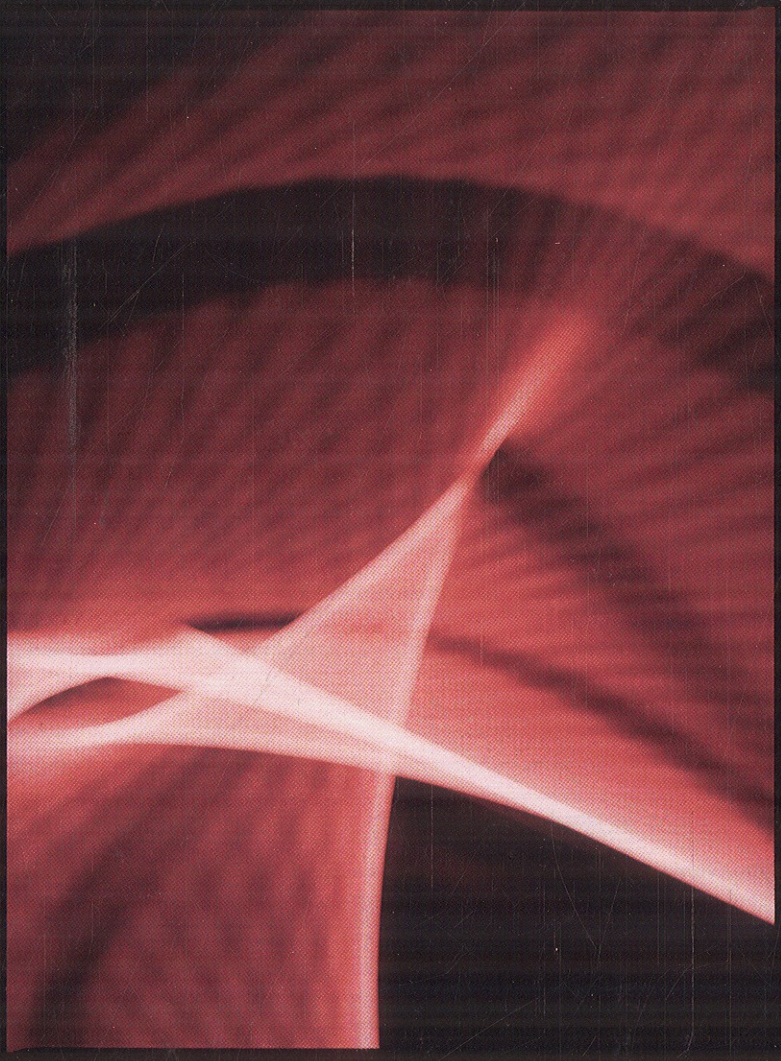
THE INSTRUCTIONAL DESIGN KNOWLEDGE BASE

THEORY, RESEARCH, AND PRACTICE



RITA C. RICHEY, JAMES D. KLEIN,
AND MONICA W. TRACEY

ROUTLEDGE

CONTENTS

List of Tables xiv

List of Figures xvi

Preface xvii

Acknowledgments xx

Chapter 1 The Dimensions of an Instructional Design Knowledge Base 1
Instructional Design: An Overview 2
The Definition of Instructional Design 2
The Scope of Instructional Design 3
The Characteristics of a Knowledge Base 4
The Nature of Disciplinary Knowledge 4
The Components of a Knowledge Base 4
Alternative Views of Knowledge 5
The Nature of Theory 6
Types of Theory 6
Functions of Theory 7
The Nature of Models 8
Foundations of the Instructional Design Knowledge Base 9

Chapter 2 General Systems Theory 11
The Nature of General Systems Theory 11
Definitions and Types of Systems 11
The Environment of a System 12
The Structure of a System 13
The Adjusting Properties of a System 14
The Philosophical Orientations of General Systems Theory 15
General Systems Theory and Instructional Design 16

