| Preface..... | xix |
| Acknowledgments..... | xxiii |
| The Authors..... | xxv |
| 1. Introduction to Subtle Science, Exact Art..... | 1 |
| 1.1 Introduction..... | 1 |
| 1.2 Theoretical Orientation..... | 2 |
| 1.2.1 Cognitive Systems Engineering: Ecological Interface Design..... | 3 |
| 1.2.2 With a Psychological Twist..... | 4 |
| 1.3 Basic versus Applied Science..... | 5 |
| 1.3.1 Too Theoretical!..... | 5 |
| 1.3.2 Too Applied!..... | 6 |
| 1.4 Pasteur's Quadrant..... | 7 |
| 1.4.1 The Wright Brothers in the Quadrant..... | 8 |
| 1.4.2 This Book and the Quadrant..... | 9 |
| 1.5 Overview..... | 10 |
| 1.6 Summary..... | 11 |
| References..... | 13 |
| 2. A Meaning Processing Approach..... | 15 |
| 2.1 Introduction..... | 15 |
| 2.2 Two Alternative Paradigms for Interface Design..... | 16 |
| 2.2.1 The Dyadic Paradigm..... | 16 |
| 2.2.2 The Triadic Paradigm..... | 17 |
| 2.2.3 Implications for Interface Design..... | 18 |
| 2.3 Two Paths to Meaning..... | 20 |
| 2.3.1 Conventional Wisdom: Meaning = Interpretation..... | 20 |
| 2.3.2 An Ecological or Situated Perspective: Meaning = Affordance..... | 22 |
| 2.3.3 Information versus Meaning..... | 26 |
| 2.4 The Dynamics of Meaning Processing..... | 30 |
| 2.4.1 The Regulator Paradox..... | 30 |
| 2.4.2 Perception and Action in Meaning Processing..... | 31 |
| 2.4.3 Inductive, Deductive, and Abductive Forms of Knowing..... | 33 |
| 2.5 Conclusion..... | 34 |
| 2.6 Summary..... | 38 |
| References..... | 38 |

| | |
|--|----|
| 3. The Dynamics of Situations | 41 |
| 3.1 Introduction..... | 41 |
| 3.2 The Problem State Space..... | 42 |
| 3.2.1 The State Space for the Game of Fifteen..... | 43 |
| 3.2.2 The State Space for a Simple Manual Control Task..... | 46 |
| 3.2.3 Implications for Interface Design..... | 50 |
| 3.3 Levels of Abstraction..... | 51 |
| 3.3.1 Two Analytical Frameworks for Modeling Abstraction..... | 52 |
| 3.4 Computational Level of Abstraction..... | 52 |
| 3.4.1 Functional Purpose..... | 54 |
| 3.4.2 Abstract Function..... | 55 |
| 3.4.3 Summary..... | 56 |
| 3.5 Algorithm or General Function Level of Abstraction..... | 57 |
| 3.6 Hardware Implementation..... | 58 |
| 3.6.1 Physical Function..... | 58 |
| 3.6.2 Physical Form..... | 59 |
| 3.7 Putting It All Together..... | 59 |
| 3.7.1 Abstraction, Aggregation, and Progressive Deepening..... | 60 |
| 3.7.2 Implications for Work Domain Analyses..... | 61 |
| 3.7.3 Summary..... | 62 |
| 3.8 Conclusion..... | 64 |
| References..... | 65 |
| | |
| 4. The Dynamics of Awareness | 67 |
| 4.1 Introduction..... | 67 |
| 4.1.1 Zeroing In as a Form of Abduction..... | 68 |
| 4.1.2 Chunking of Domain Structure..... | 70 |
| 4.1.3 Implications for Interface Design..... | 71 |
| 4.2 A Model of Information Processing..... | 72 |
| 4.2.1 Decision Ladder: Shortcuts in Information Processing..... | 73 |
| 4.3 Automatic Processing..... | 76 |
| 4.3.1 Varied and Consistent Mappings..... | 77 |
| 4.3.2 Two Modes of Processing..... | 77 |
| 4.3.3 Relationship to Decision Ladder..... | 78 |
| 4.3.4 Implications for Interface Design..... | 79 |
| 4.4 Direct Perception..... | 80 |
| 4.4.1 Invariance as a Form of Consistent Mapping..... | 80 |
| 4.4.2 Perception and the Role of Inferential Processes..... | 82 |
| 4.4.3 Implications for Interface Design..... | 84 |
| 4.5 Heuristic Decision Making..... | 85 |
| 4.5.1 Optimization under Constraints..... | 85 |

