Preface xxix
Acknowledgments xxxi
Acronyms xxxiii

Part I Wireless Communications: Networking and Management

1 Wireless Communications and Networking 3

1.1 Communications Networks 3
1.2 Communications Architectures and Protocols 5
1.3 Wireless Communications 9
1.4 Wireless Communications Classification 11
1.5 Wireless Communications Architecture 14
1.6 Wireless Communications Architectural Components 15
1.7 Wired and Wireless Communications Networks 17
1.8 Spectrum Designation in Wireless Communications 19
1.9 Wireless Communications at a Glance 22

2 Network Management 25

2.1 Network and Systems Management Concepts 25
2.2 Network and Systems Management Models 28
2.3 Management Systems Classification 30
2.4 Management Systems Evolution 31
2.5 Network and Systems Management Platforms 33
2.6 Internet SNMP-based Management 36
2.7 ISO OSI CMIP-based Management 40
2.8 Network and Systems Management Requirements 45
2.9 Network and Systems Management Products 46

3 Service Management **47**

3.1 Service Management Conceptual Model 47
3.2 Classes of Services 48
3.3 Quality of Service Parameters 49
3.4 Service Level Specifications/Agreements 51
3.5 Guidelines for Establishing SLAs 53
3.6 QOS Measurement Mechanisms 54
3.7 Service Management and COS/QOS/SLA 54
3.8 High-level Service Management Requirements 55
3.9 Service Level Management 56
3.10 Service Management Products 57

Part II Cellular Mobile Radio Networking and Management

4 Cellular Mobile Radio Networking **63**

4.1 Cellular Mobile Radio Communications Concepts 63
4.2 Mobile Radio Link Access Methods 64
4.3 PCS/PCN Communications Architecture and Components 66
4.4 Cellular Mobile Radio Spectrum 68
4.5 Handoff/Handover and Roaming in Mobile Networks 70
4.6 Cellular Mobile Networks Classification 71
4.7 GSM Packet Radio Service Network Architecture and Components 73
4.8 Cellular Mobile Standards and Standards Organizations 75
4.9 Cellular Mobile Applications and Services 78
4.10 Cellular Mobile Networks Evolution 80
4.11 GSM and CDMA Cellular Networks Comparison 82
4.12 UMTS/IMT-2000 Architecture and Components 86
4.13 Mobile Internet Protocol 90
4.14 Signaling in Cellular Mobile Communications 93
4.15 Leading Cellular Smartphone Technical Specifications 96

5 Cellular Mobile Radio Networks Management and Services **100**

5.1 Cellular Mobile Network Management Services 100
5.2 Mobile Networks Management Requirements 101
5.3 Cellular Mobile Networks Service Providers 101
5.4 Cellular Mobile Networks Management Products 103
5.5 Service Level Management in Mobile Networks 106
5.6 GSM/GPRS Data Networking 110
5.7 GPRS Classes of Services 112
5.8 GPRS QOS Profiles 113
5.9 Service Management Products in Mobile Networks 115

Part III Fixed Wireless Technologies: Networking and Management

6 Wireless Local Area Networking 121

6.1 Wireless LAN Architecture 121
6.2 WLAN Networking Solutions Comparison 122
6.3 WLAN IEEE Standards 124
6.4 IEEE 802.11n and 802.11s WLAN Standards 125
6.5 Wi-Fi Multimedia Specifications 127
6.6 FCC Released Unlicensed Spectrum Specifications 128
6.7 WLAN Security Aspects 128
6.8 Wireless LAN Adapters for Computing Devices 132
6.9 WLAN Systems Controllers 134
6.10 Advantages and Disadvantages of WLAN Technologies 135
6.11 WLAN Access Points and WLAN Service Platforms 136
6.12 WLAN Layered Communications 139
6.13 WLAN Management Requirements 140
6.14 WLAN Management Products 142
6.15 Voice over WLAN Architecture 143
6.16 Challenges of Transmitting Voice and Video over WLAN 144
6.17 WLAN QOS and VoWLAN QOS Metrics 147

