

# DYNAMICS IN ENGINEERING PRACTICE

---

TENTH EDITION

---

DARA W. CHILDS

CRC Press  
Taylor & Francis Group

# Contents

Preface.....	xiii
<b>1. Introduction and Fundamentals.....</b>	<b>1</b>
1.1 Introduction .....	1
1.2 A Short History of Dynamics.....	1
1.3 Units .....	3
<b>2. Planar Kinematics of Particles.....</b>	<b>7</b>
2.1 Introduction .....	7
2.2 Motion in a Straight Line.....	7
2.2.1 Distance Traveled.....	9
2.3 Particle Motion in a Plane: Cartesian Coordinates .....	10
2.4 Coordinate Transformations: Relationships between Components of a Vector in Two Coordinate Systems.....	12
2.5 Particle Motion in a Plane: Polar Coordinates.....	14
2.6 Particle Motion in a Plane: Normal-Tangential (Path) Coordinates.....	17
2.7 Moving between Cartesian, Polar, and Path-Coordinate Definitions for Velocity and Acceleration Components .....	20
2.7.1 An Example That Is Naturally Analyzed with Cartesian Components .....	20
2.7.2 An Example That Is Naturally Analyzed Using Polar Coordinates .....	23
2.7.3 An Example That Is Naturally Analyzed with Path-Coordinate Components.....	24
2.8 Time-Derivative Relationships in Two Coordinate Systems .....	26
2.9 Velocity and Acceleration Relationships in Two Cartesian Coordinate Systems .....	28
2.9.1 Comparisons to Polar-Coordinate Definitions .....	30
2.9.2 Coordinate-System Expressions for Kinematic Equations.....	30
2.9.3 Coordinate System Observers .....	31
2.10 Relative Position, Velocity, and Acceleration Vectors between Two Points in the Same Coordinate System .....	32
2.11 Summary and Discussion .....	36
Problems.....	37
<b>3. Planar Kinetics of Particles .....</b>	<b>43</b>
3.1 Introduction .....	43
Nomenclature .....	43
3.2 Differential Equations of Motion for a Particle Moving in a Straight Line: An Introduction to Physical Modeling .....	45
3.2.1 Constant Acceleration: Free Fall of a Particle without Drag .....	45
3.2.2 Acceleration as a Function of Displacement: Spring Forces.....	47
3.2.2.1 Deriving the Equation of Motion Starting with the Spring Undeflected.....	47
3.2.2.2 Deriving the Equation of Motion for Motion about Equilibrium .....	48
3.2.2.3 Developing a Time Solution for the Equation of Motion.....	50
3.2.2.4 Developing a Solution for $\dot{Y}$ as a Function of $Y$ .....	51
3.2.2.5 Negative Sign for the Stiffness Coefficient .....	52
3.2.3 Energy Dissipation: Viscous Damping .....	52
3.2.3.1 Viscous Damper.....	52
3.2.3.2 Deriving the Equation of Motion for a Mass-Spring-Damper System.....	53
3.2.3.3 Motion about the Equilibrium Position .....	53

