About the Editors	xix
PART ONE PERVASIVE COMPUTING AND SYSTEMS	1
1 Introduction	3
<i>Mohammad S. Obaidat and Isaac Woungang</i>	
1.1 Pervasive Computing and Its Significance	3
1.2 Research Trends in Pervasive Computing and Networking	3
1.3 Scanning the Book	4
1.4 Target Audience	6
1.5 Supplementary Resources	6
1.6 Acknowledgments	6
References	6
2 Tools and Techniques for Dynamic Reconfiguration and Interoperability of Pervasive Systems	9
<i>Evens Jean, Sahra Sedigh, Ali R. Hurson, and Behrooz A. Shirazi</i>	
2.1 Introduction	9
2.2 Mobile Agent Technology	10
2.2.1 Introduction	10
2.2.2 Mobile Agent Security	11
2.2.3 Mobile Agent Platforms	12
2.3 Sensor Networks	13
2.3.1 Introduction	13
2.3.2 Sensor Network Applications	14
2.3.3 Dynamic Reconfiguration of Sensor Networks	14
2.4 Collaboration and Interoperability Among Sensor Networks	17
2.5 Applications	18
2.5.1 A Pervasive System for Volcano Monitoring	19
2.5.2 A Pervasive Computing Platform for Individualized Higher Education	22
2.6 Conclusion	24
References	24
3 Models for Service and Resource Discovery in Pervasive Computing	27
<i>Mehdi Khouja, Carlos Juiz, Ramon Puigjaner, and Farouk Kamoun</i>	
3.1 Introduction	27
3.2 Service Oriented Architecture	28
3.3 Industry and Consortia Supported Models for Service Discovery	28
3.3.1 Existing Models for Service Discovery	28
3.3.2 Suitability of Existing Models for Pervasive Systems	32

3.4	Research Initiatives in Service Discovery for Pervasive Systems	33
3.4.1	<i>Related Work</i>	33
3.4.2	<i>Our Proposition: Using Semantic in Context Modeling to Enhance Service Discovery</i>	34
3.5	Conclusions	35
	References	36
4	Pervasive Learning Tools and Technologies	37
	<i>Neil Y. Yen, Qun Jin, Hiroaki Ogata, Timothy K. Shih, and Y. Yano</i>	
4.1	Introduction	37
4.2	Pervasive Learning: A Promising Innovative Paradigm	38
4.2.1	<i>Historical Development of Computing and IT in Education</i>	38
4.2.2	<i>Past Experience and Issues</i>	40
4.2.3	<i>Practice and Challenge at Waseda E-School</i>	41
4.3	Emerging Technologies and Systems for Pervasive Learning	42
4.3.1	<i>Emerging Computing Paradigms for Education</i>	42
4.3.2	<i>Pervasive Learning Support Systems and Technologies</i>	43
4.4	Integration of Real-World Practice and Experience with Pervasive Learning	45
4.4.1	<i>Ubiquitous Learning</i>	45
4.4.2	<i>UPS (Ubiquitous Personal Study)</i>	46
4.5	Nature of Pervasive Learning and Provision of Well-Being in Education	46
4.5.1	<i>Ubiquitous and Pervasive</i>	46
4.5.2	<i>The Possible Trend of Pervasive Technology in Education</i>	46
4.6	Conclusion	48
	References	48
5	Service Management in Pervasive Computing Environments	51
	<i>Jiannong Cao, Joanna Siebert, and Vaskar Raychoudhury</i>	
5.1	Introduction	51
5.2	Service Management in Pervasive Computing Environments	52
5.2.1	<i>Introduction</i>	52
5.2.2	<i>Pervasive Computing Environments</i>	53
5.2.3	<i>Service Management Framework</i>	53
5.2.4	<i>General Components of a Service Management System</i>	54
5.2.5	<i>System Support Components</i>	55
5.2.6	<i>Service Management Challenges</i>	56
5.3	Techniques for Service Management in PvCE	57
5.3.1	<i>Introduction</i>	57
5.3.2	<i>Classification of Service Discovery Protocols</i>	57
5.3.3	<i>Service Discovery in Infrastructure-Based Networks</i>	58
5.3.4	<i>Service Discovery in Infrastructure-Less Networks</i>	59
5.3.5	<i>Multiprotocol Service Discovery</i>	62
5.3.6	<i>Service Discovery Approaches</i>	63
5.4	Service Composition	63
5.4.1	<i>Service Composition Functions</i>	63
5.4.2	<i>Survey of Methods in Service Composition Process</i>	65
5.4.3	<i>Service Composition Approaches</i>	66

PART THREE PERSVASIVE NETWORKING AND COMMUNICATIONS	219
14 Autonomic and Pervasive Networking	221
<i>Thabo K. R. Nkwe, Mieso K. Denko, and Jason B. Ernst</i>	
14.1 Introduction	221
14.2 Ubiquitous/Pervasive Networks	223
14.2.1 Introduction	223
14.2.2 Ubiquitous/Pervasive Networks Architecture	223
14.2.3 Ubiquitous/Pervasive Networks Applications	223
14.3 Applying Autonomic Techniques to Ubiquitous/Pervasive Networks	224
14.3.1 Introduction	224
14.3.2 Autonomic Networking and Computing Paradigms	224
14.3.3 Cross-Layer Interactions	225
14.3.4 Limitations of Existing Networks	227
14.4 Self-* (star) In Autonomic and Pervasive Networks	228
14.4.1 Self-Protection	228
14.4.2 Self-Organization	230
14.4.3 Self-Management	231
14.4.4 Autonomic Wireless Mesh Networks	233
14.5 Autonomic and Pervasive Networking Challenges	234
14.6 Conclusions and Future Directions	234
