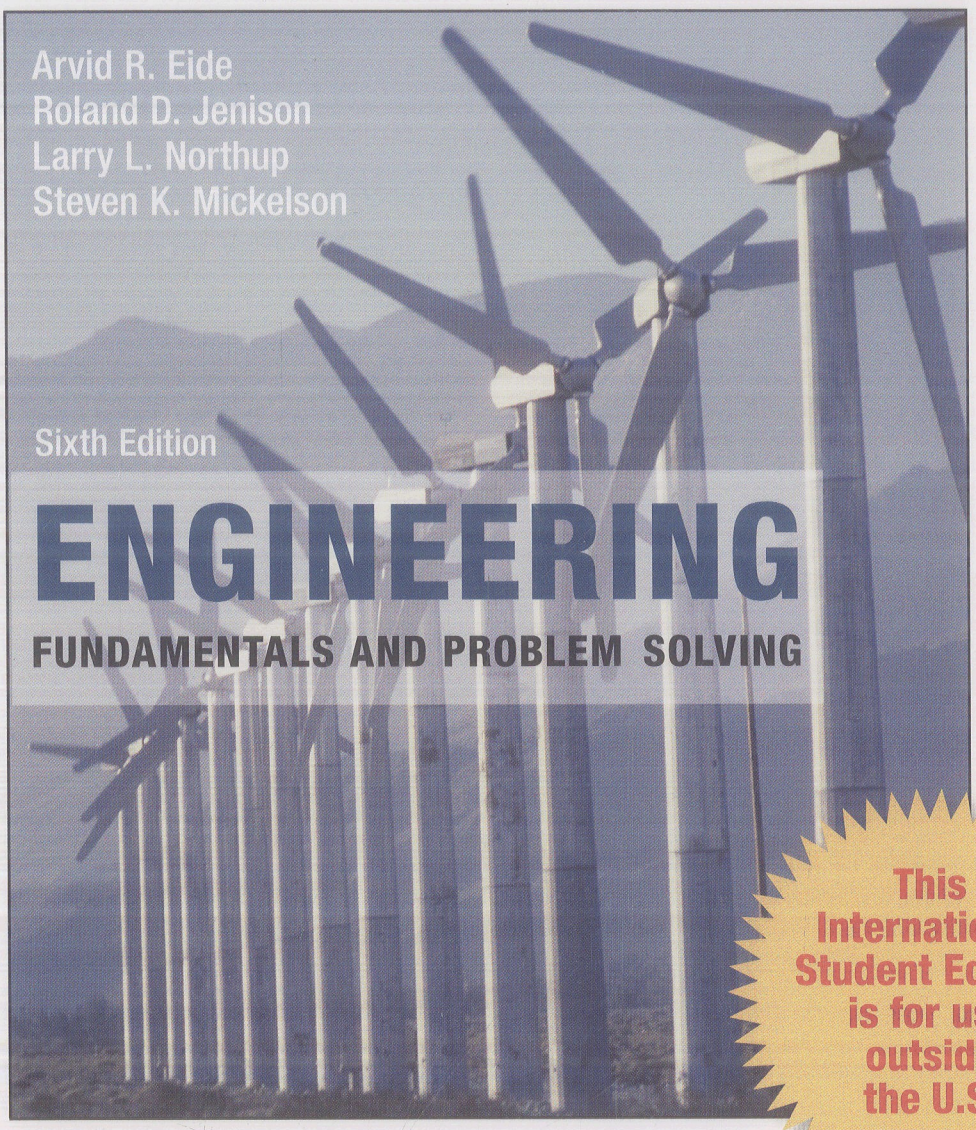
Steven K. Mickelson

Sixth Edition

ENGINEERING

FUNDAMENTALS AND PROBLEM SOLVING



This International Student Edition is for use outside the U.S.

McGRAW-HILL INTERNATIONAL EDITION

Contents

1 The Engineering Profession 1

1.1 An Engineering Career 1
1.2 The Technology Team 3
1.3 The Engineering Profession 6
1.4 The Engineering Functions 7
1.5 The Engineering Disciplines 20
1.6 Conclusion 36

2 Education for Engineering 39

2.1 Education for Engineering 39
2.2 The Engineer as a Professional 47
2.3 Conclusion 50

3 Introduction to Engineering Design 53

3.1 An Introduction to Engineering Design 53
3.2 The Design Process 55
3.3 Design and the Customer 59
3.4 The Nature of Engineering Design 60
3.5 Experiencing the Design Process in Education 62
3.6 Design Opportunities and Challenges of the Future 62

