

Methods in
ENZYMOLOGY

Volume 476

Guide to Techniques in
Mouse Development, Part A

Mice, Embryos, and Cells
2nd Edition

Edited by

Paul M. Wassarman
and
Philippe M. Soriano

CONTENTS

<i>Contributors</i>	<i>xiii</i>
<i>Preface</i>	<i>xix</i>
<i>Volumes in Series</i>	<i>xxi</i>

Section I. General Resources **1**

1. A Survey of Internet Resources for Mouse Development **3**

Thomas L. Saunders

1. Introduction	4
2. Mouse Embryo Atlases	5
3. Gene Expression Atlases and Databases	8
4. Locating and Acquiring Mutant Mice and Embryonic Stem Cells	13
5. Discussion	16
6. Further Reading	17
References	17

Section II. Handling Mouse Lines **23**

2. Transport of Mouse Lines by Shipment of Live Embryos **25**

Kevin A. Kelley

1. Introduction	26
2. Materials	28
3. Methods	30
4. Results and Discussion	33
References	35

3. Strategies and Considerations for Distributing and Recovering Mouse Lines **37**

Yubin Du, Wen Xie, and Chengyu Liu

1. Introduction	38
2. Shipping Live Mice	39
3. Shipping Nonfrozen Embryos or Gametes	42

4. Archiving and Distributing Mouse Lines Through Cryopreservation	46
5. Conclusion	49
Acknowledgment	50
References	50
4. Archiving and Distributing Mouse Lines by Sperm Cryopreservation, IVF, and Embryo Transfer	53
Hideko Takahashi and Chengyu Liu	
1. Introduction	54
2. Sperm Cryopreservation	55
3. Storing and Shipping Frozen Sperm Samples	59
4. <i>In Vitro</i> Fertilization	61
5. Oviduct Transfer	64
6. Conclusions	67
Acknowledgment	68
References	68
Section III. Gametes and Embryos	71
5. Isolation and Manipulation of Mouse Gametes and Embryos	73
Eveline S. Litscher and Paul M. Wassarman	
1. Introduction	74
2. Materials, Media, and Solutions	74
3. Collection and Storage Conditions	76
4. Sperm-Egg Interactions	80
5. Analysis of the Status of the Sperm's Acrosome	81
6. Visualization of Gold-Labeled Antibody on Sperm	82
Acknowledgments	83
References	83
6. Cryopreservation of Mouse Gametes and Embryos	85
Carlisle P. Landel	
1. Introduction	86
2. Cryopreservation of Mouse Embryos	86
3. Cryopreservation of Spermatozoa	94
4. Cryopreservation of Oocytes and Ovaries	100
5. Troubleshooting	100
6. Beyond the Methods: Other Considerations	101
7. Summary	103
Acknowledgments	103
References	104

7. Ovarian Follicle Culture Systems for Mammals	107
David F. Albertini and Gokhan Akkoyunlu	
1. Background	108
2. 2D Culture Systems	112
3. 3D Culture Systems	115
4. Considerations Based on Species Variations	117
5. Conclusions and Future Considerations	118
Acknowledgments	119
References	119
8. Production of Mouse Chimeras by Aggregating Pluripotent Stem Cells with Embryos	123
Andras Nagy, Kristina Nagy, and Marina Gertsenstein	
1. Introduction	124
2. Methods for Producing Chimeras: General Issues	126
3. Preparation of Donor Embryos	128
4. Preparation of Pluripotent Cells	135
5. Making the Aggregates	138
6. Embryo Transfer to Pseudopregnant Females	142
7. Detection of Chimerism and Testing for Germline Transmission	146
8. Discussion	146
References	147
9. Production of Cloned Mice from Somatic Cells, ES Cells, and Frozen Bodies	151
Sayaka Wakayama, Eiji Mizutani, and Teruhiko Wakayama	
1. Introduction	152
2. Equipment	153
3. Mouse Strains	154
4. Culture Media	154
5. Chemicals	155
6. Protocol	155
References	167
10. Nuclear Transfer in Mouse Oocytes and Embryos	171
Zhiming Han, Yong Cheng, Cheng-Guang Liang, and Keith E. Latham	
1. Introduction	172
2. Equipment and Solutions	172
3. Procedures	175
Acknowledgments	184
References	184

