Contributors	xiii
Preface	xv
Vision Statement	xvii

Part I Networks and Systems

Chapter 1. National Transportation Networks and Intermodal Systems 1.3 *Michael S. Bronzini*

1.1. Introduction	/ 1.3
1.2. National Transportation Network Databases	/ 1.4
1.3. Examples of National Modal Networks	/ 1.7
1.4. Multimodal Networks and Intermodal Connectors	/ 1.10
1.5. Network Model Applications	/ 1.11
Acknowledgment	/ 1.12
References	/ 1.12

Chapter 2. Transport Network Planning: Methodology and Theoretical Notions 2.1 *Ben Immers, Bart Egeter, and Rob van Nes*

2.1. Introduction	/ 2.1
2.2. A Functional Classification of Transport Systems	/ 2.2
2.3. Key Characteristics of the Design Method	/ 2.3
2.4. Dilemmas Encountered in Designing a Transportation Network	/ 2.5
2.5. Feasibility of Design	/ 2.7
2.6. The Design Process	/ 2.7
2.7. Theoretical Background	/ 2.11
2.8. Application of the Design Method	/ 2.16
2.9. Evaluation Network Design	/ 2.29
Acknowledgments	/ 2.32
References	/ 2.32

Chapter 3. Reliability of Travel Times and Robustness of Transport Networks 3.1 *Ben Immers, Bart Egeter, Maaïke Snelder, and Chris Tampere*

3.1. Introduction	/ 3.1
3.2. Definitions, Relationships, and Examples	/ 3.2
3.3. The Robustness of a Network on the Micro Level: Identifying Vulnerable Network Elements	/ 3.7
3.4. The Robustness of a Network on the Macro Level: Some General Principles for a Robust Road Network	/ 3.15
3.5. An Example: The Rotterdam—The Hague Urban Area	/ 3.18
3.6. Conclusions	/ 3.28
Acknowledgments	/ 3.28
References	/ 3.28

Chapter 4. Transportation Systems Modeling and Evaluation *Andrew P. Tarko and Panagiotis Ch. Anastasopoulos* **4.1**

- 4.1. Introduction / 4.1
- 4.2. Types of Transportation Models and Modeling Paradigms / 4.2
- 4.3. Example Studies and Models / 4.7
- 4.4. What Are the Uses of Transportation Models? / 4.11
- 4.5. Selecting a Model / 4.13
- 4.6. Transportation Systems Evaluation / 4.16
- 4.7. Conclusion / 4.19
- References / 4.20

Chapter 5. Software Systems and Simulation for Transportation Applications *Elena Shenk Prassas* **5.1**

- 5.1. Computational Software versus Simulation Software / 5.2
- 5.2. Important Areas and Tools Not Covered / 5.2
- 5.3. Traffic Software Systems / 5.4
- 5.4. Basics of Simulation / 5.4
- 5.5. Microscopic Simulation Models / 5.7
- 5.6. Issues in Traffic Simulation / 5.10
- 5.7. Visualization / 5.13
- 5.8. Why Simulate? Advanced Traffic Control Systems, and Other / 5.16
- 5.9. Traffic Simulators / 5.16
- 5.10. Real-Time Traffic Management / 5.16
- 5.11. Planning Tools / 5.17
- 5.12. Resources for Further Information / 5.17
- References / 5.17

Chapter 6. Applications of GIS in Transportation *Gary S. Spring* **6.1**

- 6.1. Introduction / 6.1
- 6.2. Background / 6.2
- 6.3. Basic Principles of GIS-T / 6.3
- 6.4. GIS Applications in Transportation / 6.16
- 6.5. Implementation Issues / 6.19
- 6.6. Conclusions / 6.21
- References / 6.23

Chapter 7. Travel Demand Forecasting for Urban Transportation Planning *Arun Chatterjee and Mohan M. Venigalla* **7.1**

