

Liquid Chromatography: Principles and Methods

Panadda Boonserm

Contents

Chapter 1: General Concepts of Liquid Chromatography 1

1.1	Introduction	3
1.2	Classification of Liquid Chromatography	3
1.2.1	Planar Chromatography	4
1.2.1.1	Paper Chromatography (PC)	4
1.2.1.2	Thin Layer Chromatography (TLC)	4
1.2.2	Column Chromatography	5
1.3	Liquid Chromatography Development	6
1.4	Chromatographic Separation Scale	7
1.4.1	Analytical Chromatography	7
1.4.2	Preparative Chromatography	7
1.5	Basic Elements of Liquid Chromatography	7
1.5.1	Stationary Phase	8
1.5.1.1	Support Matrix	8
1.5.1.2	Bonded Phase	8
1.5.2	Column	9
1.5.3	Mobile Phase	9
1.6	Chromatographic Equipment	10
1.6.1	Pump	10
1.6.2	Blending System	11
1.6.3	Sample Injector	11
1.6.4	Detector and Recorder	11
1.6.5	Fraction Collector	12
1.6.6	User Interface or Computerized System Controller	12
1.7	Sample Elution	13
1.7.1	Isocratic Elution	13
1.7.2	Gradient Elution	13
1.7.3	Displacement Elution	13
1.8	Chromatographic Performance Evaluation	14
1.8.1	Selectivity and Retention	14
1.8.2	Band Broadening and Efficiency	16
1.8.3	Resolution	18
1.8.4	Capacity	19
1.9	Protein Chromatography	20

1.10 Protein Properties	20
1.10.1 Charge	20
1.10.2 Hydrophobicity	21
1.10.3 Affinity	21
1.10.4 Solubility and Stability	21
1.10.5 Size and Shape	21
1.11 Conclusions	21
1.12 References	22

Chapter 2: Types of Liquid Chromatography 25

2.1 Introduction	27
2.2 Ion Exchange Chromatography	27
2.2.1 Mechanism of Separation	27
2.2.2 Elution Strategies	30
2.2.3 Applications of Ion Exchange Chromatography	32
2.3 Hydrophobic Interaction Chromatography	32
2.3.1 Mechanism of Separation	33
2.3.2 Factors Affecting the Binding Behavior of Hydrophobic Interaction Chromatography	34
2.3.3 Elution Strategies	35
2.3.4 Applications of Hydrophobic Interaction Chromatography	36
2.4 Reversed Phase Chromatography	37
2.4.1 Mechanism of Separation	37
2.4.2 Elution Strategies	39
2.4.3 Applications of Reversed Phase Chromatography	40
2.5 Affinity Chromatography	41
2.5.1 Mechanism of Separation	42
2.5.2 Elution Strategies	44
2.5.3 Applications of Affinity Chromatography	45
2.5.3.1 Purification of Immunoglobulins	45
2.5.3.2 Purification of DNA-binding Proteins	46
2.5.3.3 Purification of Glycoproteins	46
2.5.3.4 Affinity Tags	47
2.6 Gel Filtration Chromatography	50
2.6.1 Mechanism of Separation	50
2.6.2 Elution Strategies	53
2.6.3 Applications of Gel Filtration Chromatography	54

2.6.3.1	Group Separation	54
2.6.3.2	High Resolution Fractionation	54
2.6.3.3	Determination of Molecular Size	54
2.7	Conclusions	55
2.8	References	56

Chapter 3: Application Examples of Liquid Chromatography 59

3.1	Introduction	61
3.2	Application Example of Ion Exchange Chromatography	61
3.2.1	Materials and Reagents	62
3.2.2	Equipment	62
3.2.3	Protocol	63
3.2.3.1	Sample preparation	63
3.2.3.2	Purification of the DmGSTE7-7 enzyme by using an anion exchange column	63
3.2.3.3	Removal of salt from the eluted sample by using a desalting column	64
3.2.4	Note	65
3.3	Application Example of Affinity Chromatography using a Glutathione Sepharose Column	66
3.3.1	Materials and Reagents	66
3.3.2	Equipment	66
3.3.3	Protocol	67
3.3.3.1	Sample preparation	67
3.3.3.2	Purification of the GST enzyme by using a glutathione-sepharose column	67
3.3.3.3	Removal of reduced glutathione from the eluted sample by using a desalting column	68
3.3.4	Note	69
3.4	Application Example of Affinity Chromatography using IMAC	70
3.4.1	Materials and Reagents	70
3.4.2	Equipment	70
3.4.3	Protocol	71
3.4.3.1	Sample preparation	71
3.4.3.2	Purification of the His-tagged BinB protein by using a Ni-NTA column	71
3.4.3.3	Removal of imidazole from the eluted sample by using a desalting column	72
3.4.4	Note	73

C o n t e n t s

3.5	Application Example of Gel Filtration Chromatography	74
3.5.1	Materials and Reagents	74
3.5.2	Equipment	74
3.5.3	Protocol	75
3.5.3.1	Sample preparation	75
3.5.3.2	Protein purification by gel filtration chromatography	75
3.5.4	Note	77
3.6	Conclusions	77
3.7	References	77
	GLOSSARY	79
	INDEX	85
	About the Author	91
