

ORACLE®

Fully updated for JDK 7

Java A Beginner's Guide

Fifth Edition

Create, Compile, and Run Java Programs Today

Herbert Schildt

Contents

| | |
|--|----------|
| INTRODUCTION | xvii |
| 1 Java Fundamentals | 1 |
| The Origins of Java | 3 |
| How Java Relates to C and C++ | 4 |
| How Java Relates to C# | 4 |
| Java's Contribution to the Internet | 5 |
| Java Applets | 5 |
| Security | 5 |
| Portability | 6 |
| Java's Magic: The Bytecode | 6 |
| The Java Buzzwords | 7 |
| Object-Oriented Programming | 8 |
| Encapsulation | 9 |
| Polymorphism | 9 |
| Inheritance | 10 |
| Obtaining the Java Development Kit | 10 |
| A First Simple Program | 12 |
| Entering the Program | 12 |
| Compiling the Program | 13 |
| The First Sample Program Line by Line | 13 |
| Handling Syntax Errors | 16 |
| A Second Simple Program | 16 |
| Another Data Type | 18 |
| Try This 1-1: Converting Gallons to Liters | 20 |
| Two Control Statements | 21 |
| The if Statement | 21 |
| The for Loop | 23 |

| | |
|---|-----------|
| Create Blocks of Code | 24 |
| Semicolons and Positioning | 26 |
| Indentation Practices | 26 |
| Try This 1-2: Improving the Gallons-to-Liters Converter | 27 |
| The Java Keywords | 28 |
| Identifiers in Java | 29 |
| The Java Class Libraries | 29 |
| Chapter 1 Self Test | 30 |
| 2 Introducing Data Types and Operators | 31 |
| Why Data Types Are Important | 32 |
| Java's Primitive Types | 32 |
| Integers | 33 |
| Floating-Point Types | 35 |
| Characters | 35 |
| The Boolean Type | 37 |
| Try This 2-1: How Far Away Is the Lightning? | 38 |
| Literals | 39 |
| Hexadecimal, Octal, and Binary Literals | 40 |
| Character Escape Sequences | 40 |
| String Literals | 41 |
| A Closer Look at Variables | 42 |
| Initializing a Variable | 42 |
| Dynamic Initialization | 43 |
| The Scope and Lifetime of Variables | 43 |
| Operators | 46 |
| Arithmetic Operators | 46 |
| Increment and Decrement | 47 |
| Relational and Logical Operators | 48 |
| Short-Circuit Logical Operators | 50 |
| The Assignment Operator | 51 |
| Shorthand Assignments | 51 |
| Type Conversion in Assignments | 53 |
| Casting Incompatible Types | 54 |
| Operator Precedence | 56 |
| Try This 2-2: Display a Truth Table for the Logical Operators | 57 |
| Expressions | 58 |
| Type Conversion in Expressions | 58 |
| Spacing and Parentheses | 60 |
| Chapter 2 Self Test | 60 |
| 3 Program Control Statements | 63 |
| Input Characters from the Keyboard | 64 |
| The if Statement | 65 |

| | |
|---|------------|
| Nested ifs | 67 |
| The if-else-if Ladder | 68 |
| The switch Statement | 69 |
| Nested switch Statements | 72 |
| Try This 3-1: Start Building a Java Help System | 73 |
| The for Loop | 75 |
| Some Variations on the for Loop | 77 |
| Missing Pieces | 78 |
| The Infinite Loop | 79 |
| Loops with No Body | 79 |
| Declaring Loop Control Variables Inside the for Loop | 80 |
| The Enhanced for Loop | 81 |
| The while Loop | 81 |
| The do-while Loop | 83 |
| Try This 3-2: Improve the Java Help System | 85 |
| Use break to Exit a Loop | 88 |
| Use break as a Form of goto | 89 |
| Use continue | 94 |
| Try This 3-3: Finish the Java Help System | 95 |
| Nested Loops | 99 |
| Chapter 3 Self Test | 100 |
| 4 Introducing Classes, Objects, and Methods | 103 |
| Class Fundamentals | 104 |
| The General Form of a Class | 105 |
| Defining a Class | 106 |
| How Objects Are Created | 108 |
| Reference Variables and Assignment | 109 |
| Methods | 110 |
| Adding a Method to the Vehicle Class | 110 |
| Returning from a Method | 112 |
| Returning a Value | 113 |
| Using Parameters | 115 |
| Adding a Parameterized Method to Vehicle | 117 |
| Try This 4-1: Creating a Help Class | 119 |
| Constructors | 124 |
| Parameterized Constructors | 126 |
| Adding a Constructor to the Vehicle Class | 126 |
| The new Operator Revisited | 128 |
| Garbage Collection and Finalizers | 128 |
| The finalize() Method | 129 |
| Try This 4-2: Demonstrate Garbage Collection and Finalization | 130 |
| The this Keyword | 132 |
| Chapter 4 Self Test | 134 |

