**Contributions
to climate change
mitigation and
the environment**

Table of contents

Foreword	11
<i>José Goldemberg, professor at the University of São Paulo, Brazil</i>	
Executive summary	15
Chapter 1 Introduction to sugarcane ethanol contributions to climate change mitigation and the environment	19
<i>Peter Zuurbier and Jos van de Vooren</i>	
1. Introduction	19
2. Biofuels	20
3. Bioethanol	20
4. Production and use of bioethanol	21
5. Where does it come from: the feedstock for ethanol	22
6. Brazil as main exporter	23
7. What makes the ethanol attractive?	23
8. The core of the debate	24
9. Structure of the book	25
References	26
Chapter 2 Land use dynamics and sugarcane production	29
<i>Günther Fischer, Edmar Teixeira, Eva Tothne Hizsnyik and Harrij van Velthuizen</i>	
1. Historical scale and dynamics of sugarcane production	29
2. Global potential for expansion of sugarcane production	47
References	59
Chapter 3 Prospects of the sugarcane expansion in Brazil: impacts on direct and indirect land use changes	63
<i>André Meloni Nassar, Bernardo F.T. Rudorff, Laura Barcellos Antoniazzi, Daniel Alves de Aguiar, Miriam Rumenos Piedade Bacchi and Marcos Adami</i>	
1. Introduction	63
2. The dynamics of sugarcane expansion in Brazil	65
3. Methodology	66
4. Results and discussions	75
5. Conclusions and recommendations	91
References	92

Chapter 4 Mitigation of GHG emissions using sugarcane bioethanol	95
<i>Isaias C. Macedo and Joaquim E.A. Seabra</i>	
1. Introduction	95
2. Ethanol production in 2006 and two Scenarios for 2020	95
3. Energy flows and lifecycle GHG emissions/mitigation	96
4. Land use change: direct and indirect effects on GHG emissions	102
5. Conclusions	109
References	110
 Chapter 5 Environmental sustainability of sugarcane ethanol in Brazil	 113
<i>Weber Antônio Neves do Amaral, João Paulo Marinho, Rudy Tarasantchi, Augusto Beber and Eduardo Giuliani</i>	
1. Introduction	113
2. The Brazilian environmental legal framework regulating ethanol production	117
3. Environmental indicators	120
4. Initiatives towards ethanol certification and compliance	132
5. Future steps towards sustainable production of ethanol and the role of innovation	135
References	135
 Chapter 6 Demand for bioethanol for transport	 139
<i>Andre Faaij, Alfred Szwarc and Arnaldo Walter</i>	
1. Introduction	139
2. Development of the ethanol market	140
3. Drivers for ethanol demand	145
4. Future ethanol markets	151
5. Discussion and final remarks	153
References	155
 Chapter 7 Biofuel conversion technologies	 159
<i>Andre Faaij</i>	
1. Introduction	159
2. Long term potential for biomass resources.	161
3. Technological developments in biofuel production	164
4. Energy and greenhouse gas balances of biofuels	172
5. Final remarks	177
References	179

Chapter 8 The global impacts of US and EU biofuels policies	181
<i>Wallace E. Tyner</i>	
1. Introduction	181
2. Ethanol economics and policy	183
3. Impacts of US and EU policies on the rest of the world	189
4. Conclusions	195
Acknowledgements	196
References	196
 Chapter 9 Impacts of sugarcane bioethanol towards the Millennium Development Goals	 199
<i>Annie Dufey</i>	
1. Introduction	199
2. Opportunities for sugarcane bioethanol in achieving sustainable development and the Millennium Development Goals	200
3. Risks and challenges	207
4. Conclusions	220
References	222
 Chapter 10 Why are current food prices so high?	 227
<i>Martin Banse, Peter Nowicki and Hans van Meijl</i>	
1. World agricultural prices in a historical perspective	227
2. Long run effects	229
3. What explains the recent increase in agricultural prices?	232
4. First quantitative results of the analysis of key driving factors	238
5. The future	241
6. Concluding remarks	244
Acknowledgements	246
References	246
 Acknowledgements	 249
