Section 1 General Introduction

Chapter 1.1	Reflections on Fundamental and Policy-oriented Research of Water System Knowledge over the Past 25 Years	3
	<i>André van der Beken</i>	
1.1.1	Introduction	3
1.1.2	Policy, Management and Knowledge	4
1.1.3	Scientific Research	5
	1.1.3.1 Objectives	5
	1.1.3.2 Methodology	7
	1.1.3.3 Dynamics	8
	1.1.3.4 Finalization	9
	1.1.3.5 Evaluation	10
1.1.4	Water Research Progress and Problems	10
	1.1.4.1 Progress in General Research based on Technological Developments	10
	1.1.4.2 Problems in Water Research	11
1.1.5	By Way of Conclusion	13
	References	14
Chapter 1.2	Bridging the Gaps between Science and Policy: A Review of the Evidence and some Principles for Effective Action	15
	<i>John Holmes and Alister Scott</i>	
1.2.1	Introduction	15
1.2.2	Developments in Europe	18

Water System Science and Policy Interfacing

1.2.2.1	European Commission	18
1.2.2.2	European Union Member States	20
1.2.2.3	Science Meets Policy and Bridging the Gap	20
1.2.3	The ‘Front End’: Planning and Managing Research Programmes	21
1.2.3.1	Identifying Research Needs and Setting Research Agendas	21
1.2.3.2	Engagement and Stakeholder Dialogue	22
1.2.3.3	Research Project Selection	23
1.2.4	The ‘Back End’: Dissemination and Uptake	24
1.2.4.1	Intermediaries and Translators	24
1.2.4.2	Enhancing the Accessibility of Knowledge	25
1.2.4.3	Quality and Transparency	26
1.2.5	Cross-cutting Issues	27
1.2.5.1	Two Worlds	27
1.2.5.2	Training and Development	29
1.2.5.3	Developing Inter-disciplinarity	29
1.2.5.4	‘Strong Science’	30
1.2.6	Discussion	30
1.2.7	Principles of Effective Science-into-Policy Practices	32
	References	34
Chapter 1.3	Research into Practice – An Organisational Learning Perspective	36
	<i>Judy Payne</i>	
1.3.1	Introduction	36
1.3.2	How Many Gaps?	37
1.3.2.1	Lost in Translation	37
1.3.2.2	Lost before Translation	38
1.3.2.3	Closing the ‘Lost in Translation’ and ‘Lost before Translation’ Gaps through Collaboration	38
1.3.2.4	Lost after Translation	38
1.3.2.5	Summary	39
1.3.3	The Tension between Exploring New Knowledge and Exploiting Existing Knowledge	39
1.3.3.1	Exploration and Exploitation	39
1.3.3.2	The Tension	40
1.3.3.3	Exploration, Exploitation and the Gap between Research and Practice	40
1.3.4	Organisational Knowledge Creation and Learning	41

1.3.4.1	Crossan, Lane and White's Organisational Learning Framework	41
1.3.4.2	Using the Organisational Learning Framework to Explain the Research-Practice Gaps	43
1.3.4.3	Enabling the 4I Processes	44
1.3.4.4	Learning from Research across Organisational Boundaries	48
1.3.5	Summary and Implications	49

Chapter 1.4	General Features of the EU Water Policy and Related Scientific Framework	52
	<i>Philippe Quevauviller, Christos Fragakis and Panagiotis Balabanis</i>	
1.4.1	Introduction	52
1.4.2	General Features of the EU Water Policy Framework	53
1.4.3	Water in the EU R&D Framework	53
1.4.3.1	EU RTD Framework Programme	53
1.4.3.2	Research carried out by the Joint Research Centre (JRC)	55
1.4.3.3	Demonstration Projects	55
1.4.4	Identifying Research Needs in the Water Sector	55
1.4.5	Examples of Water-related Research Projects and Initiatives	56
1.4.5.1	Research on the Knowledge of Ground- water and Dependent Ecosystems	56
1.4.5.2	Research on Catchment Modelling	57
1.4.5.3	Research on Climate Change Impacts on Water	58
1.4.5.4	Technological Platforms	60
1.4.5.5	Science-Policy Interfacing	61
	References	61
Chapter 1.5	Developing the Evidence Base for Integrated Catchment Management: Challenges and Opportunities	63
	<i>Ben Surridge, Alison Holt and Bob Harris</i>	
1.5.1	Introduction	63
1.5.2	Towards an Integrated Catchment Management Approach	64
1.5.3	Institutional and Legislative Contexts for ICM – Examples from the UK	66