3.2.3.4	Developing a Time Solution for the Equation of Motion.....	53
3.2.3.5	Characterizing Damping .....	58
3.2.3.6	Solution for $\dot{Y}$ as a Function of $Y$ Including Damping? .....	59
3.2.3.7	Negative Damping and Dynamic Instability .....	60
3.2.4	Base Excitation for a Spring-Mass-Damper System.....	60
3.2.4.1	Deriving the Equation of Motion.....	60
3.2.4.2	Relative Motion due to Base Excitation .....	64
3.2.5	Harmonic Excitation for a 1DOF, Spring-Mass-Damper System: Solution for Motion in the Frequency Domain .....	65
3.2.5.1	Base Excitation .....	69
3.2.5.2	Steady-State Relative Motion due to Base Excitation .....	71
3.2.5.3	Rotating-Imbalance Excitation.....	71
3.2.5.4	Summary and Extensions.....	74
3.2.6	Energy Dissipation: Coulomb Damping .....	75
3.2.7	Quadratic Damping: Aerodynamic Drag.....	77
3.2.7.1	Terminal Velocity Calculation.....	78
3.2.8	Closure and Review.....	80
3.3	More Motion in a Straight Line: Degrees of Freedom and Equations of Kinematic Constraints.....	81
3.3.1	Pulleys: Equations of Motion and Equations of Constraint .....	81
3.3.2	Linkage Problems: More Equations of Constraint .....	85
3.4	Motion in a Plane: Equations of Motion and Forces of Constraint .....	88
3.4.1	Cartesian-Coordinate Applications: Trajectory Motion in a Vertical Plane.....	89
3.4.1.1	Drag-Free Motion .....	89
3.4.1.2	Trajectory Motion with Aerodynamic Drag.....	91
3.4.1.3	Trajectory Motion and Coulomb Drag.....	92
3.4.2	Polar-Coordinate Applications.....	92
3.4.2.1	Particle Sliding on the Inside of a Horizontal Cylinder without Friction .....	92
3.4.2.2	Particle Sliding on the Inside of a Horizontal Cylinder with Coulomb Friction .....	93
3.4.2.3	The Simple Pendulum .....	95
3.4.2.4	The Simple Pendulum with Damping .....	96
3.4.3	Path-Coordinate Applications.....	98
3.4.4	Summary and Overview .....	100
3.5	Particle Kinetics Examples with More Than One Degree of Freedom.....	101
3.5.1	Developing Equations of Motion for Problems Having More Than One Degree of Freedom .....	101
3.5.1.1	Developing Equations of Motion for a Two-Mass Vibration Example .....	101
3.5.1.2	Developing Equations of Motion for a Double Pendulum .....	104
3.5.2	Analyzing Multi-Degree-of-Freedom Vibration Problems .....	106
3.5.2.1	Analyzing Undamped Two-Degree-of-Freedom Vibration Problems .....	106
3.5.2.2	Free Motion from Initial Conditions (the Homogeneous Solution).....	111
3.5.2.3	Modal Damping Models .....	114
3.5.2.4	Steady-State Solutions due to Harmonic Excitation.....	115
3.5.2.5	Harmonic Response with Damping .....	118
3.6	Work-Energy Applications for One-Degree-of-Freedom Problems in Plane Motion .....	119
3.6.1	The Work-Energy Equation and Its Application.....	119
3.6.1.1	More on Spring Forces and Spring Potential-Energy Functions .....	121
3.6.1.2	More on the Force of Gravity and the Potential-Energy Function for Gravity .....	123
3.6.2	Deriving Equations of Motion from Work-Energy Relations.....	125
3.7	Linear-Momentum Applications in Plane Motion .....	130
3.7.1	Collision Problems in One Dimension.....	130
3.7.2	The Coefficient of Restitution.....	132
3.7.3	Collision Problems in Two Dimensions .....	133