7 Wireless Personal Area Networking 149

7.1 Wireless PAN Architecture 149
7.2 WPAN Networking Solutions 150
7.3 Bluetooth WPAN Architecture 151
7.4 Bluetooth Protocol Architecture 154
7.5 Bluetooth Profiles 155
7.6 Bluetooth Standards and Applications 157
7.7 Bluetooth Security 158
7.8 Advantages and Disadvantages of Bluetooth Technology 159
7.9 Bluetooth Products 160
7.10 ZigBee Network Architecture 160
7.11 ZigBee Protocol Architecture 162
7.12 Advantages and Disadvantages of ZigBee Technology 164
7.13 ZigBee Products 164
7.14 Comparison of Bluetooth and ZigBee 166
7.15 Power Line Communications Architecture 166
7.16 WPAN Management and WPAN QOS 169

8 Wireless Metropolitan Area Networking 172

8.1 Wireless MAN Technologies 172
8.2 Local Multipoint Distributed Services 173

8.3 Multi-Channel Multipoint Distributed Services 174
8.4 Free Space Optics Metropolitan Access 176
8.5 WiMAX-Wireless Metropolitan Area Network Architecture 177
8.6 WMAN Networking Solutions Technical Comparison 178
8.7 WiMAX Standardization 179
8.8 Mobile WiMAX 802.16e Main Features 180
8.9 WiMAX Protocol Architecture 181
8.10 WiMAX Security 182
8.11 Advantages and Disadvantages of WiMAX Technology 183
8.12 WiMAX and 3G Cellular Mobile Comparison 184
8.13 WiMAX Applications, Products and Service Providers 184
8.14 WiMAX Management Requirements and Management Products 187
8.15 WiMAX Quality of Services and QOS Metrics 188

9 Wireless Near-Field Sensor Networking 191

9.1 Near-Field Sensor Technologies 191
9.2 RFID Networking Architecture Components, Frequencies 192
9.3 Classification of RFID Tags 193
9.4 RFID Standards 194
9.5 RFID Applications 195
9.6 RFID Security Aspects 197
9.7 RFID Vendors, Products, and System Integrators 198
9.8 Near-Field Communications 199
9.9 Advantages and Disadvantages of RFID and NFC Technologies 201
9.10 Ultra Wide Band Network Architecture 202
9.11 Advantages and Disadvantages of UWB Technology 204
9.12 Wireless USB 205

Part IV Fixed Wireless Cellular Mobile Networks Convergence and Integration

10 Fixed-Mobile Convergence Overview 209

10.1 Why Convergence? 209
10.2 Convergence Explained 210
10.3 Fixed-Mobile Convergence History 211
10.4 A High Level Wireless Convergence Concept 211
10.5 Fixed-Mobile Convergent Network Architecture 212
10.6 Fixed-Mobile Convergent Network Components 213
10.7 Fixed-Mobile Convergent Network Interfaces and Protocols 214
10.8 Drivers of Fixed-Mobile Convergence 214
10.9 Convergence Functional Requirements 215
10.10 Media Independent Handover Services (IEEE 802.21) 216
10.11 Fixed-Mobile Convergent Networking Solutions 218
10.12 Fixed-Mobile Convergent Networking Forums 218

11 Wireless LAN Cellular Mobile Convergence 220

11.1 WLAN Convergent Network Architecture 220
11.2 WLAN Convergent Applications 220
11.3 802.11n–based WLAN Implementation Case Study 221
11.4 Convergent WLAN Cellular Mobile Network Architecture 223
11.5 Dual Mode WLAN Mobile Convergent Handsets 224
11.6 Siemens WLAN Cellular Mobile Convergent Network Case Study 226
11.7 WLAN Mesh Networks 227
11.8 Metropolitan Mesh WLAN Convergent Network Case Study 230
11.9 Wi-Fi and BlackBerry Convergence 231
11.10 Wi-Fi and iPhone Convergence 232
11.11 Siemens HiPath WLAN Network Management Solution 233
11.12 QOS in WLAN Cellular Mobile Convergent Networks 235

