

DVD Included

Run or install 18 different Linux
distributions from the multi-boot DVD!

Christopher Negus

Linux[®]

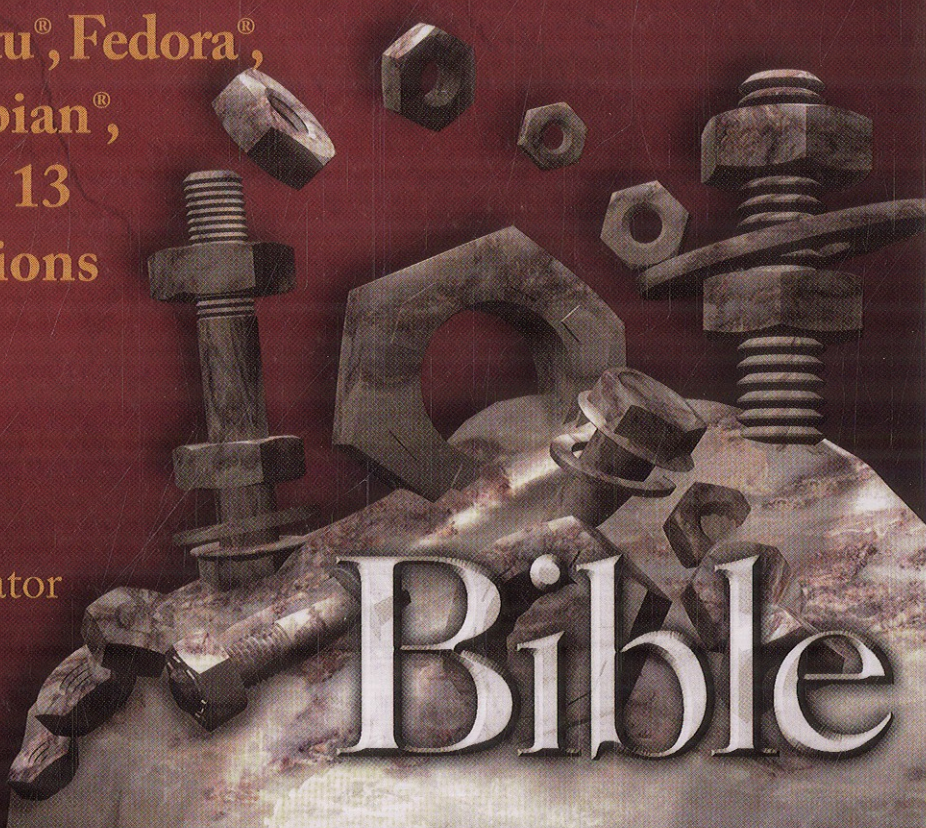

2011 Edition

**Boot up to Ubuntu[®], Fedora[®],
KNOPPIX, Debian[®],
openSUSE[®], and 13
Other Distributions**

Turn your PC into a
Linux desktop system

Learn to use Linux
as a system administrator

Find and install loads
of free software apps

Bible

The book you need to succeed!

Contents

Introduction	xxvii
-------------------------------	--------------

Part I: Getting Off the Ground with Linux **1**

Chapter 1: Starting with Linux **3**

Taking Your First Step	4
What Comes in Linux Systems?	4
What Do You Need to Get Started?	5
Starting Right Now	6
Trying KNOPPIX	6
Trying Damn Small Linux	8
Trying Other Linux Distributions	10
Understanding Linux	10
What's So Great About Linux?	12
Summary	14

Chapter 2: Creating the Perfect Desktop **15**

Starting with Your Linux Desktop	16
Step 1: Getting a Computer	17
Selecting Computer Hardware	17
Choosing Networking Hardware	18
Step 2: Installing Your Linux Desktop	18
Starting with a Fedora Desktop	19
Preparing to Install Extra Software	19
Checking Available Software	20
Step 3: Configuring Your Desktop	23
Step 4: Adding Applications	24
Choosing Office Applications	25
Choosing Games	26
Choosing Multimedia Applications	27
Choosing Internet Applications	27
Choosing Other Applications	28
Step 5: Transitioning from Windows	29
Getting Your Files from Windows to Linux	29
Getting Windows Content from the Local Disk	29
Getting Windows Content over the Network	30
Putting Content on Removable Media	30
Running Windows Applications in Linux	30
Summary	31

