Preface to the Fourth Edition xv

1 An Overview

1

- 1.1 Introduction 1
- 1.2 Definitions and Types of Pollutants 2
- 1.3 Pollutants of Global Concern 6
 - Ozone Depletion 6
 - Global Climate Change 7
 - Sources of Global Climate Change 10
 - What Can We Do? 15
- 1.4 Legislative and Regulatory Trends in the United States 17
 - Federal Legislation 17
 - Federal Regulations and Standards 22
 - The Permitting Process 29
- 1.5 The Ideal Gas Law and Concentration Measurements in Gases 30
- 1.6 Other Applications of the Ideal Gas Law 34
- 1.7 Gas Flow Measurement 37
- 1.8 Causes, Sources, and Effects 48
 - Particulate Matter 50
 - Sulfur Dioxide 53
 - Nitrogen Oxides 54
 - Photochemical Oxidants and VOCs 56
 - Carbon Monoxide 57
 - An Air Quality Index 59
- 1.9 National Air Quality Trends 61
- ▲ Problems 66 References 70**

2	What Is Process Design?	75
2.1	Introduction	75
2.2	General Design Considerations	77
	Process Flow Sheets	77
	Material Balances and Energy Balances	79
	Enthalpy	84
2.3	Simple Analysis of a Coal-Fired Power Plant	85
2.4	Engineering Economics	93
	Optimizing Fixed Capital and Operating Costs	93
	Depreciation	94
	Incremental Rate of Return on Investment	96
	Comparison of Several Alternatives	98
	Payout Period	98
2.5	APC Equipment Cost Estimation	98
	Equipment Costs	102
2.6	Preliminary Fixed Capital Cost Estimates for Pollution Control Projects	103
2.7	Annual Operating Cost Estimates	105
	▲ Problems	106
	References	110
3	Particulate Matter	111
3.1	Introduction	111
3.2	Characteristics of Particles	111
3.3	Particulate Behavior in Fluids	120
	The Drag Force	120
	External Forces	124
	Gravitational Settling	124
	Collection of Particles by Impaction, Interception, and Diffusion	127
3.4	Overview of Particulate Control Equipment	129
	▲ Problems	131
	References	134
4	Cyclones	135
4.1	Introduction	135
	Cyclone Dimensions	138
4.2	Theory	140
	Collection Efficiency	140
4.3	Design Considerations	141
	Collection Efficiency	141
	Pressure Drop	146
	Other Considerations	148
4.4	Costs	152
	▲ Problems	155
	References	159

5	Electrostatic Precipitators	161
5.1	Introduction	161
5.2	Theory	163
5.3	Design Considerations	169
	Plate Sizing	169
	Corona	170
	Particulate Resistivity	170
	Internal Configuration	174
	Plates and Wires	178
	Removal of Particle Dust	179
	Power Consumption	181
	Flue Gas Conditioning	182
5.4	Wet ESPs	185
5.5	Costs	186
	▲ Problems 188	References 191
6	Fabric Filters	193
6.1	Introduction	193
6.2	Theory	195
6.3	Design Considerations	200
	Reverse-Air and Shaker Baghouses	201
	Pulse-Jet Baghouses	210
	Other Considerations	218
6.4	Costs	220
	▲ Problems 224	References 228
7	Particulate Scrubbers	231
7.1	Introduction	231
	Spray-Chamber Scrubbers	231
	Cyclone Spray Chambers	233
	Orifice and Wet-Impingement Scrubbers	233
	Venturi and Venturi Jet Scrubbers	235
	Other Designs	235
	Typical Wet Scrubber Applications	236
	Advantages and Disadvantages of Wet Scrubbers	237
7.2	Theory and Design Considerations	239
	Spray Chambers	239
	Venturi Scrubbers	243
	Contacting Power Approach in Wet Scrubber Design	247
7.3	Other Considerations	252
	Elimination of Liquid Entrainment	252
	Humidification of Scrubbed Gases	252
7.4	Costs	257
	▲ Problems 258	References 260

Contents

8 Auxiliary Equipment: Hoods, Ducts, Fans, and Coolers 263

- 8.1 Introduction 263
- 8.2 Hoods 263
- 8.3 Ducts 267
- 8.4 Fans 277
 - Fan Curves 279
 - Fan Laws 279
 - Fan Rating Tables 286
 - Fan Selection 286
- 8.5 Cooling Hot Airstreams 294
 - Air Dilution 294
 - Water Injection 294
 - Heat Exchange 296
- 8.6 Costs 300
 - Hoods 300
 - Ducts 300
 - Fans 302
 - Coolers 308