12 Wireless PAN Cellular Mobile Convergence 238

12.1 Bluetooth Networking 238
12.2 Bluetooth Convergent Applications 239
12.3 Multi-mode Bluetooth Mobile Convergent Terminals 240
12.4 Convergent Bluetooth Cellular Mobile Network Architecture 241
12.5 Bluetooth and GSM Health Care Convergent Networks Case Studies 243
12.6 ZigBee Networking Standards 244
12.7 ZigBee Convergent Applications 247
12.8 ZigBee-based Electrical Power Management Case Study 247
12.9 ZigBee, Wi-Fi, GSM Convergence Case Study 248
12.10 ZigBee and Wi-Fi Coexistence and Interference 250
12.11 AirBee ZigBee Network Management System 251
12.12 WPAN PLC-based Management System 253
12.13 The Concept of Femtocell 254

13 Wireless MAN Cellular Mobile Convergence 256

13.1 WiMAX Mobile Convergent Applications 256
13.2 WiMAX and Internet Protocol Television 256
13.3 Multi-mode WiMAX Mobile Convergent Terminals 257
13.4 Convergent WiMAX Cellular Mobile Network Architecture 259
13.5 WiMAX and Ultra Wide Band Convergence 260
13.6 WiMAX and Fixed Wired EPON Convergence 261
13.7 WiMAX, Wi-Fi, and RFID Convergence Case Study 263
13.8 WiMAX and Metro Mesh Convergence Case Study 264
13.9 QOS in Fixed-Mobile WiMAX Convergence 266
13.10 WiMAX Mobile Convergence Service Providers 266
13.11 WiMAX as an Alternative to 4G Cellular Mobile 267
13.12 The Upcoming Auction of the 700 MHz Spectrum 268

14 Wireless Sensor Networks Cellular Mobile Convergence 270

14.1 RFID Technology Development 270
14.2 RFID Tag Standards and Code Structures 272
14.3 RFID Tag Evaluation Criteria 274
14.4 RFID Reader Evaluation Criteria 274
14.5 RFID and Cellular Mobile Networks Convergence 275
14.6 RFID-based Health Care Services Case Study 276
14.7 IBM's Secure Trade Lane RFID-based Case Study 278
14.8 NFC Networking, Standards, and Applications 280
14.9 NFC and Cellular Mobile Networks Convergence 281
14.10 NFC Payment and Promotion Case Study 282
14.11 UWB-based Wireless USB Products 284
14.12 Mobile Ad-hoc and Wireless Sensor Networks 284

Part V Fixed Wireless Cellular Mobile Networks Convergence: Standardized Networking Solutions

15 UMA-based Fixed Wireless and Cellular Mobile Networking Solutions and Products 289

15.1 What is Unlicensed Mobile Access or GAN? 289
15.2 UMA-based Network Architecture 289
15.3 UMA-based Networking Overview 290
15.4 UMA-based WLAN and GSM/CDMA Convergent Networking Solution 291
15.5 Advantages and Disadvantages of the UMA/GAN Technology 292
15.6 UMA/GAN Standard Specifications 293
15.7 UMAN UNC Design Requirements and Functionalities 293
15.8 UMAN UNC Discovery and Registration 294
15.9 Securing the UMA "up" Interface 295
15.10 GERAN to UMAN UNC Handover Operation 296
15.11 UMAN to GERAN UNC Handover Operation 296
15.12 UMAN Signaling Protocol for Voice Communications 297
15.13 UMAN Signaling Protocol for Data Communications 297
15.14 UMAN Mobile Station Lower Layers Protocols 299
15.15 UMA-based FMC Solutions, Products, and Services 300
15.16 UMA-based Nokia Dual-mode 6301 Handset 302