| | | |
|-----------|---|------------|
| 4.5.2 | Cognitive Illusions..... | 86 |
| 4.5.3 | Ecological Rationality..... | 87 |
| 4.5.3.1 | Less Is More | 87 |
| 4.5.3.2 | Take the Best | 88 |
| 4.5.3.3 | One-Reason Decision Making..... | 88 |
| 4.6 | Summary and Conclusions | 89 |
| | References | 90 |
| 5. | The Dynamics of Situation Awareness..... | 93 |
| 5.1 | Introduction..... | 93 |
| 5.2 | Representation Systems and Modes of Behavior | 94 |
| 5.2.1 | Signal Representations/Skill-Based Behavior | 95 |
| 5.2.2 | Sign Representations/Rule-Based Behavior | 96 |
| 5.2.3 | Symbol Representations/Knowledge-Based Behaviors..... | 97 |
| 5.3 | Representations, Modes, and the Decision Ladder..... | 99 |
| 5.3.1 | Skill-Based Synchronization | 99 |
| 5.3.2 | Rule-Based Shortcuts..... | 101 |
| 5.3.3 | Knowledge-Based Reasoning | 101 |
| 5.3.4 | Summary..... | 101 |
| 5.4 | Ecological Interface Design (EID)..... | 102 |
| 5.4.1 | Complementary Perspectives on EID | 103 |
| 5.4.2 | Qualifications and Potential Misunderstandings | 104 |
| 5.5 | Summary..... | 105 |
| | References | 106 |
| 6. | A Framework for Ecological Interface Design (EID)..... | 109 |
| 6.1 | Introduction..... | 109 |
| 6.2 | Fundamental Principles | 111 |
| 6.2.1 | Direct Manipulation/Direct Perception..... | 112 |
| 6.3 | General Domain Constraints | 115 |
| 6.3.1 | Source of Regularity: Correspondence-Driven Domains..... | 116 |
| 6.3.2 | Source of Regularity: Coherence-Driven Domains..... | 117 |
| 6.3.3 | Summary..... | 118 |
| 6.4 | General Interface Constraints | 119 |
| 6.4.1 | Propositional Representations | 119 |
| 6.4.2 | Metaphors | 120 |
| 6.4.3 | Analogies | 122 |
| 6.4.4 | Metaphor versus Analogy..... | 122 |
| 6.4.5 | Analog (versus Digital)..... | 123 |
| 6.5 | Interface Design Strategies | 124 |

| | | |
|-----------|---|------------|
| 6.6 | Ecological Interface Design: Correspondence-Driven Domains | 126 |
| 6.6.1 | Nested Hierarchies | 127 |
| 6.6.2 | Nested Hierarchies in the Interface: Analogical Representations | 129 |
| 6.7 | Ecological Interface Design: Coherence-Driven Domains | 132 |
| 6.7.1 | Objective Properties: Effectivities | 133 |
| 6.7.2 | Nested Hierarchies in the Interface: Metaphorical Representations | 134 |
| 6.8 | Summary | 136 |
| | References | 139 |
| 7. | Display Design: Building a Conceptual Base | 141 |
| 7.1 | Introduction | 141 |
| 7.2 | Psychophysical Approach | 142 |
| 7.2.1 | Elementary Graphical Perception Tasks | 143 |
| 7.2.2 | Limitations | 145 |
| 7.3 | Aesthetic, Graphic Arts Approach | 146 |
| 7.3.1 | Quantitative Graphs | 146 |
| 7.3.2 | Visualizing Information | 149 |
| 7.3.3 | Limitations | 152 |
| 7.4 | Visual Attention | 152 |
| 7.5 | Naturalistic Decision Making | 152 |
| 7.5.1 | Recognition-Primed Decisions | 153 |
| 7.5.1.1 | Stages in RPD | 153 |
| 7.5.1.2 | Implications for Computer-Mediated Decision Support | 155 |
| 7.6 | Problem Solving | 155 |
| 7.6.1 | Gestalt Perspective | 156 |
| 7.6.1.1 | Gestalts and Problem Solving | 156 |
| 7.6.1.2 | Problem Solving as Transformation of Gestalt | 157 |
| 7.6.2 | The Power of Representations | 159 |
| 7.6.3 | Functional Fixedness | 160 |
| 7.6.4 | The Double-Edged Sword of Representations | 164 |
| 7.7 | Summary | 165 |
| | References | 166 |
| 8. | Visual Attention and Form Perception | 169 |
| 8.1 | Introduction | 169 |
| 8.2 | Experimental Tasks and Representative Results | 170 |
| 8.2.1 | Control Condition | 171 |
| 8.2.2 | Selective Attention | 173 |
| 8.2.3 | Divided Attention | 173 |