1.5.4	A New Framework for ICM	69
1.5.4.1	Ecosystem Services and the ICM Framework	70
1.5.4.2	Implementing a Framework for ICM	71
1.5.5	Using Science to Support the ICM Framework	76
1.5.5.1	Social-Environmental Systems and ICM	77
1.5.5.2	Developing Participatory Processes	78
1.5.5.3	Understanding Social-Environmental Systems	79
1.5.5.4	Scenario Analyses and the Evolution of Integrated Models	81
1.5.6	Interdisciplinary Science and ICM	86
1.5.6.1	Calls for Interdisciplinary Research	86
1.5.6.2	Changes in the Practices of Science	87
1.5.6.3	Supporting Interdisciplinary Research	89
1.5.7	Future Challenges Facing Implementation of ICM	92
1.5.7.1	Developing a Revised Conceptual Understanding of ICM	92
1.5.7.2	Designing Suitable Frameworks for Implementing ICM	93
1.5.7.3	Supporting the Implementation of Frameworks for ICM	93
	References	95
Chapter 1.6	Analysis of EC Framework Programme and LIFE Projects for their Relevance to the Water Framework Directive	101
	<i>Kees J. M. Kramer and Xenia Schneider</i>	
1.6.1	Introduction	101
1.6.1.1	Research Dissemination and Communication	102
1.6.1.2	Bridging Science–Policy	104
1.6.2	Collection of EC Research Project Information	104
1.6.2.1	EC Projects Considered	105
1.6.2.2	Nature of the Information	105
1.6.2.3	Sources of Information	106
1.6.3	Project Information Uploaded to the WISE-RTD Portal	106
1.6.3.1	Research Projects with WFD Relevance	106
1.6.3.2	WFD Relevant Information	108
1.6.3.3	Shelf Life of RTD Results	108
1.6.3.4	RTD Information Lost?	109
1.6.3.5	Maintenance	110

1.6.4	Challenges and Recommendations for Bridging Science and Policy	110
1.6.4.1	Challenge 1: Preserving the Project's Generated Knowledge is a Necessity	111
1.6.4.2	Challenge 2: Tapping into the Knowledge of WFD Related Projects through a Single Source	112
1.6.4.3	Challenge 3: Simplifying Communication with Non-scientific Audiences	113
1.6.4.4	Challenge 4: Dissemination of Research into Practice and Change Management are Lagging Behind	114
1.6.4.5	Challenge 5: Having a Continuous Dialogue and Adopting a Participatory Approach	114
	Acknowledgements	115
	References	115
Chapter 1.7	WFD Economics and the Science–Policy Interface: Status and Perspectives	117
	<i>Eduard Interwies and Ilke Borowski</i>	
1.7.1	Introduction	117
1.7.2	Main Fields of Work for the Implementation of the Economic WFD-aspects: Gaps and Current Activities	119
1.7.2.1	Selection of Measures, Cost-effectiveness Analysis (CEA), Integrated (Hydro-economic) Modelling	120
1.7.2.2	Cost–Benefit Analysis (CBA), Exemptions, Environmental Benefits	122
1.7.2.3	Water Pricing, Cost Recovery/ Polluter-pays Principle, Economic Instruments	122
1.7.3	Use of Scientific Economic Models and Methods	124
1.7.3.1	EU-funded Research on Socio-economic aspects of Water Management	125
1.7.3.2	Awareness and use of EU-funded Research	126
1.7.3.3	Main Difficulties in Current Implementation Regarding the use of Scientific Tools and Methods	127
1.7.4	Summary and Conclusions: Elements for a Future Research Agenda	129