| | |
|---|------------|
| 5 More Data Types and Operators | 135 |
| Arrays | 136 |
| One-Dimensional Arrays | 137 |
| Try This 5-1: Sorting an Array | 140 |
| Multidimensional Arrays | 142 |
| Two-Dimensional Arrays | 142 |
| Irregular Arrays | 143 |
| Arrays of Three or More Dimensions | 144 |
| Initializing Multidimensional Arrays | 144 |
| Alternative Array Declaration Syntax | 145 |
| Assigning Array References | 146 |
| Using the length Member | 147 |
| Try This 5-2: A Queue Class | 149 |
| The For-Each Style for Loop | 153 |
| Iterating Over Multidimensional Arrays | 156 |
| Applying the Enhanced for | 158 |
| Strings | 158 |
| Constructing Strings | 159 |
| Operating on Strings | 160 |
| Arrays of Strings | 162 |
| Strings Are Immutable | 162 |
| Using a String to Control a switch Statement | 164 |
| Using Command-Line Arguments | 165 |
| The Bitwise Operators | 166 |
| The Bitwise AND, OR, XOR, and NOT Operators | 167 |
| The Shift Operators | 171 |
| Bitwise Shorthand Assignments | 173 |
| Try This 5-3: A ShowBits Class | 174 |
| The ? Operator | 176 |
| Chapter 5 Self Test | 178 |
| 6 A Closer Look at Methods and Classes | 181 |
| Controlling Access to Class Members | 182 |
| Java's Access Modifiers | 183 |
| Try This 6-1: Improving the Queue Class | 187 |
| Pass Objects to Methods | 188 |
| How Arguments Are Passed | 190 |
| Returning Objects | 192 |
| Method Overloading | 194 |
| Overloading Constructors | 199 |
| Try This 6-2: Overloading the Queue Constructor | 201 |
| Recursion | 204 |
| Understanding static | 206 |
| Static Blocks | 209 |

| | |
|---|------------|
| Try This 6-3: The Quicksort | 210 |
| Introducing Nested and Inner Classes | 213 |
| Varargs: Variable-Length Arguments | 216 |
| Varargs Basics | 217 |
| Overloading Varargs Methods | 220 |
| Varargs and Ambiguity | 221 |
| Chapter 6 Self Test | 222 |
| 7 Inheritance | 225 |
| Inheritance Basics | 226 |
| Member Access and Inheritance | 229 |
| Constructors and Inheritance | 232 |
| Using super to Call Superclass Constructors | 234 |
| Using super to Access Superclass Members | 238 |
| Try This 7-1: Extending the Vehicle Class | 239 |
| Creating a Multilevel Hierarchy | 242 |
| When Are Constructors Called? | 244 |
| Superclass References and Subclass Objects | 246 |
| Method Overriding | 250 |
| Overridden Methods Support Polymorphism | 253 |
| Why Overridden Methods? | 255 |
| Applying Method Overriding to TwoDShape | 255 |
| Using Abstract Classes | 259 |
| Using final | 263 |
| final Prevents Overriding | 263 |
| final Prevents Inheritance | 263 |
| Using final with Data Members | 264 |
| The Object Class | 265 |
| Chapter 7 Self Test | 266 |
| 8 Packages and Interfaces | 267 |
| Packages | 268 |
| Defining a Package | 269 |
| Finding Packages and CLASSPATH | 270 |
| A Short Package Example | 270 |
| Packages and Member Access | 272 |
| A Package Access Example | 273 |
| Understanding Protected Members | 274 |
| Importing Packages | 276 |
| Java's Class Library Is Contained in Packages | 278 |
| Interfaces | 278 |
| Implementing Interfaces | 279 |
| Using Interface References | 283 |
| Try This 8-1: Creating a Queue Interface | 285 |