11. Culture of Whole Mouse Embryos at Early Postimplantation to Organogenesis Stages: Developmental Staging and Methods	185
Jaime A. Rivera-Pérez, Vanessa Jones, and Patrick P. L. Tam	
1. Introduction	186
2. Developmental Staging of Postimplantation Mouse Embryos Dissected Between E5.5 and E8.25	188
3. Materials	195
4. Culture Protocols	198
Acknowledgments	202
References	202
12. <i>In Utero</i> and <i>Exo Utero</i> Surgery on Rodent Embryos	205
Valérie Ngô-Muller and Ken Muneoka	
1. Introduction	206
2. Preparation for Abdominal Surgery	207
3. <i>In Utero</i> Manipulation of Embryos	209
4. <i>Exo Utero</i> Manipulation of Embryos	212
5. Postsurgery	215
6. Experimental Approaches	216
7. Summary	222
References	222
Section IV. Fertilization	227
13. Enhancement of IVF in the Mouse by Zona-Drilling	229
Kevin A. Kelley	
1. Introduction	230
2. Materials	233
3. Methods	235
4. Results and Discussion	240
References	249
14. ICSI in the Mouse	251
Paula Stein and Richard M. Schultz	
1. Introduction	252
2. Experimental Procedures	252
Acknowledgments	261
References	261

Section V. ES and IPS Cells	263
15. A Simple Procedure for the Efficient Derivation of Mouse ES Cells	265
Esther S. M. Wong, Kenneth H. Ban, Rafidah Mutalif, Nancy A. Jenkins, Neal G. Copeland, and Colin L. Stewart	
1. Introduction	266
2. Methodology/Workflow	269
3. Concluding Remarks and Future Perspective	281
References	282
16. Producing Fully ES Cell-Derived Mice from Eight-Cell Stage Embryo Injections	285
Thomas M. DeChiara, William T. Poueymirou, Wojtek Auerbach, David Friendewey, George D. Yancopoulos, and David M. Valenzuela	
1. Introduction	286
2. Methods	288
3. Summary	293
References	294
17. The Loss-of-Allele Assay for ES Cell Screening and Mouse Genotyping	295
David Friendewey, Rostislav Chernomorsky, Lakeisha Esau, Jinsop Om, Yingzi Xue, Andrew J. Murphy, George D. Yancopoulos, and David M. Valenzuela	
1. Introduction	296
2. Methods	298
References	307
18. Induced Pluripotent Stem Cells	309
Holm Zaehres, Jeong Beom Kim, and Hans R. Schöler	
1. Generation of iPS Cells	309
2. Expression Vectors for iPS Cell Generation	311
3. Retrovirus Production	314
4. iPS Cell Generation with Retroviral Vectors	315
5. iPS Cell Generation with Proteins and Small Molecules	317
6. iPS Cell Characterization	319
7. Biotechnological and Medical Applications	321
Acknowledgments	321
References	322

Section VI. Imaging Mouse Development	327
19. Imaging Mouse Embryonic Development	329
Ryan S. Udan and Mary E. Dickinson	
1. Introduction	330
2. Overview of Key Parameters	331
3. Whole Embryo Culture	333
4. Labeling Cells of Interest	338
5. Time-Lapse Imaging of Early Mouse Embryos	340
6. Image Analysis	344
7. Summary	346
References	346
20. Imaging Mouse Development with Confocal Time-Lapse Microscopy	351
Sonja Nowotschin, Anna Ferrer-Vaquero, and Anna-Katerina Hadjantonakis	
1. Introduction	352
2. Materials	355
3. Methods	361
Acknowledgments	375
References	376
21. Ultrasound and Magnetic Resonance Microimaging of Mouse Development	379
Brian J. Nieman and Daniel H. Turnbull	
1. Introduction	380
2. Ultrasound Biomicroscopy	381
3. Magnetic Resonance Microimaging	385
4. Summary	396
Acknowledgments	396
References	397
Section VII. Hematopoiesis	401
22. Use of Transgenic Fluorescent Reporter Mouse Lines to Monitor Hematopoietic and Erythroid Development During Embryogenesis	403
Stuart T. Fraser, Joan Isern, and Margaret H. Baron	
1. Introduction	404
2. Materials	410

3. Methods	413
4. Notes	423
References	423
23. Identification and <i>In Vivo</i> Analysis of Murine Hematopoietic Stem Cells	429
Serine Avagyan, Yacine M. Amrani, and Hans-Willem Snoeck	
1. Hematopoietic Stem Cells	429
2. Assays of Hematopoietic Stem Cells	431
3. Isolation of Hematopoietic Stem Cells	438
References	442
<i>Author Index</i>	449
<i>Subject Index</i>	473
