Preface **xiii**

<b>Part 1</b>	<b>LINEAR PROGRAMMING</b>	<b>1</b>
<b>Chapter 1</b>	INTRODUCTORY CONCEPTS AND THE GRAPHICAL APPROACH TO LINEAR PROGRAMMING	<b>2</b>
	1.1 Applications of Linear Programming in Agricultural, Environmental, and Resource Economics	<b>3</b>
	1.2 Components of the General Form of the Model	<b>5</b>
	1.3 Standard Assumptions of Linear Programming Models	<b>7</b>
	1.4 Formulating Linear Programming Problems	<b>7</b>
	1.5 The Graphical Approach for Solving Linear Programming Maximization Problems	<b>13</b>
	1.6 The Graphical Approach for Solving Linear Programming Minimization Problems	<b>26</b>
	1.7 Sensitivity Analysis with the Graphical Approach	<b>33</b>
	Summary	<b>43</b>
	Exercises	<b>44</b>
<b>Chapter 2</b>	THE SIMPLEX METHOD TO SOLVING LINEAR PROGRAMMING PROBLEMS	<b>55</b>
	2.1 The Simplex Method for a Simple Maximization Problem	<b>56</b>
	2.2 The Simplex Method for Maximization Problems: General Case	<b>64</b>
	2.3 The Simplex Method and Minimization Problems	<b>72</b>
	Summary	<b>79</b>
	Exercises	<b>80</b>
<b>Chapter 3</b>	SENSITIVITY ANALYSIS USING THE SIMPLEX METHOD AND DUALITY	<b>88</b>
	3.1 Simplex-Based Sensitivity Analysis for Maximization Problems	<b>89</b>
	3.2 Simplex-Based Sensitivity Analysis for Minimization Problems	<b>93</b>
	3.3 Duality	<b>96</b>
	3.4 Solving Linear Programming Problems Using Solver	<b>107</b>
	Summary	<b>116</b>
	References	<b>117</b>
	Appendix: Summation and Matrix Notation	<b>117</b>
	Exercises	<b>124</b>

<b>Chapter 4</b>	<b>FARM-LEVEL LINEAR PROGRAMMING MODELS</b>	<b>135</b>
	4.1 Static Models of a Crop Farm	136
	4.2 A Multiple-Year Model	145
	4.3 Crop-Livestock Enterprises	148
	4.4 Dynamic Models	151
	4.5 Model Validation	155
	4.6 Research Application: Crop Farm Model	158
	4.7 Research Application: Economic Feasibility of an Energy Crop for a South Alabama Cotton-Peanut Farm	164
	Summary	165
	References	166
	Exercises	167
<b>Chapter 5</b>	<b>TRANSPORTATION AND ASSIGNMENT MODELS FOR FOOD AND AGRICULTURAL MARKETS</b>	<b>173</b>
	5.1 General Transportation Model	174
	5.2 Extensions of the Model	179
	5.3 The Transshipment Model	182
	5.4 The Assignment Model	189
	5.5 Research Application: U.S. Dairy Sector Simulator	191
	Summary	196
	References	196
	Exercises	197
<b>Chapter 6</b>	<b>NATURAL RESOURCE AND ENVIRONMENTAL ECONOMICS APPLICATIONS OF LINEAR PROGRAMMING</b>	<b>211</b>
	6.1 Forest Management	211
	6.2 Land Use Planning	215
	6.3 Optimal Stocking Problem for a Game Ranch	222
	6.4 Efficient Irrigation and Cropping Patterns	228
	6.5 Research Application: Optimizing Grizzly Bear Corridor Design	233
	Summary	237
	References	237
	Exercises	237
<b>Part 2</b>	<b>RELAXING THE ASSUMPTIONS OF LINEAR PROGRAMMING</b>	<b>247</b>
<b>Chapter 7</b>	<b>INTEGER AND BINARY PROGRAMMING</b>	<b>248</b>
	7.1 Background on Integer Programming	249
	7.2 The Branch-and-Bound Solution Procedure	250
	7.3 Mixed-Integer Programs	255
	7.4 Solver's Integer and Binary Programming Options	256
	7.5 Capital Budgeting Problems—A Case of Water Conservation	257
	7.6 Distribution System Design	263
	7.7 Sensitivity Analysis in Integer Programming	266
	7.8 Research Application: Optimizing Agricultural Land Protection in Delaware	268
	7.9 Research Application: Farmland Conservation with a Simultaneous Multiple-Knapsack Model	271
	Summary	274
	References	274
	Exercises	275

