

Contents

<i>Preface</i>	<i>v</i>
1. Bioactive Natural Compounds	1
2. Bioactive Natural Products	18
3. Bioactive Substances of Plant Origin	26
4. Bioactive Metabolites	47
5. Food Biotechnology	54
6. Food Processing through Biotechnology	75
7. Foods Derived through Modern Biotechnology	87
8. Environmental and Food Analysis	103
9. Food Processing and Food Consumption	112
10. Technological Advancements in Food Products	139
11. Nutritional Quality	147
12. Nutritional Quality and Modern Biotechnology	157
13. Nutritionally Improved Food Feeds	185
14. Nutritional Assessment Process for Biotechnology	203
15. Application of Modern Biotechnology	216
16. Technological Trends and Needs	236
<i>Bibliography</i>	285
<i>Index</i>	287
