List of Figures	xiii
Notation	xvii
1 Vectors, Matrices and Transforms	1
1.1 Vector Spaces	1
1.2 Points and Vectors	4
1.2.1 Homogeneous Coordinates	4
1.3 Representing Objects by Points	5
1.4 Affine Transformations	5
1.4.1 Introduction and Definitions	5
1.4.2 Scaling	6
1.4.3 Translation	7
1.4.4 Rotation	7
1.4.5 Concatenation of Transforms	10
1.4.6 Projection	11
1.5 Quaternions	13
1.6 C# Implementation	15
2 Lighting	23
2.1 Shading	23
2.1.1 Affine Transforms and Normal Vectors	24
2.2 Local Lighting Models	25
2.3 The Phong Lighting Model	25
2.3.1 Emissive Properties	26
2.3.2 Ambient Reflection	26
2.3.3 Diffuse Reflection	26
2.3.4 Specular Reflection	27
2.3.5 Multiple Colored Light Sources	28
2.3.6 Attenuation	29

2.4	Lights	30
2.4.1	Spot Lights	30
2.5	Transparent Objects	31
2.6	Cook-Torrance Model	31
2.6.1	Bidirectional Reflectivity	31
2.6.2	Cook-Torrance Model	32
2.6.3	Microfacet Distribution Term	33
2.6.4	Geometric Surface Occlusion Term	33
2.6.5	Fresnel Term	37
2.6.6	Beer-Lambert Law	38
2.7	C# Implementation	39
3	Rasterization	49
3.1	Pixels	49
3.2	Drawing Lines	49
3.2.1	Bresenham's Algorithm for Lines	50
3.3	Drawing Circles	51
3.3.1	Bresenham's Algorithm for Circles	51
3.4	Filling	53
3.4.1	Gouraud Shading	54
3.5	Rasterization in C#	55
3.5.1	Drawing Pixels	57
3.6	Bresenham's Algorithms in C#	57
3.7	Fractals	59
3.7.1	Mandelbrot Set	60
3.7.2	Julia Set	62
3.8	Iterated Function Systems	64
3.9	L-Systems and Fractals	65
3.10	Kronecker Product and Fractals	69
3.10.1	Definitions	69
3.10.2	Kronecker Product Fractals	71
4	Curves	75
4.1	Introduction	75
4.2	Affine Invariance	76
4.3	Convex Hull	77
4.4	Lagrange Interpolation	78
4.4.1	C# Implementation	79
4.5	Bézier Curves	83
4.5.1	Affine Invariance	83
4.5.2	Convex Hull	84
4.5.3	Derivative at Edges	84

4.5.4	Piecewise Continuous Bézier Curves	86
4.5.5	Rendering	87
4.5.6	Rational Bézier Curves	91
4.5.7	Bézier Curves: Conic Sections	91
4.5.8	C# Implementation	91
4.6	Catmull-Rom Splines	92
4.7	Bessel-Overhauser Splines	93
4.8	Tension-Continuity-Bias Splines	93
4.9	Uniform B-Splines	94
4.9.1	Affine Invariance	98
4.9.2	Convex Hull	98
4.9.3	Cox-de Boor Formula	98
4.9.4	C# Implementation	99
4.10	Non-Uniform B-Splines	99
4.11	Interpolating with B-Splines	100
4.11.1	Periodic Interpolation	102
4.12	Non-Uniform Rational B-Splines	104
4.13	Trigonometric Interpolation	104
4.14	METAPOST and Bézier Curves	108
4.14.1	METAPOST Example	110
4.15	Curvature and Torsion	112
4.16	Harmonic Interpolation	117
4.17	Interpolation	118
4.18	Odd Case	120
4.19	Even Case	122
4.20	Examples	125
4.21	Curvature Plots	132
4.22	Numerical Stability	136
4.23	Affine Invariance	138
4.24	Convex Hull Property	141
4.25	C# Implementation of Harmonic Interpolation	141
4.26	Chebyshev Polynomials	142
4.26.1	Odd Case	143
4.26.2	Even Case	144
4.27	Non-Uniform Harmonic Interpolation	144

5	Wavelets	153
5.1	Introduction	153
5.2	One-Dimensional Wavelets	154
5.3	Two-Dimensional Wavelets	158
5.4	Curves	162
5.5	C# Implementation	164