<b>Chapter 8</b>	<b>OPTIMIZATION OF NONLINEAR FUNCTIONS</b>	<b>283</b>
8.1	Slopes of Functions	<b>283</b>
8.2	Shortcut Formulas for Derivatives	<b>286</b>
8.3	Unconstrained Optimization	<b>287</b>
8.4	Multivariate Functions	<b>289</b>
8.5	Constrained Optimization with Equality Constraints	<b>290</b>
8.6	Kuhn–Tucker Conditions and Constrained Optimization with Inequality Constraints	<b>293</b>
8.7	Solving Constrained Optimization Problems with Solver	<b>299</b>
8.8	Fishery Management Using Nonlinear Programming	<b>305</b>
8.9	Research Application: Optimal Advertising	<b>309</b>
8.10	Research Application: Water Pollution Abatement Policies	<b>312</b>
	Summary	<b>314</b>
	References	<b>315</b>
	Exercises	<b>315</b>
<b>Chapter 9</b>	<b>GLOBAL APPROACHES TO NONLINEAR OPTIMIZATION</b>	<b>321</b>
9.1	Development of Nonlinear Problems	<b>322</b>
9.2	Second-order Conic Problem Barrier Solver	<b>324</b>
9.3	Evolutionary Solver	<b>328</b>
9.4	Interval Global Solver	<b>336</b>
9.5	A Forestry Example Using Nonlinear Excel Functions	<b>338</b>
9.6	Research Application: Crop Farming in Northeast Australia	<b>341</b>
9.7	Research Application: An Analysis of Energy Market Deregulation	<b>342</b>
	Summary	<b>342</b>
	References	<b>343</b>
	Exercises	<b>343</b>
<b>Chapter 10</b>	<b>RISK PROGRAMMING MODELS</b>	<b>347</b>
10.1	Expected Value, Variance, and Covariance	<b>348</b>
10.2	Agricultural Decision Analysis under Risk and Uncertainty	<b>349</b>
10.3	Quadratic Risk Programming	<b>353</b>
10.4	Linearized Version of Quadratic Risk Programming	<b>360</b>
10.5	Target Minimization of Total Absolute Deviations	<b>367</b>
10.6	Chance-Constrained Programming	<b>369</b>
10.7	Discrete Stochastic Sequential Programming	<b>371</b>
10.8	Issues in Measuring Risk in Risk Programming	<b>376</b>
10.9	Research Application: Quadratic Risk Programming	<b>377</b>
10.10	Research Application: Discrete Stochastic Sequential Programming	<b>379</b>
10.11	Research Application: Agriculture and Climate Change	<b>385</b>
	Summary	<b>391</b>
	References	<b>393</b>
	Exercises	<b>394</b>
<b>Chapter 11</b>	<b>PRICE ENDOGENOUS MATHEMATICAL PROGRAMMING MODELS</b>	<b>401</b>
11.1	The Market under Perfect Competition	<b>402</b>
11.2	The Market under Monopoly/Monopsony and Imperfect Competition	<b>404</b>
11.3	Spatial Equilibrium Models	<b>407</b>
11.4	Industry Models	<b>409</b>
11.5	Research Application: A Spatial Equilibrium Model for Imperfectly Competitive Milk Markets	<b>410</b>
11.6	Research Application: Climate Change and U.S. Agriculture	<b>419</b>

	Summary	421
	References	422
	Exercises	423
<b>Chapter 12</b>	<b>GOAL PROGRAMMING</b>	<b>427</b>
12.1	Goal Programming	428
12.2	Nonpreemptive Goal Problem	428
12.3	Preemptive Goal Programming	431
12.4	Deriving Weights for Goal Programming	438
12.5	Research Application: Optimal Parasite Control Programs	438
12.6	Research Application: Forest Land Protection	443
	Summary	446
	References	447
	Exercises	448
<b>Chapter 13</b>	<b>DYNAMIC PROGRAMMING</b>	<b>453</b>
13.1	A Network Problem	454
13.2	Characteristics of Dynamic Programming Problems	458
13.3	A Production Inventory Problem	458
13.4	A Capital Budgeting Problem	463
13.5	Comments on Dynamic Programming	465
13.6	Research Application: Animal Health in Developing Countries	466
13.7	Research Application: Conversion to Organic Arable Farming	471
	Summary	478
	References	479
	Exercises	479
