

# Project Management IN CONSTRUCTION

SIXTH EDITION

- Quality Control/Quality Assurance
- New ConsensusDOCS®, AIA, and Lean Construction Contracts
- The Latest Green Building Guidelines

Sidney M. Levy

# Contents

## Preface xiii

<b>Chapter 1. An Introduction to the Construction Industry</b>	<b>1</b>
Critical Issues Facing Contractors in This New Millennium	3
How our industry is perceived	3
Information technology	4
Human resources—the changing workforce	5
Undocumented immigrant problem	6
Productivity	6
Quality control	8
Project delivery systems	8
The organization	9
Construction technology	9
Safety	10
The changing marketplace	10
<b>Chapter 2. The Start of the Construction Process</b>	<b>15</b>
The Letter of Intent	16
Defining costs in the letter of intent	17
Subcontractor commitments via the letter of intent	18
The letter of intent termination clause	18
Prevalent Types of Construction Contracts	19
Cost of the work plus a fee	19
The stipulated or lump-sum contract	26
The cost-plus-a-fee with a GMP contract	28
Construction manager contracts	35
Program manager	39
The joint venture agreement	40
Turnkey contracts	41
Build-operate-transfer	42
Contracts with government agencies	42
<b>Chapter 3. The General Conditions to the Construction Contract</b>	<b>51</b>
AIA A201—General Conditions of the Contract for Construction	51
Article 1: General provisions	52

<b>Article 2: Owner</b>	53
<b>Article 3: Contractor</b>	53
<b>Article 4: The architect</b>	55
<b>Article 5: Subcontractors</b>	56
<b>Article 6: Construction by owner or by separate contractors</b>	58
<b>Article 7: Changes in the work</b>	58
<b>Article 8: Time</b>	60
<b>Article 9: Payments and completion</b>	60
<b>Article 10: Protection of persons and property</b>	61
<b>Article 11: Insurance and bonds</b>	62
<b>Article 12: Uncovering and correction of work</b>	63
<b>Article 13: Miscellaneous provisions</b>	64
<b>Article 14: Termination or suspension of the contract</b>	64
<b>Article 15: Claims and disputes</b>	64
<b>AIA Document A232—General Conditions for the Construction Manager Contract</b>	65
<b>A Word to the Wise</b>	65
 <b>Chapter 4. ConsensusDOCS, Integrated Project Delivery, and Lean Construction Contracts</b>	67
 <b>The American Institute of Architects—AIA Integrated Delivery Project C191-2009, Standard Form Multi-Party Agreement for Integrated Project Delivery</b>	69
 <b>C195-2008, Standard Form Single Purpose Entity Agreement for Integrated Project Delivery</b>	70
 <b>Exploring the Limited Liability Company Concept</b>	73
 <b>ConsensusDOCS</b>	76
 <b>ConsensusDOCS 200, Standard Agreement and General Conditions Between Owner and Contractor (Where the Contract Price Is a Lump Sum)</b>	77
 <b>ConsensusDOCS 200.1, Potentially Time and Price Impacted Materials</b>	78
 <b>ConsensusDOCS 200.2, Electronic Protocol Addendum</b>	78
 <b>ConsensusDOCS 300, Standard Form of Tri-Party Agreement for Collaborative Delivery</b>	78
 <b>ConsensusDOCS 400, Standard Design-Build Agreement and General Conditions Between Owner and Design-Builder (Where the Basis of Payment Is the Cost of the Work with a GMP)</b>	79
 <b>ConsensusDOCS 500, Standard Agreement and General Conditions Between Owner and Construction Manager (Where the Basis of Payment Is a Guaranteed Maximum Price with an Option for Pre-Construction Services)</b>	79
 <b>ConsensusDOCS 750, Standard Form of Agreement Between Contractor and Subcontractor</b>	80
 <b>Lean Construction</b>	87
 <b>Section 3, Relationship of the Parties</b>	87
 <b>Section 4, Formation and Functioning of the Core Group</b>	88
 <b>Section 5, Collaboration and Integrated Preconstruction Services</b>	88
 <b>Section 6, Project Planning and Scheduling</b>	88
 <b>Section 10, Development of Design Documents</b>	88
 <b>Section 11, Value Engineering, Constructability, and Work Structuring</b>	89
 <b>Section 12, Guaranteed Maximum Price Proposal and Contract Time</b>	89
 <b>Section 13, Financial Responsibilities and Project Contingencies</b>	90
 <b>Section 15, Construction Phase Operations</b>	90

