

POWER EQUIPMENT **ENGINE** TECHNOLOGY

Edward Abdo

TABLE OF CONTENTS

PREFACE	xi	Summary	27
		Chapter 2 Review Questions	28
CHAPTER 1		CHAPTER 3	
Introduction to Power Equipment Engine Technology	1	Tools	29
Learning Objectives	1	Learning Objectives	29
Introduction	2	Introduction	30
A Brief History of the Internal Combustion Engine	2	Basic Hand Tools	30
The Birth of the Internal Combustion Engine	3	Wrenches	30
Career Opportunities in the Power Equipment Engine Industry	5	Screwdrivers	36
Opportunities in Dealerships	6	Pliers	38
Power Equipment Industry Education and Certification	8	Hammers	40
Equipment & Engine Training Council	8	Punches and Chisels	40
Summary	9	Clamps and Vises	42
Chapter 1 Review Questions	9	Cutting Tools	42
		Power Tools	44
CHAPTER 2		Drills	44
Safety First	10	Drill Press	46
Learning Objectives	10	Bench Grinder	46
Introduction	11	Air Tools	46
The Safety Attitude	11	Special Tools	47
Fire Safety	11	Pullers	47
The Fire Triangle	12	Precision Measuring Tools	48
The Four Fire Classes	12	Test Instruments	51
Using a Fire Extinguisher	14	Purchasing Tools	53
Hazardous Chemicals	16	Storing Tools	54
Right-to-Know Laws	17	Service Information Library	55
Electrical Safety	18	Summary	56
Exhaust Gas Safety	18	Chapter 3 Review Questions	56
Safe Operation of Equipment	20		
Good Housekeeping Practices	20	CHAPTER 4	
Handling Heavy Objects and Materials	22	Measuring Systems, Fasteners, and Thread Repair	57
Using Personal Protective Equipment	23	Learning Objectives	57
Protecting Your Eyes and Face	23	Introduction	58
Protecting Your Lungs	24	Measurement Systems	58
Protecting Your Hearing	25	The Conventional System	58
Proper Attire	25	The Metric System	58
Protecting Your Feet and Legs	25	Fasteners	59
Protecting Your Hands and Arms	25	The Nuts and Bolts of Bolts and Nuts	59
Using Tools Safely	26	Fastener Anatomy	59
Using Hand Tools Safely	26	Thread Types	60
Using Power Tools Safely	26	Bolt Grades	61
Compressed Air Safety	27	Bolts Types	61

Nuts	63	Starting Devices	89
Washers	64	Piston	89
Thread-Locking Agents and Sealers	65	Cylinder and Cylinder Head	89
Inspection and Cleaning of Threaded Fasteners	66	Engine Cooling	89
Stresses on Threaded Fasteners	67	Air-Cooled Engines	90
Preload	68	Liquid-Cooled Engines	90
Tips for Working with Threaded Fasteners	69	Engine Configurations	91
Tightening and Torque	69	Single Cylinder Engines	91
Torque	70	Horizontally Opposed Twin-Cylinder Engines	91
Torque Wrenches	70	V-Twin Engines	91
Repairing and Replacing Broken Fasteners	72	Summary	92
Screw Extractors	72	Chapter 5 Review Questions	92
Drilling and Re-Tapping	73		
Thread Inserts	73	CHAPTER 6	
Summary	74	Internal Combustion Engines	93
Chapter 4 Review Questions	75	Learning Objectives	93
		Introduction	94
CHAPTER 5		General and Scientific Terms and Laws	94
Basic Engine Operation and Configurations	76	Matter	94
Learning Objectives	76	Viscosity	95
Basic Engine Operation	77	Boyle's Law	95
Reciprocating Engines	77	Pressure Differences	95
Four-Stroke Basic Engine Operation	78	Momentum	95
Two-Stroke Basic Engine Operation	78	Laws of Motion	95
Engine Ratings	79	Energy	95
Work	79	The Basic Internal Combustion Process	96
Horsepower	80	Construction of the Internal Combustion Engine	96
Torque	81	The Three Phases of Internal Combustion	97
Engine Displacement	82	Results of Combustion	98
Compression Ratio	83	Internal Combustion Engine Operation	98
Basic Four-Stroke Engine Components	83	Basic Four-Stroke Engine Components	99
Cylinder Block/Crankcase	84	Four-Stroke Cylinder Heads	99
Crankshaft	85	Four-Stroke Camshafts	102
Seals	85	Four-Stroke Cylinders	104
Bearings	85	Four-Stroke Pistons	104
Gaskets	85	Four-Stroke Piston Rings	105
Piston	85	Four-Stroke Crankshafts	106
Cylinder Head	86	Four-Stroke Connecting Rods	106
Counter-Balancer	87	Four-Stroke Crankcase	107
Starting Devices	87	Theory of Operation of the Four-Stroke Engine	107
Basic Two-Stroke Engine Components	88	Valve Operation	107
Cylinder Block/Crankcase	88	Fuel Induction	107
Crankshaft	88	The Strokes of a Four-Stroke Engine	108
Seals and Bearings	88	Two-Stroke Engines	109
Gaskets	89	Two-Stroke Engine Components	109