Part II: Running a Linux Desktop

33

Chapter 3: Getting into the Desktop35

Understanding Your Desktop	35
Starting the Desktop.....	36
Boot to the Desktop	36
Boot to Graphical Login.....	37
Boot to a Text Prompt.....	39
K Desktop Environment.....	40
Using the KDE Desktop	41
Managing Files with Dolphin and Konqueror.....	44
Using the Dolphin File Manager.....	45
Working with Files	46
Searching for Files	47
Creating New Files and Folders	48
Using the Konqueror Web Browser/File Manager.....	49
Using Bookmarking Features in Konqueror	50
Configuring Konqueror Options.....	50
Managing the KDE Desktop	52
Managing Windows in the Taskbar	52
Moving Windows.....	52
Resizing Windows	53
Pinning Windows on Top or Bottom.....	53
Using Virtual Desktops.....	53
Adding Widgets.....	53
Configuring the Desktop	54
The GNOME Desktop	56
Using the Metacity Window Manager.....	58
Using the GNOME Panels.....	59
Using the Applications and System Menus.....	60
Adding an Applet.....	60
Adding Another Panel.....	61
Adding an Application Launcher	61
Adding a Drawer.....	62
Changing Panel Properties.....	63
Using the Nautilus File Manager.....	63
3D Effects with AIGLX	66
Changing GNOME Preferences	68
Exiting GNOME	69
Configuring Your Own Desktop.....	70
Configuring X.....	71
Creating a Working X Configuration File	71
Getting New X Drivers.....	72
Tuning Up Your X Configuration File	73
Choosing a Window Manager.....	75
Choosing Your Personal Window Manager.....	77
Getting More Information	78
Summary.....	78

Chapter 4: E-mailing and Web Browsing79

Using E-mail.....	79
Choosing an E-mail Client.....	79
Getting Here from Windows.....	81
Getting Started with E-mail.....	82
Tuning Up E-mail.....	84
Reading E-mail with Thunderbird.....	84
Setting Up an E-mail Account.....	85
Connecting to the Mail Server	87
Managing Incoming Mail.....	87
Composing and Sending Mail.....	88
Filtering Mail and Catching Spam	89
Managing E-mail in Evolution.....	90
Receiving, Composing, and Sending E-mail.....	91
Managing E-mail with Search Folders	93
Filtering E-mail Messages.....	94
Reading E-mail with SeaMonkey Mail.....	94
Working with Text-based E-mail Readers.....	95
Mutt Mail Reader	96
Mail Reader.....	96
Choosing a Web Browser.....	96
Exploring the SeaMonkey Suite.....	97
Using Firefox.....	99
Setting Up Firefox.....	100
Setting Firefox Preferences.....	100
Adding Add-ons and Plug-ins.....	102
Changing Firefox Themes.....	105
Securing Firefox.....	105
Tips for Using Firefox	106
Using Firefox Controls.....	107
Improving Firefox Browsing by Adding a Preferences Toolbar	108
Doing Cool Things with Firefox	109
Blocking Pop-ups.....	109
Using Tabbed Browsing	109
Resizing Web Page Text	109
Using Text-Based Web Browsers.....	110
Summary.....	111

Chapter 5: Playing Music, Video, Photos, and Games 113

Running Multimedia Servers.....	114
Using Totem for Audio and Video.....	115
Adding Audio/Video Support to Totem	115
Using Totem as a Movie Player.....	116
Playing Music in Linux.....	117
Playing Music with Rhythmbox	118