<b>Section 27, Quality of Work and Services</b>	90
<b>These New Documents Raise Insurance, Legal, and Claims Concerns</b>	91
<b>The Legal Concerns</b>	92
<b>Chapter 5. Bonds and Insurance</b>	93
<b>This Risky Business</b>	93
<b>Bonds for Projects in Government Projects—The Miller Act</b>	94
<b>Why Contractors Fail</b>	94
<b>Bonds and the Bonding Process</b>	96
The terminology of bonds	97
Ten things you should know about surety bonding	98
The letter of credit	98
The bonding process	98
Prequalifying for a bond	100
Insurance	101
Builder's risk	102
Workers' compensation insurance	102
Subcontractor default insurance	103
Subguard®-Default Insurance for Subcontractors	103
Controlled insurance programs	104
Insurance terms	107
Are New Insurance Requirements on the Horizon?	110
<b>Chapter 6. Organizing the Project Team</b>	111
<b>Organizing the Job in the Office</b>	112
Changing CSI specification division numbering	112
Addenda and bulletins	112
Project files	115
<b>Organizing the Estimate</b>	116
Investigating allowance and bid alternates	117
Alternates	119
Shop drawings and the shop drawing log	120
Informational copies	124
The RFI log	124
Job scheduling	127
The critical path method (CPM)	130
Activity duration times	131
The importance of float and who owns it	132
The project meeting minutes	132
Other forms to consider when getting organized	134
Lien waivers—for progress and final payment	136
<b>Organizing in the Field</b>	138
<b>Shop Drawing Organization</b>	141
<b>The Future of Project Organization</b>	141
<b>Chapter 7. Successful Project Completion Demands a Successful Start</b>	143
<b>Starting Off on the Right Foot</b>	144
<b>Controlling the Project Start</b>	144
<b>Review of the Contract with the Owner</b>	145

<b>Review of the Project Specifications</b>	146
<b>Specific items to look for when reviewing the specifications</b>	146
<b>Record Drawings</b>	147
<b>Inspections and Test Reports (Other Than Those Required by Local Officials)</b>	148
<b>Operations and Maintenance Manuals</b>	148
<b>Commissioning and TAB</b>	149
<b>TAB—A Procedure That Requires Special Attention</b>	149
<b>Commissioning</b>	150
<b>The Punch List</b>	152
<b>Is it a punch list or a warranty item?</b>	153
<b>Attic stock, special tools, and spare parts</b>	153
<b>Material safety data sheets</b>	154
<b>Preparing for that First Project Meeting with the Subcontractors</b>	154
<b>That Dangerous End-of-Project Syndrome</b>	160
<b>A Building Systems Commissioning Checklist</b>	161
 <b>Chapter 8. Estimating</b>	167
<b>The 2010 Edition of CSI's <i>MasterFormat</i>®</b>	167
<b>Acquiring a Database</b>	169
<b>The purchased database</b>	169
<b>Acquiring the in-house database</b>	170
<b>The weekly field labor report</b>	170
<b>Combining cost codes and daily reports to produce the database</b>	172
<b>Analyzing Unit Costs</b>	173
<b>Displaying unit costs</b>	173
<b>Monitoring the reporting of costs</b>	174
<b>When disparities in costs appear</b>	175
<b>Bundling to create a unit cost</b>	175
<b>Conceptual Estimating</b>	176
<b>The various stages of the process</b>	177
<b>The Postconstruction Project Review</b>	178
<b>Mining Completed Projects to Enhance the Database</b>	179
<b>The Project Parameter Cost Model Form</b>	179
<b>The preparation of a project cost model data sheet</b>	179
<b>Sources of Conceptual Estimating Data</b>	183
<b>Cost index data</b>	183
<b>Order-of-Magnitude Estimating</b>	184
<b>Order-of-magnitude issues to consider</b>	184
<b>Special Requirements Associated with Office Building Estimating</b>	185
<b>Core and shell</b>	185
<b>The Tenant Work Letter</b>	186
<b>The Developer's Responsibility</b>	186
<b>Subcontractor Responsibilities as They Relate to Tenant Fit-Ups</b>	189
 <b>Chapter 9. Buying Out the Job</b>	191
<b>Reread the Contract with the Owner</b>	191
<b>Awarding Subcontracts</b>	192
<b>The subcontract interview form</b>	193

