1. History of Biotechnology, Genetics and Selective Breeding in Aquaculture and Fisheries	1
2. Phenotypic Variation and Environmental Effects	8
3. Basic Genetics, Qualitative Traits and Selection for Qualitative Traits	23
4. Strain Evaluation, Domestication and Strain Selection	33
5. Population Size, Inbreeding, Random Genetic Drift and Maintenance of Genetic Quality	37
6. Gynogenesis, Androgenesis, Cloned Populations and Nuclear Transplantation	47
7. Intraspecific Crossbreeding	58
8. Interspecific Hybridization	65
9. Selection and Correlated Responses to Selection	73
10. Polyploidy and Xenogenesis	93
11. Sex Reversal and Breeding	128
12. Biochemical and Molecular Markers	150
13. Population Genetics and Interactions of Hatchery and Wild Fish	170
14. Genomics, Gene Mapping, Quantitative Trait Locus Mapping and Marker-assisted Selection	190
15. Gene Expression	215

<b>16. Gene-transfer Technology</b>	<b>240</b>
<b>17. Combining Genetic Enhancement Programmes</b>	<b>278</b>
<b>18. Genotype–Environment Interactions</b>	<b>283</b>
<b>19. Commercial Application of Fish Biotechnology</b>	<b>288</b>
<b>20. Environmental Risk of Aquatic Organisms from Genetic Biotechnology</b>	<b>293</b>
<b>21. Food Safety of Transgenic Aquatic Organisms</b>	<b>311</b>
<b>22. A Case Example: Safety of Consumption of Transgenic Salmon Potentially Containing Elevated Levels of Growth Hormone and Insulin-like Growth Factor</b>	<b>315</b>
<b>23. Government Regulation of Transgenic Fish and Biotechnology Products</b>	<b>329</b>
<b>24. Strategies for Genetic Conservation, Gene Banking and Maintaining Genetic Quality</b>	<b>339</b>
<b>25. Ethics</b>	<b>341</b>
<b>26. Constraints and Limitations of Genetic Biotechnology</b>	<b>344</b>
<b>Glossary</b>	<b>347</b>