Acknowledgements	133

Section 2 Interfacing Science and Policy in the Context of Selected RTD Projects

Chapter 2.1	SKEP Network: Facilitating Improvements in Science into Policy Process	137
	<i>Simon Gardner, Eeva Furman, Paula Kivimaa, Pirjo Kuuppo, Hanna Mela, Päivi Korpinen, Erik Fellenius, Jennie Savgård and John Holmes</i>	
2.1.1	Introduction	137
2.1.2	Science-Policy Aspects of the Network	138
2.1.2.1	European Overview of Research Management Approaches in the Field of Environment Protection	138
2.1.2.2	Linking Research and Policy through Evaluation: A European Overview of Approaches and Practices in Mid-term and Ex-post Evaluation of Environmental Research Programmes	143
2.1.3	Assessing the Dissemination and Implementation of Research	146
2.1.4	SKEP Joint Calls: Maintaining a Focus on the Practical Application of Science into Policy Processes	148
2.1.4.1	Assessment of Current Approaches towards the Evaluation of the Uptake, and Impact, of Research Projects and Programmes by Environmental Policy-makers	149
2.1.4.2	Assessment of Lessons Learnt in the Communication and Dissemination of Emerging Scientific Issues to Environmental Policy-makers	150
	References	151
Chapter 2.2	Evolution of Methods to Link Science and Policy: The Experience of EUPOL	153
	<i>Antony Chapman, Adriaan F.L. Slob, Marc Rijnveld and Corinne Merly</i>	
2.2.1	Introduction	153
2.2.2	Scientific Framework	154

<i>Contents</i>		xix
	2.2.2.1 Inventory of Policy Questions	155
	2.2.2.2 Linking Demand to Supply	156
2.2.3	DPSIR	158
2.2.4	Resilience	159
2.2.5	Connecting with Scientists and Policy Makers: Workshops and Interviews	160
2.2.6	Future Plans	161
2.2.7	Lessons Learned From the EUPOP Experience	161
2.2.8	Conclusions	162
	Acknowledgements	163

Chapter 2.3	Science–Policy Interfacing in the CA Project RISKBASE	165
	<i>Jos Brils</i>	
2.3.1	Introduction	165
2.3.2	RISKBASE	166
2.3.3	Science–Policy Interface Pillars in RISKBASE	167
2.3.4	Science–Science Interfacing (SSI)	172
2.3.5	Science–Policy Interfacing (SPI)	173
2.3.6	Policy–Policy Interfacing (PPI)	176
2.3.7	SPI Lessons Learned So Far	178
	Acknowledgements	179
	References	179
Chapter 2.4	Narrowing the Science–Policy Gap – Experience from the Harmoni-CA Concerted Action	181
	<i>Michiel W. Blind, Jens Christian Refsgaard, Ilke Borowski and Willem J. De Lange</i>	
2.4.1	Introduction	181
2.4.2	Concerted Action Harmoni-CA	182
	2.4.2.1 Rationale	182
	2.4.2.2 Science–Policy and Science–Science Interface in Harmoni-CA	183
	2.4.2.3 Approach and Methodology	185
	2.4.2.4 Results	187
2.4.3	Analyses and Recommendations from Harmoni-CA’s Efforts	190
	2.4.3.1 Workshops and Conferences	190
	2.4.3.2 Development of Synthesis Reports	191
	2.4.3.3 Development of WISE-RTD & Dissemination through Leaflets	192

	2.4.3.4	Researching the Science–Policy Interface with Respect to Model use/Research Model Uptake	193
2.4.4		Conclusions and Discussion	194
		Acknowledgements	196

