

# Table of Contents

<b>Introduction</b> .....	<b>1</b>
About This Book .....	2
Conventions Used in This Book .....	3
Foolish Assumptions .....	4
How This Book Is Organized .....	4
Part I: Planning the Killer App .....	4
Part II: Becoming a Real Developer .....	4
Part III: Understanding How Apps Work .....	5
Part IV: Building DeepThoughts .....	5
Part V: Building an Industrial-Strength Application .....	5
Part VI: The Part of Tens .....	6
Icons Used in This Book .....	6
Where to Go from Here .....	6
<b>Part I: Planning the Killer App</b> .....	<b>7</b>
<b>Chapter 1: What Makes a Killer iPad App</b> .....	<b>9</b>
Figuring Out What Makes a Great iPad Application .....	10
Providing an immersive experience .....	11
Making content relevant .....	12
Designing for the touch-display experience .....	13
Exploiting the Platform .....	14
Exploiting advantages of the system .....	14
Accessing the Internet .....	16
Knowing the location of the user .....	16
Tracking orientation and motion .....	16
Tracking user's fingers on the screen .....	17
Playing content .....	17
Accessing information from Apple's apps .....	17
Copying, cutting, and pasting between apps .....	18
Multitasking, background processing, and notifications .....	18
Living large on the big screen .....	19
Embracing the iPad's Limitations .....	20
Designing for fingers .....	20
Balancing memory and battery life .....	21
Why Develop iPad Applications? .....	21
Developing with Apple's Expectations in Mind .....	23
An Overview of the Development Cycle .....	24
The Sample Applications .....	25
What's Next .....	27

<b>Chapter 2: Creating a Compelling User Experience</b> .....	<b>29</b>
Deep Thoughts on the User Experience .....	30
Creating Compelling Content .....	32
Focusing on the task at hand .....	33
Maintaining consistency with the user's world .....	33
Modeling apps on real-world metaphors .....	34
Engaging the user .....	35
Making it obvious .....	35
Using stunning graphics with aesthetic integrity .....	37
Designing the User Experience .....	37
Understanding the real-world context .....	38
Doing it better on the iPad .....	39
Playing to the iPad's Strengths .....	40
Sensing multifinger gestures .....	40
Tracking orientation and motion .....	41
Displaying stunning graphics and images .....	41
Playing and recording content .....	42
Knowing the location of the device .....	42
Accessing the Internet .....	42
Avoiding Practices that Get Apps Rejected .....	43
<b>Chapter 3: The App Store Is Not Enough</b> .....	<b>45</b>
Why People Buy Apps from the App Store .....	46
Finding out how to reach your potential customers .....	47
Marketing 101: Pricing your app .....	49
Publishing free and paid versions .....	50
Knowing Your Customers .....	51
Tracking downloads .....	52
Adding analytical code to your app .....	54
Deploying the In App Purchase Feature .....	55
Putting iAds in Your App .....	57
Links Are Not Enough .....	58
Using iTunes affiliate links .....	58
Making use of user reviews .....	59
Going social .....	59
Buying advertising .....	60
Getting publicity .....	62
<b>Part 11: Becoming a Real Developer</b> .....	<b>63</b>
<b>Chapter 4: Enlisting in the Developer Corps</b> .....	<b>65</b>
Becoming a Registered Developer .....	66
Joining the Developer Program .....	70
Exploring the Dev Center .....	74
Looking forward to using the SDK .....	75
Resources in the Dev Center .....	76

Downloading the SDK.....	78
Getting Yourself Ready for the SDK .....	78
<b>Chapter 5: Getting to Know the SDK .....</b>	<b>81</b>
Developing Using the SDK .....	81
Starting an app from scratch.....	82
Starting from an existing iPhone app.....	82
Creating Your Xcode Project .....	83
Exploring Your Project .....	86
Building and Running Your Application .....	91
The Simulator.....	93
Hardware interaction .....	93
Gestures .....	94
Uninstalling apps and resetting your device.....	95
Limitations.....	96
Customizing Xcode to Your Liking.....	97
Using Interface Builder .....	99
It's Time to Get Real.....	102
<b>Chapter 6: Death, Taxes, and iPad Provisioning .....</b>	<b>105</b>
How the Process Works.....	106
The distribution process .....	106
The development process .....	107
Organizing Your Account in the Member Center.....	109
Obtaining a Development Certificate.....	110
Provisioning Your iPad for Development.....	114
Using Xcode to create a provisioning profile.....	115
Getting an assist from the Development Provisioning Assistant.....	116
Provisioning Your Application for the App Store or Ad Hoc Distribution.....	120
Building Your App for Distribution .....	123
Using iTunes Connect to Manage Apps in the App Store.....	125
Managing Users.....	127
Adding contract, tax, and banking information.....	127
Adding the metadata and artwork.....	128
Uploading your app and its data.....	132
Avoiding the App Store Rejection Slip.....	133
Now What?.....	135
<b>Part III: Understanding How Apps Work .....</b>	<b>137</b>
<b>Chapter 7: Looking Behind the Screen.....</b>	<b>139</b>
Using Frameworks .....	139
Using Design Patterns .....	141
The Model-View-Controller (MVC) pattern .....	142
The MVC in action .....	143

