

Interdisciplinary Mathematical Sciences – Vol. 11

Advances in Interdisciplinary Applied Discrete Mathematics

Editors

Hemanshu Kaul

Henry Martyn Mulder

Contents

<i>Preface</i>	vii
<i>Introduction</i>	1
<i>H. Kaul and H.M. Mulder</i>	
1. Contributions of F.R. McMorris to Character Compatibility Analysis	5
<i>G.F. Estabrook</i>	
2. Families of Relational Statistics for 2×2 Tables	25
<i>W.J. Heiser and M.J. Warrens</i>	
3. Applications of Spanning Subgraphs of Intersection Graphs	53
<i>Terry A. McKee</i>	
4. Axiomatic Characterization of Location Functions	71
<i>F.R. McMorris, H.M. Mulder and R.V. Vohra</i>	
5. Median Graphs. A Structure Theory	93
<i>H.M. Mulder</i>	
6. Generalized Centrality in Trees	127
<i>M.J. Pelsmayer and K.B. Reid</i>	
7. Consensus Centered at Majority Rule	149
<i>R.C. Powers</i>	

8.	Centrality Measures in Trees	167
	<i>K.B. Reid</i>	
9.	The Port Reopening Scheduling Problem	199
	<i>F.S. Roberts</i>	
10.	Reexamining the Complexities in Consensus Theory	211
	<i>D.G. Saari</i>	
11.	The Contributions of F.R. McMorris to Discrete Mathematics and its Applications	225
	<i>G.F. Estabrook, T.A. McKee, H.M. Mulder, R.C. Powers and F.S. Roberts</i>	
	<i>Author Index</i>	243
	<i>Subject Index</i>	249
	<i>Symbol Index</i>	257