6	Surfaces	167
6.1	Parametric Surfaces	167
6.2	Tensor Product Surfaces	168
6.3	Bézier Surfaces	169
6.3.1	Tensor Product Bézier Surfaces	170
6.3.2	Triangular Bézier Surfaces	171
6.3.3	Rational Bézier Surfaces	173
6.3.4	Bézier Surface Interpolation	173
6.4	B-Spline Tensor Product Surfaces	173
6.4.1	B-Spline Surface Interpolation	174
6.5	Subdivision Surfaces	177
6.5.1	Loop Subdivision	180
6.5.2	Modified Butterfly Subdivision	183
6.5.3	$\sqrt{3}$ Subdivision	185
6.5.4	Interpolating $\sqrt{3}$ Subdivision	187
6.5.5	Catmull-Clark Subdivision	191
6.5.6	Doo-Sabin Subdivision	192
6.5.7	Comparison	195
6.5.8	Interpolation with Subdivision Surfaces	198
6.6	Curvature of Surfaces	200
6.7	Harmonic Surfaces	206
6.8	Tensor Product Surface	206
6.9	Harmonic Subdivision	207
6.10	Local Harmonic Subdivision	208
6.10.1	Local Harmonic Interpolation for Curves	209
6.10.2	Parametric Distance	210
6.10.3	Subdivision Rules	212
6.10.4	Irregular Vertices	214
6.10.5	Boundaries	217
6.11	Geometry Images and Parameterization	219
6.11.1	Cutting a Mesh into a Disk	219
6.11.2	Parameterization	222
6.11.3	Rasterization of the Geometry Image	228
6.12	Interpolation of Geometry Images	229
6.13	Geometry Images — Approximation	237
6.14	Rendering	238
6.15	Approximating Basis Functions	240
6.16	Combined Results	243
6.17	Curvature	245
6.18	C# Implementation	257

7	Raytracing	333
7.1	Raytracing Process	333
7.2	Representation of a Ray	338
7.3	Reflection	338
7.4	Refraction	339
7.5	Intersections	341
7.5.1	Sphere	342
7.5.2	Infinite Plane	342
7.5.3	Triangles	343
7.5.4	Effect of Transforms	344
7.6	C# Implementation of a Raytracer	344
7.7	Implicit Surfaces	368
7.7.1	Sphere Tracing	369
7.7.2	Distance Functions	371
7.7.3	C# Implementation	374
7.8	CSG Objects	376
7.8.1	C# Implementation	377
7.9	Parametric Surfaces	379
7.9.1	Interval Arithmetic	380
7.9.2	Interval Root Finding — Bisection	381
7.9.3	Interval Root Finding — Newton-Raphson	382
7.9.4	Ray Tracing Harmonic Surfaces	385
7.10	Lighting Models	386
7.11	Supersampling	386
7.11.1	Regular Supersampling	387
7.11.2	Stochastic Supersampling	387
7.11.3	Adaptive Supersampling	388
7.12	Ambient Occlusion	389
7.13	Ray Marching	392
7.14	Photon Mapping	393
7.14.1	Transport Notation	394
7.14.2	Path Tracing	394
7.14.3	Creating the Photon Map	395
7.14.4	Photon Tracing	396
7.14.5	Photon Map Data Structure	397
7.14.6	Radiance Estimate	399
7.14.7	C# Implementation	401
8	Radiosity	409
8.1	Light Transport Notation	409
8.2	Radiosity Matrix	410
8.3	Solving for Radiosity Values	411

8.3.1	Solving: Jacobi Method	411
8.3.2	Solving: Gauss-Seidel Iteration	411
8.3.3	Solving: Shooting Method	412
8.4	Form Factors	412
8.4.1	Numerical Solution	413
8.4.2	Raytracing Method	413
8.4.3	Hemicube Method	413
8.5	Rendering	415
8.6	C# Implementation	415
9	Animation	427
9.1	Traditional Animation Techniques	427
9.1.1	Keyframing	427
9.1.2	Motion Capture	428
9.2	Physics Models	428
9.3	Animation of Position	429
9.3.1	Arc length parameterization	430
9.3.2	Orientation	430
9.4	Articulated Structures (Kinematics)	431
9.4.1	Forward Kinematics	432
9.4.2	Vertex Blending	433
9.4.3	Inverse Kinematics	433
9.5	Mass Spring Systems	434
9.6	Particle Systems	435
9.7	Free Form Deformations	435
9.8	Fluids	436
9.8.1	Navier-Stokes Equations	438
9.8.2	Advection	439
9.8.3	Diffusion	440
9.8.4	Projection	440
9.8.5	Boundary Conditions	441
9.8.6	C# Implementation	441
9.8.7	Free Surface	449
9.8.8	C# Implementation of Free Surfaces	450
	Bibliography	459
	Index	471
