# Power Generation from Solid Fuels

Springer

# Contents

|   |    |
|---|----|
| <b>1 Motivation</b> .....   | 1  |
| 1.1 Primary Energy Consumption and CO <sub>2</sub> Emissions .....              | 1  |
| 1.1.1 Development of Primary Energy Consumption<br>in the Past 40 Years .....   | 1  |
| 1.1.2 Developments Until 2030 .....   | 1  |
| 1.2 Greenhouse Effect and Impacts on the Climate .....                          | 5  |
| 1.2.1 Greenhouse Effect .....   | 6  |
| 1.2.2 Impacts .....   | 8  |
| 1.2.3 Scenarios of the World Climate .....                                      | 8  |
| 1.3 Strategies of CO <sub>2</sub> Reduction .....                               | 10 |
| 1.3.1 Substitution .....  | 10 |
| 1.3.2 Carbon Capture and Storage (CCS) .....                                    | 11 |
| 1.3.3 Energy Saving .....   | 12 |
| 1.3.4 Mitigation Scenarios .....  | 12 |
| References .....  | 13 |
| <br>  |    |
| <b>2 Solid Fuels</b> .....  | 15 |
| 2.1 Fossil Fuels .....  | 15 |
| 2.1.1 Origin and Classification of Coal Types .....                             | 15 |
| 2.1.2 Composition and Properties of Solid Fuels .....                           | 16 |
| 2.1.3 Reserves of Solid Fuels .....   | 25 |
| 2.2 Renewable Solid Fuels .....   | 29 |
| 2.2.1 Potential and Current Utilisation .....                                   | 29 |
| 2.2.2 Considerations of the CO <sub>2</sub> Neutrality of Regenerative Fuels .. | 40 |
| 2.2.3 Fuel Characteristics of Biomass .....                                     | 42 |
| References .....  | 54 |
| <br>  |    |
| <b>3 Thermodynamics Fundamentals</b> .....                                      | 57 |
| 3.1 Cycles .....  | 57 |
| 3.1.1 Carnot Cycle .....  | 57 |
| 3.1.2 Joule–Thomson Process .....   | 58 |
| 3.1.3 Clausius–Rankine Cycle .....  | 61 |

|          |   |           |
|----------|---|-----------|
| 3.2      | Steam Power Cycle: Energy and Exergy Considerations .....   | 64        |
| 3.2.1    | Steam Generator Energy and Exergy Efficiencies .....  | 67        |
| 3.2.2    | Energy and Exergy Cycle Efficiencies .....  | 69        |
| 3.2.3    | Energy and Exergy Efficiency of the Total Cycle .....   | 70        |
|          | References .....  | 71        |
| <b>4</b> | <b>Steam Power Stations for Electricity and Heat Generation .....</b>                                     | <b>73</b> |
| 4.1      | Pulverised Hard Coal Fired Steam Power Plants .....   | 73        |
| 4.1.1    | Energy Conversion and System Components .....   | 73        |
| 4.1.2    | Design of a Condensation Power Plant .....  | 75        |
| 4.1.3    | Development History of Power Plants – Correlation<br>Between Unit Size, Availability and Efficiency ..... | 77        |
| 4.1.4    | Reference Power Plant .....   | 81        |
| 4.2      | Steam Generators .....  | 81        |
| 4.2.1    | Flow and Heat Transfer Inside a Tube .....  | 83        |
| 4.2.2    | Evaporator Configurations .....   | 87        |
| 4.2.3    | Steam Generator Construction Types .....  | 93        |
| 4.2.4    | Operating Regimes and Control Modes .....   | 95        |
| 4.3      | Design of a Condensation Power Plant .....  | 104       |
| 4.3.1    | Requirements and Boundary Conditions .....  | 104       |
| 4.3.2    | Thermodynamic Design of the Power Plant Cycle .....   | 110       |
| 4.3.3    | Heat Balance of the Boiler and Boiler Efficiency .....  | 114       |
| 4.3.4    | Design of the Furnace .....   | 115       |
| 4.3.5    | Design of the Steam Generator and of the Heating<br>Surfaces .....  | 121       |
| 4.3.6    | Design of the Flue Gas Cleaning Units and the<br>Auxiliaries .....  | 141       |
| 4.4      | Possibilities for Efficiency Increases in the Development of a Steam<br>Power Plant .....                 | 141       |
| 4.4.1    | Increases in Thermal Efficiencies .....   | 142       |
| 4.4.2    | Reduction of Losses .....   | 161       |
| 4.4.3    | Reduction of the Auxiliary Power Requirements .....   | 172       |
| 4.4.4    | Losses in Part-Load Operation .....   | 175       |
| 4.4.5    | Losses During Start-Up and Shutdown .....   | 178       |
| 4.4.6    | Efficiency of Power Plants During Operation .....   | 179       |
| 4.4.7    | Fuel Drying for Brown Coal .....  | 179       |
| 4.5      | Effects on Steam Generator Construction .....   | 184       |
| 4.5.1    | Membrane Wall .....   | 186       |
| 4.5.2    | Heating Surfaces of the Final Superheater .....   | 194       |
| 4.5.3    | High-Pressure Outlet Header .....   | 201       |
| 4.5.4    | Furnaces Fuelled by Dried Brown Coal .....  | 204       |
| 4.6      | Developments – State of the Art and Future .....  | 206       |
| 4.6.1    | Hard Coal .....   | 206       |
| 4.6.2    | Brown Coal .....  | 214       |
|          | References .....  | 214       |
