C Contents

1	Synthesis Parameters and Structural Properties of Mesoporous Silica	1
1.1	Synthesis of Mesoporous Materials	1
1.2	M41s Materials	3
1.3	MCM-41 Mesoporous Materials.....	5
1.4	MSU Mesoporous Materials.....	6
1.5	SBA Mesoporous Materials	7
2	Characterisation of Mesoporous Materials.....	9
2.1	Nitrogen Gas Adsorption	9
2.1.1	Classification of Pores according to their Width.....	10
2.2	Adsorption in Micropores	12
2.3	Adsorption in Mesopores	15
2.4	General Considerations on Adsorption.....	17
2.5	Adsorption in Nonporous Solids	19
2.5.1	Specific Surface Area	20
2.6	X-Ray Powder Diffraction.....	20
2.7	Scanning Electron Microscopy.....	23
2.8	Transmission Electron Microscopy	25
3	Nanostructuring Mesoporous Silica: An Overview.....	29
3.1	Controlling Morphology	29
3.2	Hybrid Mesoporous Silica	35

3.2.1	Post-synthesis Grafting Hybridisation.....	36
3.2.2	Co-condensation.....	36
4	Potential Applications of Mesoporous Silica.....	41
4.1	Potential Applications of Mesoporous Silica in Catalysis.....	41
4.2	Potential Applications of Mesoporous Silica in Separations.....	56
5	Inclusion of Biomolecules in Mesopores.....	65
5.1	Immobilisation of Proteins or Enzymes in Mesopores.....	65
5.2	Mesoporous Silica in Peptide Separations for Applications in Proteomics.....	66
5.3	Biological Molecules included in Mesoporous Silica: Organised Bio-inspired Systems.....	70
6	Mesoporous Silica as Matrices for Modified Drug Release.....	77
6.1	Generalities and Preliminary Studies for Oral Drug Administration.....	77
6.2	Engineered Drug Delivery Systems.....	86
6.3	Drug Delivery of Anticancer Agents and Pulmonary Drug Delivery.....	105
7	Multifunctional Mesoporous Silica in Cancer and Gene Therapy.....	109
7.1	Synthesising Mesoporous Materials: Towards the Design of a Multifunctional Drug Targeting Device.....	109
7.2	Toxicity of Silica and Mesoporous Silica.....	111
7.2.1	Toxicity of Surface-functionalised and Luminescent Mesoporous Silica Particles ...	111
7.2.2	Studies Correlating Surface Functionalisation and Morphologies of Mesoporous Silica with Cellular Uptake	115

7.3	Engineering Drug-targeting Devices.....	119
7.3.1	Preferential Functionalisation of External Surface of Mesoporous Silica Particles	119
7.3.2	Drug Targeting via Magnetically Active Nanoparticles.....	126
7.3.3	Polymeric Functionalisation of Mesoporous Silica.....	131
7.3.4	Mesoporous Silica Devices in Gene Transfection	132
8	Cell Markers and Bioimaging.....	137
9	Perspectives	147
	Abbreviations.....	151
	Index.....	155