| | |
|--|------------|
| Variables in Interfaces | 290 |
| Interfaces Can Be Extended | 291 |
| Chapter 8 Self Test | 292 |
| 9 Exception Handling | 295 |
| The Exception Hierarchy | 297 |
| Exception Handling Fundamentals | 297 |
| Using try and catch | 298 |
| A Simple Exception Example | 298 |
| The Consequences of an Uncaught Exception | 300 |
| Exceptions Enable You to Handle Errors Gracefully | 302 |
| Using Multiple catch Statements | 303 |
| Catching Subclass Exceptions | 304 |
| Try Blocks Can Be Nested | 305 |
| Throwing an Exception | 306 |
| Rethrowing an Exception | 307 |
| A Closer Look at Throwable | 308 |
| Using finally | 310 |
| Using throws | 312 |
| New Exception Features Added by JDK 7 | 313 |
| Java's Built-in Exceptions | 315 |
| Creating Exception Subclasses | 317 |
| Try This 9-1: Adding Exceptions to the Queue Class | 319 |
| Chapter 9 Self Test | 323 |
| 10 Using I/O | 325 |
| Java's I/O Is Built upon Streams | 327 |
| Byte Streams and Character Streams | 327 |
| The Byte Stream Classes | 327 |
| The Character Stream Classes | 328 |
| The Predefined Streams | 329 |
| Using the Byte Streams | 330 |
| Reading Console Input | 330 |
| Writing Console Output | 332 |
| Reading and Writing Files Using Byte Streams | 333 |
| Inputting from a File | 333 |
| Writing to a File | 337 |
| Automatically Closing a File | 339 |
| Reading and Writing Binary Data | 342 |
| Try This 10-1: A File Comparison Utility | 345 |
| Random-Access Files | 346 |
| Using Java's Character-Based Streams | 349 |
| Console Input Using Character Streams | 349 |
| Console Output Using Character Streams | 353 |

| | |
|--|------------|
| File I/O Using Character Streams | 354 |
| Using a FileWriter | 354 |
| Using a FileReader | 355 |
| Using Java's Type Wrappers to Convert Numeric Strings | 357 |
| Try This 10-2: Creating a Disk-Based Help System | 359 |
| Chapter 10 Self Test | 366 |
| 11 Multithreaded Programming | 367 |
| Multithreading Fundamentals | 368 |
| The Thread Class and Runnable Interface | 369 |
| Creating a Thread | 370 |
| Some Simple Improvements | 373 |
| Try This 11-1: Extending Thread | 375 |
| Creating Multiple Threads | 377 |
| Determining When a Thread Ends | 380 |
| Thread Priorities | 383 |
| Synchronization | 386 |
| Using Synchronized Methods | 386 |
| The synchronized Statement | 389 |
| Thread Communication Using notify(), wait(), and notifyAll() | 392 |
| An Example That Uses wait() and notify() | 393 |
| Suspending, Resuming, and Stopping Threads | 398 |
| Try This 11-2: Using the Main Thread | 402 |
| Chapter 11 Self Test | 404 |
| 12 Enumerations, Autoboxing, Static Import, and Annotations | 405 |
| Enumerations | 406 |
| Enumeration Fundamentals | 407 |
| Java Enumerations Are Class Types | 409 |
| The values() and valueOf() Methods | 410 |
| Constructors, Methods, Instance Variables, and Enumerations | 411 |
| Two Important Restrictions | 413 |
| Enumerations Inherit Enum | 413 |
| Try This 12-1: A Computer-Controlled Traffic Light | 415 |
| Autoboxing | 420 |
| Type Wrappers | 420 |
| Autoboxing Fundamentals | 422 |
| Autoboxing and Methods | 423 |
| Autoboxing/Unboxing Occurs in Expressions | 425 |
| A Word of Warning | 426 |
| Static Import | 427 |
| Annotations (Metadata) | 430 |
| Chapter 12 Self Test | 432 |

