

TRANSPORT OF THE CRITICAL CARE PATIENT

Rosemary Adam, RN, EMT-P
Chris Cebollero, CCEMT-P

Contents

1 Foundations of Critical Care Transport, 1

- Ethical and Legal Decision Making, 1
 - Ethical Decision Making, 1
 - Legal Decision Making, 2
 - Legal Considerations, 2
- Federal Rules in Health Care and Transport, 5
 - Medicare, 5
- Federal Rules of Transfer, 7
 - Emergency Medical Treatment and Active Labor Act (EMTALA), 7
 - Consolidated Omnibus Budget Reconciliation Act of 1986, 7
 - Emergency Medical Condition, 7
 - EMTALA Investigations, 7
 - Hospital Transfer Regulations, 7
 - Penalties for EMTALA Violations, 8
 - Physician and Nurse Reports to Receiving Hospitals, 8
 - Hand-Off Report, 8
 - Documentation, 9

2 Pharmacology, 15

- Anatomy and Physiology Related to Pharmacology, 15
 - Autonomic Nervous System, 16
 - Neurotransmitters, 16
- Pharmacokinetics, 17
 - Absorption, 18
 - Distribution, 18
 - Metabolism, 18
 - Excretion, 18
- Pharmacodynamics, 18
 - Age, 18
 - Genetics, 18
 - Body Mass, 18
 - Disease State, 18
 - Environmental Factors, 19
 - Mechanism of Action, 19
- Drug Action, 19
 - Plasma Level Profile, 19
 - Biologic Half-Life, 19
 - Therapeutic Threshold, 20
 - Therapeutic Index, 20
 - Drug Effect, 20

- Cardiovascular Medications, 21
 - Antiarrhythmics, 21
 - Antihypertensives, 21
 - Antiplatelet Agents, Anticoagulants, and Fibrinolytics, 22
 - Electrolytes, 22
 - Respiratory Medications, 22
 - Gastrointestinal Medications, 22
 - Antiemetics, 23
 - Endocrine Medications, 23
 - Immune System Agents, 23
 - Antibiotics and Antiviral and Antifungal Agents, 23
 - Antiretroviral Agents, 23
 - Neurologic Medications, 24
 - Benzodiazepines, 24
 - Anticonvulsants, 24
 - Analgesics and Sedatives, 24
 - Antipsychotic Agents, 24
 - Neuromuscular Blocking Agents, 25
 - Drug Calculations, 25
 - Calculating the Appropriate Volume Dose, 25
 - Calculating Medication Infusions, 25
 - Calculating a Fluid Infusion Over Time, 25
 - Drug Administration Techniques, 26
 - Intravenous Lines, 26
 - Central Venous Access Devices, 27
 - Intravenous Pressure Bags, 30
 - Intravenous Infusion Sets, 30
 - Pump Systems, 30
 - Alternative Routes of Medication Administration, 30
-
- ## 3 Respiratory System, 35
- Respiration and Ventilation, 36
 - Anatomy and Physiology, 36
 - Airway and Airway Patency, 36
 - Assessment, 38
 - Assessment of the Airway, 38
 - Cough and Airway Assessment, 40
 - Assessment of the Respiratory System—Look, Listen, and Feel, 40

- Diagnostics, 42
 - Imaging, 42
 - Pulmonary Function Testing, 43
 - Laboratory Assessment, 44
- Disorders of the Airway and Respiratory System, 50
 - Threat to the Airway or Airway Compromise, 50
 - Special Airway Techniques, 61
 - Medication-Assisted Intubation, 67
- Disease Processes of the Respiratory System, 75
 - Acute Respiratory Failure, 75

4 Cardiovascular System, 99

- Anatomy and Physiology, 99
 - Atria, 99
 - Ventricles, 100
 - Atrioventricular Valves, 100
 - Semilunar Valves, 100
 - Coronary Arteries, 100
 - Major Cardiac Vessels, 102
 - Cardiac Cycle, 103
 - Factors That Affect Cardiac Performance, 104
 - Blood Flow, 107
 - Neuroregulation of the Heartbeat, 108
 - Electrophysiology of the Heart, 109
- Assessment, 110
 - Global Findings, 111
 - Regional Findings, 111
 - Local Findings, 111
 - Cellular Findings, 111
 - Physical Assessment, 111
- Diagnostic Tools, 113
 - Vital Signs, 114
 - Multilead Electrocardiogram, 120
 - Cardiac Auscultation, 120
 - Laboratory Analysis and Abnormalities in the Cardiac Patient, 123
 - Radiographic, Ultrasound, and MRI Examinations, 127
 - Diagnostic Cardiac Catheterization and Percutaneous Catheter Intervention, 131
 - Electrophysiology Studies, 132
 - Hemodynamic Monitoring, 132
- Disease Processes and Management of the Cardiac Patient, 141
 - Conductive Disorders, 141
 - Myocardial Ischemia and Acute Coronary Syndromes, 143
 - Inflammation, 148
 - Mechanical Disorders, 149
 - Cardiomyopathy, 159
 - Cardiac Tamponade, 160
 - Aortic Dissection, 160
 - Physiologic Disorders, 162

