

Introduction to AutoCAD® 2011 2D and 3D Design

Autodesk®
Authorised Author

Alf Yarwood

Contents

Preface.....	xiii
--------------	------

Part 1 – 2D Design 1

Chapter 1 Introducing AutoCAD 2011 3

Aim of this chapter.....	3
Opening AutoCAD 2011.....	4
The mouse as a digitiser.....	8
Palettes.....	9
Tool palettes.....	10
Dialogs.....	11
Buttons at the left-hand end of the status bar.....	13
Buttons at the right-hand end of the status bar.....	15
The AutoCAD coordinate system.....	16
Drawing templates.....	17
Methods of showing entries in the command palette.....	20
Tools and tool icons.....	20
Another AutoCAD workspace.....	21
The Ribbon.....	23
The Quick View Drawings button.....	24
Customisation of the User Interface.....	25
Revision notes.....	26

Chapter 2 Introducing drawing 27

Aims of this chapter.....	27
The 2D Drafting & Annotation workspace.....	28
Drawing with the Line tool.....	29
Drawing with the Circle tool.....	36
The Erase tool.....	38
Undo and Redo tools.....	40
Drawing with the Polyline tool.....	41
Revision notes.....	46
Exercises.....	47

Chapter 3 Draw tools, Object Snap and Dynamic Input49

Aims of this chapter.....	49
Introduction.....	50
The Arc tool.....	51
The Ellipse tool.....	53
Saving drawings.....	54
Snap.....	56
Object Snaps (Osnaps).....	56
Dynamic Input (DYN).....	60
Notes on the use of Dynamic Input.....	61
Why use Dynamic Input?	68
Examples of using other Draw tools	69
The Polyline Edit tool	71
Transparent commands.....	74
The set variable PELLIPSE	74
Revision notes	75
Exercises.....	77

Chapter 4 Zoom, Pan and templates.....81

Aims of this chapter.....	81
Introduction.....	82
The Aerial View window.....	84
The Pan tool.....	85
Drawing templates.....	86
Adding features to the template	87
Setting text.....	87
Setting dimension style.....	88
Setting the shortcutmenu variable.....	91
Setting layers.....	91
Saving the template file	93
Template file to include Imperial dimensions.....	95
Revision notes	97
Exercises	98

Chapter 5 The Modify tools.....99

Aim of this chapter.....	99
Introduction.....	100
The Copy tool	100
The Mirror tool	102

The Offset tool.....	104
The Array tool	105
The Move tool	109
The Rotate tool	110
The Scale tool	111
The Trim tool	112
The Stretch tool.....	114
The Break tool.....	116
The Join tool.....	118
The Extend tool	119
The Fillet and Chamfer tools.....	121
Revision notes	124
Exercises.....	126

Chapter 6 Dimensions and Text 131

Aims of this chapter.....	131
Introduction.....	132
The Dimension tools.....	132
Adding dimensions using these tools	133
Adding dimensions from the command line.....	136
The Arc Length tool	141
The Jogged tool	141
Dimension tolerances	142
Text.....	144
Symbols used in text.....	147
Checking spelling.....	147
Revision notes	149
Exercises.....	150

Chapter 7 Orthographic and isometric 151

Aim of this chapter	151
Orthographic projection.....	152
An example of an orthographic projection.....	152
First angle and third angle.....	154
Isometric drawing	158
Examples of isometric drawings.....	160
Revision notes	162
Exercises.....	163

Chapter 8	Hatching.....	165
	Aim of this chapter.....	165
	Introduction.....	166
	The Hatch and Gradient dialog	169
	Revision notes.....	174
	Exercises.....	175

Chapter 9	Blocks and Inserts	177
	Aims of this chapter.....	177
	Introduction.....	178
	Blocks.....	178
	Inserting blocks into a drawing.....	179
	The Explodé tool.....	184
	Purge.....	184
	Using the DesignCenter.....	185
	Wblocks.....	187
	Revision notes.....	189
	Exercises.....	190

Chapter 10	Other types of file format.....	191
	Aims of this chapter.....	191
	Object Linking and Embedding.....	192
	DXF (data exchange format) files.....	195
	Raster images.....	197
	External references (Xrefs).....	200
	Dgnimport and Dgnexport	202
	Multiple Design Environment.....	204
	Revision notes.....	205
	Exercises.....	206