▲ Problems 310 References 312

9 A Particulate Control Problem 313

- 9.1 Introduction 313
- 9.2 Problem Statement 314
- 9.3 Options for Final Control 315
- 9.4 Major Items of Equipment 316
 - The Cyclone 318
 - The Cooler 319
 - Final Control Device—Alternative 1: Baghouse 320
 - Final Control Device—Alternative 2: ESP 322
 - Ductwork 323
 - Induced Draft Fan 324
 - Stack 326
- 9.5 Summary 326

▲ References 326

10 Properties of Gases and Vapors 327

- 10.1 Introduction 327
- 10.2 Vapor Pressure 328
- 10.3 Diffusivities 331
- 10.4 Gas-Liquid and Gas-Solid Equilibria 332
 - Solubility 332
 - Adsorption 333

10.5	Chemical Reactions	334	
	Kinetics	334	
	Thermodynamics	337	
	▲ Problems 339		References 341
11	VOC Incinerators		343
11.1	Introduction	343	
11.2	Theory	345	
	Oxidation Chemistry	345	
	The Three Ts	349	
	Predicting VOC Kinetics	351	
	Nonisothermal Nature of VOC Oxidation	356	
	Catalytic Oxidation	356	
11.3	Design Considerations	357	
	Thermal Oxidizers	357	
	Catalytic Oxidizers	365	
	Heat Recovery	369	
	Flares	374	
11.4	Costs	375	
	Purchased Equipment Costs	376	
	Heat Exchangers	378	
	▲ Problems 379		References 382
12	Gas Adsorption		385
12.1	Introduction	385	
12.2	Adsorption Theory	387	
	Physical and Chemical Adsorption	387	
	Adsorption Isotherms	387	
	Adsorption Potential	390	
	Experimental Determination of Isotherms	390	
12.3	Physical Properties of Adsorbents	392	
	Activated Carbon	392	
	Other Adsorbents	394	
12.4	Fixed-Bed Adsorption Systems	394	
	Breakthrough Curves and Their Relationship to System Design	394	
	Pressure Drop Across Fixed Beds	396	
	Adsorbent Regeneration	399	
	Safety Considerations	401	
12.5	Design of Fixed-Bed Carbon Adsorption Systems	401	

Contents

- 12.6 Economics of Fixed-Bed Adsorption Systems 407
 - Capital Costs Estimates 407
 - Adsorber Operating Costs 408
- 12.7 Fluidized-Bed Adsorbers 411
- ▲ Problems 413 References 415**

13 Gas Absorption 417

- 13.1 Introduction 417
 - Gas Absorption Equipment 418
- 13.2 Absorption Tower Design 418
 - Mass Transfer Theory 418
 - Mass Transfer in Packed Towers 423
 - Absorption and Chemical Reaction 431
 - Flooding, Pressure Drop, and Allowable Gas and Liquid Rates in Packed Towers 432
 - Design Simplification for Lean Gas Applications 440
- 13.3 Estimating the Cost of Absorption Towers 446
 - Absorption Tower Operating Costs 447
- 13.4 Stripping Operations 449
- ▲ Problems 449 References 453**

14 Biological Control of VOCs and Odors 455

- 14.1 Introduction 455
- 14.2 Theory and Descriptive Information 458
- 14.3 Key Considerations in the Design and Operation of Biofilters 468
 - Design 468
 - Operating Considerations 472
 - Case Study 477
 - Cost Estimation 480
- ▲ Problems 482 References 483**

15 Control of Sulfur Oxides 485

- 15.1 Introduction 485
- 15.2 Overview of Control Strategies 486
 - Fuel Desulfurization 487
 - SO₂ Removal Techniques 489
 - Throwaway Processes 490
 - Regenerative Processes 495
- 15.3 Limestone Scrubbing 500
 - Process Chemistry and Operational Factors 501
 - SO₂ Mass Transfer 502
 - Physical Factors 504
 - Material and Energy Balances 506