- 7.1. Introduction / 7.1
- 7.2. Characteristics of Travel / 7.2
- 7.3. Units for Measuring Travel Demand / 7.4
- 7.4. Measuring Existing Travel / 7.4
- 7.5. Forecasting Future Demand / 7.6
- 7.6. Trip Generation / 7.8
- 7.7. Trip Distribution / 7.12
- 7.8. Other Types of Trip Distribution Models / 7.15
- 7.9. Modal Split / 7.15
- 7.10. Traffic Assignment / 7.18
- 7.11. Model Adjustments and Use of Synthetic/Borrowed Models / 7.22

- 7.12. Travel Demand Modeling Software Packages / 7.24
- 7.13. Applications of Travel Models / 7.25
- 7.14. Transportation and Air Quality Planning / 7.26
- References / 7.28

Chapter 8. Transportation and Land Use *Kara Kockelman and Bin (Brenda) Zhou* **8.1**

- 8.1. Introduction / 8.1
- 8.2. Land Use Categories / 8.2
- 8.3. Land Use Effects on Travel Demand / 8.4
- 8.4. Transport's Effects on Land Use / 8.6
- 8.5. Land Use Modeling / 8.7
- 8.6. Other Topics / 8.10
- References / 8.11

Chapter 9. Sustainable Transportation *Zhong-Ren Peng, Fei Yang, and Sarah Perch* **9.1**

- 9.1. Introduction / 9.1
- 9.2. Sustainable Transportation Planning Strategies / 9.4
- 9.3. Examples of Best Practices of Sustainable Transportation Planning / 9.15
- 9.4. Conclusion / 9.21
- Acknowledgments / 9.22
- References / 9.22

Part II Operations and Economics

Chapter 10. Transportation Planning and Modeling *Konstadinos G. Goulias* **10.3**

- 10.1. Introduction / 10.3
- 10.2. Policy and Planning / 10.6
- 10.3. Modeling / 10.9
- 10.4. Future Directions / 10.26
- References / 10.27

Chapter 11. Transportation Economics *Anthony M. Pagano* **11.1**

- 11.1. Introduction / 11.1
- 11.2. The Methodology of Project Appraisal / 11.1
- 11.3. Objectives of Proposed Investments / 11.2
- 11.4. Alternatives / 11.2
- 11.5. Costs / 11.2
- 11.6. Uncertainty / 11.4
- 11.7. Benefits—Quantification and Evaluation / 11.5
- 11.8. Expert Opinion / 11.6
- 11.9. The Model / 11.7
- 11.10. Discounting / 11.7
- 11.11. Criteria for Choice among Alternatives / 11.8
- 11.12. Suboptimization / 11.14
- 11.13. Advantages and Limitations of Benefit-Cost Analysis / 11.15
- 11.14. Quantification and Evaluation of Benefits of Transportation Projects / 11.15
- 11.15. Road User Benefits / 11.16
- 11.16. Conclusions / 11.20
- References / 11.20
- Internet Resources / 11.21

Chapter 12. Innovative Information Technology Applications in Public Transportation *John Collura and Carrie Ward* **12.1**

- 12.1. Introduction / 12.1
- 12.2. Systems Engineering Concepts / 12.2
- 12.3. Public Transportation Management and Operations / 12.4
- 12.4. Traveler Information / 12.8
- 12.5. Transit Signal Priority / 12.13
- 12.6. Electronic Payments / 12.16
- 12.7. Challenges and Future Directions / 12.20
- References / 12.21

Chapter 13. Parking Management *P. Buxton Williams and Jon Ross* **13.1**

- 13.1. Overview / 13.1
- 13.2. Survey Affirms Many Parking Management Operations Are Marginalized / 13.2
- 13.3. What Is Comprehensive Parking Management? / 13.3
- 13.4. Comprehensive Parking Management—Systems and Operations / 13.4
- 13.5. Functional Parking Management Requirements / 13.9
- 13.6. Growing the Parking Management System into a Comprehensive Citation Management Solution / 13.12
- 13.7. Customer Relations / 13.20
- 13.8. System Validation and Verification Methods / 13.21
- 13.9. Measuring the Impact and Efficiency of the Parking Management System / 13.22
- 13.10. Benchmarks and Industry Trends / 13.23
- 13.11. Summary / 13.24
- Reference / 13.24