16 Session Initiation Protocol 303

16.1 What is the Session Initiation Protocol-SIP? 303
16.2 SIP System Architecture 303
16.3 SIP Overview 305
16.4 SIP-based Message Exchange 307
16.5 SIP Message Format, Fields, and Options 308
16.6 SIP IETF Standards and Extensions 310

16.7 Advantages and Disadvantages of SIP 311
16.8 SIP Applications 312
16.9 ITU-T H.323 Signaling Protocols 313
16.10 Signaling Gateways/Session Controllers 314
16.11 SIP-based Interoperability in Wireless Networks 316
16.12 SIP-based VoIP Network Architecture 317
16.13 SIP-based Solutions, Products, and Services 318
16.14 SIP-based Signaling in the MobileIGNITE Architecture 320
16.15 Electronic Number Mapping (ENUM) 321

17 IMS-based Fixed Wireless and Cellular Mobile Networking Solutions and Products 324

17.1 What is the IP-based Multimedia Subsystem? 324
17.2 The Convergence Path to IMS 325
17.3 IMS Networking Overview 327
17.4 High-Level IMS Architecture 328
17.5 IMS Reference Architecture 329
17.6 Call Session Control Functional Modules 332
17.7 Advantages and Disadvantages of IMS Technology 333
17.8 IMS Standard Specifications 334
17.9 IMS Applications 336
17.10 IMS Architecture Reference Points 336
17.11 IMS-based FMC Solutions, Products, and Services 339
17.12 Verizon Wireless IMS Vision 342
17.13 IMS and Softswitches 343
17.14 ETSI TISPAN 346
17.15 Customized Applications for Mobile Networks Enhanced Logic (CAMEL) 349

Part VI Fixed-Mobile Convergence Services, Industry Trends, and Implementation Issues

18 QOS in Fixed Wireless Cellular Mobile Convergent Networks 355

18.1 Fixed-Mobile Convergent Network Management 355
18.2 Service Level Management in Wireless Convergent Networks 357
18.3 Integrated and Differentiated Services 359
18.4 Multi-Protocol Label Switching 363
18.5 Policy-based Management 365
18.6 QOS in UMA-based Fixed-Mobile Convergent Networks 369
18.7 QOS in IMS-based Fixed-Mobile Convergent Networks 372
18.8 Open Mobile Alliance and Handset Management 375

19	**The Economics of Fixed Wireless Cellular Mobile Networks Integration**		**378**
	19.1	Economic Drivers of Fixed-Mobile Convergence	378
	19.2	Projected Mobile Communications Growth	379
	19.3	Projected Development of WLANs and Mesh WLANs	381
	19.4	Projected Development of Bluetooth and ZigBee Networks	382
	19.5	Projected Development of WiMAX Networks	382
	19.6	Projected Development of RFID, NFC, and WUSB Networks	383
	19.7	Projected Development of UMA-based Convergent Networks	384
	19.8	Projected Development of IMS-based Convergent Networks	385
	19.9	Evaluation Criteria for Fixed-Mobile Convergence Solutions	386
20	**Fixed-Mobile Convergence Implementation: Status, Trends, and Issues**		**390**
	20.1	Benefits of Fixed-Mobile Convergence	390
	20.2	Trends in Fixed and Mobile Wireless Communications	391
	20.3	Trends in Fixed-Mobile Convergence	393
	20.4	3GPP Long Term Evolution, 3GPP2 Ultra Mobile Broadband, and NGMN	394
	20.5	World Wide Web 2.0 and Service Oriented Architecture	396
	20.6	General Issues in Fixed-Mobile Convergence	397
	20.7	Issues in UMA-based Convergence Implementation	397
	20.8	Issues in IMS-based Convergence Implementation	398
	20.9	Conclusions	398
	References		400
	Index		405