Contents

Playing Music with the XMMS Multimedia Player.....	120
Using the Equalizer.....	122
Using the Playlist Editor.....	122
Managing Music on your iPod with gtkpod.....	123
Installing and Starting gtkpod iPod Manager	123
Using gtkpod iPod Manager.....	124
Recording and Ripping Music.....	125
Creating an Audio CD with cdrecord.....	125
Ripping CDs with Grip	126
Playing Videos.....	128
Exploring Codecs	128
Watching Video with xine	130
Using xine.....	131
Creating Playlists with xine	131
xine Tips	132
Working with Images.....	133
Managing Images in Shotwell Photo Manager	133
Manipulating Images with GIMP.....	135
Acquiring Screen Captures.....	137
Playing Games on Linux.....	138
Jumping into Linux Gaming.....	138
Finding Linux Games	139
Basic Linux Gaming Information.....	140
Getting Started with Commercial Games in Linux.....	142
Playing TransGaming and Cedega Games	142
Summary.....	144

Part III: Learning System Administration Skills

145

Chapter 6: Starting with System Administration. 147

Graphical Administration Tools	147
Using Web-Based Administration.....	148
Open Source Projects Offering Web Administration	148
The Webmin Administration Tool	149
Graphical Administration with Different Distributions.....	150
Fedora/RHEL system-config Tools.....	150
SUSE YaST Tools.....	152
Using the root Login.....	153
Becoming root from the Shell (su Command).....	154
Allowing Limited Administrative Access.....	155
Gaining Administrative Access with sudo	155
Exploring Administrative Commands, Configuration Files, and Log Files	157
Administrative Commands.....	157
Administrative Configuration Files.....	158
Administrative Log Files.....	162
Using Other Administrative Logins	163
Summary.....	164

Chapter 7: Installing Linux	165
Choosing a Linux Distribution	166
Getting Your Own Linux Distribution	167
Finding Another Linux Distribution	167
Understanding What You Need	168
Downloading the Distribution	169
Burning the Distribution to CD	170
Exploring Common Installation Topics	171
Knowing Your Computer Hardware	171
Upgrading or Installing from Scratch	172
Dual Booting	173
Installing Linux to Run Virtually	174
Using Installation Boot Options	174
Partitioning Hard Drives	175
Understanding Different Partition Types	176
Partitioning During Fedora Installation	176
Reasons for Partitioning	179
Partitioning with fdisk	180
Tips for Creating Partitions	182
Using LILO or GRUB Boot Loaders	184
Booting Your Computer with GRUB	184
Booting with GRUB	185
Temporarily Changing Boot Options	185
Permanently Changing Boot Options	186
Adding a New GRUB Boot Image	188
Booting Your Computer with LILO	188
Changing Your Boot Loader	192
Configuring Networking	193
Configuring Other Administrative Features	194
Summary	195
Chapter 8: Running Commands from the Shell	197
Starting a Shell	198
Using the Shell Prompt	198
Using a Terminal Window	199
Using Virtual Terminals	200
Choosing Your Shell	200
Using bash (and Earlier sh) Shells	201
Using tcsh (and Earlier csh) Shells	202
Using ash	202
Using ksh	202
Using zsh	202
Exploring the Shell	202
Checking Your Login Session	203
Checking Directories and Permissions	204
Checking System Activity	206
Exiting the Shell	207

Contents

Using the Shell in Linux	207
Locating Commands	208
Rerunning Commands	211
Command-line Editing	211
Command-line Completion	214
Command-line Recall	214
Connecting and Expanding Commands	216
Piping Commands	216
Sequential Commands	217
Background Commands	217
Expanding Commands	218
Expanding Arithmetic Expressions	218
Expanding Environment Variables	219
Creating Your Shell Environment	219
Configuring Your Shell	219
Setting Your Prompt	220
Adding Environment Variables	222
Understanding Common Shell Variables	222
Adding Aliases	224
Managing Background and Foreground Processes	225
Starting Background Processes	225
Using Foreground and Background Commands	226
Working with the Linux File System	227
Creating Files and Directories	229
Using Metacharacters and Operators	232
Using File-matching Metacharacters	232
Using File-Redirection Metacharacters	233
Understanding File Permissions	234
Moving, Copying, and Deleting Files	237
Using the vi Text Editor	237
Starting with vi	238
Moving Around the File	241
Searching for Text	241
Using Numbers with Commands	242
Learning More About vi	242
Summary	242
Chapter 9: Learning Basic Administration	243
Creating User Accounts	244
Adding Users with useradd	244
Setting User Defaults	247
Modifying Users with usermod	249
Deleting Users with userdel	250
Configuring Hardware	251
Managing Removable Hardware	251

