Contributors xv ■ Preface xxi

## Part I: Definition and Assessment of Physical Activity and Obesity. . . . . 1

<b>1</b>	<b>Introduction</b>	<b>2</b>
	<i>Claude Bouchard and Peter T. Katzmarzyk</i>	
	A General Model . . . . .	2
	Gene–Physical Activity Interaction Effects . . . . .	3
	Progress Over the Past Decade . . . . .	4
	Important Differences Between Overweight and Obesity . . . . .	4
	A Major Challenge . . . . .	5
	Content of the Book . . . . .	6

<b>2</b>	<b>The Physical Activity and Exercise Continuum</b>	<b>7</b>
	<i>Darren Warburton</i>	
	Definition of Health, Physical Activity, and Exercise . . . . .	7
	The Continuum of Physical Activity Behavior . . . . .	8
	Estimates and Indices of Physical Activity . . . . .	9
	Summary . . . . .	12

<b>3</b>	<b>Assessing the Level of Sedentarism</b>	<b>13</b>
	<i>Mark S. Tremblay</i>	
	Relationship Between Sedentarism and Health . . . . .	13
	Behavior Compensation . . . . .	14
	Methods to Assess Sedentarism . . . . .	14
	Examples of Sedentarism Assessment . . . . .	16
	Implications . . . . .	17
	Summary . . . . .	17

<b>4</b>	<b>Assessing the Level of Physical Activity in Adults</b>	<b>18</b>
	<i>Barbara E. Ainsworth</i>	
	Movement Construct . . . . .	18
	Measuring Physical Activity Behaviors . . . . .	20
	Measuring Energy Expenditure . . . . .	21
	Summary . . . . .	21

<b>5</b>	<b>Assessing the Level of Physical Activity in Children</b>	<b>22</b>
	<i>Russell R. Pate</i>	
	Established Measures of Physical Activity . . . . .	22
	Emerging Methods in Physical Activity Assessment . . . . .	24
	Conclusion . . . . .	24

<b>6</b>	<b>Evaluation of the Overweight Patient</b>	<b>26</b>
	<i>George A. Bray</i>	
	Evaluation . . . . .	26
	A Clinical Perspective on Setting Weight Loss Goals . . . . .	26
	Clinical Evaluation of the Overweight Patient . . . . .	27
	Clinical History . . . . .	27
	Family History . . . . .	27
	Physical Examination . . . . .	27
	Laboratory Evaluation . . . . .	29

<b>7</b>	<b>Assessment of Obesity in Children</b>	<b>30</b>
	<i>John H. Himes</i>	
	Definitions and Nomenclature . . . . .	30
	Clinical Applications . . . . .	31
	Public Health Applications . . . . .	31
	Research Applications . . . . .	31
	Conclusions . . . . .	33

<b>8</b>	<b>Limitations of Self-Report in Physical Activity and Obesity Research</b>	<b>34</b>
	<i>Richard P. Troiano</i>	
	Methods of Reported Weight Status . . . . .	34
	Methods of Reported Physical Activity . . . . .	34
	Evaluating Agreement Between Self-Reports and Objective Measures . . . . .	35
	Beyond Bias . . . . .	36
	Implications of Reporting Error . . . . .	37

