**PATHOPHYSIOLOGY
OF HEAT STRESSED CHICKENS:
Cases Report in Thailand**

**Edited by
Worapol Aengwanich**

Contents

	Page
Contributors	iii
Preface	vii
Chapter 1	9
Pathology of heart, lung, liver and kidney in broilers under chronic heat stress	
<i>Worapol Aengwanich and Suchint Simaraks</i>	
Chapter 2	19
Comparative ability to tolerant heat between Thai native chickens and broilers under chronic heat stress	
<i>Worapol Aengwanich and Suchint Simaraks</i>	
Chapter 3	29
Effects of ascorbic acid on cell mediated, humoral immune response and pathophysiology of white blood cell in broilers under heat stress	
<i>Worapol Aengwanich, Pornchai Sridama, Yupin Phasuk, Thevin Vongpralab, Parwadee Pakdee, Suporn Katawetin, and Suchint Simaraks</i>	
Chapter 4	41
Effect of ascorbic acid on productive performance, red blood cell parameters and heterophil: lymphocyte ratio in broilers under chronic heat stress	
<i>Worapol Aengwanich and Orawan Chinrasri</i>	

Chapter 5

51

Physiological adaptation and effect of ascorbic acid on adaptation in broilers under heat stress

Worapol Aengwanich, Yupin Phasuk, Thevin Vongpralab, Parwadee Pakdee, Suporn Katavetin, and Suchint Simaraks

Chapter 6

63

Effect of ascorbic acid on respiratory rate, body temperature, heterophil : lymphocyte ratio and microscopic lesion score in lung, liver, kidney, cardiac muscle and spleen in broilers under chronic heat stress

Worapol Aengwanich, Udom Chuachan, Yupin Phasuk, Thevin Vongpralab, Parwadee Pakdee, Suporn Katavetin, and Suchint Simaraks

Chapter 7

79

Effects of chronic heat stress on red blood cell disorders in broiler chickens

Worapol Aengwanich

Chapter 8

87

Effect of heat stress on body temperature and hematological parameters in male layers

Worapol Aengwanich and Orawan Chinrasri
