

A Beginner's Guide to
**Structural
Equation
Modeling**

Third Edition

Randall E. Schumacker
Richard G. Lomax

Contents

About the Authors	xv
Preface.....	xvii
1 Introduction	1
1.1 What Is Structural Equation Modeling?	2
1.2 History of Structural Equation Modeling	4
1.3 Why Conduct Structural Equation Modeling?	6
1.4 Structural Equation Modeling Software Programs	8
1.5 Summary	10
References	11
2 Data Entry and Data Editing Issues.....	13
2.1 Data Entry	14
2.2 Data Editing Issues	18
2.2.1 Measurement Scale	18
2.2.2 Restriction of Range	19
2.2.3 Missing Data.....	20
2.2.4 LISREL-PRELIS Missing Data Example.....	21
2.2.5 Outliers.....	27
2.2.6 Linearity	27
2.2.7 Nonnormality.....	28
2.3 Summary	29
References	31
3 Correlation	33
3.1 Types of Correlation Coefficients.....	33
3.2 Factors Affecting Correlation Coefficients	35
3.2.1 Level of Measurement and Range of Values.....	35
3.2.2 Nonlinearity	36
3.2.3 Missing Data.....	38
3.2.4 Outliers.....	39
3.2.5 Correction for Attenuation	39
3.2.6 Nonpositive Definite Matrices	40
3.2.7 Sample Size	41
3.3 Bivariate, Part, and Partial Correlations	42
3.4 Correlation versus Covariance.....	46
3.5 Variable Metrics (Standardized versus Unstandardized).....	47
3.6 Causation Assumptions and Limitations.....	48
3.7 Summary	49
References	51

4 SEM Basics	55
4.1 Model Specification.....	55
4.2 Model Identification.....	56
4.3 Model Estimation.....	59
4.4 Model Testing.....	63
4.5 Model Modification	64
4.6 Summary.....	67
References	69
 5 Model Fit	73
5.1 Types of Model-Fit Criteria.....	74
5.1.1 LISREL-SIMPLIS Example	77
5.1.1.1 Data	77
5.1.1.2 Program.....	80
5.1.1.3 Output.....	81
5.2 Model Fit.....	85
5.2.1 Chi-Square (χ^2)	85
5.2.2 Goodness-of-Fit Index (GFI) and Adjusted Goodness-of-Fit Index (AGFI)	86
5.2.3 Root-Mean-Square Residual Index (RMR).....	87
5.3 Model Comparison	88
5.3.1 Tucker-Lewis Index (TLI).....	88
5.3.2 Normed Fit Index (NFI) and Comparative Fit Index (CFI)	88
5.4 Model Parsimony	89
5.4.1 Parsimony Normed Fit Index (PNFI).....	90
5.4.2 Akaike Information Criterion (AIC)	90
5.4.3 Summary.....	91
5.5 Parameter Fit.....	92
5.6 Power and Sample Size	93
5.6.1 Model Fit	94
5.6.1.1 Power.....	94
5.6.1.2 Sample Size	99
5.6.2 Model Comparison.....	108
5.6.3 Parameter Significance.....	111
5.6.4 Summary.....	113
5.7 Two-Step Versus Four-Step Approach to Modeling	114
5.8 Summary.....	116
Chapter Footnote	118
Standard Errors	118
Chi-Squares.....	118
References	120

6 Regression Models	125
6.1 Overview	126
6.2 An Example	130
6.3 Model Specification	130
6.4 Model Identification	131
6.5 Model Estimation	131
6.6 Model Testing	133
6.7 Model Modification	134
6.8 Summary	135
6.8.1 Measurement Error	136
6.8.2 Additive Equation	137
Chapter Footnote	138
Regression Model with Intercept Term	138
LISREL–SIMPLIS Program (Intercept Term)	138
References	139
7 Path Models	143
7.1 An Example	144
7.2 Model Specification	147
7.3 Model Identification	150
7.4 Model Estimation	151
7.5 Model Testing	154
7.6 Model Modification	155
7.7 Summary	156
Appendix: LISREL–SIMPLIS Path Model Program	156
Chapter Footnote	158
Another Traditional Non-SEM Path Model-Fit Index	158
LISREL–SIMPLIS program	158
References	161
8 Confirmatory Factor Models	163
8.1 An Example	164
8.2 Model Specification	166
8.3 Model Identification	167
8.4 Model Estimation	169
8.5 Model Testing	170
8.6 Model Modification	173
8.7 Summary	174
Appendix: LISREL–SIMPLIS Confirmatory Factor Model Program	174
References	177
9 Developing Structural Equation Models: Part I	179
9.1 Observed Variables and Latent Variables	180
9.2 Measurement Model	184