**Part II: Prevalence and Cost Issues . . . . .39**

**9 Global Prevalence of Adult Physical Inactivity 40**

*Wendy J. Brown*

Comparisons From National Population  
Surveillance Instruments . . . . . 40

“International” Surveys for Measuring  
Physical (In)Activity . . . . . 41

International Comparisons in Europe . . . . . 41

Global Physical Activity . . . . . 42

Minority Populations . . . . . 43

Conclusions . . . . . 43

**10 The Prevalence of Children’s Physical Activity 44**

*Chris Riddoch*

Accelerometer Measures of Physical Activity . . . . . 44

Levels of Physical Activity . . . . . 45

Future Directions . . . . . 47

Conclusions . . . . . 47

**11 Global Prevalence of Adult Obesity 48**

*W. Philip T. James*

Secular Increases in Obesity . . . . . 48

Overall Global Prevalences . . . . . 50

Regional Differences . . . . . 50

Sex Differences . . . . . 50

Age, Period, and Cohort Effects . . . . . 51

Socioeconomic Differences . . . . . 52

**12 The Economic Cost of Obesity 53**

*Peter T. Katzmarzyk*

Methods to Estimate Costs . . . . . 53

Direct Costs of Obesity . . . . . 54

Indirect Costs of Obesity . . . . . 55

Lifetime Health Care Costs . . . . . 56

Summary . . . . . 56

**13 Global Prevalence of Childhood Obesity 57**

*Tim Lobstein*

Definitions of Child Overweight and Obesity . . . . . 57

Prevalence Levels in Childhood and Adolescence . . . . . 58

Worldwide Prevalence Levels . . . . . 58

Secular Trends and Demographic Differences . . . . . 60

Conclusion . . . . . 60

**14 The Economic Cost of Physical Inactivity 61**

*Ian Janssen*

Direct Versus Indirect Costs . . . . . 61

Population-Level Versus Individual-Level Costs . . . . . 62

Currents Costs Versus Lifetime Costs . . . . . 63

Conclusions . . . . . 64

**15 The Cost-Benefit Relationship of Physical Activity Interventions for Obesity 65**

*Larissa Roux*

Cost-Effectiveness Analyses in Obesity . . . . . 65

Determining Cost . . . . . 66

Putting It Together in the Real World . . . . . 66

Addressing Challenges Through the Project  
MOVE Approach . . . . . 67

Future Directions . . . . . 68

**Part III: Determinants of Physical Activity Levels . . . . . 69**

**16 Biological Regulation of Physical Activity Level 70**

*Catherine M. Kotz*

Spontaneous Physical Activity . . . . . 70  
Physical Activity Regulation . . . . . 70  
Physical Activity and Body Weight . . . . . 71  
Potential Mechanisms . . . . . 72  
Conclusion . . . . . 72

**17 Genetics and Physical Activity Level 73**

*Tuomo Rankinen*

Evidence From Genetic Epidemiology Studies . . . . . 73  
Evidence From Molecular Studies . . . . . 74  
Future Directions . . . . . 75  
Summary . . . . . 75

**18 Epigenetic or Programming Effects on Physical Activity Level 77**

*Mark H. Vickers*

Evidence From Animal Models and Epidemiology . . . . . 77  
Possible Mechanisms . . . . . 79  
Epigenetic Basis for Reduced Physical Activity . . . . . 79  
Conclusions . . . . . 80

**19 Socioeconomic Position and Physical Activity Levels 81**

*Lise Gauvin*

Conceptualization and Operationalization of SEP . . . . . 81  
Socioeconomic Position and Physical Activity Levels . . . . . 82  
Socioeconomic Position and Physical Activity Interventions . . . . . 83  
Conclusion . . . . . 84

**20 U.S. Ethnic Differences in Physical Activity and Sedentary Behavior 85**

*Robert L. Newton, Jr.*

Physical Activity in Adults . . . . . 85  
Sedentary Behavior in Adults . . . . . 86  
Physical Activity in Children . . . . . 87  
Sedentary Behavior in Children . . . . . 87  
Conclusions . . . . . 88

**21 Psychological Factors and Physical Activity Level 89**

*Rod K. Dishman*

Moderators and Mediators of Physical Activity . . . . . 89  
Measurement of Social-Cognitive Moderators and Mediators . . . . . 90  
Measurement of Physical Activity . . . . . 91  
Environments and Choice . . . . . 91  
Biology and Choice . . . . . 91  
Multilevel Models of Physical Activity Change . . . . . 91  
Summary . . . . . 92

**22 Effects of the Built Environment on Physical Activity Level 93**

*James F. Sallis*

Need for Transdisciplinary Collaboration . . . . . 93  
Built Environments and Physical Activity in Adults . . . . . 94  
Built Environments and Physical Activity in Youth . . . . . 95  
Causal Role of Built Environments . . . . . 95  
Strengths and Weaknesses . . . . . 96  
Future Directions . . . . . 96

**23 Sedentary Time and the Risk of Obesity in Adults 98**

*Ross Andersen*

Obesity and Sedentary Versus Active Choices . . . . . 98  
 Associations of Sedentary and Leisure-Time Activities With Obesity . . . . . 99  
 Sedentary Activity and Weight Regain . . . . . 99  
 Reducing Sedentary Time to Treat Obesity . . . . . 100  
 Summary . . . . . 100