Two-Stroke Engine Cylinder Heads	109	Seals	131
Two-Stroke Cylinders	110	Two-Stroke Engine Lubrication	131
Two-Stroke Pistons	110	Premixed Fuel and Oil	132
Two-Stroke Piston Rings	111	Oil Injection	132
Two-Stroke Crankshafts	112	Four-Stroke Engine Lubrication	134
Two-Stroke Engine Connecting Rods	112	Wet-Sump Lubrication	135
Two-Stroke Engine Crankcases	112	Oil Circulation	135
Theory of Operation of the Two-Stroke Engine	112	Oil Pressure Relief Valve	137
The Four Events of Two-Stroke Engine Operation	113	Oil Filters	138
Two-Stroke Engine Areas	113	Oil Filter Bypass Valves	138
Two-Stroke Engine Ports	113	Oil Passages	138
Two-Stroke Engine Events	114	Cooling Systems	138
Two-Stroke Engine Induction Systems	116	Air Cooling	139
Piston Port Induction	116	Liquid Cooling	139
Reed Valve Induction	116	Liquid-Cooling System Testing	143
Rotary Valve Induction	118	Summary	144
Two-Stroke Exhaust Systems	119	Chapter 7 Review Questions	144
Comparing Two-Stroke and Four-Stroke Engines	119	CHAPTER 8	
Advantages of the Two-Stroke Engine	119	Fuel Systems	145
Disadvantages of the Two-Stroke Engine	119	Learning Objectives	145
Comparison Tables	120	Introduction	146
Summary	120	Fuel	146
Chapter 6 Review Questions	120	Oxygen	147
CHAPTER 7		The Carburetor	147
Lubrication and Cooling Systems	122	Principle of Atomization	148
Learning Objectives	122	The Venturi Principle	148
Introduction	123	Fuel Delivery Systems	149
Lubricants and Lubrication	124	Fuel Tank	149
Cooling	124	Fuel Valves	149
Cleaning	125	Fuel Lines	150
Sealing	125	Fuel Pumps	150
Lubricating	125	Vent Hoses	151
Types of Engine Oils	125	Fuel Filters	151
Oil Classification	126	Adjustment Screws	151
Specialty Lubricants	128	Air Filters	152
Friction-Reducing Devices	128	Carburetor Types and Operation	153
Ball Bearings	129	Cold Start Systems	156
Roller Bearings	129	Types of Carburetors	157
Tapered Roller Bearings	129	Fuel Injection	166
Needle Bearings	129	Direct Fuel Injection	167
Plain Bearings	129	Indirect Fuel Injection	167
Bushings	131	Fuel Injection System Components	167
		Basic Operation of the Fuel Injection System	172
		Summary	172
		Chapter 8 Review Questions	173

CHAPTER 9		Inspecting the Multi-Piece Crankshaft	208
Throttle and Governor		Bench Testing	209
Control Systems	174	Summary	209
Learning Objectives	174	Chapter 11 Review Questions	210
Introduction	175		
Manual Throttle Control	175	CHAPTER 12	
Choke and Engine Shut-Off		Four-Stroke Engine Inspection	211
Switch Linkage	177	Learning Objectives	211
Governor Throttle Control	177	Introduction	212
Engine Speed and Load	177	Diagnosis	212
Air Vane Governors	178	Repair Procedures	213
Centrifugal Governors	180	Four-Stroke Engine Top End Disassembly	
Summary	182	and Inspection	214
Chapter 9 Review Questions	182	Draining Fluids and Removing External	
		Components	215
CHAPTER 10		Cylinder Head Removal	216
Two-Stroke Engine		Cylinder Head Inspection	217
Top End Inspection	184	Four-Stroke Engine Valves	219
Learning Objectives	184	Inspecting Valve Guides	223
Introduction	185	Reconditioning Valve Seats	226
Diagnostics	185	Valve Lapping	229
Repair Procedures	186	Removal and Inspection of Piston and Rings	230
Disassembly of the Two-Stroke		Measuring the Cylinder	238
Engine Top End	186	Piston Ring Installation	239
Cleaning and Inspection of the		Common Bottom End Engine Failures	240
Two-Stroke Engine Top End	188	Leaking Engine Seals	240
Cleaning Top End Components	189	Worn Crankshaft Bearings	240
Cylinder and Cylinder Head Inspection	189	Worn Connecting-Rod Bearings	241
Piston Assembly Inspection	191	Four-Stroke Engine Bottom End Inspection	242
Starting the Reassembled Rebuilt Engine	200	Inspecting the Engine Block/Crankcase	242
Engine Break-In	200	Inspecting Engine Seals	242
Summary	200	Inspecting Engine Bearings	242
Chapter 10 Review Questions	200	Inspecting the Oil Pump	244
		Inspecting the Crankshaft	245
CHAPTER 11		Inspecting the Camshaft	245
Two-Stroke Engine Bottom		Four-Stroke Engine Reassembly	246
End Inspection	201	Installing the Crankshaft and the Oil Pump	246
Learning Objectives	201	Installing the Camshaft	246
Introduction	202	Installing the Piston	247
Common Bottom End Engine Failures	202	Installing the Crankcase Cover	247
Repair Procedures	203	Installing Valves	248
Two-Stroke Engine Removal and Disassembly	203	Checking and Adjusting Valve Clearance	248
Two-Stroke Engine Bottom End Inspection	203	Bench Testing	248
Inspecting the Engine Crankcase	204	Engine Break-In	249
Inspecting and Replacing Engine Seals	205	Summary	249
Inspecting and Replacing Engine Bearings	206	Chapter 12 Review Questions	250
Inspecting the Crankshaft	207		

