

How Design and behaviour from bridges to buildings Structures Work

David Yeomans

 WILEY-BLACKWELL

Contents

<i>Preface</i>	ix
1 Brackets and Bridges	1
Cooper's tragedy	2
The Forth Bridge	4
Members in compression	7
The Quebec Bridge	8
Forces in a bracket	9
The design process	13
Stresses	14
2 Stiffening a Beam – Girder Bridges	17
The simple truss	23
Tension trusses	27
Girder bridges: the Forth Bridge	32
3 Arches and Suspension Bridges	34
Building an arch	35
Blackfriars Bridge	38
Pontypridd Bridge	40
The forces in an arch	40
Practical issues	42
Forces within the arch ring	44
Edwards's failure	50
An unexpected failure	51
Arch with point load	52
Iron and concrete arches	53
The suspension bridge	56
Arches in buildings – flying buttresses	58
Arches in walls	61
4 Bringing the Loads to the Ground – The Structural Scheme	65
Introduction	65
The alternatives	66
Choices	68
Nature of the loads	71

	'Flow of forces', or action and reaction	73
	Describing the structure	75
	Structures are three-dimensional	77
5	Safe as Houses? – Walls	80
	Bricks and mortar	81
	Point loads and openings	86
	Cavity walls	90
	Thick walls	91
	Foundation loads	94
	Horizontal loads	97
	Foundation stresses	101
6	Frames – A Problem of Stability	104
	Timber framing	105
	Bracing forces	112
	Bending in the post	113
	Light frame construction	114
	The coming of iron	116
	The frame today	124
	The multi-storey frame	127
	Columns	131
7	Floors and Beams – Deflections and Bending Moments	135
	The need for science	141
	Floors and deflections	142
	The forces in the beam	143
	Strain	144
	Galileo's cantilever	146
	Finding the stresses	149
	From cantilever to beam	149
	Iron and steel beams	151
	Cast iron	152
	Reinforced and prestressed concrete	155
	Reinforced concrete beams	157
	Prestressing	159
	Two-way floors	163
	Other structures in bending	168
8	Providing Shelter – Roofs	174
	Common rafter roofs	175
	Purlin roofs	180
	Longitudinal stability	187

The roof truss	190
The coming of iron	192
Three-dimensional roofs	194
9 Structures in a Three-dimensional World	200
Vaults	200
The pointed vault	204
Elaborations on the basic vault form	206
Building vaults	208
Domes	209
A dome analysis	212
Some historical examples	215
The modern three-dimensional structure	218
Anticlastic forms	223
Structures in tension	225
Structures for their time and place	227
<i>Appendix: Some Elements of Grammar</i>	228
<i>Glossary</i>	233
<i>Index</i>	243
