About the Authorxv

Chapter 1 Introduction 1

Chapter 2 Micromachining Methods..... 3

2.1 Micromachining of Silicon..... 3

2.1.1 Etching of Si Microchannels.....3

2.1.2 Bonding of Si Chips5

2.2 Micromachining of Glass.....5

2.2.1 Etching of Glass Microchannels7

2.2.2 Drilling of Glass for Access-Hole Formation 11

2.2.3 Glass Bonding 13

2.3 Micromachining of Fused Quartz (or Fused Silica)..... 15

2.3.1 Fused Quartz Channel Etching and Hole Drilling.....15

2.3.2 Bonding of Fused Quartz Chips.....15

2.4 Micromachining of Polymeric Chips 16

2.4.1 Casting.....17

2.4.2 Injection Molding24

2.4.3 Ablation24

2.4.4 Wire Imprinting27

2.4.5 Compression Molding28

2.4.6 Photopolymerization29

2.4.7 Other Plastic Micromachining Processes 31

2.4.8 Problems Encountered in Polymeric Chips..... 33

2.4.8.1 Optical Properties..... 33

2.4.8.2 Electrical Properties 33

2.4.8.3 Thermal Properties 33

2.4.8.4 Mechanical Properties 34

2.4.8.5 Surface Properties..... 35

2.4.8.6 Solvent-Resistant Properties 37

2.5 Metal Patterning..... 37

2.6 World-to-Chip Interface40

2.7 Problem Sets43

Chapter 3 Microfluidic Flow..... 47

3.1 Liquid Pumping Methods..... 47

3.1.1 Electroosmotic Flow (EOF)47

3.1.2 Pressure-Driven Flow.....47

3.1.3 Centrifugal Pumping50

3.1.4 Alternative Pumping Principles50

3.1.4.1 EOF-Induced Flow50

3.1.4.2	Electrochemical Bubble Generation	51
3.1.4.3	Thermally Induced Pumping	54
3.1.4.4	Surface Energy	54
3.1.4.5	Pneumatic Control	54
3.1.4.6	Magnetohydrodynamic (MHD) Pumping	54
3.1.4.7	Evaporation	56
3.1.4.8	Miscellaneous Pumping Methods	56
3.1.5	Microfluidic Flow Modeling Study	57
3.2	Microfluidic Flow Control	59
3.2.1	Surface Modifications for Flow Control	59
3.2.2	Laminar Flow for Liquid Extraction and Microfabrication	61
3.2.3	Generation of Concentration and Temperature Gradients	63
3.2.4	Flow Switching	66
3.2.5	Fluid Mixing	75
3.2.5.1	Diffusive Mixing	75
3.2.5.2	Chaotic Advection	77
3.2.5.3	Oscillating Flow	80
3.2.5.4	Acoustic Mixing	81
3.2.5.5	Other Mixing Methods	83
3.2.6	Liquid Dispensing	84
3.3	Problem Sets	86
Chapter 4	Sample Introduction	87
4.1	Electrokinetic Injection	87
4.1.1	Pinched Injection	88
4.1.2	Gated Injection	93
4.2	Hydrodynamic Injection	99
4.3	Other Sample Injection Methods	102
4.4	Problem Sets	103
Chapter 5	Sample Preconcentration	105
5.1	Sample Stacking	105
5.2	Extraction	106
5.3	Porous Membrane	110
5.4	Other Preconcentration Methods	113
5.5	Problem Sets	119
Chapter 6	Separation	121
6.1	Gas Chromatography (GC)	121
6.2	Capillary Electrophoresis (CE)	121
6.2.1	Free-Solution Capillary Electrophoresis (FSCE)	121
6.2.2	Capillary Gel Electrophoresis (CGE)	129
6.2.3	Micellar Electrokinetic Capillary Chromatography (MECC)	133
6.2.4	Isotachopheresis (ITP)	135
6.2.5	Capillary Electrochromatography (CEC)	137
6.2.6	Synchronized Cyclic Capillary Electrophoresis (SCCE)	142
6.2.7	Free-Flow Electrophoresis (FFE)	145
6.2.8	Derivatizations for CE for Separations	147

6.2.8.1	Precolumn Derivatization.....	147
6.2.8.2	Postcolumn Derivatization.....	148
6.3	Chromatographic Separations.....	148
6.4	Coupled Separations.....	150
6.4.1	Fraction Collection.....	150
6.4.2	Two-Dimensional Separations.....	153
6.5	Problem Sets.....	158

