INTRODUCTION	xvi
1 Designing Your Oracle HFM Application	1
Enterprise Performance Management	2
The Oracle EPM Suite Overview	2
Define the Scope	5
EPM and EPI	6
Identify Your Team	7
The Internal Team	7
Your Implementation Partner	9
Support from the Infrastructure Group	9
Create a Project Plan	10
Dimension Overview	13
Naming Convention	16
Application Profile	18
Currencies	23
Application Settings	24
Scenario	29
Entity	33
Value	35
Account	37
Intercompany Partner (ICP)	41
Custom Dimensions	42
Consolidation Methods	43
Best Practices for Design Dimensionality	45
The Subcube and Its Impact on Your Design	46

Migrating Your Application from Hyperion Enterprise	47
Conclusion	48
2 Tips for Building Your Oracle HFM Application	49
Workspace	50
EPMA and the Win32 Application	53
Grids	58
Web Data Entry Forms	60
Process Management	61
Phased Submissions	65
Intercompany Eliminations	67
Intercompany Transaction Module	75
Line Item Detail	77
Organization by Period and Structures	78
Ownership Module	80
Equity Pickup Module	83
Database Management	84
Security	86
Oracle HFM Security	87
Oracle FDM Security	91
Conclusion	93
3 Rules and Calculations	95
Overview	96
VBScript for Oracle HFM	98
What Is VBScript?	98
Formatting	101
Variables and Constants	102
Strings	107
Arrays	108
Sub Procedures	109
Function Procedures	109
How to Call a Procedure	110
Conditionals	110
Looping Statements	112
Sub Procedures	115
Calculation	115
Translation	115

Consolidation	116
Allocation	116
Input	116
NoInput	116
Dynamic	117
Transactions	118
Equity Pickup	118
The Value Dimension	118
Understanding the Subcube	120
Writing a Rule	120
HS.Exp Function	122
GetCell Functions	129
Scope of Rules	130
Consolidation Rules	132
Methods	132
Organization by Period and Structures	134
HS.Con	136
OpenDataUnit Functionality	137
GetNumItems	137
GetItem	138
Put It Together	138
Elimination	140
Error Handling	143
Complex Rules Issues	145
Invest in Sub	145
Good Ideas	146
Bad Ideas	146
Writing Rules in Calculation Manager	148
Rules Migration in Oracle HFM 11.1.1.3	156
Conclusion	158
4 Reporting	159
Overview	160
Financial Reports	162
Rounding	165
Report Performance Basics	167
Financial Report Design	169
Best Practices for Reports	171

Best Practices for Cell Text, Documents in Reports, and Commentary	175
Books, Batches, and Bursting	176
Charts and Graphs	178
Web Analysis	179
Best Practices for Web Analysis	179
Smart View	181
Best Practices for Smart View	182
Connection Manager	186
Linked Views and Dynamic Data Points	187
Smart Slice	187
Related Content	188
Line Item Detail	189
Annotations	190
IFRS and Multi-GAAP Reporting	191
Financial Close Manager	194
Disclosure Management	196
Conclusion	200
5 Data Integration and Testing	201
The Right Tool for the Right Job	204
Data Flow	205
Oracle Hyperion Financial Data Quality Management	206
Oracle Data Integrator	210
ERP <i>i</i>	212
Drillthrough vs. Drillback	212
Converting HAL to FDM or ODI	214
Supplemental Data	215
Journals	216
Data Loading Validations	219
Data Relationship Management	220
Validating Your Data	221
Historical Data	226
Ongoing Account Reconciliation	228
Data Validations	229
Extended Analytics	229
Moving Journals and Elimination Data	232
Conclusion	232

6	Supporting Your Application	233
	Planning to Support Your Application	235
	IT Support	236
	Admin/Functional Support	237
	Change Control Processes	239