CHAPTER 13			
Fundamentals of Electricity	251	The Battery	288
Learning Objectives	251	Charging System Operation	292
Introduction	252	Types of Charging Systems	292
Safety Precautions with Electricity	252	Half-Wave Charging System	292
Basics of Electricity	253	Full-Wave Charging System	295
Electricity Theories	254	Three-Phase Permanent-Magnet Charging System	295
Atoms	254	Three-Phase Excited-Field Electromagnet Charging System	295
The Battery	256	Charging System Inspection	297
Capacitors	257	Hand Tools for Electrical Work	297
Circuits	257	Battery Inspection	299
Properties of Electricity	259	Rectifier/Regulator Inspection	301
Units of Electricity	260	Alternator Inspection and Testing	302
Amperes (Current)	260	DC Electrical Circuits	304
Volts (Voltage)	260	Switches	305
Ohms (Resistance)	260	Headlight Circuits	305
Watts (Electrical Power)	261	Turn-Signal and Hazard Relay Circuits	305
Common Electricity Quantities	262	Warning Lights	306
Relation Between Current, Voltage, and Resistance	262	Summary	306
Alternating Current, Direct Current, and Voltage	263	Chapter 14 Review Questions	307
Electrical Meters and Measurements	264	CHAPTER 15	
Electrical Meters	264	Ignition and Electric Starting Systems	309
Multi-meter Operation	266	Learning Objectives	309
Magnetism	269	Introduction	310
Types of Magnets	270	Power Equipment Engine Ignition Systems	310
Magnetic Forces	270	Ignition Timing	311
AC Generator Operation	272	Basic Ignition System Components	313
Solenoids	272	Power Sources	314
Electromagnetism in Motors	273	Ignition Switch	314
Electronic Devices	274	Ignition Coil	314
Electronic Components	274	Spark Plug	315
Electrical Schematics and Symbols	276	Triggering Switch Devices	318
Electricity Terms	276	Stop Switch	321
Summary	281	Types of Ignition Systems	321
Chapter 13 Review Questions	281	Magneto Ignition Systems	321
CHAPTER 14		Battery-and-Points Ignition Systems	323
Power Equipment Engine Charging Systems and DC Circuits	283	Electronic Pointless Ignition Systems	324
Learning Objectives	283	Electric Starter Systems	328
Introduction	284	DC Motor Operating Principle	328
Charging Systems	284	Starter Motor Construction	330
The Alternator	284	Starter Solenoids	331
The Rectifier and the Voltage Regulator	287	Starter Clutches	331
		Summary	332
		Chapter 15 Review Questions	333

CHAPTER 16		CHAPTER 17	
Power Equipment Engine Maintenance	334	Power Equipment Engine Troubleshooting	355
Learning Objectives	334	Learning Objectives	355
Introduction	335	Introduction	356
Maintenance Intervals	335	Systematic Approaches to Solving Problems	357
Maintenance Process Order	337	Types of Problems	357
Power Equipment Engine Maintenance	337	The Troubleshooting Process	357
Good Maintenance Begins		Troubleshooting Guides	358
with a Clean Machine	337	Engine Problem Troubleshooting	359
Oil and Oil Filter Inspection		Drivetrain Troubleshooting	361
and Replacement	337	Fuel System Troubleshooting	362
Cooling System Inspection	339	Does It Run Rich or Lean?	362
Compression and Leak-Down Tests	340	When Is the Problem Apparent?	362
Valve Adjustment (Four-Stroke Engines)	342	Other Fuel-System-Related Problems	364
Spark Plug Inspection and		Electronic Fuel-Injection System	
Replacement	343	Troubleshooting	364
Battery Inspection	346	Electrical Problem Troubleshooting	367
Ignition System Inspection		Charging-System Troubleshooting	367
and Adjustment	349	Ignition-System Troubleshooting	369
Idle and Fuel Screw Adjustment	349	DC Circuit Troubleshooting	370
Air Filter Inspection	350	Electric Starter-Motor Troubleshooting	371
Power Equipment Engine		Abnormal Noise Troubleshooting	372
Storage Procedures	353	Summary	373
Preparing an Engine for Storage	353	Chapter 17 Review Questions	373
Removing an Engine from Storage	353		
Summary	354	APPENDIX A-E	374
Chapter 16 Review Questions	354	GLOSSARY	380
		INDEX	389
