

Contents

| | |
|--|-----------|
| <i>Contributors</i> | xiii |
| <i>Preface</i> | xxiii |
| 1 Tissue Engineering: From Basic Biology to Cell-Based Applications | 1 |
| <i>Robert M. Nerem</i> | |
| 1. Introduction | 1 |
| 2. Cell Source | 3 |
| 3. Stem Cells | 5 |
| 4. From Benchtop Science to Cell-Based Applications | 7 |
| 5. Concluding Comments | 8 |
| Acknowledgments | 8 |
| References | 9 |
| 2 Recent Advances and Future Perspectives on Somatic Cell Reprogramming | 13 |
| <i>Kun-Yong Kim and In-Hyun Park</i> | |
| 1. Introduction | 13 |
| 2. Nuclear Reprogramming | 14 |
| 3. Reprogramming by Defined Factors | 16 |

Contents

| | |
|--|-----------|
| 4. Recent Advances in Reprogramming Methods | 17 |
| 5. Future Perspectives on Reprogramming and iPS Cells | 19 |
| Acknowledgments | 23 |
| References | 23 |
| 3 Hematopoietic Stem Cells | 31 |
| <i>Jennifer J. Trowbridge</i> | |
| 1. Introduction | 31 |
| 2. Hematopoietic Stem Cell Sources | 32 |
| 3. Applications | 36 |
| 4. Challenges for Tissue Engineering | 37 |
| Acknowledgments | 41 |
| References | 42 |
| 4 Mesenchymal Stem Cells for Tissue Regeneration | 49 |
| <i>Ngan F. Huang and Song Li</i> | |
| 1. Introduction | 49 |
| 2. MSC Sources and Phenotype | 50 |
| 3. Differentiation of MSCs <i>in vitro</i> | 52 |
| 4. Tissue Engineering and Regeneration Using Bone Marrow MSCs and ASCs | 54 |
| 5. Future Directions | 61 |
| Acknowledgments | 62 |
| References | 62 |
| 5 Delivery Vehicles for Deploying Mesenchymal Stem Cells in Tissue Repair | 71 |
| <i>Michael S. Friedman and J. Kent Leach</i> | |
| 1. Introduction | 71 |
| 2. Delivery of MSCs for Repairing Cardiovascular Tissues | 72 |
| 3. Delivery Vehicles for Deploying Stem Cells in Skin Regeneration | 78 |
| 4. Biomaterials for Implanting MSCs for Regenerating Osteochondral Tissues | 81 |
| 5. Conclusions | 88 |
| References | 88 |

Contents

| | | |
|----------|---|------------|
| 6 | Stem Cells for Cardiac Tissue Engineering | 95 |
| | <i>Jennifer L. Young, Karen L. Christman and Adam J. Engler</i> | |
| 1. | Cell Therapies for Myocardial Infarction and Heart Failure | 95 |
| 2. | Cellular Cardiomyoplasty Revisited: The Influence of <i>in vitro</i> Mechanics | 98 |
| 3. | Tissue Engineering Approach: Utilizing Biomaterial Scaffolds | 102 |
| | References | 107 |
| 7 | Cardiovascular System: Stem Cells in Tissue-Engineered Blood Vessels | 115 |
| | <i>Rajendra Sawh-Martinez, Edward McGillicuddy, Gustavo Villalona, Toshiharu Shin'oka and Christopher K. Breuer</i> | |
| 1. | Introduction | 115 |
| 2. | Critical Elements of an Artificial Blood Vessel | 117 |
| 3. | Approaches to Creating TEBVs | 119 |
| 4. | Conclusion | 127 |
| | Acknowledgments | 128 |
| | References | 128 |
| 8 | Stem Cells for Vascular Regeneration: An Engineering Approach | 135 |
| | <i>Laura E. Dickinson and Sharon Gerecht</i> | |
| 1. | Introduction | 135 |
| 2. | Cell Sources | 136 |
| 3. | Engineering Vascular Differentiation | 141 |
| 4. | Three-Dimensional Space | 142 |
| | Acknowledgments | 152 |
| | References | 152 |
| 9 | Stem Cells and Wound Repair | 159 |
| | <i>Sae Hee Ko, Allison Nauta, Geoffrey C. Gurtner and Michael T. Longaker</i> | |
| 1. | Clinical Burden of Wound Healing | 159 |