	The Systems Approach	17
	Instructional Systems Design Models	19
	Trends in Systematic Instructional Design	23
	New Approaches to Analysis	23
	Analyzing Problems	24
	Analyzing Context	24
	Analyzing Learner Characteristics	25
	New Approaches to Synthesis	26
	Rapid Prototyping	26
	Learning Objects	27
	Research, General Systems Theory, and Instructional Design	28
	Empirical Support of General Systems Theory Applications in Instructional Design	28
	Recommendations for Research on Systemic Instructional Design	28
	Summary	29
Chapter 3	Communication Theory	31
	Alternative Views of Communication	31
	The Transmission Emphasis	32
	The Behavioral Emphasis	34
	The Interactive Emphasis	35
	The Transaction Emphasis	36
	The Philosophical Orientations of Communications Theory	38
	Empiricism, Rationalism, and Communication	38
	Humanism, Constructivism, and Communication	39
	Communication Theory and Instructional Design	40
	The Role of Language	41
	Written Language	41
	Visual Language	41
	The Role of the Communication Channel	42
	Single- and Multiple-Channel Communication	42
	Information Load	43
	The Attention-Getting Properties of Messages	43
	Cueing Techniques	44
	Content-Generated Attention	44
	Trends in Communication-Related Instructional Design	45
	Designing Mediated Communication	45
	Online Communication	45
	The Split Attention Dilemma	46
	Learner Background and Meaning-Making	46
	The Impact of Culture	46
	The Impact of Age	47
	Research, Communications Theory, and Instructional Design	48
	Empirical Support of Communication Theory Applications in Instructional Design	48
	Recommendations for Continuing Research	49
	Summary	49

Chapter 4	Learning Theory	51
	Learning Theory and Instructional Design	51
	Behavioral Learning Theory	52
	Connectionism	52
	Classical Conditioning	53
	Operant Conditioning	53
	Instructional Design Applications of Behavioral Learning Theory	54
	Teaching Machines and Programmed Instruction	54
	Task Analysis	55
	Behavioral Objectives	55
	Practice and Feedback	55
	Behavioral Fluency	56
	Cognitive Learning Theory	56
	Gestalt Theory	56
	Information Processing Theory	57
	Schema Theory	58
	Instructional Design Applications of Cognitive Learning Theory	59
	Message Design Strategies	59
	Rehearsal	59
	Chunking	59
	Mnemonics	60
	Advance Organizers	60
	Cognitive Task Analysis	60
	Social Learning Theory	60
	The Foundations of Social Learning Theory	61
	Social Cognitive Theory	61
	Instructional Design Applications of Social Learning Theory	62
	Using Models	62
	Establishing Value and Self-Efficacy	63
	The Philosophical Orientations of Learning Theory	63
	Trends in the Applications of Learning Theory to Instructional Design	63
	Contextual Analysis	64
	First Principles of Instruction	65
	Research, Learning Theory, and Instructional Design	65
	Empirical Support of Learning Theory Applications in Instructional Design	66
	Recommendations for Continuing Research	67
	Summary	67
Chapter 5	Early Instructional Theory	70
	Instructional Antecedents of Instructional Design Theory	70
	Basic Principles of Curriculum and Instruction	71
	Mastery Learning and Individualized Instruction	72
	The Model of School Learning	72
	Human Characteristics and School Learning	73
	Early Cognitive Theory of Instruction	74

	Summary and Comparison of Early Instructional Theories	75
	The Philosophical Orientation of Early Instructional Theory	75
	Early Instructional Theory and Instructional Design	76
	The Design and Management of Instruction	76
	Instructional Objectives	77
	Analysis of Learner Characteristics	78
	Sequencing	78
	Instructional Strategy Selection	79
	Feedback	79
	Research on Early Instructional Theory	79
	Empirical Support of Early Instructional Theory	79
	Recommendations for Continuing Research	81
	Summary	82
Chapter 6	Media Theory	84
	Media and Learning	85
	Media as Conduits of Content: Representations of Reality	85
	Elements of Realism	85
	The Cone of Experience	85
	Media as Language: Elements of Structure	86
	The Role of Visuals	86
	Cue Summation and Dual Coding Theory	87
	Media as a Learning Environment: Interacting with Technology	87
	Media-Learner Interaction Effects	87
	The Role of Media in Distributed Cognition	88
	The Philosophical Orientations of Media Theory	89
	Support for Realism and Object Manipulation	89
	Support for Individual Technology Interactions	90
	Media Theory and Instructional Design	90
	Media Selection	90
	Major Elements of Media Selection Models	91
	Trends in Media Selection	93
	Media Use	95
	Automating Instruction	95
	Creating Realistic, Interactive Learning Environments	97
	Trends in Media Use	98
	Research, Media Theory, and Instructional Design	99
	Empirical Support of Media Theory Applications in Instructional Design	99
	Recommendations for Continuing Research	100
	Summary	101
Chapter 7	Conditions-Based Theory	104
	The Foundations of Conditions-Based Theory	104
	Types of Learning Outcomes	105
	The Classification of Educational Goals	105
	The Domains of Learning	106