**24 Sedentary Time and the Risk of Obesity in Children 101**

*Steven L. Gortmaker*

Television Viewing and Obesity Risk . . . . . 101  
 Effects of TV Viewing on Energy Expenditure and Dietary Intake . . . . . 102  
 Other Sedentary Behaviors and Obesity Risk . . . . . 102  
 Sedentary Time and Physical Activity Levels . . . . . 102  
 Summary . . . . . 103

**25 Physical Activity Level and the Risk of Obesity in Adults 104**

*John M. Jakicic*

Cross-Sectional Association Between Body Weight and Physical Activity . . . . . 104  
 Physical Activity and Weight Change . . . . . 105  
 Cardiorespiratory Fitness and Weight Change . . . . . 105  
 Sedentary Behavior and Weight Change . . . . . 105  
 Summary . . . . . 106

**26 Physical Activity Level and the Risk of Obesity in Children 107**

*Margarita S. Treuth*

Levels of Physical Activity in Children and Adolescents . . . 107  
 Childhood . . . . . 108  
 Adolescence . . . . . 110  
 Future Directions . . . . . 110  
 Summary . . . . . 110

**27 Childhood and Adolescent Physical Activity and Risk of Adult Obesity 111**

*Robert M. Malina*

Body Mass Index as Influenced by Growth and Maturation . . . . . 111  
 Tracking Body Mass Index and Risk of Overweight or Obesity . . . . . 112

Energy Expenditure and Physical Activity in Childhood and Adolescence . . . . . 112  
 Tracking Physical Activity . . . . . 112  
 Physical Activity and Adiposity During Childhood and Adolescence . . . . . 112  
 Childhood and Adolescent Activity and Adiposity in Adulthood . . . . . 112  
 Transition From Adolescence Into Adulthood . . . . . 113  
 Conclusion . . . . . 113

**28 Childhood Obesity and the Risk of Adult Obesity 114**

*François Trudeau*

Body Mass Index . . . . . 114  
 Effect of Gender . . . . . 115  
 Skinfolds . . . . . 116  
 Waist Circumference . . . . . 116  
 Challenges for Research . . . . . 116  
 Conclusion . . . . . 116

**29 Physical Activity and Risk of Obesity in Older Adults 117**

*Wendy M. Kohrt*

Prevalence of Obesity in Older Adults . . . . . 117  
 Prevalence of Physical Activity in Older Adults . . . . . 118  
 Does Physical Activity Prevent Fat Accumulation With Aging? . . . . . 118  
 Does Physical Activity Reduce Obesity Risk in Older Adults? . . . . . 119  
 Independent Effects of Physical Activity and Obesity on Physical Function . . . . . 120  
 Summary . . . . . 120

**30 Physical Fitness and Risk of Obesity 121**

*Steven N. Blair*

Methods . . . . . 122  
 Fitness and Obesity in Children and Adolescents . . . . . 122  
 Fitness and Obesity in Adults . . . . . 124  
 Conclusion . . . . . 125

**31 The Interaction of Diet and Physical Activity on Obesity 126**

*Tom Baranowski*

The Energy Balance Concept . . . . . 126  
 Emerging Questions About Diet and Physical Activity . . . . 127  
 Future Directions . . . . . 128  
 Conclusion . . . . . 128

**32 Physical Activity Level and Resting Metabolic Rate** ..... **130**

*Angelo Tremblay*

Resting Metabolic Rate in Exercise-Trained Individuals ... 130  
 Acute Effect of Exercise on RMR ..... 130  
 A Genotype–Exercise Interaction Effect on RMR ..... 131  
 Obesity Treatment and RMR ..... 131  
 Conclusion ..... 131

**33 Physical Activity and Thermic Effect of Food** ..... **132**

*Yves Schutz*

Factors Influencing TEF in Obesity ..... 132  
 Thermic Effect of Food Combined With Exercise ..... 133  
 Thermic Effect of Food and Exercise Training ..... 134  
 Exercise, TEF, and Postprandial Substrate Utilization ... 134  
 Conclusions ..... 135