3.8	Moment of Momentum .....	136
3.8.1	Developing the Moment-of-Momentum Equation for a Particle.....	136
3.8.2	Applying Conservation of Moment of Momentum for a Particle.....	137
3.8.2.1	Two Particles Connected by an Inextensible Cord .....	137
3.8.2.2	Closing Comments .....	137
3.9	Summary and Discussion .....	138
	Problems.....	139
<b>4.</b>	<b>Planar Kinematics of Rigid Bodies .....</b>	<b>155</b>
4.1	Introduction .....	155
4.2	Rotation about a Fixed Axis .....	155
4.3	Velocity and Acceleration Relationships for Two Points in a Rigid Body.....	157
4.4	Rolling without Slipping.....	161
4.4.1	A Wheel on a Plane .....	161
4.4.1.1	Geometric Development.....	161
4.4.1.2	Vector Developments of Velocity Relationships.....	163
4.4.1.3	Vector Developments of Acceleration Results .....	164
4.4.2	A Wheel Rolling inside or on a Cylindrical Surface.....	167
4.4.2.1	Wheel Rolling inside a Cylindrical Surface .....	167
4.4.2.2	Wheel Rolling on the outside of a Cylindrical Surface.....	168
4.5	Planar Mechanisms .....	168
4.5.1	Introduction .....	168
4.5.2	A Slider-Crank Mechanism .....	168
4.5.2.1	Geometric Approach.....	168
4.5.2.2	Vector Approach for Velocity and Acceleration Results .....	170
4.5.3	A Four-Bar-Linkage Example.....	171
4.5.3.1	Geometric Approach.....	172
4.5.3.2	Vector Approach for Velocity and Acceleration Relationships .....	174
4.5.4	Another Slider-Crank Mechanism.....	177
4.5.4.1	Geometric Approach.....	177
4.5.4.2	Vector, Two-Coordinate-System Approach for Velocity and Acceleration Relationships .....	179
4.5.4.3	Solution for the Velocity and Acceleration of Point D .....	181
4.5.4.4	Closing Comments .....	182
4.6	Summary and Discussion .....	183
	Problems.....	183
<b>5.</b>	<b>Planar Kinetics of Rigid Bodies .....</b>	<b>195</b>
5.1	Introduction .....	195
	Nomenclature .....	195
5.2	Inertia Properties and the Parallel-Axis Formula.....	195
5.2.1	Centroids and Moments of Inertia .....	195
5.2.2	The Parallel-Axis Formula.....	197
5.3	Governing Force and Moment Equations for a Rigid Body.....	199
5.3.1	Force Equation.....	199
5.3.2	Moment Equation .....	201
5.3.2.1	Reduced Forms for the Moment Equation .....	203
5.4	Kinetic Energy for Planar Motion of a Rigid Body.....	203
5.5	Fixed-Axis-Rotation Applications of the Force, Moment, and Energy Equations .....	204
5.5.1	Rotor in Frictionless Bearings: Moment Equation .....	204
5.5.2	Rotor in Frictionless Bearings: Energy Equation.....	205
5.5.3	Rotor in Bearings with Viscous Drag: Moment Equation .....	205
5.5.4	Rotor in Bearings with Viscous Drag: Energy Equation.....	206
5.5.5	Torsional Vibration Example: Moment Equation .....	206

5.5.6	Torsional Vibration Example: Energy Equation.....	207
5.5.7	Pulley/Weight Example: Free-Body Approach.....	208
5.5.8	Pulley/Weight Example: Energy Approach .....	209
5.5.9	An Example Involving a Disk and a Particle: Newtonian Approach.....	209
5.5.10	An Example Involving a Disk and a Particle: Work-Energy Approach.....	210
5.5.11	Two Driven Pulleys Connected by a Belt .....	210
5.5.12	Two Driven Pulleys Connected by a Belt: Work-Energy Approach.....	211
5.6	Compound-Pendulum Applications .....	211
5.6.1	The Simple Compound Pendulum: EOM, Linearization, Stability .....	211
5.6.2	The Compound Pendulum with Damping .....	216
5.6.3	Compound Pendulum/Spring and Damper Connections: Linearization and Equilibrium.....	217
5.6.3.1	Compound Pendulum with a Spring Attachment to Ground: Moment Equation .....	217
5.6.3.2	Compound Pendulum with a Spring Attachment to Ground: Energy Approach .....	218
5.6.3.3	Compound Pendulum with a Damper Attachment to Ground: Moment Equation .....	219
5.6.3.4	Bars Supported by Springs: Preload and Equilibrium .....	221
5.6.3.5	Closing Comments and (Free) Advice .....	224
5.6.4	Prescribed Acceleration of a Compound Pendulum's Pivot Support Point .....	224
5.7	General Applications of Force, Moment, and Energy Equations for Planar Motion of a Rigid Body .....	226
5.7.1	Rolling-without-Slipping Examples: Newtonian and Energy Approaches .....	226
5.7.1.1	A Cylinder Rolling Down an Inclined Plane: Free-Body Diagram Approach.....	226
5.7.1.2	A Cylinder Rolling Down an Inclined Plane: Work-Energy Approach.....	228
5.7.1.3	An Imbalanced Cylinder Rolling Down an Inclined Plane: Newtonian Approach .....	229
5.7.1.4	An Imbalanced Cylinder Rolling Down an Inclined Plane: Work-Energy Approach.....	231
5.7.1.5	A Half Cylinder Rolling on a Horizontal Plane: Newtonian Approach.....	231
5.7.1.6	A Half Cylinder Rotating on a Horizontal Plane: Energy Approach.....	233
5.7.1.7	A Cylinder, Restrained by a Spring and Rolling on a Plane: Newtonian Approach .....	234
5.7.1.8	A Cylinder, Restrained by a Spring and Rolling on a Plane: Energy Approach .....	235
5.7.1.9	A Cylinder Rolling inside a Cylindrical Surface .....	235
5.7.1.10	Pulley-Assembly Example: Newtonian Approach.....	237
5.7.1.11	Pulley-Assembly Example: Energy Approach .....	238
5.7.1.12	Closing Comments .....	238
5.7.2	One Degree of Freedom, Planar-Motion Applications, Newtonian and Energy Approaches.....	239
5.7.2.1	A Uniform Bar, Acted on by an External Force, Moving in Slots, and Constrained by Springs .....	239
5.7.2.2	Adding Viscous Damping to the Slots Supporting the Uniform Bar.....	241
5.7.2.3	A Bar Leaning and Sliding on a Smooth Floor and against a Smooth Vertical Wall.....	243
5.7.2.4	A Bar Leaning and Sliding on a Floor and against a Vertical Wall with Coulomb Friction .....	245
5.7.2.5	Summary and Discussion.....	246
5.7.3	Multi-Body, Single-Coordinate Applications of the Work-Energy Equation.....	247
5.7.3.1	Two Bars with an Applied Force and a Connecting Spring.....	247
5.7.3.2	Hinged Bar/Plate Example .....	249
5.7.3.3	A Parallel, Double-Bar Arrangement for Retracting a Cylinder .....	251
5.7.3.4	Closing Comments .....	252