<b>The Bid Summary Sheet</b>	200
<b>Unit Prices</b>	202
Other items to consider during the solicitation of prices	204
<b>Combining Work to Best Advantage</b>	204
<b>Subcontract or Do It Ourselves?</b>	207
The "we can do it cheaper" syndrome	208
<b>Key Questions to Ask Subcontractors during Negotiations</b>	208
<b>Pitfalls to Avoid in Mechanical and Electrical Contract Negotiations</b>	209
<b>Who Is the Contractor?</b>	210
<b>Issues to Be Addressed</b>	211
Temporary light and temporary power	211
Installation of underground utilities	211
Designing to local utility standards	212
<b>Warranties and Guarantees</b>	212
<b>Spare Parts, Special Tools, and "Attic" Stock</b>	213
<b>Job Cleaning and the Contract</b>	213
<b>Communicating the Terms and Conditions of the Subcontract Agreement</b>	215
Importance of lien waiver requirements in the subcontract agreement	215
<b>Purchase Orders</b>	217
Ordering when exact quantities are not known	218
Price protection and the purchase order	219
<b>Pitfalls to Avoid When Issuing Subcontracts and Purchase Orders</b>	221
<b>Do Your Subcontract Agreements Include These Key Provisions?</b>	222
<b>Chapter 10. The Change Orders</b>	227
<b>A Cardinal Rule</b>	228
Starting off on the right foot	228
Other questions to consider as potential costs in addition to those above	229
<b>Reviewing the Important Contents of a Change-Order Request</b>	229
Time and material work	231
The verbal authorization to proceed	231
<b>What Constitutes "Cost"</b>	232
<b>Watch Those Hourly Payroll Costs</b>	233
<b>Completion Time and the Change Order</b>	234
Consequential damages	234
Will contract time remain the same, be reduced, or be extended?	235
Small-tool costs	236
What costs other than bricks and mortar should be considered?	237
What overhead and profit fees can be included in change-order work?	238
When credits and charges both apply	238
The construction change directive—the CCD	239
Be alert to other contract provisions relating to change-order work	240
<b>Public Works and the Change-Order Process</b>	240
Will this change affect productivity or overtime?	241
<b>Roadblocks to Acceptance of Change Orders</b>	243
The owner's perspective	243
The contractor's perspective	244
The architect and engineer's perspective	244
<b>Liquidated Damages and the Change-Order Process</b>	248
A typical liquidated damages clause	248

<b>Change Orders Reflecting Costs due to Job Delays</b>	251
Excusable delays	251
Concurrent delays	251
Compensable delays	252
Documenting compensable delays	252
The cost impact associated with delays, interruptions, suspension of work	253
When submitting the change order	254
<b>Pitfalls to Avoid when Preparing Change Orders</b>	255
<b>The Change-Order Cost Checklist</b>	256
<b>Effective Change-Order Control</b>	257
<b>Chapter 11. Quality Control and Quality Assurance</b>	259
Quality Begins with Quality Design	259
Strategies for Change	261
Total Quality Management	261
Benchmarking	262
The International Standards Organization	263
The Six Sigma Approach to Quality	264
From Theory to Practice	265
Quality control by observation	265
Quality starts with a thorough review of the contract documents	266
Quality Control and the Specifications	266
The F factor	266
Using trade organizations to learn about quality standards	267
The Preconstruction Conference—QC and QA	267
Sample panels and mock-ups	269
The punch list and QC/QA	269
Developing a Company QC/QA Program	270
The inspection checklist method	271
<b>Chapter 12. Project Documentation</b>	279
The Documentation Process	280
Documentation to the Owner	281
The unique provisions of a GMP contract with respect to documentation	282
Documentation to an owner from the construction manager	282
Documentation to the Architect and Engineer	284
Shop drawing submittals, review, returns, and logs	284
Requests for Clarification and Requests for Information	286
Field Conditions Documentation	288
The affect on “as-builts”	288
The Coordination Process	289
Other Important Documents	289
Cost proposal or cost estimate requests	289
Conditions that impact completion time	290
Documentation of close-out requirements	292
Documentation to the Subcontractors	293
Is the scope of the work fully understood by all?	294
Avoiding problems related to subcontractor misunderstandings	294
Linking the subcontract agreement with the owner’s contract	295