**34 Physical Activity and Substrate Oxidation** ..... **136**

*Steven R. Smith*

Metabolic Inflexibility in Obesity and Type 2 Diabetes ..... 136  
 Reduced Capacity for Fat Oxidation? ..... 136  
 Is Inflexibility “Preprogrammed” Into Muscle Cells? ... 137  
 Importance of Physical Activity in Glucose and Fat Oxidation ..... 137  
 Intramyocellular Lipid Droplets as a Fuel Source During Exercise ..... 138  
 Intramyocellular Lipid Droplets as a Buffer Against “Lipotoxicity”? ..... 140  
 Fat Oxidation ..... 140  
 Intensity and Duration of Exercise Needed to Improve Metabolic Flexibility ..... 140  
 Summary ..... 141

**35 Physical Activity and Sympathetic Nervous System Activity** ..... **142**

*Ian A. Macdonald*

Exercise and the Sympathoadrenal System ..... 143  
 Physical Activity and the Sympathoadrenal System ... 144  
 Conclusions ..... 145

**36 Physical Activity Level and Adipose Tissue Biology** ..... **146**

*Isabelle de Glisezinski*

Adipocyte Lipolysis Regulation ..... 146  
 Lipolysis and Exercise in Obesity ..... 147  
 Lipolysis and Exercise Training in Obese Persons ..... 149  
 Conclusion ..... 150

**37 Physical Activity and Leptin Biology** ..... **151**

*David J. Dyck*

Importance of Skeletal Muscle and the Potential Role of Leptin ..... 152  
 Acute Effects of Leptin Regulation of Muscle Fatty Acid Metabolism and Insulin Sensitivity ..... 152  
 Chronic Effects of Leptin Regulation of Muscle Fatty Acid Metabolism and Insulin Sensitivity ..... 153  
 Physical Activity and Leptin ..... 153  
 Summary ..... 154

**38 Physical Activity Level and Hypothalamic Peptides** ..... **155**

*Christopher D. Morrison*

Hypothalamic Regulation of Energy Balance ..... 155  
 Hypothalamic Regulation of Physical Activity: General Considerations ..... 156  
 Regulation of Physical Activity by Hypothalamic Neuropeptides ..... 156  
 Effect of Physical Activity on the Hypothalamus ..... 157  
 Conclusions ..... 158

**39 Physical Activity Level and Gut Peptides** ..... **159**

*Stephen C. Woods*

Gastrointestinal Peptides ..... 160  
 Conclusions ..... 161

**40 Physical Activity Level and Thyroid Hormones** ..... **162**

*Anthony C. Hackney*

Regulation and Physiologic Function ..... 162  
 Physical Activity ..... 163  
 Lipid Metabolism ..... 164  
 Obesity and Exercise ..... 165  
 Conclusion ..... 165

**41 Physical Activity Level and the Hypothalamic-Pituitary-Adrenal Axis 166**

*Denis Richard*

The HPA Axis and Stress . . . . . 166  
The HPA Axis, Exercise, and Exercise Training . . . . . 167  
The HPA Axis, Energy Homeostasis, and Obesity . . . . . 169  
Conclusion . . . . . 169

**42 Physical Activity Level and Skeletal Muscle Biology 170**

*David A. Hood*

Myofibrillar Isoforms . . . . . 171  
Calcium-Handling Kinetics . . . . . 172  
Energy Provision . . . . . 172  
Summary . . . . . 173

**43 Postexercise Energy Expenditure 174**

*Elisabet Børsheim*

Methodological Considerations . . . . . 174  
Aerobic Exercise . . . . . 175  
Supramaximal Exercise . . . . . 175  
Resistance Exercise . . . . . 175  
Mechanisms Underlying EPOC . . . . . 176  
Effect of Subject Characteristics . . . . . 176  
Effect of Diet Composition . . . . . 177  
Implications for Total Energy Expenditure and Obesity . . . . . 177

**44 Genetics of Obesity 178**

*Ruth J.F. Loos*

Evidence for a Genetic Contribution to Obesity . . . . . 178  
Mendelian Disorders and Single-Gene Disorders . . . . . 179  
Genes for Common Obesity . . . . . 179  
Future Directions . . . . . 182  
Conclusions . . . . . 182