Working with Windows and Views .....	144
Looking out the window.....	144
Admiring the view.....	145
The kinds of views you use.....	147
Controlling View Controllers .....	149
What about the Model?.....	150
Adding Your Own Application's Behavior .....	151
The Delegation pattern .....	152
The Block Object pattern.....	153
The Target-Action pattern .....	154
Doing What When? .....	155

## **Chapter 8: Understanding How an App Runs . . . . . 157**

App Anatomy 101 — The Lifecycle .....	158
It all starts with the main nib file .....	161
Initialization.....	166
Event processing.....	169
Responding to interruptions .....	170
Termination.....	173
The Managed Memory Model Design Pattern.....	174
Observing low-memory warnings .....	174
Avoiding the warnings.....	176
Whew!.....	177

## **Part IV: Building Deep Thoughts..... 179**

### **Chapter 9: Building the User Interface . . . . . 181**

Running the View-Based Application Template .....	182
Inspecting the View .....	182
Understanding How the View is Initialized .....	184
Adding an Image to the View .....	186
Adding an Info Button .....	190
Adding an Application Icon.....	194

### **Chapter 10: Animating the View . . . . . 197**

Using the Xcode Text Editor .....	198
Accessing Documentation.....	198
Quick Help .....	199
The header file for a symbol.....	200
Documentation window .....	200
Help menu.....	201
Find .....	202

Figuring Out Where Your Code Goes .....	204
The delegate object .....	204
The view controller object .....	204
Marking code sections in the view controller .....	206
Preparing for User Settings .....	208
Editing the view controller header .....	208
Adding a Constants.h file .....	210
Controlling the View .....	213
The viewDidLoad method .....	217
Drawing the view .....	219
The animation block .....	221
Freeing up memory .....	221
Testing the View .....	222
<b>Chapter 11: Adding User Settings and Gestures . . . . .</b>	<b>225</b>
Setting Up User Preference Settings .....	226
Identifying preference settings for UserDefaults .....	228
Reading preferences into the app .....	228
Setting Up a Modal View Controller .....	229
Adding a new view controller .....	230
Adding outlets to the view controller .....	232
Using delegation .....	234
Adding methods for the interface objects .....	235
Initializing and setting the modal view style .....	240
Saving the preference settings .....	242
Connecting the Interface Objects in Interface Builder .....	243
Adding the Done button .....	243
Adding the slider and text field .....	246
Connecting the Info button .....	252
Testing the new modal view .....	254
Adding Tap and Swipe Recognizers .....	255
A Lot Accomplished Very Quickly .....	260
<b>Chapter 12: Getting the Bugs Out . . . . .</b>	<b>263</b>
Understanding Bugs .....	264
Using the Debugger .....	268
Debugging in the Text Editor .....	269
Setting breakpoints .....	270
Using the Debugger strip .....	271
Using the Debugger Window .....	274
Showing datatips for variables and objects .....	276
Using the Mini Debugger .....	277
Using the Console Application .....	278
Using the Static Analyzer .....	279