Removable Media on a GNOME Desktop.....	252
Removable Media on a SUSE KDE Desktop	254
Working with Loadable Modules.....	254
Listing Loaded Modules.....	255
Loading Modules	256
Removing Modules	257
Monitoring System Performance.....	257
Doing Remote System Administration.....	259
Summary.....	260
Chapter 10: Managing Disks and File Systems	261
Partitioning Hard Disks.....	262
Mounting File Systems	264
Supported File Systems.....	265
Using the fstab File to Define Mountable File Systems.....	267
Using the mount Command to Mount File Systems	268
Mounting Removable Media	269
Mounting a Disk Image in loopback	269
Using the umount Command	270
Using the mkfs Command to Create a File System.....	270
Adding a Hard Disk.....	271
Checking System Space	274
Displaying System Space with df.....	274
Checking Disk Usage with du.....	275
Finding Disk Consumption with find.....	276
Summary.....	276
Chapter 11: Setting Up Networking	277
Connecting to the Network	278
Connecting via Dial-Up Service	278
Connecting a Single Wired Ethernet Card.....	279
Sharing a Network Connection with Other Computers.....	280
Connecting Servers.....	282
Connecting Other Equipment	283
Using Ethernet Connections to Connect to the Internet.....	284
Configuring Ethernet During Installation	285
Configuring Ethernet from the Desktop	285
Using Network Configuration GUI in Fedora.....	286
Identifying Other Computers (Hosts and DNS).....	288
Understanding Your Internet Connection.....	290
Using Dial-Up to Connect to the Internet.....	292
Getting Information.....	292
Setting Up Dial-Up PPP	293
Creating a Dial-Up Connection with the Internet Configuration Wizard.....	294
Launching Your PPP Connection.....	296
Launching Your PPP Connection on Demand.....	296

Contents

Checking Your PPP Connection.....	297
Checking That Your Modem Was Detected	297
Connecting to the Internet with Wireless.....	298
Summary.....	300

Chapter 12: Using Network Tools. 301

Running Commands to Browse the Web.....	301
Transferring Files	303
Downloading Files with wget	303
Transferring Files with curl	304
Transferring Files with FTP Commands.....	305
Using SSH Tools to Transfer Files	307
Copying Remote Files with scp.....	308
Copying Remote Files in sftp and lftp Sessions.....	308
Using Windows File Transfer Tools	309
Sharing Remote Directories	309
Sharing Remote Directories with NFS	309
Viewing NFS Shares.....	309
Mounting NFS Shares	310
Sharing Remote Directories with Samba.....	310
Viewing and Accessing Samba Shares.....	311
Mounting Samba (CIFS) Shares	312
Looking up Samba Hosts	313
Checking Samba Server Configuration	313
Sharing Remote Directories with SSHFS	314
Chatting with Friends in IRC	314
Using Text-based E-mail Clients	315
Managing E-mail with mail	316
Managing E-mail with mutt.....	317
Summary.....	318

Chapter 13: Securing Linux 319

Linux Security Checklist	320
Finding Distribution-Specific Security Resources.....	323
Finding General Security Resources.....	324
Using Linux Securely	324
Using Password Protection	325
Choosing Good Passwords	325
Using a Shadow Password File.....	327
Breaking Encrypted Passwords.....	327
Checking for the Shadow Password File	328
Using Log Files.....	329
The Role of syslogd	332
Redirecting Logs to a Loghost with syslogd	332
Understanding the Messages Log File.....	334