**45 Epigenetic Effects on Obesity 183**

*Peter W. Nathanielsz*

Altered Regulation of Appetite and Physical Activity . . . . . 184  
General Mechanisms of Epigenetic Modification of Gene Function . . . . . 185  
Conclusion . . . . . 186

**Part VI: Physical Activity, Behavioral, and Environmental Determinants of Obesity . . . . . 187**

**46 Physical Activity Level, Sleep, and Obesity 188**

*Shawn D. Youngstedt*

Epidemiologic Association of Sleep Duration With Obesity . . . . . 188  
Potential Mechanisms . . . . . 189  
Long Sleep and Obesity . . . . . 190  
Influence of Exercise on Sleep and Implications for Obesity . . . . . 190  
Future Directions . . . . . 190

**47 Physical Activity Level and Occupational Work 192**

*David R. Bassett, Jr.*

Historical Perspective . . . . . 192  
Recent Time Trends in Modern Industrialized Civilizations . . . . . 192  
Relationships Between Occupational Physical Activity and Obesity . . . . . 193  
How Jobs Influence Caloric Expenditure . . . . . 193  
Worksite Interventions . . . . . 194  
Conclusion . . . . . 194

**48 Physical Activity Level and Mode of Transportation 195**

*Catrine Tudor-Locke*

Active Transportation . . . . . 196  
Passive Transportation . . . . . 197  
Summary . . . . . 197

**49** **Effects of the Built Environment on Obesity** 199

*Neville Owen*

Associations of the Built Environment With Obesity . . . . . 199  
Research . . . . . 200  
Significance of Sedentary Behaviors . . . . . 201  
A Better Understanding . . . . . 201  
Conclusions . . . . . 202

**51** **Physical Activity Level and Dietary Intake** 210

*Conrad P. Earnest*

What Is Compensation? . . . . . 210  
Does Dieting Mean a License to Eat? . . . . . 211  
Does Exercise Volume Matter? . . . . . 211  
Refining Energy Balance . . . . . 212  
Summary . . . . . 213

**50** **Socioeconomic Status and Obesity** 203

*Youfa Wang*

Global Perspectives on Adults . . . . . 203  
Both Sexes . . . . . 206  
Socioeconomic Status and Weight Change  
in Adults From Developed Countries . . . . . 206  
A Global Perspective of Children  
in Developed Countries . . . . . 207  
Recent Findings in the United States . . . . . 207  
Conclusions . . . . . 209

**Part VII: Physical Activity in the Prevention and Treatment of Obesity . . . . . 215**

**52** **Physical Activity in the Prevention of Weight Gain** 216

*Mikael Fogelholm*

Secular Trends in Physical Activity and Obesity . . . . . 216  
Prospective Studies on Physical Activity  
and Weight Change . . . . . 216  
Reasons for Conflicting Results . . . . . 217  
The Public Health Message . . . . . 218

**53** **Physical Activity for Weight Loss** 219

*Robert Ross*

Physical Activity, Weight Loss,  
and Obesity Reduction . . . . . 219  
Physical Activity Without Weight Loss  
and Obesity Reduction . . . . . 221  
Summary . . . . . 222

**54** **Weight Loss Induced by Physical Activity Versus Diet** 223

*Joseph E. Donnelly*

Negative Energy Balance for Weight Loss . . . . . 223  
Energy Gap Caused by Energy Restriction  
or Physical Activity . . . . . 224  
Energy Gap Caused by Energy Restriction  
and Physical Activity . . . . . 224  
Energy Restriction Plus Physical Activity  
and Fat Mass Loss . . . . . 224  
Resistance Training and Weight Loss . . . . . 224  
Summary . . . . . 225

**55** **Role of Physical Activity in Pharmacological Weight Loss** 226

*Frank L. Greenway*

Lack of Research . . . . . 226  
Potential Role of Exercise . . . . . 227  
Future Directions . . . . . 228

**56** **Role of Physical Activity in Surgical Weight Loss** 229

*Paul E. O'Brien*

Current Types of Weight Loss Surgery . . . . . 229  
Rationale for Exercise in Bariatric Surgery . . . . . 229  
Does Exercise Make a Difference? . . . . . 230  
Recommendations for Exercise Programs  
in Bariatric Surgical Patients . . . . . 231  
Future Directions . . . . . 232