Contents

| | |
|---|------------|
| 2. Physiology of Wound Healing | 161 |
| 3. Stem Cells and Wound Repair | 165 |
| 4. Conclusion | 173 |
| References | 174 |
| 10 Engineering Cartilage: From Materials to Small Molecules | 181 |
| <i>Jeannine M. Coburn and Jennifer H. Elisseeff</i> | |
| 1. Introduction | 181 |
| 2. Structure of Articular Cartilage of the Knee | 181 |
| 3. Osteoarthritis of the Knee | 183 |
| 4. Surgical Strategies for Repairing Focal Cartilage Defects | 185 |
| 5. Scaffolds for Assisting Operative Techniques | 187 |
| 6. Mesenchymal Stem Cells for Cartilage Tissue Engineering | 192 |
| 7. Hydrogels for Directed Differentiation of Mesenchymal Stem Cells | 193 |
| 8. Fiber-Hydrogel Composites | 197 |
| 9. Small Molecules for Directing Chondrogenesis | 199 |
| 10. Conclusion | 201 |
| Acknowledgments | 202 |
| References | 202 |
| 11 Adult Stem Cells for Articular Cartilage Tissue Engineering | 211 |
| <i>Sushmita Saha, Jennifer Kirkham, David Wood, Stephen Curran and Xuebin B. Yang</i> | |
| 1. Introduction | 211 |
| 2. Human Bone Marrow Mesenchymal Stem Cells (hBMMSCs) | 213 |
| 3. Adipose Derived Mesenchymal Stem Cells (ASCs) | 216 |
| 4. Periosteum Derived Stem/Progenitor Cells (PDSCs/PDPCs) | 217 |
| 5. Synovium Derived Mesenchymal Stem Cells (SMSCs) | 218 |
| 6. Human Dental Pulp Stem Cells (HDPSCs) | 219 |
| 7. Umbilical Cord/Cord Blood Derived Stem Cells | 220 |

Contents

| | |
|---|------------|
| 8. Other Potential Cell Sources with a Chondrogenic Potential | 220 |
| 9. Conclusion and Future Directions | 222 |
| Acknowledgments | 222 |
| References | 222 |
| 12 Stem Cells for Disc Repair | 231 |
| <i>Aliza A. Allon, Zorica Buser, Sigurd Berven and Jeffrey C. Lotz</i> | |
| 1. Introduction | 231 |
| 2. The Demanding Intervertebral Disc Environment | 233 |
| 3. Evaluating a Stem Cell-Based Therapy | 234 |
| 4. Non-Stem Cell-Based Regeneration Strategies | 236 |
| 5. Stem Cells for Disc Repair | 237 |
| 6. Conclusion | 244 |
| References | 244 |
| 13 Skeletal Tissue Engineering: Progress and Prospects | 251 |
| <i>Nicholas J. Panetta, Deepak M. Gupta and Michael T. Longaker</i> | |
| 1. Introduction | 251 |
| 2. Lessons Learned from Endogenous Skeletal Tissue Development, Healing and Regeneration | 255 |
| 3. Progenitor Cell-Based Skeletal Tissue Engineering | 257 |
| 4. Pro-osteogenic Molecular Biology | 261 |
| 5. Advances in Skeletal Tissue Engineering Scaffolds | 266 |
| 6. Summary and Future Directions | 268 |
| References | 269 |
| 14 Clinical Applications of a Stem Cell Based Therapy for Oral Bone Reconstruction | 277 |
| <i>Bradley McAllister and Kamran Haghighat</i> | |
| 1. Introduction | 277 |
| 2. Procurement Methodology for Stem Cell Containing Allograft | 279 |