Chapter 7 Detection Methods 159

7.1	Optical Detection Methods.....	159
7.1.1	Fluorescence Detection.....	159
7.1.1.1	Single-Channel Fluorescence Detection.....	159
7.1.1.2	Scanning Detector.....	161
7.1.1.3	Background Reduction.....	162
7.1.1.4	Photobleaching Effect.....	163
7.1.1.5	Integrated Fluorescent Detector.....	163
7.1.2	Indirect Fluorescent Detection.....	165
7.1.3	Multiple-Point Fluorescent Detection.....	165
7.1.4	Absorbance Detection.....	168
7.1.5	Plasma Emission Detection.....	171
7.1.6	Chemiluminescence (CL) Detector.....	173
7.1.7	Refractive Index (RI).....	176
7.1.8	Thermal Lens Microscope (TLM).....	177
7.1.9	Raman Scattering.....	177
7.1.10	Surface-Plasmon Resonance.....	178
7.1.11	Infrared Detection.....	178
7.2	Electrochemical (EC) Detection.....	178
7.2.1	Amperometric Detection.....	178
7.2.2	Voltammetric Detection.....	184
7.2.3	Potentiometric Detection.....	185
7.2.4	Conductivity Detection.....	187
7.3	Mass Spectrometry (MS).....	189
7.3.1	Electrospray Ionization (ESI).....	189
7.3.2	Matrix-Assisted Laser Desorption Ionization (MALDI).....	194
7.4	Other Detection Methods.....	199
7.4.1	Thermal Detection.....	199
7.4.2	Acoustic Wave Detection.....	199
7.4.3	Nuclear Magnetic Resonance (NMR).....	200
7.5	Problem Sets.....	209

Chapter 8 Applications to Cellular/Particle Analysis..... 213

8.1	Retention of Cells and Particles.....	213
8.1.1	Slit-Type Filters.....	213
8.1.2	Weir-Type Filters.....	215
8.1.3	Cell Adhesion.....	222
8.1.4	Polymer Entrapment.....	226
8.1.5	Three-Dimensional Flow Control.....	227
8.1.6	Optical Trapping of Cells.....	229
8.1.7	Dielectrophoresis (DEP).....	231

8.2	Studies of Cells in a Flow.....	236
8.3	Other Cell Operations.....	243
8.3.1	Cell Culture.....	243
8.3.2	Electroporation.....	246
8.3.3	Chip Cleaning and Sterilization.....	246
8.3.4	Prevention of Cell Adhesion.....	246
8.4	Problem Sets.....	247
Chapter 9	Applications to Nucleic Acids Analysis.....	249
9.1	Nucleic Acids Extraction and Purification.....	249
9.2	Nucleic Acids Amplification.....	249
9.2.1	DNA Amplification.....	249
9.2.1.1	Polymerase Chain Reaction (PCR).....	249
9.2.1.2	Surface Passivation of PCR Chambers.....	251
9.2.1.3	Integrated DNA Analysis Microsystems.....	256
9.2.1.4	Real-Time PCR.....	259
9.2.1.5	Flow-Through PCR.....	260
9.2.1.6	Other DNA Amplification Techniques.....	263
9.2.2	RNA Amplification.....	264
9.3	DNA Hybridization.....	265
9.3.1	Microchannel DNA Hybridization.....	265
9.3.2	Microarray DNA Hybridization.....	268
9.4	Other Nucleic Acid Applications.....	269
9.4.1	DNA Sequencing.....	269
9.4.2	Genetic Analysis.....	272
9.4.3	Separation of Large DNA Molecules.....	275
9.5	Problem Sets.....	284
Chapter 10	Applications to Protein Analysis.....	285
10.1	Immunoassay.....	285
10.1.1	Homogeneous Immunoassay.....	285
10.1.2	Heterogeneous Immunoassay.....	290
10.2	Protein Separation.....	295
10.3	Enzymatic Assays.....	297
10.3.1	Assay of the Enzymes.....	297
10.3.2	Assay of Analytes after Enzymatic Reactions.....	302
10.4	Problem Sets.....	306
	References.....	307
	Glossary.....	357
	Appendix: Analytical Applications of Microfluidic Technology.....	365
	Index.....	385