**57** **Physical Activity and Depot-Specific Fat Loss** 233

*Victor Katch*

Subject Issues . . . . . 233  
Measurement Issues . . . . . 234  
Body Areas Studied and Exercise Mode . . . . . 234  
Summary . . . . . 236

**58** **Physical Activity, Visceral Fat, and Ectopic Fat Deposition** 237

*Bret Goodpaster*

Effects of Physical Activity  
on Visceral Abdominal Fat . . . . . 237  
Effects of Physical Activity  
on Intra- and Extramyocellular Lipids . . . . . 237  
Physical Activity and Intrahepatic Fat . . . . . 238  
Conclusions . . . . . 238

**59** **Physical Activity, Weight Loss, and Maintenance of Lean Mass** 240

*Steven B. Heymsfield*

Body Composition and Energy Expenditure Effects . . . . . 240  
Low-Calorie Diet Effects . . . . . 241  
Combined Activity and Low-Calorie Diet Effects . . . . . 241  
Experimental Observations . . . . . 242  
Conclusions . . . . . 244

**60** **Physical Activity for Weight Loss Maintenance** 245

*Rena R. Wing*

Relationship Between Activity  
and Weight Loss Maintenance . . . . . 245  
Amount of Physical Activity to Prescribe . . . . . 246  
Conclusions . . . . . 247

**61** **Physical Activity and Weight Control During Pregnancy** 249

*Michelle F. Mottola*

Healthy Lifestyle Approach for Weight Control . . . . . 250  
Activity Recommendations . . . . . 250  
Summary . . . . . 252

**62** **Physical Activity and Postpartum Weight Loss** 253

*Cheryl Lovelady*

Exercise Effects in Lactation . . . . . 253  
Other Physical Activity Interventions . . . . . 254  
Conclusions . . . . . 254

**63** **Physical Activity and Birth Weight** 256

*Johan G. Eriksson*

Maternal Physical Activity During Pregnancy  
and Offspring Birth Size . . . . . 256  
Developmental Origins of Health and Disease . . . . . 256  
Birth Size and Exercise . . . . . 256  
Protective Effect of Exercise  
Among Individuals Born Small . . . . . 257  
Conclusions . . . . . 257

**64** **Physical Activity and Body Composition in Children** 259

*Bernard Gutin*

Body Mass Index as an Indicator  
of Intervention Effectiveness . . . . . 259  
Positive Energy Balance as a Cause  
for Pediatric Obesity . . . . . 260  
Experimental Trials of Physical Activity  
and Body Composition . . . . . 261  
Conclusion . . . . . 262

**65 Physical Activity and Mortality Rates in Obesity 264**

*Kevin R. Fontaine*

Conceptual Models . . . . . 264  
 Overview of Selected Studies . . . . . 265  
 Methodological Issues . . . . . 266  
 Conclusions . . . . . 267

**66 Physical Activity and Impaired Glucose Tolerance in Obesity 268**

*Markku Laakso*

Diabetes Prevention Trials . . . . . 268  
 Other Trials . . . . . 270  
 Conclusions . . . . . 271

**67 Physical Activity and Type 2 Diabetes in Obesity 272**

*Edward S. Horton*

Effects of Exercise . . . . . 272  
 Benefits of Exercise . . . . . 274  
 Risks of Exercise . . . . . 274  
 Guidelines for Exercise . . . . . 275  
 Special Considerations for People With T2DM . . . . . 276

**68 Physical Activity and Hypertension in Obesity 277**

*James M. Hagberg*

Treatment of Hypertension . . . . . 277  
 Increased Physical Activity as a Treatment . . . . . 278  
 Increased Physical Activity Plus Dietary Weight Loss as a Treatment . . . . . 279  
 Conclusion . . . . . 280

**69 Physical Activity and Heart Disease in Obesity 281**

*Timothy Church*

Cardiorespiratory Fitness and Cardiovascular Disease . . . . . 281  
 Fitness, Physical Activity, Fatness, and Cardiovascular Disease . . . . . 281  
 Physical Activity Quantification . . . . . 282  
 Clinical Importance of Fitness and Fatness in Cardiovascular Health . . . . . 283  
 Physical Activity and Cardiovascular Disease Risk . . . . . 283  
 Summary . . . . . 283

