# *Process Control*

A Practical Approach

.....

 WILEY

# Contents

<i>Preface</i>	ix
<i>About the Author</i>	xv
<b>1. Introduction</b>	<b>1</b>
<b>2. Process Dynamics</b>	<b>3</b>
2.1 Definition	3
2.2 Cascade Control	9
2.3 Model Identification	11
2.4 Integrating Processes	20
2.5 Other Types of Process	22
2.6 Robustness	24
2.7 Laplace Transforms for Processes	27
References	28
<b>3. PID Algorithm</b>	<b>29</b>
3.1 Definitions	29
3.2 Proportional Action	30
3.3 Integral Action	33
3.4 Derivative Action	35
3.5 Versions of Control Algorithm	39
3.6 Interactive PID Controller	41
3.7 Proportional-on-PV Controller	43
3.8 Nonstandard Algorithms	50
3.9 Tuning	51
3.10 Ziegler-Nichols Tuning Method	52
3.11 Cohen-Coon Tuning Method	56
3.12 Tuning Based on Penalty Functions	57
3.13 Manipulated Variable Overshoot	60
3.14 Lambda Tuning Method	61
3.15 IMC Tuning Method	63
3.16 Choice of Tuning Method	65
3.17 Suggested Tuning Method for Self-Regulating Processes	66
3.18 Tuning for Load Changes	66
3.19 Tuning for Unconstrained MV Overshoot	71
3.20 PI Tuning Compared to PID Tuning	72
3.21 Tuning for Large Scan Interval	74
3.22 Suggested Tuning Method for Integrating Processes	76

3.23	Implementation of Tuning	78
3.24	Loop Gain	79
3.25	Adaptive Tuning	79
3.26	Initialisation	80
3.27	Anti-Reset Windup	81
3.28	On-Off Control	81
3.29	Laplace Transforms for Controllers	83
3.30	Direct Synthesis	85
	References	88
<b>4.</b>	<b>Level Control</b>	<b>91</b>
4.1	Use of Cascade Control	91
4.2	Parameters Required for Tuning Calculations	93
4.3	Tight Level Control	97
4.4	Averaging Level Control	100
4.5	Error-Squared Controller	105
4.6	Gap Controller	108
4.7	Impact of Noise on Averaging Control	111
4.8	General Approach to Tuning	113
4.9	Three-Element Level Control	114
<b>5.</b>	<b>Signal Conditioning</b>	<b>117</b>
5.1	Instrument Linearisation	117
5.2	Process Linearisation	119
5.3	Constraint Conditioning	122
5.4	Pressure Compensation of Distillation Tray Temperature	124
5.5	Pressure Compensation of Gas Flow Measurement	125
5.6	Filtering	126
5.7	Exponential Filter	127
5.8	Higher Order Filters	129
5.9	Nonlinear Exponential Filter	130
5.10	Averaging Filter	131
5.11	Least Squares Filter	132
5.12	Control Valve Characterisation	136
5.13	Equal Percentage Valve	137
5.14	Split-Range Valves	140
<b>6.</b>	<b>Feedforward Control</b>	<b>147</b>
6.1	Ratio Algorithm	147
6.2	Bias Algorithm	151
6.3	Deadtime and Lead-Lag Algorithms	152
6.4	Tuning	155
6.5	Laplace Derivation of Dynamic Compensation	161
<b>7.</b>	<b>Deadtime Compensation</b>	<b>163</b>
7.1	Smith Predictor	163

7.2	Internal Model Control	166
7.3	Dahlin Algorithm	167
	References	168
<b>8.</b>	<b>Multivariable Control</b>	<b>169</b>
8.1	Constraint Control	169
8.2	SISO Constraint Control	170
8.3	Signal Selectors	171
8.4	Relative Gain Analysis	174
8.5	Steady State Decoupling	177
8.6	Dynamic Decoupling	180
8.7	MVC Principles	184
8.8	Parallel Coordinates	187
8.9	Enhanced Operator Displays	188
8.10	MVC Performance Monitoring	189
	References	195
<b>9.</b>	<b>Inferentials and Analysers</b>	<b>197</b>
9.1	Inferential Properties	197
9.2	Assessing Accuracy	203
9.3	Laboratory Update of Inferential	208
9.4	Analyser Update of Inferential	210
9.5	Monitoring On-stream Analysers	212
	Reference	214
<b>10.</b>	<b>Combustion Control</b>	<b>215</b>
10.1	Fuel Gas Flow Correction	215
10.2	Measuring NHV	220
10.3	Dual Firing	222
10.4	Inlet Temperature Feedforward	223
10.5	Fuel Pressure Control	225
10.6	Combustion Air Control	227
10.7	Boiler Control	236
10.8	Fired Heater Pass Balancing	237
<b>11.</b>	<b>Compressor Control</b>	<b>243</b>
11.1	Polytropic Head	243
11.2	Flow Control (Turbo-Machines)	246
11.3	Flow Control (Reciprocating Machines)	251
11.4	Anti-Surge Control	252
<b>12.</b>	<b>Distillation Control</b>	<b>259</b>
12.1	Key Components	262
12.2	Relative Volatility	263
12.3	McCabe-Thiele Diagram	266
12.4	Cut and Separation	271

12.5	Effect of Process Design	281
12.6	Basic Controls	285
12.7	Pressure Control	285
12.8	Level Control	299
12.9	Tray Temperature Control	315
12.10	Pressure Compensated Temperature	325
12.11	Inferentials	335
12.12	First-Principle Inferentials	342
12.13	Feedforward on Feed Rate	344
12.14	Feed Composition Feedforward	348
12.15	Feed Enthalpy Feedforward	349
12.16	Decoupling	350
12.17	Multivariable Control	352
12.18	On-stream Analysers	360
12.19	Towers with Sidestreams	361
12.20	Column Optimisation	364
12.21	Optimisation of Column Pressure	366
12.22	Energy/Yield Optimisation	368
	References	370
<b>13.</b>	<b>APC Project Execution</b>	<b>371</b>
13.1	Benefits Study	371
13.2	Benefit Estimation for Improved Regulatory Control	373
13.3	Benefits of Closed-Loop Real-Time Optimisation	380
13.4	Basic Controls	382
13.5	Inferentials	384
13.6	Organisation	385
13.7	Vendor Selection	389
13.8	Safety in APC Design	391
13.9	Alarms	392
	References	393