<b>Subcontractor performance—the major concern</b>	296
<b>Danger signs and how to interpret them</b>	297
<b>That low subcontract bid—are problems waiting to surface?</b>	300
<b>Documentation When Major Drawing Revisions Are Made</b>	301
<b>What to do with all of those 8½ x 11s</b>	302
<b>What Impact Have These Major Revisions Had on Productivity?</b>	303
<b>Documentation Required When Contracting with Public Agencies</b>	303
<b>The Davis-Bacon Act</b>	304
<b>Complying with other government requirements</b>	305
<b>Project Documentation from the Field</b>	306
<b>The superintendent's record of daily activities</b>	307
<b>Photographs: important documentary components</b>	310
 <b>Chapter 13. Claims, Disputes, Arbitration, and Mediation</b>	313
<b>What Triggers Claims and Disputes?</b>	313
<b>The Bid Proposal Process and the Potential for Disputes</b>	314
<b>Do late bids count?</b>	315
<b>Other Potentials for Disputes</b>	319
<b>Oral contracts</b>	319
<b>Disputes regarding contract interpretation</b>	320
<b>Subsurface, changed, and differing conditions</b>	324
<b>What is different about "differing conditions"?</b>	324
<b>Differing Site Conditions (DSC)</b>	325
<b>Using geotechnical disclaimers to advantage</b>	326
<b>The court and differing site conditions</b>	326
<b>Shift Work and Its Impact on Productivity</b>	333
<b>Differing or changed conditions</b>	334
<b>Changed Conditions</b>	344
<b>Be wary of subcontractor input</b>	345
<b>A word about lost productivity</b>	347
<b>The courts and lost productivity issues</b>	349
<b>Claims against professionals</b>	350
<b>Acceleration: what it is and how it is used</b>	354
<b>Arbitration and Mediation</b>	358
<b>Mediation</b>	358
<b>The arbitration process</b>	358
<b>In Summation</b>	360
 <b>Chapter 14. Safety in Construction</b>	361
<b>The Occupational Safety and Health Act (OSHA)</b>	364
<b>Factors Responsible for Declining Accident Rates</b>	366
<b>Safety Pays—in More Ways Than One</b>	374
<b>The positive effects of a good safety record</b>	374
<b>Workers' compensation insurance</b>	375
<b>Developing the Company Safety Program</b>	378
<b>The statement of company policy</b>	378
<b>The safety director/safety coordinator</b>	379
<b>A hazard communication program</b>	381

<b>Chapter 15. Design-Build</b>	<b>395</b>
What Is Design-Build?	396
Why has design-build garnered so much attention recently?	396
Developing a Design-Build Capability	401
Creating in-house design capability	401
The joint venture	402
The limited liability corporation—the LLC	402
An architect- or contractor-led design-build team?	404
Developing a Design-Build Program	408
Developing design-build proposals	408
The two-phase design-build proposal	408
The use of stipends	409
Another approach	409
How Owners Select Design-Builders	410
The selection process	411
Using Contract Incentives	411
Several forms of design-build contracts	412
The teaming agreement	414
Contract Provisions Unique to the Design-Build Process	416
Special provisions of design-build contracts	417
Contract provisions relating to defining the owner's program	418
The role of the subcontractor in the design-build process	419
Design-Build in the Public Sector	421
Federal Design-Build Contracting	421
U.S. Department of Transportation (USDOT) Design-Build	
Effectiveness Study of January 2006	422
Evaluation of the phase two proposers	423
<b>Chapter 16. Sustainability and Green Buildings</b>	<b>425</b>
The Impact of Construction on the Environment	425
What Do We Mean by Sustainability?	426
What are some of these eco-friendly materials?	427
Whole-building design	428
Green buildings in the private sector	436
Some Design-Build/Sustainable Building Guidelines	437
Are green buildings more expensive than conventional construction?	438
Projected savings	441
Other revealing but not so apparent benefits of green buildings	442
The Greening of Existing Buildings	447
JohnsonDiversey Continues to Innovate	449
<b>Chapter 17. Interoperability and Building Information Modeling (BIM)</b>	<b>451</b>
Looking at the Last Several Decades	451
Contractors Slow to Embrace Technology	452
Interoperability—what is it and why is it so important?	454
The steel industry becomes a leader	459
What Is Building Information Modeling All About?	463
Coordination and interference issues addressed	464