| | | |
|-----------|---|------------|
| 8.2.4 | Redundant Condition..... | 174 |
| 8.2.5 | A Representative Experiment..... | 174 |
| 8.3 | An Interpretation Based on Perceptual Objects and Perceptual Glue..... | 175 |
| 8.3.1 | Gestalt Laws of Grouping..... | 176 |
| 8.3.2 | Benefits and Costs for Perceptual Objects..... | 179 |
| 8.4 | Configural Stimulus Dimensions and Emergent Features..... | 180 |
| 8.4.1 | The Dimensional Structure of Perceptual Input..... | 181 |
| 8.4.1.1 | Separable Dimensions..... | 181 |
| 8.4.1.2 | Integral Dimensions..... | 182 |
| 8.4.1.3 | Configural Dimensions..... | 183 |
| 8.4.2 | Emergent Features; Perceptual Salience; Nested Hierarchies..... | 184 |
| 8.4.3 | Configural Superiority Effect..... | 185 |
| 8.4.3.1 | Salient Emergent Features..... | 185 |
| 8.4.3.2 | Inconspicuous Emergent Features..... | 187 |
| 8.4.4 | The Importance of Being Dynamic..... | 188 |
| 8.5 | An Interpretation Based on Configurality and Emergent Features..... | 189 |
| 8.5.1 | Divided Attention..... | 190 |
| 8.5.2 | Control Condition..... | 191 |
| 8.5.3 | Selective Condition..... | 191 |
| 8.6 | Summary..... | 192 |
| | References..... | 195 |
| 9. | Semantic Mapping versus Proximity Compatibility..... | 197 |
| 9.1 | Introduction..... | 197 |
| 9.2 | Proximity Compatibility Principle..... | 198 |
| 9.2.1 | PCP and Divided Attention..... | 198 |
| 9.2.2 | PCP and Focused Attention..... | 200 |
| 9.2.3 | Representative PCP Study..... | 201 |
| 9.2.4 | Summary of PCP..... | 203 |
| 9.3 | Comparative Literature Review..... | 203 |
| 9.3.1 | Pattern for Divided Attention..... | 203 |
| 9.3.2 | Pattern for Focused Attention..... | 203 |
| 9.4 | Semantic Mapping..... | 207 |
| 9.4.1 | Semantic Mapping and Divided Attention..... | 208 |
| 9.4.1.1 | Mappings Matter!..... | 210 |
| 9.4.1.2 | Configurality, Not Object Integrality: I..... | 212 |
| 9.4.1.3 | Configurality, Not Object Integrality: II..... | 215 |
| 9.4.1.4 | Summary..... | 220 |
| 9.4.2 | Semantic Mapping and Focused Attention..... | 220 |
| 9.4.2.1 | Design Techniques to Offset Potential Costs..... | 221 |

| | | |
|------------|--|------------|
| 9.4.2.2 | Visual Structure in Focused Attention | 223 |
| 9.4.2.3 | Revised Perspective on Focused Attention | 226 |
| 9.5 | Design Strategies in Supporting Divided and Focused Attention | 226 |
| 9.6 | PCP Revisited | 227 |
