PREFACE	xi	
ACKNOWLEDGMENTS	xvi	
Part 1	Introduction	1
CHAPTER 0	From the Ground Up!	3
0.1	Signals and Systems and Digital Technologies	3
0.2	Examples of Signal Processing Applications	5
0.2.1	Compact-Disc Player	5
0.2.2	Software-Defined Radio and Cognitive Radio	6
0.2.3	Computer-Controlled Systems	8
0.3	Analog or Discrete?	9
0.3.1	Continuous-Time and Discrete-Time Representations	10
0.3.2	Derivatives and Finite Differences	12
0.3.3	Integrals and Summations	13
0.3.4	Differential and Difference Equations	16
0.4	Complex or Real?	20
0.4.1	Complex Numbers and Vectors	20
0.4.2	Functions of a Complex Variable	23
0.4.3	Phasors and Sinusoidal Steady State	24
0.4.4	Phasor Connection	26
0.5	Soft Introduction to MATLAB	29
0.5.1	Numerical Computations	30
0.5.2	Symbolic Computations	43
	Problems	53
Part 2	Theory and Application of Continuous-Time Signals and Systems	63
CHAPTER 1	Continuous-Time Signals	65
1.1	Introduction	65
1.2	Classification of Time-Dependent Signals	66

1.3	Continuous-Time Signals	67
1.3.1	Basic Signal Operations—Time Shifting and Reversal	71
1.3.2	Even and Odd Signals	75
1.3.3	Periodic and Aperiodic Signals	77
1.3.4	Finite-Energy and Finite Power Signals	79
1.4	Representation Using Basic Signals	85
1.4.1	Complex Exponentials	85
1.4.2	Unit-Step, Unit-Impulse, and Ramp Signals	88
1.4.3	Special Signals—the Sampling Signal and the Sinc	100
1.4.4	Basic Signal Operations—Time Scaling, Frequency Shifting, and Windowing	102
1.4.5	Generic Representation of Signals	105
1.5	What Have We Accomplished? Where Do We Go from Here?	106
	Problems	108
CHAPTER 2	Continuous-Time Systems	117
2.1	Introduction	117
2.2	System Concept	118
2.2.1	System Classification	118
2.3	LTI Continuous-Time Systems	119
2.3.1	Linearity	120
2.3.2	Time Invariance	125
2.3.3	Representation of Systems by Differential Equations	130
2.3.4	Application of Superposition and Time Invariance	135
2.3.5	Convolution Integral	136
2.3.6	Causality	143
2.3.7	Graphical Computation of Convolution Integral	145
2.3.8	Interconnection of Systems—Block Diagrams	147
2.3.9	Bounded-Input Bounded-Output Stability	153
2.4	What Have We Accomplished? Where Do We Go from Here?	156
	Problems	157
CHAPTER 3	The Laplace Transform	165
3.1	Introduction	165
3.2	The Two-Sided Laplace Transform	166
3.2.1	Eigenfunctions of LTI Systems	167
3.2.2	Poles and Zeros and Region of Convergence	172
3.3	The One-Sided Laplace Transform	176
3.3.1	Linearity	185
3.3.2	Differentiation	188
3.3.3	Integration	193
3.3.4	Time Shifting	194
3.3.5	Convolution Integral	196

3.4	Inverse Laplace Transform	197
3.4.1	Inverse of One-Sided Laplace Transforms	197
3.4.2	Inverse of Functions Containing $e^{-\rho s}$ Terms	209
3.4.3	Inverse of Two-Sided Laplace Transforms	212
3.5	Analysis of LTI Systems	214
3.5.1	LTI Systems Represented by Ordinary Differential Equations	214
3.5.2	Computation of the Convolution Integral	221
3.6	What Have We Accomplished? Where Do We Go from Here?	226
	Problems	226
CHAPTER 4	Frequency Analysis: The Fourier Series	237
4.1	Introduction	237
4.2	Eigenfunctions Revisited	238
4.3	Complex Exponential Fourier Series	245
4.4	Line Spectra	248
4.4.1	Parseval's Theorem—Power Distribution over Frequency	248
4.4.2	Symmetry of Line Spectra	250
4.5	Trigonometric Fourier Series	251
4.6	Fourier Coefficients from Laplace	255
4.7	Convergence of the Fourier Series	265
4.8	Time and Frequency Shifting	270
4.9	Response of LTI Systems to Periodic Signals	273
4.9.1	Sinusoidal Steady State	274
4.9.2	Filtering of Periodic Signals	276
4.10	Other Properties of the Fourier Series	279
4.10.1	Reflection and Even and Odd Periodic Signals	279
4.10.2	Linearity of Fourier Series—Addition of Periodic Signals	282
4.10.3	Multiplication of Periodic Signals	284
4.10.4	Derivatives and Integrals of Periodic Signals	285
4.11	What Have We Accomplished? Where Do We Go from Here?	289
	Problems	290
CHAPTER 5	Frequency Analysis: The Fourier Transform	299
5.1	Introduction	299
5.2	From the Fourier Series to the Fourier Transform	300
5.3	Existence of the Fourier Transform	302
5.4	Fourier Transforms from the Laplace Transform	302
5.5	Linearity, Inverse Proportionality, and Duality	304
5.5.1	Linearity	304
5.5.2	Inverse Proportionality of Time and Frequency	305
5.5.3	Duality	310