**Part V: Building an Industrial-Strength Application .... 283**

<b>Chapter 13: Designing Your Application</b> .....	<b>285</b>
Defining the Problems .....	285
Categorizing the problems and defining the solutions .....	287
The Great Application Cycle of Life .....	289
Designing the User Experience .....	289
Leveraging the iPad's strengths .....	290
What you have to work with .....	292
Device constraints .....	294
Coming up with a final design .....	296
Creating the Program Architecture .....	299
Views .....	300
View controllers .....	304
Models .....	304
Stored data mode, saving state, and localization .....	306
Writing the Code .....	306
<b>Chapter 14: Working with Split View Controllers and the Master View</b> .....	<b>307</b>
The Split View Controller .....	308
Popovers .....	314
Working with Table Views .....	316
Creating the Table view .....	318
Creating and formatting a grouped Table view .....	319
Making UITableViewController work for you .....	321
Creating the Row Model .....	331
Seeing How Table-View Cells Work .....	336
Creating the Cell .....	337
The Destination Model .....	343
Expanding the Architecture to a "Real" App .....	348
<b>Chapter 15: Finding Your Way</b> .....	<b>349</b>
Putting Content First .....	349
Adding the Map Controller .....	351
Implementing the MapController .....	352
Cleaning up the DetailViewController .....	355
Adding the framework .....	358
Setting up the nib file .....	359
Creating the MapController .....	362
Managing the views .....	365
Putting MapKit through Its Paces .....	369
MKMapView .....	370
Enhancing the map .....	371
Adding Annotations .....	378
Going to the Current Location .....	387

Displaying Multiple Annotations .....	390
Geocoding.....	394
But What If I Don't Want to Go to London? .....	400
<b>Chapter 16: Adding the Stuff .....</b>	<b>405</b>
Responding to a Selection .....	405
Putting the Map in the Selection Mechanism .....	408
How's the Weather Over There?.....	412
Adding the controller and nib file.....	412
Setting up the nib file.....	414
Loading the Web View .....	417
Cruising the Web .....	420
Responding to a Selection .....	423
Computing the view and toolbar sizes.....	426
Setting up the toolbar.....	427
Managing the popover .....	430
The Currency Implementation Model.....	431
Adding the content .....	432
Loading the Currency view.....	433
Launching the CurrencyController.....	434
Adding the City .....	434
Loading the City view .....	435
Launching the CityController .....	437
A Checkpoint.....	437
<b>Chapter 17: Printing from Your iPad App .....</b>	<b>439</b>
Printing on the iPad.....	439
Adding the Print button .....	440
The print methods.....	443
The UIPrintInteractionController .....	444
The Printer Simulator .....	449
There's Much More to Printing.....	450
<b>Chapter 18: Providing Content in the Master View .....</b>	<b>451</b>
The Airport Controller .....	451
Adding the Airport controller and nib file.....	452
Setting up the view .....	455
Responding to the user selection in the choice bar.....	460
The Destination Model.....	460
Building the Airport .....	461
Making methods "private" .....	464
Selecting the airport .....	465
Navigating the Navigation Controller .....	469
The navigation bar back button.....	470
The other Back button .....	470
Getting Rid of a Pesky Compiler Warning .....	472

<b>Chapter 19: Enhancing the User Experience</b> .....	<b>473</b>
Saving and Restoring State .....	473
Saving state information .....	474
Restoring the state .....	477
Respecting User Preferences .....	479
Adding a Settings bundle to your project .....	480
Setting up the property list .....	481
Reading Settings in the Application .....	484
Airport and City in Stored Data Mode .....	491
Managing real time and cached data .....	492
There ain't no Web cruising in stored data mode .....	494
Adding Stored Data Mode to City .....	497
Finally .....	498
<b>Part VI: The Part of Tens</b> .....	<b>499</b>
<b>Chapter 20: Ten Tips on iPad App Design</b> .....	<b>501</b>
Making an App Icon for the Masses .....	501
Launching Your App Into View .....	502
Stopping Your App on a Dime .....	503
Saving Grace with Your App's Data .....	503
Supporting All Display Orientations .....	504
Flattening Information Levels .....	504
Popping Up All Over .....	505
Minimizing Modality to Maximize Simplicity .....	506
Turning the Map into the Territory .....	507
Making Smaller Transitions (Don't Flip the View) .....	507
<b>Chapter 21: Ten Ways to Be a Happy Developer</b> .....	<b>509</b>
It's Never Too Early to Start Speaking a Foreign Language .....	509
Remember Memory .....	510
Constantly Use Constants .....	510
Don't Fall Off the Cutting Edge .....	510
Start by Initializing the Right Way .....	510
Keep the Order Straight .....	511
Avoid Mistakes in Error Handling .....	511
Remember the User .....	512
Keep in Mind that the Software Isn't Finished	
Until the Last User Is Dead .....	512
Keep It Fun .....	512
<b>Index</b> .....	<b>513</b>