15.4 Mercury Control	516	
15.5 Costs	517	
▲ Problems 519		References 520
16 Control of Nitrogen Oxides		523
16.1 Introduction	523	
16.2 Chemistry of NO _x Formation	526	
Thermal NO _x	526	
Fuel NO _x	534	
16.3 NO _x Control: Stationary Sources	535	
Combustion Modifications	537	
Flue Gas Treatment Techniques	543	
16.4 Costs	551	
▲ Problems 554		References 555
17 A Vapor Control Problem		561
17.1 Introduction	561	
17.2 Problem Statement	561	
17.3 Selecting a Design Flow Rate	568	
17.4 Carbon Adsorption System	570	
17.5 Thermal Incineration System	570	
17.6 Catalytic Incineration System	571	
17.7 Biofilter System	571	
17.8 Summary	572	
18 Mobile Sources: An Overview		573
18.1 Introduction	573	
18.2 Magnitude of the Problem	575	
Non-Road Sources	580	
18.3 Characteristics of Engines in Mobile Sources	582	
18.4 Vehicle Emissions and Emission Controls	589	
18.5 Other Measures for Control of Air Pollution from Vehicles	604	
▲ Problems 609		References 612
19 Air Pollution and Meteorology		613
19.1 Introduction	613	
19.2 General Atmospheric Circulation Patterns	614	

Contents

- 19.3 Local Circulation Effects 619
 - The Land-Sea Breeze 619
 - Mountain-Valley Winds 620
 - Wind Roses and Low-Level Pollutant Dispersion Patterns 620
- 19.4 Atmospheric Stability and Vertical Mixing 620
 - The Hydrostatic Equation 622
 - Adiabatic Heating and Cooling during Vertical Air Movement 623
 - The Effect of Lapse Rate on Vertical Stability 625
 - Temperature Inversions 626
- 19.5 Photochemistry and Smog 631
 - Causes of Photochemical Smog 631
 - Anatomy of a Smog Episode 636
 - The Chemistry of Photochemical Smog 637
 - The Nitrogen Dioxide Photolytic Cycle 638
 - The Effects of Smog 642
 - The Control of Photochemical Smog 643
- 19.6 Meteorology and Air Pollution 644
 - Air Pollution Surveys 644
 - Selection of Plant Sites 645
 - Specification of Emission Rates 645
 - Stack Design 645

▲ Problems 646 References 648

20 Atmospheric Dispersion Modeling 651

- 20.1 Introduction 651
- 20.2 A Physical Explanation of Dispersion 653
- 20.3 The Gaussian Model 655
 - Atmospheric Stability Classes 659
 - The Dependence of Concentration on Averaging Time 665
 - Estimating the Maximum Downwind Ground-Level Concentration 666
 - Estimating the Downwind Concentration under an Elevated Inversion 669
- 20.4 Tall Stacks and Plume Rise 671
 - Design Procedures 672
 - Plume Rise 673
 - Critical Wind Speed 679
 - Other Stack Design Considerations 680
 - Stack Costs 682
- 20.5 Computer Programs for Dispersion Modeling (Point Sources) 684
- 20.6 Mobile Sources and Line Source Models 685

▲ Problems 690 References 693

21	Indoor Air Quality and Control	695
21.1	Introduction	695
21.2	Some Pollutants of Concern	697
	VOCs (including Formaldehyde)	698
	Inorganic Gases—Combustion Products	700
	Respirable Particles (including Tobacco Smoke)	701
	Radon	701
	Biological Contaminants (including Molds, Mildews, and Allergens)	702
21.3	Source Control and Ventilation	703
	Source Control	704
	Ventilation	704
	Air Cleaning	705
21.4	Material Balance Models for Indoor Air Quality	706
21.5	Practical Solutions to IAQ Problems	713
21.6	Case Studies	716
	Case 1: A Water Damaged Hotel	716
	Case 2: Another Case of Water Damage	717
	▲ Problems 718	References 720
22	Control of Carbon Dioxide	721
22.1	Introduction	721
22.2	Magnitude of the CO ₂ Problem	728
22.3	CO ₂ Prevention	733
	Conservation	735
	Alternative Fuels	735
	Efficiency Improvements	736
	Supercritical PC Power Plants	737
	Integrated Gasification Combined Cycle (IGCC) Plants	738
	Oxy-fuel Combustion	741
22.4	CO ₂ Capture	742
	Wet Scrubbing of CO ₂	742
	Biogenic Capture	746
	Other Methods for Capturing CO ₂	751
22.5	Transportation and Sequestration of CO ₂	751
	Ship Transport	753
	Pipeline Transport	754
	Sequestration in Geological Formations	755
	Ocean Sequestration	756
2.6	Summary	757
	▲ Problems 758	References 760

Contents

Appendixes	765
Appendix A: Conversion Factors	766
Appendix B: Properties of Air and Other Materials	769
Appendix C: Some Properties of a Gaussian Distribution	786
Appendix D: Computer Programs	790
Appendix E: Practice Problems (with solutions) in Air Quality for the P.E. Examination in Environmental Engineering	797
Appendix F: Answers to Odd-Numbered Problems	813
Index	819