5.6	Spectral Representation	313
5.6.1	Signal Modulation	313
5.6.2	Fourier Transform of Periodic Signals	317
5.6.3	Parseval's Energy Conservation	320
5.6.4	Symmetry of Spectral Representations	322
5.7	Convolution and Filtering	327
5.7.1	Basics of Filtering	329
5.7.2	Ideal Filters	332
5.7.3	Frequency Response from Poles and Zeros	337
5.7.4	Spectrum Analyzer	341
5.8	Additional Properties	344
5.8.1	Time Shifting	344
5.8.2	Differentiation and Integration	346
5.9	What Have We Accomplished? What Is Next?	350
	Problems	350
CHAPTER 6	Application to Control and Communications	359
6.1	Introduction	359
6.2	System Connections and Block Diagrams	360
6.3	Application to Classic Control	363
6.3.1	Stability and Stabilization	369
6.3.2	Transient Analysis of First- and Second-Order Control Systems	371
6.4	Application to Communications	377
6.4.1	AM with Suppressed Carrier	379
6.4.2	Commercial AM	380
6.4.3	AM Single Sideband	382
6.4.4	Quadrature AM and Frequency-Division Multiplexing	383
6.4.5	Angle Modulation	385
6.5	Analog Filtering	390
6.5.1	Filtering Basics	390
6.5.2	Butterworth Low-Pass Filter Design	393
6.5.3	Chebyshev Low-Pass Filter Design	396
6.5.4	Frequency Transformations	402
6.5.5	Filter Design with MATLAB	405
6.6	What Have We Accomplished? What Is Next?	409
	Problems	409
Part 3	Theory and Application of Discrete-Time Signals and Systems	417
CHAPTER 7	Sampling Theory	419
7.1	Introduction	419

7.2	Uniform Sampling	420
7.2.1	Pulse Amplitude Modulation	420
7.2.2	Ideal Impulse Sampling	421
7.2.3	Reconstruction of the Original Continuous-Time Signal	428
7.2.4	Signal Reconstruction from Sinc Interpolation	432
7.2.5	Sampling Simulation with MATLAB	433
7.3	The Nyquist-Shannon Sampling Theorem	437
7.3.1	Sampling of Modulated Signals	438
7.4	Practical Aspects of Sampling	439
7.4.1	Sample-and-Hold Sampling	439
7.4.2	Quantization and Coding	441
7.4.3	Sampling, Quantizing, and Coding with MATLAB	444
7.5	What Have We Accomplished? Where Do We Go from Here?	446
	Problems	447

CHAPTER 8	Discrete-Time Signals and Systems	451
8.1	Introduction	451
8.2	Discrete-Time Signals	452
8.2.1	Periodic and Aperiodic Signals	454
8.2.2	Finite-Energy and Finite-Power Discrete-Time Signals	458
8.2.3	Even and Odd Signals	461
8.2.4	Basic Discrete-Time Signals	465
8.3	Discrete-Time Systems	478
8.3.1	Recursive and Nonrecursive Discrete-Time Systems	481
8.3.2	Discrete-Time Systems Represented by Difference Equations	486
8.3.3	The Convolution Sum	487
8.3.4	Linear and Nonlinear Filtering with MATLAB	494
8.3.5	Causality and Stability of Discrete-Time Systems	497
8.4	What Have We Accomplished? Where Do We Go from Here?	502
	Problems	502

