Preface.....	ix
Acknowledgments .....	xi
<b>1. Introduction to Polymers .....</b>	<b>1</b>
1.1 A Brief Historical Perspective .....	1
1.2 Chemical Structure, Nomenclature, and Morphology.....	2
1.3 Polymeric Classification Based on Thermal and Mechanical Properties .....	11
1.3.1 Thermoplastics .....	15
1.3.2 Thermosets.....	16
1.3.3 Ionomers .....	18
1.3.4 Elastomers.....	18
References .....	19
<b>2. Certification and Characterization of Photovoltaic Packaging.....</b>	<b>21</b>
2.1 Overview of Photovoltaic Installations.....	21
2.2 Selection Requirements for Photovoltaic Packaging .....	22
2.2.1 Certification and Compliance Criteria.....	25
2.2.1.1 Restriction of Hazardous Substances (RoHS) and Waste Electrical and Electronic Equipment (WEEE) Directives .....	26
2.2.1.2 Underwriters Laboratories.....	27
2.2.1.3 International Electrotechnical Commission .....	28
2.2.1.4 American Standard for Testing Materials .....	28
2.3 Optical Properties .....	29
2.3.1 Material Properties .....	30
2.3.1.1 Refractive Index Measurements.....	31
2.3.1.2 Yellowness Index.....	34
2.3.2 Photovoltaic Module Performance .....	37
2.3.2.1 Quantum Efficiency Measurements.....	38
2.3.2.2 Current-Voltage (IV) Measurements.....	40
2.4 Thermal Properties .....	44
2.4.1 Material Properties .....	44
2.4.1.1 Morphology.....	44
2.4.1.2 Coefficient of Thermal Expansion .....	46
2.4.1.3 Thermal Conductivity .....	48
2.4.2 Photovoltaic Module Performance .....	51
2.4.2.1 Frame Warp.....	51
2.4.2.2 In-Service Temperature Measurements .....	52

2.5	Mechanical Properties.....	52
2.5.1	Material Properties.....	53
2.5.1.1	Durometer.....	54
2.5.1.2	Peel Strength.....	55
2.5.1.3	Tensile and Compression.....	56
2.5.1.4	Impact Resistance.....	60
2.5.1.5	Flexural Testing.....	61
2.5.2	Photovoltaic Module Performance.....	62
2.5.2.1	Thermal Cycling and Humidity Testing.....	63
2.5.2.2	Salt Fog.....	65
2.5.2.3	Snow Loading.....	65
2.6	Electrical Properties.....	66
2.6.1	Material Properties: Dielectric Properties.....	67
2.6.2	Photovoltaic Module Performance.....	69
2.6.2.1	Wet-Leak Testing.....	69
2.6.2.2	High-Potential Testing.....	70
2.7	Flammability.....	70
2.7.1	Material Properties.....	71
2.7.2	Photovoltaic Module Performance.....	75
2.8	Weathering Stability.....	77
2.8.1	Material Properties.....	78
2.8.1.1	Stabilizer Package.....	78
2.8.1.2	Transmission Rates.....	81
2.8.1.3	Hydrolytic Degradation.....	86
2.8.1.4	Oxidative Degradation.....	87
2.8.2	Photovoltaic Module Performance.....	88
2.8.2.1	Accelerated UV Aging Techniques.....	89
2.8.2.2	Developing an Accelerated Test.....	91
2.8.2.3	Data Analysis.....	96
	References.....	99

### 3. Polymer Specifications for Photovoltaic (PV) Packaging and Balance of System (BOS) Components.....

3.1	Commercial Formulations.....	107
3.1.1	Polymeric Stabilizers.....	107
3.1.2	Polymeric Modifiers.....	109
3.1.3	Other Classifications.....	111
3.2	The Effect of Additives on Polymeric Properties.....	111
3.3	Common Failure Mechanisms in Photovoltaic Packaging.....	112
3.4	Encapsulants.....	113
3.4.1	Polysiloxane.....	115
3.4.2	Polyvinyl Acetate and Polyethylene.....	118
3.4.3	Ethylene Vinyl Acetate Copolymer.....	120
3.4.4	Polyvinyl Butyral.....	123

3.4.5	Ionomers.....	124
3.4.5.1	Surlyn®.....	125
3.5	Frames.....	126
3.6	Junction Boxes.....	127
3.7	Backsheets.....	128
3.7.1	Fluorinated Polyolefins.....	129
3.7.2	Laminate Structures.....	130
References	.....	131
<b>4.</b>	<b>Polymer Processing Techniques Used in Photovoltaic Packaging and Balance of Systems (BOS) Component Fabrication.....</b>	<b>135</b>
4.1	Common Polymer Processes for Photovoltaic Packaging and BOS Components.....	135
4.2	Polymer Viscosity.....	135
4.2.1	Viscosity Measurement.....	137
4.3	Lamination.....	138
4.4	Injection Molding.....	141
4.5	Adhesive Dispense.....	145
References	.....	149
<b>5.</b>	<b>Economic Theory and Photovoltaic Packaging.....</b>	<b>151</b>
5.1	The First U.S. Energy Crisis.....	151
5.2	The Current Energy Crisis.....	154
5.3	Technology Development Theory and Photovoltaic Energy.....	155
5.4	Operational Optimization for Photovoltaic Companies.....	162
5.5	Photovoltaic Markets Abroad.....	168
5.5.1	China's Solar Market.....	172
5.5.2	Saudi Arabia's Solar Market.....	174
5.6	The U.S. Polymer Market.....	175
References	.....	177
<b>6.</b>	<b>Other Polymeric Applications in Photovoltaic Modules.....</b>	<b>181</b>
6.1	Emerging Polymeric Applications.....	181
6.1.1	Soiling Behavior of Photovoltaic Modules.....	181
6.1.1.1	Considerations for Developing a Soiling Protocol.....	182
6.1.1.2	Experiments to Characterize Antisoiling Coatings.....	186
6.1.1.3	Antisoiling Coatings.....	188
6.1.2	Antiscratch Coatings.....	191
6.1.3	Antireflective Coatings.....	192
6.1.4	High Index of Refraction Polymers.....	193
6.2	Concentrated and Organic Photovoltaics.....	194
6.2.1	Lenses.....	195
6.2.2	Metallic Films.....	196

6.2.3	Luminescent Solar Concentrators (LSCs).....	198
6.2.4	Polymeric Photovoltaic Solar Cells.....	202
	References .....	204
 <b>Appendix A: Conversion Factors and Common Units</b>		
	<b>of Measurement.....</b>	<b>207</b>
	<b>Appendix B: Glossary .....</b>	<b>209</b>
	<b>Index .....</b>	<b>215</b>