| | |
|---|------------|
| 13 Generics | 435 |
| Generics Fundamentals | 436 |
| A Simple Generics Example | 437 |
| Generics Work Only with Objects | 441 |
| Generic Types Differ Based on Their Type Arguments | 441 |
| A Generic Class with Two Type Parameters | 442 |
| The General Form of a Generic Class | 443 |
| Bounded Types | 444 |
| Using Wildcard Arguments | 447 |
| Bounded Wildcards | 450 |
| Generic Methods | 453 |
| Generic Constructors | 455 |
| Generic Interfaces | 456 |
| Try This 13-1: Create a Generic Queue | 458 |
| Raw Types and Legacy Code | 463 |
| Type Inference with the Diamond Operator | 466 |
| Erasure | 467 |
| Ambiguity Errors | 468 |
| Some Generic Restrictions | 469 |
| Type Parameters Can't Be Instantiated | 469 |
| Restrictions on Static Members | 469 |
| Generic Array Restrictions | 469 |
| Generic Exception Restriction | 471 |
| Continuing Your Study of Generics | 471 |
| Chapter 13 Self Test | 471 |
| 14 Applets, Events, and Miscellaneous Topics | 473 |
| Applet Basics | 474 |
| Applet Organization and Essential Elements | 477 |
| The Applet Architecture | 477 |
| A Complete Applet Skeleton | 478 |
| Applet Initialization and Termination | 479 |
| Requesting Repainting | 480 |
| The update() Method | 481 |
| Try This 14-1: A Simple Banner Applet | 481 |
| Using the Status Window | 485 |
| Passing Parameters to Applets | 486 |
| The Applet Class | 487 |
| Event Handling | 489 |
| The Delegation Event Model | 490 |
| Events | 490 |
| Event Sources | 490 |
| Event Listeners | 490 |
| Event Classes | 491 |
| Event Listener Interfaces | 491 |

| | |
|--|------------|
| Using the Delegation Event Model | 492 |
| Handling Mouse and Mouse Motion Events | 493 |
| A Simple Mouse Event Applet | 493 |
| More Java Keywords | 496 |
| The transient and volatile Modifiers | 497 |
| instanceof | 497 |
| strictfp | 497 |
| assert | 498 |
| Native Methods | 499 |
| Chapter 14 Self Test | 500 |
| 15 Introducing Swing | 503 |
| The Origins and Design Philosophy of Swing | 505 |
| Components and Containers | 507 |
| Components | 507 |
| Containers | 508 |
| The Top-Level Container Panes | 508 |
| Layout Managers | 509 |
| A First Simple Swing Program | 509 |
| The First Swing Example Line by Line | 511 |
| Use JButton | 515 |
| Work with JTextField | 519 |
| Create a JCheckBox | 523 |
| Work with JList | 526 |
| Try This 15-1: A Swing-Based File Comparison Utility | 530 |
| Use Anonymous Inner Classes to Handle Events | 536 |
| Create a Swing Applet | 537 |
| What Next? | 539 |
| Chapter 15 Self Test | 540 |
| A Answers to Self Tests | 543 |
| Chapter 1: Java Fundamentals | 544 |
| Chapter 2: Introducing Data Types and Operators | 546 |
| Chapter 3: Program Control Statements | 547 |
| Chapter 4: Introducing Classes, Objects, and Methods | 550 |
| Chapter 5: More Data Types and Operators | 551 |
| Chapter 6: A Closer Look at Methods and Classes | 555 |
| Chapter 7: Inheritance | 560 |
| Chapter 8: Packages and Interfaces | 562 |
| Chapter 9: Exception Handling | 563 |
| Chapter 10: Using I/O | 566 |
| Chapter 11: Multithreaded Programming | 570 |
| Chapter 12: Enumerations, Autoboxing, Static Import, and Annotations | 572 |
| Chapter 13: Generics | 576 |
| Chapter 14: Applets, Events, and Miscellaneous Topics | 581 |
| Chapter 15: Introducing Swing | 586 |

| | |
|--|------------|
| B Using Java's Documentation Comments | 593 |
| The javadoc Tags | 594 |
| @author | 595 |
| {@code} | 595 |
| @deprecated | 595 |
| {@docRoot} | 595 |
| @exception | 595 |
| {@inheritDoc} | 596 |
| {@link} | 596 |
| {@linkplain} | 596 |
| {@literal} | 596 |
| @param | 596 |
| @return | 596 |
| @see | 597 |
| @serial | 597 |
| @serialData | 597 |
| @serialField | 597 |
| @since | 597 |
| @throws | 598 |
| {@value} | 598 |
| @version | 598 |
| The General Form of a Documentation Comment | 598 |
| What javadoc Outputs | 599 |
| An Example That Uses Documentation Comment | 599 |
| Index | 601 |
