<i>List of Figures</i>	xvii
<i>List of Tables</i>	xix

Part I: Basis — Energy Considerations

1. Introduction	3
1.1 Is There a Problem?	3
1.2 Where Does Energy Come From?	3
1.3 Conservation of Energy	8
1.4 Where Does the Gasoline get Its Energy?	8
1.5 Fossil Fuel Sources	10
1.6 The Carbon Dioxide Problem	12
References	13
2. What To Do About It?	15
2.1 The Possibilities	15
2.2 Using Less Energy	15
2.3 Lifestyle Changes	17
2.4 Food Supply	18
2.5 Transportation	20
2.6 Conservation	23
2.7 Alternative Energy Sources	23
References	24

Contents

3.	Thermodynamics	25
3.1	The First Law of Thermodynamics	28
3.2	Some Examples of the First Law	29
3.3	The Second Law of Thermodynamics	32
3.4	A Reflection	37
	References	38
4.	Conservation	41
4.1	The Nature of Conservation	42
4.2	Change in Nature of Housing	45
4.3	Energy Consuming Devices	49
4.4	Transportation	50
4.5	Hybrids and Fuel Efficient Cars	54
4.6	Planes, Buses, Trucks, and Trains	57
4.7	Centralized Agriculture	58
4.8	Electrical Power Conservation	58
4.9	Other Factors that Might be Considered	62
4.10	An Overview of the Conservation Approach	65
4.11	Considerations for Bringing Conservation About	65
4.12	Summary	66
	References	67

Part II: Present Energy Sources

5.	Fossil Fuels	71
5.1	Coal	71
5.2	What About Oil?	74
5.3	Gasification of Coal	77
5.4	Natural Gas as a Fuel	79
5.5	Synthetic Oil	81
5.6	Oil Sands	82
	References	83

Part III: Alternate Energy Sources

6.	Alternative Energy Sources	89
6.1	The Problem with Fossil Fuels	89

6.2	The Sun is the Ultimate Source of Most Energy . . .	89
6.3	“Blue-Sky” Ideas	93
	References	95
7.	Biofuels	97
7.1	Why Biofuels?	97
7.2	Burning Wood	100
7.3	Biodiesel	104
7.4	Alcohol as a Biofuel	106
7.5	The Preparation of Biofuels by Pyrolysis	109
7.6	Energy from Trash	111
7.7	Synthetic Photosynthesis	113
7.8	Hydrocarbons	114
	References	115
8.	Wind and Water	117
8.1	Wind Power	117
8.2	Hydroelectric Power	120
8.3	Tidal and Wave Energy	124
8.4	Overview	126
	References	126
9.	Geothermal	129
9.1	Introduction	129
9.2	Hot Springs	129
9.3	Heat Pumps	131
9.4	General Considerations	132
	References	132
10.	Solar Energy	133
10.1	The Sun’s Energy	133
10.2	Conclusion	141
	References	141
11.	Nuclear Energy	143
11.1	Principles	143

Contents

11.2	Nuclear Reactions	144
11.3	The Future	157
	References	157

Part IV: Conclusions **161**

12.	Overview	163
12.1	Economics	164
12.2	Timing	174
12.3	Political Considerations	177
	References	182

	Index	185
