

ANALYTICAL CHEMISTRY SERIES

ARTIFICIAL NEURAL NETWORKS IN BIOLOGICAL AND ENVIRONMENTAL ANALYSIS

Grady Hanrahan

CRC Press
Taylor & Francis Group

Contents

Foreword	xi
Preface.....	xiii
Acknowledgments.....	xv
The Author.....	xvii
Guest Contributors.....	xix
Glossary of Acronyms	xxi
Chapter 1 Introduction.....	1
1.1 Artificial Intelligence: Competing Approaches or Hybrid Intelligent Systems?.....	1
1.2 Neural Networks: An Introduction and Brief History.....	3
1.2.1 The Biological Model.....	5
1.2.2 The Artificial Neuron Model	6
1.3 Neural Network Application Areas.....	11
1.4 Concluding Remarks	13
References	13
Chapter 2 Network Architectures	17
2.1 Neural Network Connectivity and Layer Arrangement.....	17
2.2 Feedforward Neural Networks	17
2.2.1 The Perceptron Revisited	17
2.2.2 Radial Basis Function Neural Networks	23
2.3 Recurrent Neural Networks.....	26
2.3.1 The Hopfield Network	28
2.3.2 Kohonen's Self-Organizing Map.....	30
2.4 Concluding Remarks	33
References	33
Chapter 3 Model Design and Selection Considerations.....	37
3.1 In Search of the Appropriate Model.....	37
3.2 Data Acquisition	38
3.3 Data Preprocessing and Transformation Processes.....	39
3.3.1 Handling Missing Values and Outliers	39
3.3.2 Linear Scaling	40
3.3.3 Autoscaling.....	41
3.3.4 Logarithmic Scaling.....	41
3.3.5 Principal Component Analysis.....	41
3.3.6 Wavelet Transform Preprocessing.....	42

3.4	Feature Selection	43
3.5	Data Subset Selection	44
3.5.1	Data Partitioning	45
3.5.2	Dealing with Limited Data	46
3.6	Neural Network Training	47
3.6.1	Learning Rules	47
3.6.2	Supervised Learning	49
3.6.2.1	The Perceptron Learning Rule	50
3.6.2.2	Gradient Descent and Back-Propagation	50
3.6.2.3	The Delta Learning Rule	51
3.6.2.4	Back-Propagation Learning Algorithm	52
3.6.3	Unsupervised Learning and Self-Organization	54
3.6.4	The Self Organizing Map.....	54
3.6.5	Bayesian Learning Considerations.....	55
3.7	Model Selection	56
3.8	Model Validation and Sensitivity Analysis	58
3.9	Concluding Remarks	59
	References	59

Chapter 4 Intelligent Neural Network Systems and Evolutionary Learning 65

4.1	Hybrid Neural Systems.....	65
4.2	An Introduction to Genetic Algorithms	65
4.2.1	Initiation and Encoding.....	67
4.2.1.1	Binary Encoding.....	68
4.2.2	Fitness and Objective Function Evaluation	69
4.2.3	Selection	70
4.2.4	Crossover	71
4.2.5	Mutation	72
4.3	An Introduction to Fuzzy Concepts and Fuzzy Inference Systems.....	73
4.3.1	Fuzzy Sets	73
4.3.2	Fuzzy Inference and Function Approximation	74
4.3.3	Fuzzy Indices and Evaluation of Environmental Conditions	77
4.4	The Neural-Fuzzy Approach.....	78
4.4.1	Genetic Algorithms in Designing Fuzzy Rule-Based Systems	81
4.5	Hybrid Neural Network-Genetic Algorithm Approach.....	81
4.6	Concluding Remarks	85
	References	86

Chapter 5 Applications in Biological and Biomedical Analysis..... 89

5.1	Introduction	89
5.2	Applications.....	89

5.2.1	Enzymatic Activity.....	94
5.2.2	Quantitative Structure–Activity Relationship (QSAR).....	99
5.2.3	Psychological and Physical Treatment of Maladies	108
5.2.4	Prediction of Peptide Separation	110
5.3	Concluding Remarks	112
	References	115
Chapter 6	Applications in Environmental Analysis	119
6.1	Introduction	119
6.2	Applications.....	120
6.2.1	Aquatic Modeling and Watershed Processes	120
6.2.2	Endocrine Disruptors	128
6.2.3	Ecotoxicity and Sediment Quality	133
6.2.4	Modeling Pollution Emission Processes	136
6.2.5	Partition Coefficient Prediction.....	141
6.2.6	Neural Networks and the Evolution of Environmental Change (A Contribution by Kudlak et al.)	143
6.2.6.1	Studies in the Lithosphere	144
6.2.6.2	Studies in the Atmosphere.....	144
6.2.6.3	Studies in the Hydrosphere.....	145
6.2.6.4	Studies in the Biosphere	146
6.2.6.5	Environmental Risk Assessment	146
6.3	Concluding Remarks.....	146
	References	147
	Appendix I: Review of Basic Matrix Notation and Operations.....	151
	Appendix II: Cytochrome P450 (CYP450) Isoform Data Set Used in Michielan et al. (2009)	155
	Appendix III: A 143-Member VOC Data Set and Corresponding Observed and Predicted Values of Air-to-Blood Partition Coefficients.....	179
	Index.....	183