5 Neurologic System, 169

- Neurologic Anatomy and Physiology, 169
 - Divisions of the Nervous System, 170

- Microstructure, 170
- Central Nervous System, 171
- Brain, 172
- Spinal Cord, 180
- Autonomic Nervous System, 183
- CSF, Intracranial, and Cerebral Perfusion Pressures, and Autoregulation, 183
- Neurologic Assessment, 185
 - Obtaining the Patient History, 185
 - Physical Examination, 186
- Diagnostic Evaluation of Neurologic Conditions, 194
 - Head and Spine Radiographs, 194
 - Computed Tomography, 196
 - Magnetic Resonance Imaging, 196
 - Cerebral Angiography, 197
 - Doppler Studies and Positron Emission Tomography, 197
 - Electrophysiology Studies, 197
 - Lumbar Puncture, 197
 - Cerebral Oxygenation Monitoring, 197
- Disease Processes of the Neurologic System, 198
 - Coma, 198
 - Traumatic Brain Injury, 198
 - Stroke, 200
 - Intracranial Masses, 204
 - Syndrome of Inappropriate Antidiuretic Hormone and Diabetes Insipidus, 206
 - Intracranial Hypertension, 206
 - Other Neurologic Disorders, 213
 - Vertebral Column and Spinal Cord Injury, 214

6 Gastrointestinal and Renal Systems, 224

- GASTROINTESTINAL SYSTEM, 224
- Anatomy and Physiology, 224
 - Mouth, 225
 - Pharynx, 225
 - Esophagus, 225
 - Stomach, 226
 - Small Intestine, 227
 - Large Intestine, 228
 - Rectum, 228
 - Accessory Organs, 228
 - Structural Support and Arterial Blood Supply to the GI Tract, 230
- Assessment of the GI Tract, 230
 - History, 230
 - Inspection, 231
 - Auscultation, 232
 - Percussion, 232
 - Palpation, 232
- Diagnostics and Laboratory Values, 232
 - Laboratory Tests for the GI Tract, 232
- Disorders and Management of the GI System, 233
 - Gastrointestinal Bleeding, 233

Pancreatitis, 244
Liver Failure, 246
Abdominal Surgery, 250
Nutrition, 252

RENAL SYSTEM, 256

Anatomy and Physiology, 256
Structure of the Nephron, 257
Urine Formation, 258
Functions of the Kidneys, 261
Electrolyte Balance, 262
Assessment of the Genitourinary Tract, 263
History, 263
Physical Assessment, 264
Diagnostics and Laboratory Values, 265
Laboratory Tests, 265
Disease Processes and Management of the Renal System, 266
Acute Renal Failure, 266
Chronic Renal Failure, 269

7 Multisystem Trauma, 282

The Disease of Trauma, 283
Clinical Assessment of the Trauma Patient, 283
Primary Assessment and Management, 283
Secondary Assessment, 285
Packaging for Transport, 285
Diagnostic Procedures, 285
Laboratory Values, 285
Radiographs, 285
Bedside Ultrasound for the Trauma Patient, 287
Review and Management of Major Traumatic Injuries, 288
Thoracic Injuries, 288
Shock, 296
Head and Spinal Cord Injuries, 300
Abdominal Injuries, 302
Burns, 302

8 Multisystem Organ Dysfunction Syndrome and Systemic Inflammatory Response Syndrome, 310

Anatomy and Physiology of the Immune System, 311
Antibodies and Complement Proteins, 311
Cells of the Immune System, 311
Inflammatory Cellular Response, 311
Immunity, 312
Diagnostics, 313
Laboratory Tests and Microbiology, 313
Radiographs, 314
Disease Processes and Management, 314
Pathogens, 314
Sepsis, 316
Disseminated Intravascular Coagulation, 321
Multisystem Organ Dysfunction Syndrome, 323

9 Special Patient Groups in Critical Care, 332

Critical Care of the Obstetric Patient, 332
Anatomy and Physiology of Pregnancy, 332
Pulmonary System, 333
Cardiovascular System, 333
Endocrinologic System, 334
Hematologic System, 334
Gastrointestinal and Genitourinary Systems, 334
Reproductive System, 334
Assessment of the Obstetric Patient, 335
Position, 335
Obstetric History, 335
Assessment of Gestational Age, 335
Fetal and Uterine Monitoring, 335
Diagnostics for an Obstetric Patient, 336
Laboratory Testing, 336
Ultrasound Testing, 337
Radiography, 337
Magnetic Resonance Imaging, 337
Conditions That Affect the Healthy Obstetric Patient, 337
Preexisting Conditions, 337
Illness and Injury in a Healthy Obstetric Patient, 338
Critical Care Transport of Neonatal and Pediatric Patients, 343
Anatomy and Physiology of the Neonatal and Pediatric Patient, 344
Airway Differences, 344
Differences in Breathing, 345
Differences in Circulation, 345
Difference in the Central Nervous System, 346
Differences in Temperature and Environment Regulation, 346
Differences in Hepatic and Renal Physiology Pharmacologic Applications, 347
Assessment of the Neonatal and Pediatric Patient, 347
Pediatric Assessment Triangle, 347
Assessing for Shock, 347
Diagnostics, 348
Laboratory Values, 348
Lumbar Puncture, 350
Imaging and Radiographs, 350
Invasive Hemodynamic Monitoring, 350
Special Equipment and Procedures, 350
Cardiovascular Mechanical Support, 350
Disease Processes and Management of the Neonatal and Pediatric Patient, 351
Airway Compromise, 351
Respiratory Failure, 352
Cardiovascular Failure, 355
Nervous System Disease, 357
Trauma, 357
Hypoglycemia, 358
Child Abuse, 358
Cardiopulmonary Arrest in Children, 359

- Care and Transport of Neonatal and Pediatric Patients, 359
 - Special Considerations, 359
 - Neonatal Transport, 360
- Training for Neonatal and Pediatric Transport, 362
 - Transport Team, 362
 - Educational Programs for Neonatal and Pediatric Transport, 362
 - Continuing Education, 363
 - Transport Safety for Pediatric Patients, 365
 - Family-Centered Care and Family Presence During Treatment, 366
 - Injury Prevention for Pediatric Patients, 367
- CRITICAL CARE OF THE GERIATRIC PATIENT, 367
 - Older Patients and Critical Care, 367
