FOREWORD	xvii
ACKNOWLEDGMENTS	xix
INTRODUCTION	xxiii

PART I Introduction

1 BPM: Background	3
BPM in a Nutshell	6
Why BPM?	8
Business Process Types	17
Capturing a Business Process	19
Business Process Architecture and Frameworks	23
The BPM Life Cycle	28
The BPMS and BPM Ecosystem	29
Succeeding in BPM Initiatives	32
Summary	37
2 Standards in BPM	39
The Need for Standards in BPM	40
The Evolution of BPM Standards	43
Graphical Notations	44
Execution	47
Interchange	49
Summary	50

3 BPM Suite 11g: An Overview	51
Building a Modern Process-based Business Application	53
Design of BPM Suite 11g: Goals and Guiding Principles	56
BPM Suite 11g: Product Architecture and Functionality Overview	61
Modeling and Simulation Tools	62
Process Analytics and Business Activity Monitoring	72
Collaboration Components: Process Spaces	74
Infrastructure Tools and Features	77
Operations, Administration, and Systems Monitoring/Management	83
BPM Suite Interplay with Related Technologies	85
Summary	88

PART II

Mastering Oracle BPM 11g

4 The Quick Learner's Guide to Oracle BPM 11g	91
BPM Projects	92
The BPM Project Navigator	94
Business Catalog	94
Deploying a BPM Project	95
BPMN 2.0 for Quick Learners	95
Process Simulation	98
Process Data	100
Expressions	104
Process Start and End	106
A Process's Service Interface	107
Human Task for Quick Learners	110
Human Tasks and BPMN	112
Advanced Task Routing	113
Roles and Users	114
Process Owner and Other Special Roles	116
Forms (User Interfaces) for Human Tasks	120
Business Rules for Quick Learners	121
Rule Actions	122
Rule Dictionary, Rulesets, and Other Concepts	123
Working with Business Rules	124
Decision Tables	126

Service Tasks	130
Oracle Business Process Composer	133
Project Sharing via MDS	134
Roles and Access	135
Working with Process Composer	136
A Quick Tour of BPM WorkSpace	143
Process Monitoring and Analytics	145
Business Indicators and Measurements	146
Oracle Business Activity Monitoring	148
Business Intelligence and BPM	157
Summary	158
5 Business Process Modeling and Implementation	
Using BPMN 2.0	159
Recommended Flow and Practices	160
The Flow of Process Modeling	160
Process Readability	161
Data Considerations	163
BPMN Basics	165
Token Flow	165
Activities	166
Gateways	169
Subprocesses	175
(Inline or Embedded) Subprocesses	176
Reusable Subprocesses	182
Events and Exceptions	186
Events Classification	186
Events Behavior Details	189
Event-based Gateways	194
Exception Handling	195
Conversations	199
Messages	200
Signals	205
Workflow Patterns	207
Basic Control Flow Patterns	208
Advanced Branching and Synchronization Patterns	209
Multiple Instance Patterns	213
State-based Patterns	216

Cancellation and Force Completion Patterns	218
Iteration Patterns	220
Termination Patterns	220
Trigger Patterns	221
Other Process Patterns	221
Ack-and-Continue	222
Query Operations	222
Initializing Process Start Form	223
Conditional Interrupt	224
Variable Frequency Recurring Timers	225
Dynamically Added Subcases	226
Merge Independent Instances	228
Summary	230
6 Mastering Business Rules	231
Introduction to Business Rules	232
Why Use Business Rules	232
When to Use Business Rules	234
Where All Business Rules Can Be Used	235
Business Rules Scenarios	237
Recommended Flow and Practices	237
Rule Organization	239
Rule Dictionary	240
Ruleset	240
Dictionary Links	241
The Rule Data Model	242
XML Facts	242
Java Facts	242
RL Facts	245
ADF-BC Facts	245
Refining Imported Facts	246
Updating Imported Facts	248
Rule Functions	248
Strategies for Business Rules Results	253
Using Decision Tables	253
Using Global for Holding Results	254
Using Wrapper Fact to Associate Input and Result	255

