

Physical Properties *of* Materials

Second Edition

Mary Anne White

CRC Press
Taylor & Francis Group

Contents

Preface to the Second Edition.....	xiii
Preface to the First Edition.....	xv
Acknowledgments	xvii
About the Author	xix

Part I Introduction

1 Introduction to Materials Science	3
1.1 History	3
1.2 More Recent Trends	4
1.3 Impact on Daily Living	6
1.4 Future Materials	6
1.5 Structures of Materials	8
1.6 Problems	10
Further Reading	11

Part II Color and Other Optical Properties of Materials

2 Atomic and Molecular Origins of Color	19
2.1 Introduction	19
2.2 Atomic Transitions	22
2.3 Black-Body Radiation	23
2.4 Vibrational Transitions as a Source of Color	26
2.5 Crystal Field Colors	27
2.6 Color Centers (F-Centers)	29
2.7 Charge Delocalization, Especially Molecular Orbitals	32
2.8 Problems	38
Further Reading	42
3 Color in Metals and Semiconductors	45
3.1 Introduction	45
3.2 Metallic Luster	45
3.3 Colors of Pure Semiconductors	50
3.4 Colors of Doped Semiconductors	52
3.5 Problems	61
Further Reading	63

4 Color from Interactions of Light Waves with Bulk Matter	67
4.1 Introduction	67
4.2 Refraction	67
4.3 Interference	75
4.4 Scattering of Light	82
4.5 Diffraction Grating	84
4.5.1 An Example of Diffraction Grating Colors: Liquid Crystals	86
4.6 Problems	92
Further Reading	96
5 Other Optical Effects	101
5.1 Introduction	101
5.2 Optical Activity and Related Effects	101
5.3 Birefringence	105
5.4 Circular Dichroism and Optical Rotatory Dispersion	106
5.5 Nonlinear Optical Effects	108
5.6 Problems	115
Further Reading	117

Part III Thermal Properties of Materials

6 Heat Capacity, Heat Content, and Energy Storage	123
6.1 Introduction	123
6.2 Equipartition of Energy	123
6.2.1 Heat Capacity of a Monatomic Gas	125
6.2.2 Heat Capacity of a Nonlinear Triatomic Gas	125
6.3 Real Heat Capacities and Heat Content of Real Gases	126
6.3.1 Joule's Experiment	130
6.3.2 Joule–Thomson Experiment	131
6.4 Heat Capacities of Solids	135
6.4.1 Dulong–Petit Law	135
6.4.2 Einstein Model	136
6.4.3 Debye Model	137
6.4.4 Heat Capacities of Metals	140
6.5 Heat Capacities of Liquids	141
6.6 Heat Capacities of Glasses	142
6.7 Phase Stability and Phase Transitions, Including Their Order	146
6.8 $(C_p - C_v)$: An Exercise in Thermodynamic Manipulations	152
6.9 Problems	159
Further Reading	164

7 Thermal Expansion	167
7.1 Introduction	167
7.2 Compressibility and Thermal Expansion of Gases	167
7.3 Thermal Expansion of Solids	172
7.4 Problems	182
Further Reading	186
8 Thermal Conductivity	187
8.1 Introduction	187
8.2 Thermal Conductivity of Gases	187
8.3 Thermal Conductivities of Insulating Solids	193
8.4 Thermal Conductivities of Metals	197
8.5 Problems	200
Further Reading	203
9 Thermodynamic Aspects of Stability	205
9.1 Introduction	205
9.2 Pure Gases	205
9.3 Phase Equilibria in Pure Materials: The Clapeyron Equation	207
9.4 Phase Diagrams of Pure Materials	209
9.5 The Phase Rule	221
9.6 Liquid-Liquid Binary Phase Diagrams	225
9.7 Liquid-Vapor Binary Phase Diagrams	227
9.8 Relative Proportions of Phases: The Lever Principle	231
9.9 Liquid-Solid Binary Phase Diagrams	232
9.10 Compound Formation	240
9.11 Three-Component (Ternary) Phase Diagrams	243
9.12 Problems	250
Further Reading	259
10 Surface and Interfacial Phenomena	265
10.1 Introduction	265
10.2 Surface Energetics	266
10.3 Surface Investigations	267
10.4 Surface Tension and Capillarity	269
10.5 Liquid Films on Surfaces	275
10.6 Problems	280
Further Reading	282
11 Other Phases of Matter	289
11.1 Introduction	289
11.2 Colloids	289
11.3 Micelles	291
11.4 Surfactants	294
11.5 Inclusion Compounds	296

11.6 Problems	302
Further Reading	303

Part IV Electrical and Magnetic Properties of Materials

12 Electrical Properties	309
12.1 Introduction	309
12.2 Metals, Insulators, and Semiconductors: Band Theory	309
12.2.1 Metals	312
12.2.2 Semiconductors	313
12.2.3 Insulators	315
12.3 Temperature Dependence of Electrical Conductivity	316
12.3.1 Metals	317
12.3.2 Intrinsic Semiconductors	318
12.4 Properties of Extrinsic (Doped) Semiconductors	322
12.5 Electrical Devices Using Extrinsic (Doped) Semiconductors	324
12.5.1 p,n-junction	324
12.5.2 Transistors	330
12.6 Dielectrics	332
12.7 Superconductivity	335
12.8 Problems	342
Further Reading	348
13 Magnetic Properties	357
13.1 Introduction	357
13.2 Origins of Magnetic Behavior	357
13.3 Magnetic Induction as a Function of Field Strength	364
13.4 Temperature Dependence of Magnetization	368
13.5 Problems	375
Further Reading	377

Part V Mechanical Properties of Materials

14 Mechanical Properties	383
14.1 Introduction	383
14.2 Elasticity and Related Properties	388
14.3 Beyond the Elastic Limit	394
14.4 Defects and Dislocations	397
14.5 Crack Propagation	400
14.6 Adhesion	405
14.7 Electromechanical Properties: The Piezoelectric Effect	407
14.8 Problems	416
Further Reading	422

Appendix 1: Fundamental Physical Constants.....	429
Appendix 2: Unit Conversions	431
Appendix 3: The Greek Alphabet	433
Appendix 4: Sources of Lecture Demonstration Materials.....	435
Index	437
