Fault Tolerant Control Design for Hybrid Systems

Springer

Contents

1	Fault Tolerant Control and Hybrid Systems	1
1.1	Background	1
1.1.1	Hybrid Systems	1
1.1.2	Fault Tolerant Control	4
1.2	FTC Problems of HS	5
1.3	The Structure of the Book	8
2	Hybrid Systems with Time-Dependent Switching	11
2.1	Output-Input Stability Technique	11
2.1.1	State Feedback Control for Nonlinear System	12
2.1.2	Observer-Based FTC for Nonlinear System	15
2.1.3	FTC for Hybrid Systems	19
2.2	Overall Fault Tolerant Regulation	21
2.2.1	Fault Tolerant Regulation for Nonlinear Systems	22
2.2.2	Overall Fault Tolerant Regulation	22
2.3	Multiple Observers Method	25
2.3.1	Problem Formulation	25
2.3.2	FTC for Continuous Faults	26
2.3.3	FTC for Discrete Faults	33
2.3.4	FTC Framework	35
2.4	Global Passivity	41
2.4.1	Passivity and Fault Diagnosis	41
2.4.2	Fault Tolerance Analysis of Hybrid Systems	43
2.5	General Stability Results in HS	49
2.5.1	Preliminaries	49
2.5.2	Stabilization of Switched Systems	50
2.6	Conclusion	58

3	Hybrid Systems with State-Dependent Switching	59
3.1	Preliminaries	59
3.2	Hybrid Linear Systems	59
3.2.1	FTC for Linear Systems	60
3.2.2	FTC for Hybrid Systems	64
3.3	Hybrid Nonlinear Systems	74
3.3.1	Preliminaries	74
3.3.2	Fault Diagnosis for Nonlinear Systems	75
3.3.3	FTC for the Nonlinear System	80
3.3.4	FTC for Hybrid Nonlinear System	83
3.4	Conclusion	90
4	Hybrid Systems with Impulsive and Stochastic Switching	91
4.1	Impulsive Switching Case	91
4.1.1	Preliminaries	91
4.1.2	FTC for Single Mode	92
4.1.3	FTC for Hybrid Impulsive Systems	94
4.2	Stochastic Switching Case	100
4.2.1	Preliminaries	100
4.2.2	Fault Tolerance Analysis	101
4.3	Conclusion	112
5	Hybrid Systems with Discrete Specifications	113
5.1	Qualitative FTC Based on Finite State Machine	113
5.1.1	Problem Formulation	113
5.1.2	Qualitative Abstraction for Nonlinear System	116
5.1.3	Qualitative Abstraction of Hybrid Systems	118
5.1.4	Discrete Abstraction	120
5.1.5	Fault Tolerance	121
5.2	FTC via Hybrid Petri Nets	129
5.2.1	Model Setting	130
5.2.2	FD and Marking Estimation	133
5.2.3	FTC Design	140
5.3	Conclusion	147
6	Hybrid Control Approach in FTC Design	149
6.1	Supervisory FTC via Hybrid System Approaches	149
6.1.1	FTC via Overall Regulation	150
6.1.2	FTC via Global Dissipativity	155
6.1.3	FTC via Gain Technique	158
6.2	Hybrid Control Based FTC for Automated Vehicles	164
6.2.1	Background	164

6.2.2	Vehicle Model and Fault Setting	166
6.2.3	Hybrid FTC Scheme	169
6.2.4	Simulation Results	173
6.3	Conclusion	179
7	Conclusion and Future Research Directions	181
	References	183
	Index	191