**70 Physical Activity and Stroke in Obesity 284**

*Janice Eng*

Impact of Obesity in Stroke . . . . . 284  
 Lack of Intensive Activity in Stroke Rehabilitation . . . . . 284  
 Inactivity in Chronic Stroke . . . . . 285  
 Challenges of Regular Exercise . . . . . 285  
 Benefits of Exercise . . . . . 285  
 Strategies for Increasing Physical Activity and Healthy Eating . . . . . 285  
 Conclusions . . . . . 286

**71 Physical Activity and Endothelial Dysfunction in Obesity 287**

*Christopher A. DeSouza*

Obesity and Endothelium-Dependent Vasodilation . . . . . 287  
 Obesity, Endothelium-Dependent Vasodilation, and Physical Activity . . . . . 288  
 Obesity and Endothelial Fibrinolytic Capacity . . . . . 289  
 Obesity, Endothelial Fibrinolytic Capacity, and Physical Activity . . . . . 289  
 Summary . . . . . 290

**72 Physical Activity and Inflammation in Obesity 291**

*Mark Hamer*

Adiposity, Inflammation, and Confounding . . . . . 291  
 Mechanisms . . . . . 292  
 Cause and Effect of Inflammation . . . . . 293  
 Future Directions . . . . . 294  
 Conclusion . . . . . 294

**73 Physical Activity and Depression in Obesity 295**

*Adrian H. Taylor*

Associations Between Physical Activity, Depression, and Obesity . . . . . 295  
 Physical Activity, Depression, and Obesity . . . . . 295  
 Mechanisms . . . . . 297  
 Psychological and Behavioral Acute Responses to Physical Activity . . . . . 297  
 Conclusion . . . . . 298

**74 Physical Activity and Breast Cancer in Obesity 299**

*Kerry S. Courneya*

Physical Activity in the Primary Prevention of Breast Cancer . . . . . 299  
Physical Activity in the Secondary Prevention of Breast Cancer . . . . . 300  
Possible Mechanisms . . . . . 301  
Supportive Care in Survivors . . . . . 301  
Physical Activity in Breast Cancer Survivors . . . . . 301  
Weight Loss Interventions in Breast Cancer Survivors . . . . . 302  
Future Directions . . . . . 302

**75 Physical Activity and Colon Cancer in Obesity 303**

*I-Min Lee*

Potential Biological Mechanisms . . . . . 303  
Physical Activity and Decreased Risk of Colon Cancer . . . . . 304  
Obesity and Increased Risk of Colon Cancer . . . . . 304  
Association of Physical Activity and Obesity With Colon Cancer Risk . . . . . 305  
Conclusion . . . . . 306

**76 Physical Activity and Other Cancers in Obesity 307**

*Roy J. Shephard*

Endometrial Tumors . . . . . 307  
Renal Tumors . . . . . 308  
Pancreatic Tumors . . . . . 308  
Esophageal Tumors . . . . . 308  
Prostatic Tumors . . . . . 308  
Ovarian Tumors . . . . . 308  
Hepatic and Biliary Tract Tumors . . . . . 308  
Multiple Myelomata . . . . . 309  
Leukemia . . . . . 309  
Non-Hodgkin's Lymphoma . . . . . 309  
Reasons for the Observed Associations . . . . . 309  
Conclusions . . . . . 310

**77 Physical Activity, Obesity, and Metabolic Syndrome 311**

*Mercedes R. Carnethon*

Physical Activity and Metabolic Syndrome . . . . . 311  
Obesity, Activity, and Metabolic Syndrome . . . . . 313  
Is Weight Loss Required to Lower Metabolic Syndrome Risk? . . . . . 313  
Is Cardiorespiratory Fitness Needed to Lower Metabolic Syndrome Risk? . . . . . 314  
Summary . . . . . 315

**78 Physical Activity and Musculoskeletal Disorders in Obesity 316**

*Jennifer M. Hootman*

Relationship Between Obesity and MSK Disorders and Disability . . . . . 316  
Relationship Between Physical Activity and MSK Disorders . . . . . 317  
Effects of Obesity on the MSK System . . . . . 318  
Physical Activity and Diet Interventions for Obese Patients With MSK disease . . . . . 319  
Summary . . . . . 319