Using Secure Shell Tools.....	334
Starting the ssh Service.....	335
Using the ssh, sftp, and scp Commands	335
Using ssh, scp, and sftp Without Passwords	337
Securing Linux Servers.....	338
Controlling Access to Services with TCP Wrappers.....	338
Understanding Attack Techniques.....	341
Protecting Against Denial-of-Service Attacks	342
Mailbombing.....	342
Spam Relaying	344
Smurf Amplification Attack	345
Protecting Against Distributed Denial-of-Service Attacks	345
Protecting Against Intrusion Attacks	350
Evaluating Access to Network Services.....	350
Disabling Network Services	351
Securing Servers with SELinux	353
Protecting Web Servers with Certificates and Encryption	353
Symmetric Cryptography.....	354
Asymmetric Cryptography	355
Secure Socket Layer	355
Using Security Tools from Linux Live CDs.....	363
Advantages of Security Live CDs	363
Using INSERT to Check for Rootkits	364
Summary.....	365

Chapter 14: Creating Useful Shell Scripts. 367

Understanding Shell Scripts.....	367
Executing and Debugging Shell Scripts	368
Understanding Shell Variables.....	369
Special Shell Variables	370
Parameter Expansion in bash.....	370
Performing Arithmetic in Shell Scripts	371
Using Programming Constructs in Shell Scripts.....	372
The “if . . . then” Statements.....	372
The case Command	375
The “for . . . do” Loop.....	376
The “while . . . do” and “until . . . do” Loops.....	377
Some Useful External Programs	378
The General Regular Expression Parser	378
Remove Sections of Lines of Text (cut).....	378
Translate or Delete Characters (tr).....	379
The Stream Editor (sed)	379
Trying Some Simple Shell Scripts	380
A Simple Telephone List.....	380
A Simple Backup Script.....	381
Summary.....	382

Part IV: Setting Up Linux Servers

383

Chapter 15: Running a Linux Web Server 385

Components of a Web Server (Apache, MySQL and PHP)	385
Apache	386
MySQL	386
PHP	387
Setting Up Your Web Server	388
Installing Apache	388
Installing PHP	388
Installing MySQL	390
Operating Your Web Server	390
Editing Your Apache Configuration Files	391
Adding a Virtual Host to Apache	393
User Content and the UserDir Setting	395
Installing a Web Application: Coppermine Photo Gallery	395
Troubleshooting Your Web Server	398
Configuration Errors	398
Access Forbidden and Server Internal Errors	400
Securing Your Web Traffic with SSL/TLS	401
Generating Your SSL Keys	403
Configuring Apache to Support SSL/TLS	404
Summary	405

Chapter 16: Running a Mail Server 407

Internet E-Mail's Inner Workings	407
About the System and the Software Used	409
Preparing Your System	409
Configuring DNS for Direct Delivery	410
Configuring for Retrieval from a Mail Host	411
Installing and Configuring the Mail Server Software	411
Installing Exim and Courier	412
Installing ClamAV and SpamAssassin	414
Testing and Troubleshooting	416
Checking Logs	416
Common Errors (and How to Fix Them)	417
Messages Rejected by Exim	417
Messages Not Delivered by Exim	418
Login Failures when Connecting to Courier	419
Configuring Mail Clients	420
Configuring Fetchmail	420
Configuring Web-Based Mail	421
Securing Communications with SSL/TLS	421
Summary	423