Testing Business Rules	257
Testing Rules in BPM Studio	257
Testing Using Fusion Middleware Control	259
Understanding Business Rules Engines	263
The Rete Algorithm	264
The Oracle Business Rules Engine	266
Business Rules	270
Simple and Advanced Mode	270
Rule Patterns	272
Rule Priority	275
Effective Dates	276
Tree Mode—Parent—Child References	277
Aggregate	278
If-Then-Else	280
Decision Tables	282
Business Rules Interfaces	286
Decision Functions	287
Business Rules Java APIs	289
Business Rules Editors	290
Rule Language	292
Summary	294
7 Advanced Human Tasks	295
Task Metadata	296
Task Stakeholders	296
Users and Roles	299
Notifications and Deadlines	302
Data	308
Assignment and Routing	314
Modeled Routing	314
Modeling Routing in Task vs. in BPMN	315
Routing Overrides	324
Runtime Reassignment and Rerouting	330
Activity Guide	341
Summary	344

8 Developing Rich User Interfaces for BPM with ADF	345
Overview of Oracle ADF	346
ADF Faces Rich Client Framework (View)	347
ADF Task Flows (ADF Controller)	348
ADF Data Control and Bindings (Model)	348
ADF Business Components (Business Services)	349
Some Basics	349
Expression Language	349
Managed Beans	350
BPM Task Forms	351
Task Form Generation	351
BPM Data Control	352
Process Initiation Alternative	356
Tips and Recommendations	357
Working with ADF Page Editor	357
Debugging and Running in Integrated Server	358
Form Reuse	359
Parallel Development of the BPM Process and Task Form ...	360
Deployment	361
Forms for E-mail	362
Task Forms in Non-ADF Technology	363
The ADF Model Layer—Data Controls and Bindings	363
Data Control	363
Bindings	367
ADF Faces	374
Layout Components	374
Data Forms	385
Input Components	387
Select Components	392
Collection Components	396
Data Visualization Components	413
Page Templates	414
Drag and Drop	415
ADF Life Cycle	420
Partial Page Refreshes (AJAX)	421
ADF and JSF Life Cycle	423

ADF Task Flows	427
Bounded Task Flows	428
Task Flow Trains	431
ADF Business Components	432
Entity Objects	433
View Objects	437
Application Modules	439
BPM and ADF-BC	441
For More Information	442

PART III

Essentials of Oracle BPM Methodology

9 Planning BPM Adoption	445
Introduction	446
The Oracle Approach to BPM Adoption	448
Frameworks and Methods	450
Roadmap Creation	456
The Oracle BPM Maturity Model	458
The Roadmap Creation Process	464
Summary	490
10 Strategic Analysis, Process Selection, and Design	491
The Business Process Life Cycle	494
Business Process Discovery (BPD)	496
Business Process Identification and Selection	497
Strategic Approach to Process Identification	499
Functional Models	499
Business Strategy Modeling	504
Business Analysis	515
Porter Value Chains	516
Process Groups	519
Core Processes	521
A Tactical Approach to Process Identification	523
Business Process Selection	523
Process Candidates Evaluation Criteria	524

Business Process Design	530
Process Definition and Refinement	531
Process Definition	533
Refinement	553
Summary	557
11 Technical Design and Project Delivery Strategies	559
The Motivation for Adopting a BPM Methodology	560
Introduction to the Business Process Engineering Life Cycle	562
An Outline of Life-Cycle Activities	562
Incremental and Iterative	567
Related Software Engineering Activities	567
Business Process Engineering Roles and Responsibilities	571
Business Participants	571
IT Participants	575
Contributors and Advisors	576
Participant Responsibilities	578
Business Process Engineering Life-Cycle Detail	581
Technical Analysis and Design	582
Composition	596
Testing and Deployment	600
Integration Testing	608
Deployment Planning	609
Approval	611
Commissioning	612
Business Process Monitoring	614
Business Process Engineering Concerns	619
Mapping to IID Methodologies	621
Summary	627
Index.....	629
