Preface vii

Acknowledgments viii

<b>1</b>	<b>Overview of Pulmonary Rehabilitation</b> . . . . .	<b>1</b>
	Definition	1
	Positioning Pulmonary Rehabilitation Within COPD Guidelines	1
	Rationale for Pulmonary Rehabilitation	1
	ACCP/AACVPR Evidence-Based Guidelines on Pulmonary Rehabilitation	2
	Pulmonary Rehabilitation and Integrated Care of the Respiratory Patient	3
	History of Pulmonary Rehabilitation	4
	Summary	6
<b>2</b>	<b>Selecting and Assessing the Pulmonary Rehabilitation Candidate</b> . . . . .	<b>9</b>
	Patient Selection	9
	Patient Assessment	11
	Rehabilitation Potential	18
	Summary	19
<b>3</b>	<b>Collaborative Self-Management Education</b> . . . . .	<b>21</b>
	Developing an Individualized Education Program	21
	Educational Content	22
	Summary	30
<b>4</b>	<b>Exercise Assessment and Training</b> . . . . .	<b>31</b>
	Exercise Assessment	31
	Walk Distance Tests (WDTs)	33
	Incremental Maximal Exercise Tests (IMETs)	38
	Submaximal Exercise Test	39
	Exercise Assessment Equipment	39
	Functional Performance Assessment	40
	Exercise Training in Chronic Lung Disease	40
	Principles of Exercise Training	42

Contents

Upper- and Lower-Extremity Training 45  
Strength Training 45  
Flexibility, Posture, and Body Mechanics 46  
Respiratory Muscle Training 46  
Emergency Procedures 47  
Documenting the Evaluation and Treatment Session 48  
Home Exercise Program 48  
Summary 49

**5 Psychosocial Assessment and Intervention . . . 53**

Prevalence of Psychosocial Concerns 53  
Assessment of Psychosocial Concerns 54  
Interventions for Psychosocial Concerns 59  
Interventions for Other Psychological Concerns 60  
Summary 64

**6 Patient-Centered Outcomes . . . . . 67**

Timing and Analyzing Outcomes 68  
Common Outcome Measures 69  
Summary 75

**7 Disease-Specific Approaches  
in Pulmonary Rehabilitation . . . . . 77**

Asthma 78  
Cystic Fibrosis 80  
Non-Cystic Fibrosis Bronchiectasis 82  
Interstitial Lung Disease 82  
Obesity-Related Respiratory Disorders 85  
Pulmonary Hypertension 87  
Chest Wall and Neuromuscular Disorders 89  
Lung Cancer 92  
Pulmonary Rehabilitation and the Surgical Patient 92  
Lung Volume Reduction Surgery 94  
Lung Transplantation 95  
Patients with Coexisting Respiratory and Cardiac Disease 98  
Summary 99

**8 Program Management ..... 107**

- Interdisciplinary Team 107
- Program Content and Structure 110
- Administrative Aspects of Program Management 112
- Postrehabilitation Maintenance 115
- Reimbursement 116
- Strategies for Program Success 116
- Summary 117

**9 AACVPR Pulmonary Rehabilitation Program Certification ..... 119**

- Resources for Certification 119
- Certification Process 120
- Staffing Ratios for Exercise 120
- Documentation Overview 120
- Documentation for Outcomes 123
- Summary 124

- Appendix A Forms, Questionnaires, and Assessments 125
- Appendix B American Thoracic Society Statement: Guidelines for the Six-Minute Walk Test 149
- Appendix C Clinical Competency Guidelines for Pulmonary Rehabilitation Professionals 159
- Appendix D Examples of Pulmonary Rehabilitation Programs That Meet 2, 3, and 5 Days a Week 167
- Appendix E Example of a Typical Pulmonary Rehabilitation Facility 171
- Appendix F Pulmonary Rehabilitation Skills and Competency Assessment 173
- Index 177
- About the AACVPR 183
- Membership Application 184