Chapter 2.5		The OpenMI – Science Responding to Policy, Industry and Events	200
		<i>Roger V. Moore</i>	
2.5.1		Introduction	200
	2.5.1.1	Background	200
	2.5.1.2	A Starting Point	201
2.5.2		What is the OpenMI?	205
	2.5.2.1	Introduction	205
	2.5.2.2	Overview of the OpenMI	208
	2.5.2.3	Current Status	214
2.5.3		OpenMI Association’s Strategy	214
	2.5.3.1	Background	214
	2.5.3.2	OpenMI Association’s Objectives According to its Charter	215
	2.5.3.3	Vision	215
	2.5.3.4	Mission	216
	2.5.3.5	Implementation Strategy	217
2.5.4		Where Next?	220
	2.5.4.1	Standards Take Time	220
	2.5.4.2	Implementing the Strategy	221
Chapter 2.6		Stakeholder Responsive Research as an Approach to Support Adaptive Integrated Water Management: Examples from the NeWater Project	226
		<i>Claudia Pahl-Wostl, Britta Kastens, Ilke Borowski and Darya Hirsch</i>	
2.6.1		Introduction	226
2.6.2		Scientific Background	229
2.6.3		Science–Policy Interface in NeWater	230
	2.6.3.1	Stakeholder involvement in NeWater	230
	2.6.3.2	CAIWA Science-to-Policy Day	235
	2.6.3.3	Synthesizing insights for Water Policy Makers and Water Managers	237
2.6.4		Conclusions	239
		References	240

Section 3 Links to Water National or Regional Research, Policies and Management

Chapter 3.1	Building a National Strategy on Science–Policy Interface in Support of Water Policies – The Case of France	245
	<i>Marie-Perrine Durot and Patrick Flammarion</i>	
3.1.1	Introduction	245
3.1.2	Plans for Research and Development Support of Public Water Policies in France	246
3.1.3	The Research and Development System and its Management in France	248
3.1.4	Building a Strategy for National Research and Development on Water and Aquatic Environments Targeting Operational Stakeholders	249
3.1.4.1	Coordination between the National and Catchment-basin Levels	250
3.1.4.2	A Research and Development Strategy Interfacing with Stakeholders	251
3.1.5	Conclusion. A European Platform to Share Information and Experience	254
	References	254
Chapter 3.2	Links to Water National or Regional Research, Policies and Management – IWRM-Net	255
	<i>Natacha Amorsi, Peter Allen-Williams, Michiel Blind, Daniela Hohenwallner, Irene Huber, Xavier Lafon, Stephen Midgley and Daniela Past</i>	
3.2.1	Introduction	255
3.2.2	IWRM-Net Context	256
3.2.2.1	ERA-Net Scheme	257
3.2.2.2	Water Framework Directive and Integrated Water Resource Management	258
3.2.3	The Science–Policy Interface and its Water Specificities	259
3.2.3.1	Policy Life-cycle and Interface with Science	259
3.2.3.2	SPI-WFD Water Specificities	261
3.2.4	IWRM-Net Strategies and Actions Related to Science–Policy Interface	265
3.2.4.1	Ambition of IWRM-Net	265