9.3	Structural Model	186
9.4	Variances and Covariance Terms	189
9.5	Two-Step/Four-Step Approach	191
9.6	Summary	192
	References	193
10	Developing Structural Equation Models: Part II	195
10.1	An Example	195
10.2	Model Specification	197
10.3	Model Identification	200
10.4	Model Estimation	202
10.5	Model Testing	203
10.6	Model Modification	205
10.7	Summary	207
	Appendix: LISREL-SIMPLIS Structural Equation Model Program	207
	References	208
11	Reporting SEM Research: Guidelines and Recommendations ...	209
11.1	Data Preparation	212
11.2	Model Specification	213
11.3	Model Identification	215
11.4	Model Estimation	216
11.5	Model Testing	217
11.6	Model Modification	218
11.7	Summary	219
	References	220
12	Model Validation	223
	Key Concepts	223
12.1	Multiple Samples	223
12.1.1	Model A Computer Output	226
12.1.2	Model B Computer Output	227
12.1.3	Model C Computer Output	228
12.1.4	Model D Computer Output	229
12.1.5	Summary	229
12.2	Cross Validation	229
12.2.1	ECVI	230
12.2.2	CVI	231
12.3	Bootstrap	234
12.3.1	PRELIS Graphical User Interface	234
12.3.2	LISREL and PRELIS Program Syntax	237
12.4	Summary	241
	References	243

13 Multiple Sample, Multiple Group, and Structured Means Models	245
13.1 Multiple Sample Models	245
Sample 1	247
Sample 2	247
13.2 Multiple Group Models	250
13.2.1 Separate Group Models	251
13.2.2 Similar Group Model	255
13.2.3 Chi-Square Difference Test	258
13.3 Structured Means Models	259
13.3.1 Model Specification and Identification	259
13.3.2 Model Fit	261
13.3.3 Model Estimation and Testing	261
13.4 Summary	263
Suggested Readings	267
Multiple Samples	267
Multiple Group Models	267
Structured Means Models	267
Chapter Footnote	268
SPSS	268
References	269
14 Second-Order, Dynamic, and Multitrait Multimethod Models	271
14.1 Second-Order Factor Model	271
14.1.1 Model Specification and Identification	271
14.1.2 Model Estimation and Testing	272
14.2 Dynamic Factor Model	274
14.3 Multitrait Multimethod Model (MTMM)	277
14.3.1 Model Specification and Identification	279
14.3.2 Model Estimation and Testing	280
14.3.3 Correlated Uniqueness Model	281
14.4 Summary	286
Suggested Readings	290
Second-Order Factor Models	290
Dynamic Factor Models	290
Multitrait Multimethod Models	290
Correlated Uniqueness Model	291
References	291
15 Multiple Indicator–Multiple Indicator Cause, Mixture, and Multilevel Models	293
15.1 Multiple Indicator–Multiple Cause (MIMIC) Models	293
15.1.1 Model Specification and Identification	294
15.1.2 Model Estimation and Model Testing	294

15.1.3	Model Modification	297
	Goodness-of-Fit Statistics	297
	Measurement Equations	297
	Structural Equations	298
15.2	Mixture Models	298
15.2.1	Model Specification and Identification	299
15.2.2	Model Estimation and Testing	301
15.2.3	Model Modification	302
15.2.4	Robust Statistic	305
15.3	Multilevel Models	307
15.3.1	Constant Effects	313
15.3.2	Time Effects	313
15.3.3	Gender Effects	315
15.3.4	Multilevel Model Interpretation	318
15.3.5	Intraclass Correlation	319
15.3.6	Deviance Statistic	320
15.4	Summary	320
	Suggested Readings	324
	Multiple Indicator–Multiple Cause Models	324
	Mixture Models	325
	Multilevel Models	325
	References	325
16	Interaction, Latent Growth, and Monte Carlo Methods	327
16.1	Interaction Models	327
16.1.1	Categorical Variable Approach	328
16.1.2	Latent Variable Interaction Model	331
	16.1.2.1 Computing Latent Variable Scores	331
	16.1.2.2 Computing Latent Interaction Variable	333
	16.1.2.3 Interaction Model Output	335
	16.1.2.4 Model Modification	336
	16.1.2.5 Structural Equations—No Latent Interaction Variable	336
16.1.3	Two-Stage Least Squares (TSLS) Approach	337
16.2	Latent Growth Curve Models	341
16.2.1	Latent Growth Curve Program	343
16.2.2	Model Modification	344
16.3	Monte Carlo Methods	345
16.3.1	PRELIS Simulation of Population Data	346
16.3.2	Population Data from Specified Covariance Matrix	352
	16.3.2.1 SPSS Approach	352
	16.3.2.2 SAS Approach	354
	16.3.2.3 LISREL Approach	355

16.3.3 Covariance Matrix from Specified Model	359
16.4 Summary	365
Suggested Readings	368
Interaction Models	368
Latent Growth-Curve Models	368
Monte Carlo Methods	368
References	369
17 Matrix Approach to Structural Equation Modeling	373
17.1 General Overview of Matrix Notation	373
17.2 Free, Fixed, and Constrained Parameters	379
17.3 LISREL Model Example in Matrix Notation	382
LISREL8 Matrix Program Output (Edited and Condensed) ..	385
17.4 Other Models in Matrix Notation	400
17.4.1 Path Model	400
17.4.2 Multiple-Sample Model	404
17.4.3 Structured Means Model	405
17.4.4 Interaction Models	410
PRELIS Computer Output	412
LISREL Interaction Computer Output	416
17.5 Summary	421
References	423
Appendix A: Introduction to Matrix Operations	425
Appendix B: Statistical Tables	439
Answers to Selected Exercises	449
Author Index	489
Subject Index	495