5.7.4 Examples Having More Than One Degree of Freedom.....	252
5.7.4.1 Torsional Vibration Examples .....	253
5.7.4.2 Beams as Springs: Bending Vibration Examples .....	256
5.7.4.3 The Jeffcott/Laval Rotor Model .....	263
5.7.4.4 A Translating Mass with an Attached Compound Pendulum .....	265
5.7.4.5 A Swinging Bar Supported at Its End by a Cord .....	267
5.7.4.6 A Double Compound Pendulum.....	269
5.7.5 Planar Mechanisms .....	270
5.7.5.1 Slider-Crank Mechanism .....	271
5.7.5.2 A Four-Bar-Linkage Example .....	275
5.7.5.3 Alternative Slider-Crank Mechanism .....	277
5.7.5.4 Closing Comments .....	279
5.8 Moment of Momentum for Planar Motion .....	279
5.8.1 Developing Moment-of-Momentum Equations for Planar Motion of Rigid Bodies .....	279
5.8.2 Applying Moment-of-Momentum Equations in Planar Dynamics .....	282
5.8.2.1 Two Spinning Wheels Connected by an Adjustable-Tension Belt.....	282
5.8.2.2 A Particle Impacting a Compound Pendulum .....	284
5.8.2.3 A Spinning Baton Striking the Ground.....	285
5.8.2.4 A Rolling Cylinder That Encounters an Inclined Plane .....	287
5.9 Summary and Discussion .....	288
Problems.....	290
<b>Appendix A: Essentials of Matrix Algebra .....</b>	<b>313</b>
<b>Appendix B: Essentials of Differential Equations.....</b>	<b>315</b>
B.1 Introduction .....	315
B.2 Linear Differential Equations .....	315
B.2.1 Linear First-Order Equation .....	315
B.2.2 Constant Coefficient, Linear, Second-Order Differential Equations.....	316
B.2.2.1 Undamped Spring-Mass Model .....	316
B.2.2.2 Spring-Mass-Damper Model.....	318
B.3 An Introduction to Numerical Integration of Differential Equations .....	320
<b>Appendix C: Mass Properties of Common Solid Bodies .....</b>	<b>323</b>
Problems.....	324
Answers.....	326
<b>Appendix D: Answers to Selected Problems.....</b>	<b>327</b>
<b>References.....</b>	<b>371</b>
<b>Index .....</b>	<b>373</b>
