# PLANT SCIENCE

GROWTH, DEVELOPMENT,  
AND UTILIZATION OF CULTIVATED PLANTS

FIFTH EDITION

# brief contents

Preface vi

## unit one

### **Environmental, Cultural, and Social Factors That Influence the Cultivation and Utilization of Plants 1**

---

- 1 History, Trends, Issues, and Challenges in Plant Science 2
- 2 Terrestrial Ecosystems and Their Relationship to Cultivating Plants 17
- 3 Growing Plants for Human Use 33
- 4 Climate 45
- 5 Soils 62

## unit two

### **Plant Structure, Chemistry, Growth, Development, Genetics, Biodiversity, and Processes 77**

---

- 6 Structure of Higher Plants 78
- 7 Plant Growth and Development 110
- 8 Plant Chemistry and Metabolism 146
- 9 Genetics and Propagation 158
- 10 Cultivated Plants: Naming, Classifying, Origin, Improvement, and Germplasm Diversity and Preservation 197
- 11 Photosynthesis and Respiration 225
- 12 Water Relations 241
- 13 Mineral Nutrition 251

## unit three

### **Plant Production and Utilization of Plants 265**

---

- 14 Soil, Water, and Fertility Management 266
- 15 Integrated Management of Weeds, Insects, Diseases, and Other Pests 296
- 16 General Considerations for Production, Harvest, Postharvest Handling, and Marketing 341
- 17 Field Crops Grown for Food, Fiber, and Fuel 366
- 18 Forage Crops and Rangelands 399
- 19 Vegetable Production 416
- 20 Temperate Fruit and Nut Crops 442
- 21 Tropical and Subtropical Crop and Crop Production Systems 489
- 22 Nursery Production 517
- 23 Floriculture 528
- 24 Turfgrasses 550
- 25 Landscape Plants 579
- 26 Constructed Landscapes and Landscape Design Considerations 615

Appendix 631

Glossary 643

Index 665