3.2.4.2	SPI Focus for IWRM-Net: Topics, Critical Aspects and Actors	266
3.2.4.3	From Vision to Actions, IWRM-Net's Activities	267
3.2.4.4	Research Needs Identification	267
3.2.4.5	Joint Calls	273
3.2.4.6	Developing the Network – Liaison and Communication Activities	275
3.2.5	Our Current Limits and First Lessons Learnt	275
3.2.5.1	Be Desirable to Target Actors	275
3.2.5.2	Content of IWRM-Net Calls – Identifying Research Priorities	276
3.2.5.3	Implementation of the First IWRM Transnational Call	277
3.2.5.4	First Lessons Learnt and Corroboration of our Aims	277
3.2.6	Conclusion	278
	Useful Websites	279
	References	279
Chapter 3.3	Linking Water Science to Policy: A Canadian Experience	281
	<i>Karl A. Schaefer, Alex T. Bielak and Leah E. Brannen</i>	
3.3.1	Introduction	281
3.3.1.1	Canadian Context for Science Policy Linkages	283
3.3.2	Water Science–Policy Workshops	285
3.3.2.1	Rationale	285
3.3.2.2	Workshop Approach	286
3.3.2.3	Assessing Workshop Effectiveness	287
3.3.3	Recent Developments	288
3.3.4	Conclusions	290
	References	291
Chapter 3.4	ECOBAG – A Regional Science/Water Policies Interface	293
	<i>Philippe Vervier, Jérôme Depasse, Michel Combarrous, Hugues Ayphassorho, Martine Gaeckler and Marc Jarry</i>	
3.4.1	Background of Scientific Support Needs for Integrated River Basin Management Implementation	293
3.4.2	A Regional 'Science–Water Policy' Interface: ECOBAG	295
3.4.3	Examples of Successful ECOBAG Projects	296

3.4.3.1	Improving Exchanges of Information and of Knowledge between Researchers, Socio-Economic Actors, Managers and Decision Makers of Water Systems	296
3.4.3.2	A Collective and Iterative Process to Identify the Support Required by Water Managers and Decision Makers	297
3.4.3.3	Example of Concert'Eau (http://concerteau.cobag.org/)	299
3.4.4	Conclusions	301
	References	302

Section 4 Communication and Education Needs

Chapter 4.1	General Introduction on Communication and Education Needs	305
	<i>Philippe Quevauviller</i>	
4.1.1	Introduction	305
4.1.2	Communication in the Light of Matching Agendas	306
4.1.3	Enhancing Dialogue	307
4.1.4	Synthesis Needs	307
4.1.5	Exchange Platforms, Networking	308
4.1.6	Education Needs	308
	References	309
Chapter 4.2	WISE-RTD – A Portal for Science & Technology Transfer to Policy Making & Implementation in Integrated Water Resources Management	310
	<i>Willem J. De Lange, Jurgen Plyson, Patrick Willems, Thomas Vansteenkiste, Frank Provost, Fred Hatterman, Guido Vaes and Patrick Swartenbroeckx</i>	
4.2.1	Introduction: Historical Perspective, Operation Environment	310
4.2.2	Strategy and Scope: Towards a Sustainable Web Portal	311
4.2.3	Background: Context, Science, Techniques	312
4.2.3.1	Context Scope	312
4.2.3.2	Scientific Background	313
4.2.3.3	Technical Background	316
4.2.3.4	Guided and Non-guided Search Front End Link	317

4.2.4	Operation Process: Aim/Focus Management, Input/Output Support, QA, Adaptations, Extensions	318
4.2.4.1	Aim and Focus of Operational Management	318
4.2.4.2	User Support 1: Upload of Information into WISE-RTD	318
4.2.4.3	User Support 2: Retrieving Results	321
4.2.5	User Interaction: Evaluation and Adaptation	328
4.2.5.1	First Phase, Before Launch 2003–2007 HCA Period	328
4.2.5.2	Second Phase, After Launch 2006–2008 SPI-Water Workshops	329
4.2.5.3	Evaluation in The Netherlands	330
4.2.5.4	Concluding Remarks	331
4.2.6	Sustainability	331
	References	332
Chapter 4.3	EUGRIS – More Than a Database	333
	<i>Jörg Frauenstein, Paul Bardos and Antony Chapman</i>	
4.3.1	Introduction	333
4.3.2	Initiation of EUGRIS as an EU Funded Project	334
4.3.3	What Does EUGRIS Offer?	335
4.3.4	Subsequent Development and Expansion of EUGRIS	336
4.3.5	EUGRIS, AquaTerra and Linking to Other Portals	341
4.3.5.1	Soil, a Pressing Issue for Information Exchange	342
4.3.6	Bottlenecks and Options for Future Development	343
4.3.7	Conclusions	346
Chapter 4.4	EuroAquaе and its Links to RTD (Research & Technological Development) & Management	347
	<i>Philippe Gourbesville and Jean A. Cunge</i>	
4.4.1	Introduction	347
4.4.1.1	Water Sector Industry & Engineering: Demands & Needs for Hydroinformatics	347
4.4.1.2	EuroAquaе Project Description & Joint Degree	348
4.4.1.3	Erasmus Mundus Framework	349