Chapter 17: Running a Print Server	425
Common UNIX Printing System	426
Setting Up Printers	427
Using Web-Based CUPS Administration	427
Using the Printer Configuration Window	431
Configuring Local Printers with the Printer Configuration Window	431
Configuring Remote Printers	435
Adding a Remote CUPS Printer	436
Adding a Remote UNIX Printer	436
Adding a Windows (SMB) Printer	436
Working with CUPS Printing	438
Configuring the CUPS Server (cupsd.conf)	438
Starting the CUPS Server	439
Configuring CUPS Printer Options Manually	440
Using Printing Commands	441
Printing with lpr	442
Listing Status with lpc	442
Removing Print Jobs with lprm	443
Configuring Print Servers	443
Configuring a Shared CUPS Printer	444
Configuring a Shared Samba Printer	445
Understanding smb.conf for Printing	445
Setting Up SMB Clients	446
Summary	447
Chapter 18: Running a File Server	449
Setting Up an NFS File Server	450
Getting NFS	451
Sharing NFS File Systems	452
Configuring the /etc/exports File	452
Exporting the Shared File Systems	456
Starting the nfs Daemons	456
Using NFS File Systems	457
Manually Mounting an NFS File System	457
Automatically Mounting an NFS File System	458
Using autofs to Mount NFS File Systems on Demand	461
Unmounting NFS File Systems	462
Other cool things to do with NFS	463
Understanding NFS security issues	464
Setting Up a Samba File Server	464
Getting and Installing Samba	466
Configuring Samba with SWAT	466
Turning on the SWAT Service	466
Starting with SWAT	467
Creating Global Samba Settings in SWAT	468
Configuring Shared Directories with SWAT	474
Checking Your Samba Setup with SWAT	476

Contents

Working with Samba Files and Commands.....	476
Editing the smb.conf File	476
Adding Samba Users	478
Starting the Samba Service	478
Testing your Samba Permissions.....	479
Checking the Status of Shared Directories.....	479
Using Samba Shared Directories.....	479
Using Samba from Nautilus	479
Mounting Samba Directories in Linux.....	480
Troubleshooting Your Samba Server	480
Basic networking in Place?	480
Samba Service Running?.....	481
Firewall Open?.....	482
User Passwords Working?	482
Summary.....	483

Part V: Choosing and Installing Different Linux Distributions

485

Chapter 19: Running Ubuntu Linux 487

Overview of Ubuntu.....	488
Ubuntu Releases	488
Ubuntu Installer	489
Ubuntu as a Desktop	490
Ubuntu as a Server	491
Ubuntu Spin-offs	492
Challenges Facing Ubuntu.....	493
Installing Ubuntu.....	494
Getting Started with Ubuntu.....	497
Trying Out the Desktop.....	498
Adding More Software	500
Getting More Information About Ubuntu.....	502
Summary.....	502

Chapter 20: Running Fedora and Red Hat Enterprise Linux 503

Digging into Features.....	505
Red Hat Installer (Anaconda)	505
Custom Spins, Install Sets, and Live CDs	506
RPM Package Management	506
Latest Desktop Technology	507
System Configuration Tools.....	508
Going Forward with Red Hat Enterprise Linux.....	509
Red Hat Network and Satellite Servers	509
Red Hat Enterprise Virtualization	510
Red Hat Cloud Computing	510
Going Forward with Fedora	510
Growing Community Support for Fedora.....	511

Joining Fedora Special Interest Groups.....	511
Forums and Mailing Lists.....	512
Installing Fedora	512
Beginning the Installation	512
Running the Fedora Firstboot.....	515
Summary.....	515
Chapter 21: Running Debian GNU/Linux.....	517
Inside Debian GNU/Linux	518
Debian Packages	518
Debian Package Management Tools.....	519
Debian Releases	521
Getting Help with Debian	521
Installing Debian GNU/Linux	522
Hardware Requirements and Installation Planning.....	522
Workstations.....	523
Servers	523
Running the Installer.....	523
Managing Your Debian System.....	527
Configuring Network Connections.....	527
IP Networks: Ethernet and Wireless	528
Dial-up PPP Connections.....	529
PPPoE Connections.....	530
Package Management Using APT.....	530
Managing the List of Package Repositories.....	531
Updating the APT Package Database	532
Finding and Installing Packages	532
Removing Packages.....	533
Upgrading your System.....	534
Package Management Using dpkg.....	534
Installing and Removing Packages	535
Querying the Package Database	535
Examining a Package File	536
Installing Package Sets (tasks) with tasksel.....	536
Alternatives, Diversions, and Stat Overrides.....	537
Managing Package Configuration with debconf	539
Summary.....	539
Chapter 22: Running SUSE and openSUSE Linux	541
Understanding SUSE Linux Enterprise and openSUSE	542
What's in SUSE Distributions?.....	543
Installation and Configuration with YaST.....	543
Rpm Package Management	546
Automated Software Updates.....	547
Installing openSUSE.....	548
Starting with openSUSE.....	549
Summary.....	550