Chapter 11	Sheet sets	209
	Aims of this chapter.....	209
	Sheet sets.....	210
	Sheet set for 62 Pheasant Drive.....	210
	62 Pheasant Drive DWF.....	214
	Revision notes.....	217
	Exercises.....	218

Part 2 – 3D Design221

Chapter 12 Introducing 3D modeling..... 223

Aims of this chapter 223
Introduction..... 224
The 3D Basics workspace 224
Methods of calling tools for 3D modeling..... 224
The Polysolid tool..... 227
2D outlines suitable for 3D models..... 229
The Extrude tool..... 231
The Revolve tool 235
Other tools from the Home/Create panel 238
The Chamfer and Fillet tools..... 242
Constructing 3D surfaces using the Extrude tool..... 245
The Sweep tool..... 246
The Loft tool 248
Revision notes 250
Exercises 251

Chapter 13 3D models in viewports 257

Aim of this chapter 257
The 3D Modeling workspace 258
Setting up viewport systems 259
Revision notes 265
Exercises 266

Chapter 14 The modification of 3D models 269

Aims of this chapter 269
Creating 3D model libraries 270
Constructing a 3D model..... 273
The 3D Array tool..... 275
The 3D Mirror tool..... 278
The 3D Rotate tool..... 280
The Slice tool..... 280
Views of 3D models 282
The ViewCube..... 283
Using Dynamic Input to construct a helix..... 284
3D Surfaces 286
Revision notes 287
Exercises 288

Chapter 15	Rendering.....	291
	Aims of this chapter.....	291
	Setting up a new 3D template.....	292
	The Materials Browser palette.....	293
	Applying materials to a model.....	293
	Modifying an applied material.....	297
	The Render tools and dialogs.....	299
	The Lights tools.....	300
	Setting rendering background colour.....	302
	Free Orbit.....	310
	Producing hardcopy.....	310
	Saving and opening 3D model drawings.....	315
	Camera.....	315
	Using a camera.....	318
	Revision notes.....	324
	Exercises.....	325

Chapter 16	Building drawing	327
	Aims of this chapter.....	327
	Building drawings.....	328
	Floor layouts.....	331
	3D models of buildings.....	332
	The garage.....	335
	Material attachments and rendering.....	339
	Revision notes.....	340
	Exercises.....	341

Chapter 17	Three-dimensional space	345
	Aim of this chapter.....	345
	3D space.....	346
	The User Coordinate System (UCS).....	346
	The variable UCSFOLLOW.....	347
	The UCS icon.....	347
	Examples of changing planes using the UCS.....	348
	Constructing 2D objects in 3D space.....	354
	The Surfaces tools.....	357
	Revision notes.....	360
	Exercises.....	361

Chapter 18	Editing 3D solid models	369
	Aims of this chapter	369
	The Solid Editing tools	370
	Examples of more 3D models	377
	Exercises	381

Chapter 19	Other features of 3D modeling	385
	Aims of this chapter	385
	Raster images in AutoCAD drawings	386
	Printing/Plotting	389
	Polygonal viewports	393
	The Navigation Wheel	395
	The Mesh tools	397
	Exercises	398

Part 3 – Internet tools and Design **403**

Chapter 20	Internet tools and Help	405
	Aim of this chapter	405
	Emailing drawings	406
	Creating a web page	407
	The eTransmit tool	409
	Help	409
	The New Features Workshop	410

Chapter 21	Design and AutoCAD 2011	413
	Aims of this chapter	413
	Ten reasons for using AutoCAD	414
	The place of AutoCAD 2011 in designing	414
	A design chart	415
	Enhancements in AutoCAD 2011	416
	System requirements for running AutoCAD 2011	417

Part 4 – Appendices **419**

Appendix A	List of tools	421
	Introduction	422
	2D Commands	422

3D Commands	427
Internet tools.....	429

Appendix B Some set variables..... 431

Introduction.....	432
Some of the set variables.....	432

Appendix C Ribbon panel tool icons..... 435

Introduction.....	436
2D Drafting and annotation ribbon.....	436
3D Modeling ribbon.....	440
Index.....	443