4.4.1.4	Water Sector Educational Environment in Europe	351
4.4.2	EuroAqua Project History and Achievements	351
4.4.2.1	Joint Degree Agreement	351
4.4.2.2	Knowledge Skills of Graduates	352
4.4.2.3	Innovation in Education: Virtual University and HydroEurope	355
4.4.2.4	Internship of 4th Semester and Employment of Alumni	356
4.4.2.5	Statistics of Four Generations of Students	356
4.4.2.6	EuroAqua Alumni Association	357
4.4.3	Why is the Profile a Success?	357
4.4.3.1	Hydroinformatics – Links with RTD	357
4.4.3.2	Mobility, Intellectual Profile, Industry Needs (Research or Industry)	359
4.4.3.3	Link with Management Capacities	362
4.4.4	Developments Thanks to the EuroAqua Project	363
4.4.4.1	EuroAqua Consortium – Links between the Partner Universities	363
4.4.4.2	Links between EuroAqua Course and Industry	363
4.4.5	European Added Value	364
4.4.5.1	Traditional Academia Concept and EuroAqua Mobility Paradigm	364
4.4.5.2	New Education Paradigm	365
4.4.5.3	Water Sector Industry, Interrelations, Exportation	366
4.4.5.4	Radiating European Engineering Approaches and Ethics	367
4.4.6	Future Common Activities: EuroAqua Research Group	367
	References	368

Chapter 4.5	Inserting the Multi-lingual Urban Designer into the Water Discussion	370
	<i>Skye Duncan</i>	
4.5.1	Introduction	370
4.5.1.1	Inserting Urban Design into the Science and Policy Discussion	370
4.5.2	Urban Design, our Pedagogy and our Focus on Water	371

4.5.2.1	What is Urban Design?	371
4.5.2.2	Urban Design Pedagogy	371
4.5.2.3	Understanding Water and the Multiple Scales of Urban Design	374
4.5.3	Managing Multiple Languages	376
4.5.3.1	Language of Urban Designers	376
4.5.3.2	Language of Science	378
4.5.3.3	Language of Policy	380
4.5.3.4	Combining the Languages	384
4.5.4	How Science, Policy and Design Interact	384
4.5.5	Future of Hybrid Approaches	386
	Acknowledgements	388

Section 5 Summary, Way Forward and Conclusions

Chapter 5.1	Concept of Interfacing and Perspectives	393
	<i>Philippe Quevauviller, Philippe Vervier and Marie-Perrine Durot</i>	
5.1.1	Introduction	393
5.1.2	Science–Policy Interfacing in the Context of the WFD	394
5.1.3	Operational Features	395
5.1.3.1	Harmoni-CA Initiative	395
5.1.3.2	WISE-RTD Web Portal	396
5.1.4	General Principles of the Science–Policy Interface	396
5.1.5	Pilot Initiative: the CIS-SPI Activity	397
	References	398
Chapter 5.2	Role of Translators in Science–Policy Interfacing	400
	<i>Antony Chapman, Philippe Quevauviller, Willem J. De Lange and Philippe Vervier</i>	
5.2.1	Introduction	400
5.2.2	Rationale behind Translators	401
5.2.3	Role of the Translator	402
5.2.4	Integration of Knowledge	406
5.2.5	Value of Translators	407
5.2.6	Requirements of a Translator	408
5.2.7	Need for Appropriate Relays	408
5.2.8	Conclusions	411
	References	412
