

AN INTRODUCTION TO
METHODS & MODELS IN
Ecology, Evolution, & Conservation Biology

STANTON BRAUDE & BOBBI S. LOW

EDITORS

Contents

<i>Figures</i>	vii
<i>Tables</i>	xi
<i>Preface</i>	xv
<i>Acknowledgments</i>	xvii
<i>Introduction</i>	xix
Section I Evolutionary Biology	
1 Evolution and Pesticide Resistance: Examining Quantitative Trends Visually <i>Stanton Braude and John Gaskin</i>	3
2 Lizard Ecomorphology: Generating and Testing Hypotheses of Adaptation <i>Kenneth H. Kozak</i>	12
3 Phylogenetic Inference: Examining Morphological and Molecular Datasets <i>James Beck</i>	22
4 Life History Tradeoffs in Avian Clutch Size: Interpreting Life History Data and Evaluating Alternative Hypotheses <i>Jon Hess</i>	36
5 Mimicry: Experimental Design and Scientific Logic <i>James Robertson</i>	51
Section II Demography and Population Ecology	
6 Life Table Analysis <i>Stanton Braude</i>	63
7 Lotka-Volterra Competition Modeling <i>Stanton Braude, Tara Scherer, and Rebecca McGaha</i>	69
8 Explosive Population Growth and Invasive Exotic Species <i>Jon Hess and James Robertson</i>	79
9 Island Biogeography: Evaluating Correlational Data and Testing Alternative Hypotheses <i>James Robertson</i>	91
Section III Population Genetics	
10 Hardy-Weinberg: Evaluating Disequilibrium Forces <i>Jason J. Kolbe</i>	107
11 Drift, Demographic Stochasticity, and Extinction in Woggles <i>James Robertson, Anton Weisstein, and Stanton Braude</i>	117
12 Conservation of Small Populations: Effective Population Sizes, Inbreeding, and the 50/500 Rule <i>Luke J. Harmon and Stanton Braude</i>	125

13	Dispersal and Metapopulation Structure	
	<i>James Robertson</i>	139
Section IV Quantitative Ecological Tools		
14	Understanding Descriptive Statistics	
	<i>Beth Sparks-Jackson and Emily Silverman</i>	155
15	Understanding Statistical Inference	
	<i>Emily Silverman and Beth Sparks-Jackson</i>	179
16	Sampling Wild Populations	
	<i>Stanton Braude and James Robertson</i>	189
17	Quantifying Biodiversity	
	<i>Cawas Behram Engineer and Stanton Braude</i>	198
18	Environmental Predictability and Life History	
	<i>Bobbi S. Low and Stanton Braude</i>	214
19	Modeling Optimal Foraging	
	<i>Stanton Braude and James Robertson</i>	226
Section V Synthetic Exercises and Writing Assignments		
20	Evaluating Competing Hypotheses of Regional Biodiversity	
	<i>Stanton Braude</i>	235
21	Preparing and Evaluating Competitive Grant Proposals for Conservation Funding	
	<i>Stanton Braude</i>	239
22	Tracing the History of Scientific Ideas: From Darwin, Connell, or Soule to the Present	
	<i>Bobbi S. Low</i>	245
	<i>Glossary</i>	251
	<i>Contributors</i>	263
	<i>Index</i>	265