Contents

Chapter 23: Running PCLinuxOS	551
Starting with PCLinuxOS	552
Discovering What's in PCLinuxOS	552
Adding More Applications	553
Installing PCLinuxOS	555
Starting the Install	555
Configuring After Installation	556
Remastering PCLinuxOS	557
Summary	557
Chapter 24: Running Bootable Linux Distributions	559
Overview of Bootable Linux Distributions	560
Trying a Bootable Linux	561
Starting with KNOPPIX	562
Looking Inside KNOPPIX	562
Booting KNOPPIX	563
Correcting Boot Problems	564
Customizing KNOPPIX	567
Special Features and Workarounds	568
Showcasing Linux from a Live CD	569
Security and Rescue Bootables	569
BackTrack Network Security Suite	571
SystemRescueCd	571
KNOPPIX Security Tools Distribution	573
The Inside Security Rescue Toolkit	573
Demonstration Bootables	574
Multimedia Bootables	575
MoviX	575
GeeXboX	576
KnoppMyth	577
Tiny Desktops	577
Damn Small Linux	578
Puppy Linux	579
Special-Purpose Bootables	580
Customizing a Bootable Linux	581
Building a Live CD with Fedora	583
Summary	584

Part VI: Programming in Linux **585**

Chapter 25: Programming Environments and Interfaces	587
Understanding Programming Environments	588
Using Linux Programming Environments	588
The Linux Development Environment	589
The Process Model	590

Contents

CPU and Memory Protection	591
The Security Model.....	592
Preemptive Multitasking.....	593
Multiuser by Design.....	594
Interprocess Communication.....	595
The Building Blocks Philosophy.....	595
Graphical Programming Environments	597
Eclipse: The Universal Tool Platform	597
KDevelop: KDE's IDE.....	599
Anjuta: An IDE for GTK/GNOME.....	600
Code Crusader.....	601
The Command-line Programming Environment	602
Linux Programming Interfaces.....	603
Creating Command-line Interfaces.....	604
Creating Text Applications with Ncurses.....	605
Creating Text Applications with S-Lang	608
Creating Graphical Interfaces	610
Application Programming Interfaces	612
Summary.....	616

Chapter 26: Programming Tools and Utilities. 617

The Well-Stocked Toolkit	617
Using the GCC Compiler.....	618
Compiling Multiple Source Code Files	620
GCC Command-line Options	622
Automating Builds with make	624
Library Utilities	626
The nm Command.....	627
The ar Command.....	628
The ldd Command.....	629
The ldconfig Command	630
Environment Variables and Configuration Files	630
Source Code Control	631
Source Code Control Using RCS.....	631
Checking Files In and Out	632
Making Changes to Repository Files.....	633
Additional Command-line Options	634
Source Code Control with CVS	634
Debugging with GNU Debugger	638
Starting GDB.....	639
Inspecting Code in the Debugger	642
Examining Data.....	643
Setting Breakpoints.....	644
Working with Source Code	646
Summary.....	646

Part VII: Appendix and License	647
Appendix: Media	649
Finding Linux Distributions on the DVD	650
Fedora Linux	650
KNOPPIX Linux	650
Slackware Linux	650
Ubuntu Linux	651
AntiX Linux	651
BackTrack 3 Linux Security Suite	651
Gentoo Linux	651
openSUSE Linux	652
PCLinuxOS	652
Inside Security Rescue Toolkit	652
Puppy Linux	652
Debian GNU/Linux	653
Damn Small Linux	653
SystemRescueCd	653
Coyote Linux	653
Tiny Core Linux	654
SLAX	654
CentOS	654
Creating Linux CDs or DVDs	654
Getting Source Code	656
GNU General Public License	659
Index	665