**79 Physical Activity and Risk of Falls in Obese Adults 320**

*Teresa Liu-Ambrose*

Falls in Community-Dwelling Older Adults . . . . . 320  
Risk Factors for Falls . . . . . 320  
Risk Factors for Injurious Falls . . . . . 320  
Risk of Falls and Injurious Falls Among Obese Adults . . . . . 321  
Evidence-Based Exercise Interventions to Prevent Falls . . . . . 321  
Conclusions . . . . . 322

**80 Adverse Events From Physical Activity in Obese Persons 323**

*Kenneth E. Powell*

Activity-Related Adverse Events and Their Risk Factors . . . . . 324  
Obesity and the Risks of Musculoskeletal Injury . . . . . 324  
Obesity and the Risks of Activity-Related Sudden Adverse Cardiac Events . . . . . 325  
Obesity and the Risk of Heat Injury . . . . . 326  
Conclusion . . . . . 326

**81 Physical Activity and Cardiovascular Disease Risk Profile in Obese Children 327**

*Lars Bo Andersen*

Physiological Mechanisms Associated With CVD Risk Factors . . . . . 328  
Single CVD Risk Factors . . . . . 328  
Clustering of Risk Factors . . . . . 329  
The Role of Cytokines . . . . . 330  
Conclusion . . . . . 330

**82 Physical Activity and Risk of Diabetes in Obese Children 331**

*Louise A. Baur*

Insulin Resistance and Risk of Diabetes . . . . . 331  
Measuring Insulin Action . . . . . 331  
Observational Studies of Physical Activity and Insulin Resistance . . . . . 331  
Intervention Studies . . . . . 332  
Conclusion . . . . . 333

**83 Global Policy Initiatives  
Related to Physical Activity and Obesity 336**

*Timothy Armstrong*

Global Response to NCD  
and Physical Inactivity Burden . . . . . 336  
Global Strategy on Diet, Physical Activity and Health. . . . . 336  
Conclusions . . . . . 339

**84 The Role of Government  
in the Promotion of Physical Activity 341**

*Art Salmon*

Global Governmental Initiatives . . . . . 341  
Governmental Roles, Strategies, and Tools . . . . . 342  
Conclusion . . . . . 344

**85 Community-Based Physical Activity  
Programs to Address Obesity 345**

*W. Kerry Mummery*

Importance of Community-Level Interventions  
for Physical Activity. . . . . 345  
Role of Community Coalitions  
in Physical Activity Promotion . . . . . 347  
10,000 Steps Rockhampton. . . . . 347  
Conclusion . . . . . 348

**86 School-Based Physical Activity  
Programs to Address Obesity 349**

*Chantal Simon*

Summary of Evidence Base . . . . . 350  
Physical Activity Promotion Strategies. . . . . 350  
Keys to Success and Mediators of Effectiveness. . . . . 354  
Conclusion . . . . . 356

**87 The Role of Industry in the Promotion  
of Physical Activity 357**

*John C. Peters*

How Industry and the Public are Connected . . . . . 357  
Should Industry Promote Physical Activity? . . . . . 358  
Why Physical Activity Promotion Is Not the Norm  
in the Workplace . . . . . 358  
Missing Factors . . . . . 359  
Importance of Incentives . . . . . 359  
Future Directions . . . . . 359  
Conclusion . . . . . 360

**88 Mass Media Approaches to Addressing  
Physical Inactivity and Obesity 361**

*Adrian Bauman*

The History of Mass Media Campaigns . . . . . 362  
Future Directions . . . . . 363  
Conclusion . . . . . 363

**89 Future Directions in Physical Activity  
and Obesity Research 364**

*Peter T. Katzmarzyk and Claude Bouchard*

Definition and Assessment  
of Physical Activity and Obesity . . . . . 365  
Prevalence and Cost Issues . . . . . 365  
Determinants of Physical Activity Levels . . . . . 366  
Physical Activity and Risk of Obesity . . . . . 366  
Physical Activity and Biological Determinants  
of Obesity . . . . . 366  
Physical Activity and Behavioral and Environmental  
Determinants of Obesity . . . . . 366  
Physical Activity in the Prevention  
and Treatment of Obesity . . . . . 367  
Clinical Applications . . . . . 367  
Policy and Research Issues . . . . . 367  
Summary . . . . . 367