	The Performance-Content Matrix	108
	Integrative Goals	108
	Sequencing Learning Outcomes	109
	Learning Hierarchies and the Theory of Cumulative Learning	109
	Elaboration Theory	111
	Facilitating Internal Learning Processes	112
	The Events of Instruction	112
	Component Display Theory and Instructional Transaction Theory	113
	The Philosophical Orientations of Conditions-Based Theory	115
	The Refinement of Conditions-Based Instructional Design Theory	116
	Supplantive and Generative Strategies	116
	Designing for Complex Learning	117
	A Design Theory for Problem Solving	119
	Motivational Design of Instruction	121
	Research on Conditions-Based Instructional Design Theory	123
	Empirical Support of Conditions-Based Applications in Instructional Design	123
	Recommendations for Continuing Research	126
	Summary	126
Chapter 8	Constructivist Design Theory	129
	The Nature of Constructivist Design Theory	130
	Personal Interpretation of Experience	130
	Developing Self-Knowledge	131
	Facilitating Learning	131
	Active, Realistic, and Relevant Learning	132
	Active Learning	132
	Authentic and Contextualized Learning Activities	132
	Exploration of Multiple Perspectives	133
	Rich Learning Environments	133
	Collaborative Learning Environments	133
	Constructivism and Related Philosophical Issues	134
	Applications of Constructivist Design Theory	135
	Analysis	135
	Instructional Strategies	136
	Cognitive Apprenticeships	136
	Problem-Based Learning	136
	Scaffolding	136
	Collaboration	137
	Assessment	137
	Summary	138
	Trends in Constructivist Instructional Design	139
	Emergence of Constructivist Instructional Design Models	139
	Layers of Negotiation Model	139
	Recursive, Reflective Instructional Design Model	140

Applications of Constructivist Instructional Design to Online Learning 141
Computer-Supported Collaborative Learning Environments 141
Social Network Learning Communities 142
Research on Constructivist Instructional Design 142
Empirical Support for Constructivist Strategies 142
Recommendations for Continuing Research 143
Summary 144

Chapter 9 Performance Improvement Theory 146
Theoretical Foundations of Performance Improvement 147
Models of Performance Improvement 147
A Comprehensive Performance Improvement Model 148
Performance Analysis 148
Cause Analysis 149
Intervention Selection, Design, and Development 149
Intervention, Implementation, and Change Management 151
Evaluation and Measurement 151
The Behavior Engineering Model 152
The Performance Improvement Process Model 152
Managing the White Space in Organizations—The Rummler and Brache Model 154
The Organizational Elements Model and Megaplanning 154
Evaluation Models for Performance Improvement 155
The Four-Level Model of Evaluation 155
An Integrated Model of Evaluation 156
A System for Assessing Performance Results 157
The Philosophical Orientations of Performance Improvement Theory 158
Performance Improvement and Instructional Design 158
Performance Improvement's Role in Instructional Design Competency Development 158
Expansion of Front-End Analysis 159
Strategies to Promote Transfer 160
Trends in the Application of Performance Improvement to Instructional Design 160
Improving Performance with a Range of Interventions 161
Changes in Evaluation: Focusing on Organizational Results and Continuous Improvement 162
Research, Performance Improvement Theory, and Instructional Design 163
Empirical Support for Performance Improvement Applications 163
Recommendations for Continuing Research 164
Summary 164

Chapter 10 A Taxonomy of the Instructional Design Knowledge Base 167
The Character of a Taxonomy 167
The Development of Taxonomies 167
The Purpose of Taxonomies 169
The Taxonomies of the Instructional Design Knowledge Base Domains 169
Learners and Learning Processes 170
Learning and Performance Contexts 172
Content Structure and Sequence 174
Instructional and Noninstructional Strategies 174
Media and Delivery Systems 177
Designers and Design Processes 179
Using the Instructional Design Knowledge Base Taxonomy 182
Using the Instructional Design Taxonomy to Define Practice 182
Using the Instructional Design Taxonomy as a Research Guide 182
Final Thoughts 183

Glossary 185