4 Engineering Solutions 73

4.1 Introduction 73
4.2 Problem Analysis 73
4.3 The Engineering Method 75
4.4 Problem Presentation 76
4.5 Standards of Problem Presentation 77

5 Representation of Technical Information 95

5.1 Introduction 95
5.2 Collecting and Recording Data 100
5.3 General Graphing Procedures 102
5.4 Empirical Functions 114
5.5 Curve Fitting 114
5.6 Method of Selected Points and Least Squares 115

5.7 Empirical Equations: Linear 115
5.8 Empirical Equations: Power Curves 117
5.9 Empirical Equations: Exponential Curves 122

6 Engineering Measurements and Estimations 135

6.1 Introduction 135
6.2 Measurements: Accuracy and Precision 135
6.3 Measurements: Significant Digits 137
6.4 Errors 142
6.5 Estimations 144

7 Dimensions, Units, and Conversions 155

7.1 Introduction 155
7.2 Progress in the United States toward Metrification 156
7.3 Physical Quantities 157
7.4 Dimensions 158
7.5 Units 159
7.6 SI Units and Symbols 160
7.7 Rules for Using SI Units 164
7.8 U.S. Customary and Engineering Systems 169
7.9 Conversion of Units 171
7.10 Celsius, Fahrenheit, and Absolute Scales 174

8 Introduction to Engineering Economics 181

8.1 Introduction 181
8.2 Simple and Compound Interest 182
8.3 Cash-Flow Diagram 188
8.4 Present Worth and Future Worth 189
8.5 Annual Worth and Gradients 193
8.6 Summary Table 215

9 Economics: Decision Making 223

9.1 Economic Decision Making 223
9.2 Depreciation and Taxes 228

10 Statistics 231

10.1 Introduction 231
10.2 Frequency Distribution 232
10.3 Measures of Central Tendency 234
10.4 Measures of Variation 236
10.5 Linear Regression 242
10.6 Coefficient of Correlation 248

11 Inferential Statistics and Decision Making 263

11.1 Inferential Statistics 263
11.2 Experimental Design 264
11.3 Sampling 265
11.4 Use of Various Distributions 266
11.5 Level of Significance and Confidence Intervals 273

12 Mechanics: Statics 277

12.1 Introduction 277
12.2 Scalars and Vectors 280
12.3 Forces 281
12.4 Types of Force Systems 281
12.5 Transmissibility 282
12.6 Resolution of Forces 283
12.7 Moments and Couples 287
12.8 Free-Body Diagrams 290
12.9 Equilibrium 292

13 Mechanics: Strength of Materials 307

13.1 Introduction 307
13.2 Stress 307
13.3 Strain 309
13.4 Modulus of Elasticity 311
13.5 Design Stress 312

14 Material Balance 321

14.1 Introduction 321
14.2 Conservation of Mass 321
14.3 Processes 325
14.4 A Systematic Approach 327

15 Energy Sources and Alternatives 339

15.1 Introduction 339
15.2 Fossil Fuels 340
15.3 Finite Supply of Fossil Fuels 341
15.4 Major Areas of Energy Consumption in the United States 346
15.5 Alternate Energy Sources 350

16 Fundamental Energy Principles 359

16.1 Introduction to Thermodynamics 359
16.2 Stored Energy 359
16.3 Energy in Transit 362

16.4 First Law of Thermodynamics: The Conservation of Energy 365
16.5 Second Law of Thermodynamics 369
16.6 Efficiency 370
16.7 Power 373
16.8 Refrigeration Cycles 375

17 Electrical Theory 379

17.1 Introduction 379
17.2 Structure of Electricity 380
17.3 Static Electricity 381
17.4 Electric Current 381
17.5 Electric Potential 382
17.6 Simple Electric Circuits 382
17.7 Resistance 383
17.8 DC Circuit Concepts 384
17.9 DC Electric Power 390
17.10 Terminal Voltage 392
17.11 Kirchhoff's Laws 394
17.12 Mesh Currents 399

Appendixes

A. Part 1 Unit Conversions 411
Part 2 Unit Prefixes 417
Part 3 Physical Constants 418
Part 4 Approximate Specific Gravities and Densities 419
B. Greek Alphabet 421
C. Chemical Elements 422
D. NSPE Code of Ethics for Engineers 425
E. Flowcharts 430
F. Part 1 Selected Algebra Topics 445
Part 2 Selected Trigonometry Topics 453

Answers to Selected Problems 467
Credits 475
Index 477
