Crawl Loader Command	160
The Feed Processing Pipeline	162
Running the Code	176

Wrapping Up	177
-------------------	-----

Chapter 7 EC2 Monitoring, Auto Scaling, and Elastic Load Balancing

Introduction	179
Vertical Scaling	180
Horizontal Scaling	180
Monitoring, Scaling, and Load Balancing	181
Installing the Command Line Tools	182
Monitoring EC2 Data with Amazon CloudWatch	186
Amazon CloudWatch Concepts	186
Amazon CloudWatch Operation	187
Amazon CloudWatch Pricing	188
Amazon CloudWatch from the Command Line	188
Programming Amazon CloudWatch	190
Learning and Using Apache JMeter	201
Why JMeter?	201
Installing and Running JMeter	202
Creating a Test Plan	203
Running the Test	204
Viewing the Results	204
Going Further with JMeter	206
Scaling EC2 Instances with Elastic Load Balancing	207
Elastic Load Balancing Concepts	207
Elastic Load Balancing Processing Model	208
Elastic Load Balancing Pricing	210
Elastic Load Balancing in Operation	210
Programming Elastic Load Balancing	215
Auto Scaling	215
Auto Scaling Concepts	216

Auto Scaling Processing Model	216
Auto Scaling Pricing	219
Auto Scaling in Operation	219
Off the Scale	222
Wrapping It Up	222

Chapter 8 Amazon SimpleDB: A Cloud

Database	223
Introduction	223
Amazon SimpleDB	224
Amazon SimpleDB Concepts	224
Amazon SimpleDB Programming Model	226
Amazon SimpleDB Pricing	227
Programming Amazon SimpleDB	228
Creating a Domain	229
Listing Domains	230
Storing Data	230
Storing Multiple Items Efficiently	232
Running a Query	235
Advanced Queries	237
Augmenting Items with Additional Data	240
Storing Multiple Values for an Attribute	241
Accessing Attribute Values	242
Deleting Attributes	243
Deleting Items	244
Monitoring Domain Statistics	245
Processing and Storing RSS Feeds with Amazon SimpleDB	247
All Stored	258

Chapter 9 Amazon Relational Database Service

Service	259
Introduction	259
Amazon Relational Database Service	261
Amazon RDS Concepts	261
<i>Amazon RDS Programming Model</i>	266
Amazon RDS Pricing	266
Using Amazon RDS	268
Signing Up	268
Tour the Console	268
Launching a DB Instance	270
Configure a DB Security Group	272
Access the DB Instance	274
Import Some Data	275
Administering RDS	276
Monitor Instance Performance	276
Initiate a Snapshot Backup	277
Scale-up Processing	278
Scale-up Storage	280
Create a DB Instance from a DB Snapshot or to a Point in Time	281
Convert to Multi-AZ	281
Delete DB Instances	282
And That's a Wrap	282

Chapter 10 Advanced AWS

Accounting and Tracking	285
Account Activity	285
Access to Usage Data	287

Importing Usage Data	288
Querying Account Data	294
Retrieving and Displaying Usage Data	296
Elastic Block Storage	302
EBS from the Command Line	302
EBS Snapshots	304
EBS Public Data Sets	308
EBS RAID	309
EC2 Instance Metadata	313
Dynamic Diagramming	317
Conclusion	329

Chapter 11 Putting It All Together:

CloudList

Designing the Application	331
Utility Functions and Programs	332
The Web Front End	344
The New Item Submission Form	349
And That's It	354