CHAPTER 9	The Z-Transform	511
9.1	Introduction	511
9.2	Laplace Transform of Sampled Signals	512
9.3	Two-Sided Z-Transform	515
9.3.1	Region of Convergence	516
9.4	One-Sided Z-Transform	521
9.4.1	Computing the Z-Transform with Symbolic MATLAB	522
9.4.2	Signal Behavior and Poles	522
9.4.3	Convolution Sum and Transfer Function	526

9.4.4	Interconnection of Discrete-Time Systems.....	537
9.4.5	Initial and Final Value Properties	539
9.5	One-Sided Z-Transform Inverse	542
9.5.1	Long-Division Method	542
9.5.2	Partial Fraction Expansion	544
9.5.3	Inverse Z-Transform with MATLAB.....	547
9.5.4	Solution of Difference Equations	550
9.5.5	Inverse of Two-Sided Z-Transforms	561
9.6	What Have We Accomplished? Where Do We Go from Here?.....	564
	Problems.....	564
CHAPTER 10	Fourier Analysis of Discrete-Time Signals and Systems.....	571
10.1	Introduction	571
10.2	Discrete-Time Fourier Transform	572
10.2.1	Sampling, Z-Transform, Eigenfunctions, and the DTFT	573
10.2.2	Duality in Time and Frequency	575
10.2.3	Computation of the DTFT Using MATLAB	577
10.2.4	Time and Frequency Supports	580
10.2.5	Parseval's Energy Result.....	585
10.2.6	Time and Frequency Shifts.....	587
10.2.7	Symmetry	589
10.2.8	Convolution Sum	595
10.3	Fourier Series of Discrete-Time Periodic Signals.....	596
10.3.1	Complex Exponential Discrete Fourier Series	599
10.3.2	Connection with the Z-Transform	601
10.3.3	DTFT of Periodic Signals	602
10.3.4	Response of LTI Systems to Periodic Signals	604
10.3.5	Circular Shifting and Periodic Convolution	607
10.4	Discrete Fourier Transform	614
10.4.1	DFT of Periodic Discrete-Time Signals	614
10.4.2	DFT of Aperiodic Discrete-Time Signals.....	616
10.4.3	Computation of the DFT via the FFT	617
10.4.4	Linear and Circular Convolution Sums	622
10.5	What Have We Accomplished? Where Do We Go from Here?.....	628
	Problems.....	629
CHAPTER 11	Introduction to the Design of Discrete Filters	639
11.1	Introduction	639
11.2	Frequency-Selective Discrete Filters.....	641
11.2.1	Linear Phase	641
11.2.2	IIR and FIR Discrete Filters	643

11.3	Filter Specifications	648
11.3.1	Frequency-Domain Specifications	648
11.3.2	Time-Domain Specifications	652
11.4	IIR Filter Design.....	653
11.4.1	Transformation Design of IIR Discrete Filters	654
11.4.2	Design of Butterworth Low-Pass Discrete Filters	658
11.4.3	Design of Chebyshev Low-Pass Discrete Filters	666
11.4.4	Rational Frequency Transformations	672
11.4.5	General IIR Filter Design with MATLAB	677
11.5	FIR Filter Design	679
11.5.1	Window Design Method	681
11.5.2	Window Functions	683
11.6	Realization of Discrete Filters	689
11.6.1	Realization of IIR Filters	690
11.6.2	Realization of FIR Filters	699
11.7	What Have We Accomplished? Where Do We Go from Here?.....	701
	Problems.....	701
CHAPTER 12	Applications of Discrete-Time Signals and Systems.....	709
12.1	Introduction	709
12.2	Application to Digital Signal Processing.....	710
12.2.1	Fast Fourier Transform	711
12.2.2	Computation of the Inverse DFT	715
12.2.3	General Approach of FFT Algorithms	716
12.3	Application to Sampled-Data and Digital Control Systems.....	722
12.3.1	Open-Loop Sampled-Data System	724
12.3.2	Closed-Loop Sampled-Data System	726
12.4	Application to Digital Communications	729
12.4.1	Pulse Code Modulation.....	730
12.4.2	Time-Division Multiplexing	733
12.4.3	Spread Spectrum and Orthogonal Frequency-Division Multiplexing.....	735
12.5	What Have We Accomplished? Where Do We Go from Here?.....	742
APPENDIX	Useful Formulas.....	743
