CONTENTS

PREFACE xiii

NOTATION xv

1 MAIN RESULTS AND DEVELOPMENT LINES IN HYDRO-AEROMECHANICS OF DRILLING PROCESSES 1

2 BASIC PROBLEMS OF HYDRO-AEROMECHANICS IN DRILLING PROCESSES 4

3 MULTIPHASE MEDIA IN DRILLING PROCESSES 8

4 HYDRO-AEROMECHANIC EQUATIONS OF DRILLING PROCESSES 16

4.1 Mass Conservation Equation 16
4.2 Momentum (Motion) Equation 18
4.3 Thermodynamic Equations of State 27
4.4 Rheological Equations of State 29
4.5 Equation of Concentrations 37
4.6 Formulation of Hydro-Aeromechanical Problems for Drilling Processes 37

4.6.1 Axial Flows in Pipes and Annulus 37
4.6.2 Flows Caused by Rotation of Pipes and Walls of Annulus 39
4.6.3 Radial Flow in Circular Slot 39
4.6.4 Flows in Pipes and Annulus 41
4.6.5 Flow in Circular Slot 44

5 HYDROSTATICS OF SINGLE-PHASE FLUIDS AND TWO-PHASE MIXTURES IN GRAVITY FIELD 47

5.1 Hydrostatics of Single-Phase Fluids 47
5.2 Hydrostatics of Incompressible Fluid at $\tau_w = 0$ 48
5.3 Hydrostatics of Single-Phase Compressible Fluid (Gas) at $\tau_w = 0$ 50
5.4 Hydrostatics of Slightly Compressible Fluid at $\tau_w = 0$ 51
5.5 Hydrostatics of a Fluid with Dynamic Shear Stress ($\tau_0 \neq 0$) 52
5.6 Hydrostatics of Two-Phase Fluids 57

6 STATIONARY FLOW OF FLUIDS IN ELEMENTS OF THE WELL CIRCULATION SYSTEM 67

6.1 Equations for Stationary Flows of Homogeneous Incompressible Fluids 67
6.1.1 Flows in Pipes and Annular Channels ($w_z = w \neq 0$) 67
6.1.2 Flows in Rotation of Pipes and Annulus Walls ($w_\varphi = w \neq 0$) 68
6.1.3 Radial Flow in a Circular Slot ($w_r = w \neq 0$) 69
6.2 Calculation of Pressure in Laminar Flows of Viscous Incompressible Fluids in Circular Slots, Pipes, and Annular Channels 69
6.2.1 Flow in a Circular Slot 69
6.2.2 Flows in Pipes and Annular Channels 74
6.3 Calculation of Pressure in Laminar Flows of Viscous-Plastic Fluids in Circular Slots, Pipes, and Annular Channels 77
6.3.1 Flows in a Circular Slot 77
6.3.2 Flows in Pipes 81
6.3.3 Flows in Annular Concentric Channels 85

6.4 Calculation of Pressure in Laminar Flows of Power Incompressible Fluids in Slots, Pipes, and Annular Channels 91
6.4.1 Circular Slot 91
6.4.2 Flow of Power Fluid in Pipes 94
6.4.3 Flow in Annular Channels 97
6.5 Calculation of Pressure in Turbulent Flows in Pipes and Annular Channels 101
6.5.1 Turbulent Flow in Annular Channel 111
6.5.2 Turbulent Flow of Viscous-Plastic Fluid in Pipes 115
6.6 Transition of Laminar Flow of Viscous, Viscous-Plastic, and Power Fluids into Turbulent One 117
6.7 Calculation of Pressure in Flows in Eccentric Annulus: Formation of Stagnation Zones 121
6.8 Effect of Internal Pipe Rotation on Pressure in Annulus 134
6.9 Pressure Drop in Local Resistances of Circulation System 139

EQUILIBRIUM AND MOTION OF RIGID PARTICLES IN FLUID, GAS, AND GAS–LIQUID MIXTURE 149

7.1 Washing of the Well Bottom 149
7.2 Levitation of Rigid Particles in Fluid, Gas, and Gas–Liquid Mixture Flows 153
7.2.1 Flow Around a Particle of Cutting Near the Wall 164
7.2.2 Graphical Illustration of Non-Newtonian Fluid Flow Regimes Around Particles 169
7.3 Flow Rates of Fluid, Gas, and Gas–Liquid Mixture Needed for Removal of Cutting from Well Bore 169
7.4 Calculation of Ball Drop Time in Descending Flow of Washing Fluid in a Column of Pipes 171
7.5 Hydraulic Calculation of Circular System in Drilling with Incompressible Fluid Washing 173
7.5.1 Determination of Fluid Flow Rate Providing Washing of the Well Bottom and Cutting Transport in Annulus 173

7.5.2 Selection of Pump Cylindrical Bushing Diameter 174
7.5.3 Selection of Washing Fluid Density 174
7.5.4 Selection of the Downhole Motor 176
7.5.5 Calculation of Pressure Losses in Elements of Circulation System 177
7.5.6 Determination of Pressure Loss in a Drill Bit: Selection of Hydro-Monitor Head 180
7.5.7 Main Formulas to Calculate Pressure at the Mouth of Drilling Pipe, at the Juncture of Circulation System Elements, and Bottom Hole 181
7.5.8 Construction of Pressure Chart 183
7.5.9 An Example of Hydraulic Calculation of Well Washing 183

