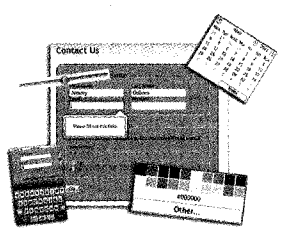
Starting up 135
A review of semantic markup 136
HTML5 fundamentals 137
The HTML5 DOCTYPE declaration 138
The different categories used for HTML5 content 140
Using the new header element in HTML5 142
Adding support for HTML5 elements in browsers 144
Adding the HTML5 `<nav>` elements 146
Adding the other HTML5 sectioning elements 150
HTML5 document outlines 151
Adding the footer element 154
Adding the article and aside elements 155
Additional HTML5 elements 160
Revisiting familiar HTML elements 162
Self study 165
Review 165

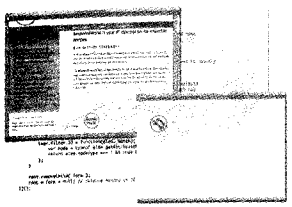
Lesson 7: Creating HTML5 Forms



Starting up 167
The need for updated forms 168
Reviewing how forms work 168
The components of a form 169
Adding new HTML5 input types and attributes 177
Creating an order form with new HTML5 input types and attributes 182

HTML5 form features under development 187
Providing fallbacks for browsers that don't support HTML5 features 188
Self study 192
Review 192

Lesson 8: Introduction to JavaScript and jQuery

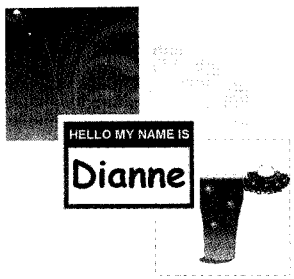


Starting up 193
Interactivity on the Web 194
Adobe Flash 194
JavaScript 194
JavaScript basics 195
JavaScript events 200
Placing your JavaScript into an external document 202
The Document Object Model 203
JavaScript frameworks 204
Hiding an element with jQuery 204
Adding an event to trigger the show effect 207
Self study 210
Review 210

Lesson 9: Working with Video and Audio Elements

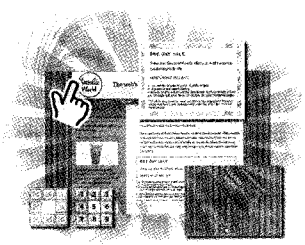
Starting up 211
Adding video 212
Adding support for more browsers 215
Adding fallback support for older browsers 216
Controlling a video with JavaScript 219
Adding audio 223
Self study 224
Review 224

Lesson 10: Working with Canvas



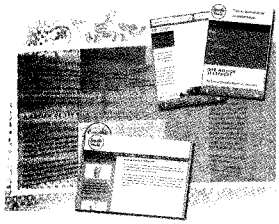
Starting up 225
Understanding the Canvas element 226
The benefits of the Canvas element 227
Drawing paths 227
Drawing rectangles 227
Drawing lines and circles 230
Drawing with curves 234
Adding text 237
Using colors, styles, and gradients 239
Adding images 244
Using transforms 246
Creating a drawing loop 250
Self study 254
Review 254

Lesson 11: Styling with CSS3



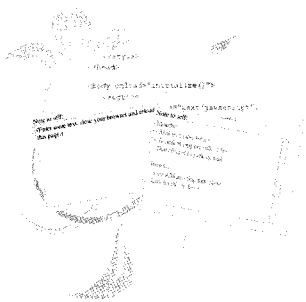
Starting up 255
Understanding the role of CSS3 256
Using CSS3 **`border-radius`** and **`border-image`** 257
Adding multiple background images 263
Working with CSS3 transparency and opacity 269
Using CSS3 gradients 274
CSS gradients potential for the future 277
CSS3 transforms, transitions, and animation 279
Creating CSS3 transforms and transitions 279
Working with CSS animation 285
Working with web fonts 288
Using **`@font-face`** to specify a web font 288
Using a web service to generate multiple fonts 292
Alternative methods for adding web fonts 296
Self study 297
Review 297

Lesson 12: CSS3 Media Queries and the Future of CSS3



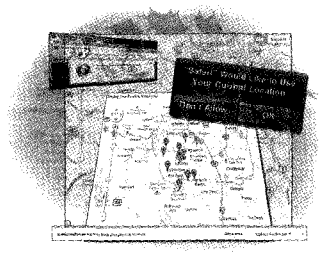
Starting up 299
The role of CSS3 media queries 300
Using CSS3 media queries to deliver a mobile-optimized layout 300
Upcoming developments in CSS3 309
The CSS3 multi-column layout 310
The CSS3 Flexible Box layout module 314
The CSS3 template layout module 319
Adding template-based position to CSS 319
Self study 325
Review 325

Lesson 13: Offline Storage in HTML5



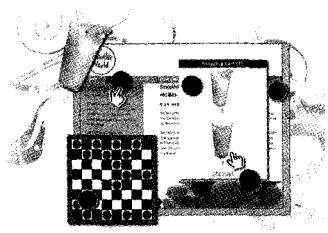
Starting up 327
On the road, again 328
Offline storage in HTML5 328
HTML5 storage types 328
`localStorage` methods 329
`localStorage` example 329
Putting it all together 333
Advanced data storage 335
Application caching 336
The cache manifest file 336
Cache manifest structure 337
Updating the cache 338
The `applicationCache` object 339
Bringing it all together 340
Self study 341
Review 341

Lesson 14: HTML5 Geolocation



Starting up 343
Understanding Geolocation..... 344
Getting the user's location 344
Displaying the user's location with Google Maps 347
Browsers lacking HTML5 Geolocation..... 350
Creating a HTML5 Geolocation and Google Maps mashup 351
Adding Google Map markers to your geolocation page 351
Self study..... 356
Review 356

Lesson 15: HTML5 Drag and Drop



Starting up 357
Drag and drop on the Web..... 358
Cross-browser drag and drop 358
Transferring data with a drag-and-drop operation..... 363
Self study..... 368
Review 368

Appendix: HTML5 Elements and Attributes

Table 1 List of current HTML5 elements 369
Table 2 List of element content categories 374
Table 3 List of attributes 375
Table 4 List of event handler content attributes..... 384
Table 5 List of events 388
Table 6 Media element events..... 390