Chapter 14. Trucking Operations *Amelia Regan* **14.1**

- 14.1. Introduction / 14.1
- 14.2. A Brief History of the Trucking Industry in the United States / 14.1
- 14.3. Classification of Trucking Operations / 14.2
- 14.4. The Evolution and Impacts of Regulation / 14.2
- 14.5. The Industry and Unions / 14.3
- 14.6. Truckload Trucking / 14.3
- 14.7. Less-Than-Truckload / 14.4
- 14.8. Express Services / 14.5
- 14.9. Private Fleets / 14.6
- 14.10. Third-Party Logistics / 14.6
- 14.11. Major Industry Issues / 14.7
- 14.12. Conclusion / 14.9
- References / 14.9

Chapter 15. The Economics of Railroad Operations: Resurgence of a Declining Industry *Wesley W. Wilson and Mark L. Burton* **15.1**

- 15.1. Introduction / 15.1
- 15.2. Railroad Operations / 15.3
- 15.3. The Definition and Evolution of Railroad Markets / 15.5
- 15.4. Changes in Market Structure / 15.14
- 15.5. Railroad Markets and the Future / 15.15
- 15.6. Regulation and Partial Deregulation / 15.16
- 15.7. Models of Railroad Decision-Making / 15.19
- 15.8. Captive Shippers and Railroad Pricing / 15.19

15.9. Multiple Shippers and Network Externalities /	15.21
15.10. Multiple Shippers and Multiple Railroads /	15.22
15.11. Summary and Conclusions /	15.24
References /	15.25

Chapter 16. Airline Management and Operations *Saad Laraqui* **16.1**

16.1. Executive Summary /	16.1
16.2. Introduction /	16.1
16.3. Operating Environment among Airlines in Different Regions /	16.3
16.4. The Changing Airline Business Environment /	16.13
16.5. An Era of Change in the Airline Industry /	16.16
16.6. Risk Management at Airlines /	16.17
16.7. Conclusion /	16.18
References /	16.19

Chapter 17. The Marine Transportation System *James J. Corbett* **17.1**

17.1. Introduction /	17.1
17.2. Overview of Marine Transportation /	17.1
17.3. Vessels /	17.6
17.4. Ports /	17.10
17.5. Trends, Opportunities, and Challenges /	17.16
References /	17.18

Chapter 18. Global Logistics and the Maritime Transport System *John Mangan* **18.1**

18.1. The Economic Importance of Maritime Transport /	18.1
18.2. Maritime Transport, Supply Chain Management, and Logistics /	18.2
18.3. Consignors and Maritime Transport /	18.3
18.4. Ports and Terminal Operators /	18.5
18.5. Maritime Transport Providers /	18.8
18.6. Conclusion /	18.9
References /	18.10

Chapter 19. Freight Transportation Planning *Kathleen Hancock* **19.1**

19.1. Introduction /	19.1
19.2. Freight Transportation Operations Today /	19.4
19.3. Planning /	19.9
19.4. The Future /	19.18
19.5. Conclusion /	19.19
References /	19.19

Chapter 20. Management of Transportation Organizations *George L. Whaley* **20.1**

Abstract /	20.1
20.1. What Is Management? /	20.1
20.2. The External Environment /	20.2
20.3. The Internal Environment /	20.6
20.4. Functions of Management /	20.7

CONTENTS

- 20.5. Contingency Approaches to Transportation Management Activities / 20.14
- 20.6. Leadership in Transportation Management / 20.18
- 20.7. Typical Challenges Faced by New Managers in Transportation / 20.23
- 20.8. The Future of Transportation Management / 20.25
- References / 20.27

Index 1.1