8 STATIONARY FLOW OF GAS AND GAS-CUTTING MIXTURE IN ELEMENTS OF WELL CIRCULATION SYSTEM 195

8.1 Pressure Distribution in Ascending Flow of Gas and Gas-Cutting Mixture in Annular Channel of a Well 195
8.2 Pressure Distribution in Descending Flow of Gas in Pipes 198
8.3 Pressure Losses in Bit Heads and Pipe Joints 199
8.4 Calculation Procedure of Pump Capacity and Compressor Pressure in Drilling with Blasting 202

9 STATIONARY FLOWS OF GAS–LIQUID MIXTURES IN A WELL 209

9.1 Equations of Gas–Liquid Mixture Flow 211
9.2 Laminar Ascending Flow of Gas–Liquid Mixtures in Pipes and Annular Channels 212
9.3 Calculation of Pressure in Pipes and Annular Space in Ascending Vertical Turbulent Flows of Gas–Liquid Mixtures 215

9.4 Pressure Drop in Bit Heads in Flow of Gas–Liquid Mixture 218
9.5 Pressure Drop in Turbo-Drills 219
9.6 Calculation of Pressure in Pipes in Descending Vertical Turbulent Flow of Gas–Liquid Mixture 220
9.7 Method of Calculation of Delivery and Pressure of Pumps and Compressors in Drilling with Aerated Fluid Washing 222
9.8 Effect of Gas Solubility in Fluid on Pressure of Mixture in Well 234

10 NONSTATIONARY FLOWS OF SINGLE-PHASE FLUIDS IN A WELL 240

10.1 Equations of Nonstationary Single-Phase Flows 240
10.2 Nonstationary Flows of Incompressible Fluid in Round Trip Operations 243
10.3 Hydrodynamic Pressure in Round Trip Operation in a Well Filled by Viscous Fluid 247
10.4 Hydrodynamic Pressure Generating in Drill-Stem Descent in a Well Filled by Viscous-Plastic Fluid 257
10.5 Examples of Pressure Calculation in Round Trip Operations 260
10.6 Nonstationary Fluid Flow in a Well as Wave Process 266
10.7 Pressure Calculation in Deterioration of the Safety Bypass 270
10.8 Calculation of Pressure in Recovery of Circulation in a Well 276
10.9 Calculation of Pressure in a Well in Setting of a Ball Cage on a Seat (Thrust Ring) in Drill-Stem 280
10.10 Calculation of Pressure in Round Trip of Drill-Stem as Wave Process 285

11 FLOWS OF FORMATION FLUIDS AND ROCK SOLIDS 289

11.1 Basic Equations of Formation Fluid and Rock Solid Flows 289

11.2 Stationary Laminar Flows of Incompressible and Compressible Fluids and Gases 291
11.3 Nonstationary Laminar Flows of Incompressible and Compressible Fluids and Gases 293
11.4 Flows of Formation Fluids and Rock Solids in Regimes Different from Laminar 307

12 NONSTATIONARY FLOWS OF GAS–LIQUID MIXTURES IN WELL-FORMATION SYSTEM 315

12.1 Estimation of Bottom-Hole Decompression in Removal of Gas Bench From a Well 316
12.2 Recognition of the Gas Outburst and Selection of Regimes of Its Liquidation 321
12.3 Calculation of Amount, Density, and Delivery of Fluid Needed to Kill Open Gas Blowout 329
12.4 Calculation of Pressure at the Well Mouth in Blowout Killing by Direct Pumping of Killing Fluid in the Well 336

13 NONSTATIONARY FLOWS OF FLUID MIXTURES IN WELL-FORMATION SYSTEM: CALCULATION OF FLUID-GAS BLOWOUT KILLING 339

14 DISTRIBUTION OF CONCENTRATION AND PRESSURE IN DISPLACEMENT OF NEWTONIAN AND VISCOUS-PLASTIC FLUIDS FROM CIRCULAR PIPES AND ANNULAR CHANNELS: HYDRAULIC CALCULATION OF CEMENTATION REGIME 347

14.1 Main Reasons of Incomplete Displacement of Fluids 347
14.2 Distribution of Concentrations in Displacement of One Fluid by Another Fluid 350
14.3 Taking into Account Needed Displacement Completeness in Calculation of Cementing 358
14.4 Method of Hydraulic Calculation of Cementation Regimes with Regard to Given Concentration in Channel Cross Section 359
14.5 Calculation of Single-Stage Well Cementation: Method and Calculation of Cementation with Foam–Cement Slurry 380

14.5.1 Calculation of Cementing Parameters 381
14.5.2 Selection and Calculation of Cement Slurry Composition 395

15 SEDIMENTATION OF RIGID PHASE IN DRILLING FLUID AFTER DEADLOCK OF MIXING 401

15.1 One-Dimensional Equation for Hydraulic Pressure in Sedimentation of Rigid Phase of Suspension 402
15.2 Lowering of Hydraulic Pressure in a Well After Deadlock of Solution Circulation 405

16 EXPERIMENTAL DETERMINATION OF RHEOLOGICAL CHARACTERISTICS 408

16.1 Determination of Rheological Characteristics with Rotary Viscometer 409
16.2 Determination of Rheological Characteristics with Capillary Viscometer 411
16.3 Determination of Rheological Characteristics of Rock Solids 415
16.4 Examples of Applications of Rheological Characteristics 417