Contents

| | |
|--|------------|
| 3. Ridge Augmentation | 282 |
| 4. Sinus Augmentation | 284 |
| 5. Discussion | 289 |
| Acknowledgments | 292 |
| References | 292 |
| 15 Therapeutic Strategies for Repairing the Injured Spinal Cord Using Stem Cells | 297 |
| <i>Michael S. Beattie and Jacqueline C. Bresnahan</i> | |
| 1. Introduction | 297 |
| 2. Secondary Injury and Endogenous Repair After SCI | 299 |
| 3. Therapeutic Targets for Transplanted Stem and Progenitor Cells | 300 |
| 4. Animal Models of Spinal Cord Injury | 301 |
| 5. Types of Stem and Progenitor Cells Used for Transplantation in SCI | 305 |
| 6. Evidence for Effects on Regeneration and Sprouting | 306 |
| 7. Evidence for Effects on Neuroprotection | 307 |
| 8. Evidence for Replacement of Neurons | 307 |
| 9. Evidence for Oligodendrocyte Replacement and Remyelination | 308 |
| 10. Keys to Future Progress | 309 |
| 11. Are Stem and Progenitor Cell Therapies Ready for Clinical Trials? | 311 |
| Acknowledgments | 312 |
| References | 312 |
| 16 Potential of Tissue Engineering and Neural Stem Cells in the Understanding and Treatment of Neurodegenerative Diseases | 321 |
| <i>Caroline Auclair-Daigle and François Berthod</i> | |
| 1. Introduction | 321 |
| 2. Neurodegenerative Diseases and Their Current Treatments | 322 |
| 3. Tissue Engineering as a Tool to Better Understand Neurodegenerative Diseases | 324 |
| 4. Neural Stem Cells to Treat Neurodegenerative Diseases | 329 |

Contents

| | |
|---|------------|
| 5. Conclusion | 339 |
| Acknowledgments | 339 |
| References | 340 |
| 17 High-Throughput Systems for Stem Cell Engineering | 347 |
| <i>David A. Brafman, Karl Willert and Shu Chien</i> | |
| 1. Introduction | 347 |
| 2. Sources of Stem Cells Suitable for High-Throughput Screening Approaches | 348 |
| 3. The Stem Cell Niche: A Cellular Microenvironment That Controls Stem Cell Behavior | 349 |
| 4. High-Throughput Intrinsic Systems for Stem Cell Investigations | 363 |
| 5. Conclusions and Future Trends | 365 |
| References | 367 |
| 18 Microscale Technologies for Tissue Engineering and Stem Cell Differentiation | 375 |
| <i>Jason W. Nichol, Hojae Bae, Nezamoddin N. Kachouie, Behnam Zamanian, Mahdokht Masaeli and Ali Khademhosseini</i> | |
| 1. Introduction | 375 |
| 2. Control of Cellular and Tissue Microarchitecture | 377 |
| 3. Microscale Technologies to Investigate and Control Stem Cell Behavior | 380 |
| 4. Assembly Techniques for Creating Engineered Tissues from Microscale Building Blocks | 385 |
| 5. Conclusions and Future Directions | 391 |
| References | 391 |
| 19 Quality Control of Autologous Cell- and Tissue-Based Therapies | 397 |
| <i>Nathalie Dusserre, Todd McAllister and Nicolas L'Heureux</i> | |
| 1. Introduction | 397 |
| 2. Regulations Pertaining to Quality Control of Cell- and Tissue-Based Products | 398 |

Contents

| | |
|---|------------|
| 3. cGMP, cGTP and Quality System | 401 |
| 4. Core Requirements of a Quality Program | 402 |
| 5. Tailoring Quality Control to the Manufacturing Process | 407 |
| 6. Conclusion | 417 |
| Acknowledgments | 418 |
| References | 418 |
| 20 Regulatory Challenges for Cell-Based Therapeutics | 423 |
| <i>Todd McAllister, Corey Iyican, Nathalie Dusserre and Nicolas L'Heureux</i> | |
| 1. Introduction | 423 |
| 2. Regulatory Challenges at Each Phase of Clinical Development | 425 |
| 3. Regional Considerations for Clinical Trials | 430 |
| 4. Use of a Clinical Research Organization | 435 |
| 5. Universal Regulatory Considerations for Cell-Based Therapeutics | 437 |
| References | 439 |
| <i>Index</i> | 441 |
