

CONTENTS

Preface	<i>xv</i>
Acknowledgments	<i>xviii</i>

CHAPTER ONE. THE REGULATORY FRAMEWORK **1**

Learning Objectives	<i>1</i>
The International Civil Aviation Organization (ICAO)	<i>2</i>
Overview	<i>2</i>
Background	<i>3</i>
Chronology of Key ICAO Developments	<i>3</i>
The Federal Aviation Administration (FAA)	<i>6</i>
Overview	<i>6</i>
Background	<i>6</i>
Chronology of Major FAA Regulations	<i>7</i>
The Environmental Protection Agency (EPA)	<i>16</i>
Overview	<i>16</i>
Background	<i>16</i>
Chronology of Major Environmental Laws Affecting Aviation Operations	<i>17</i>
Occupational Safety and Health Administration (OSHA)	<i>22</i>
Overview	<i>22</i>
Background	<i>23</i>
Chronology of Major OSHA Standards Affecting Aviation Operations	<i>24</i>
Key Terms	<i>26</i>
Review Questions	<i>28</i>
References	<i>28</i>
Web References	<i>29</i>

CHAPTER TWO. REGULATORY ORGANIZATION AND RULEMAKING **31**

Learning Objectives	<i>31</i>
ICAO Organization and Rulemaking	<i>32</i>
ICAO Organization	<i>32</i>
ICAO Rulemaking	<i>35</i>

FAA Organization and Rulemaking	39
FAA Organization	39
Headquarters Offices	39
FAA Rulemaking	47
OSHA Organization Structure and Rulemaking	50
OSHA Organization	50
OSHA Rulemaking	54
EPA Organization Structure and Rulemaking	55
EPA Organization	56
EPA Rulemaking	58
Key Terms	58
Review Questions	59
References	60
Web References	60

CHAPTER THREE. THE NATIONAL TRANSPORTATION SAFETY BOARD

61

Learning Objectives	61
International Accident Investigation	62
Overview	62
ICAO's Role	62
Regional and National Authorities	63
Recent International Investigation	63
National Transportation Safety Board	63
NTSB Organization	66
Accident Investigation Process	69
Party Process	69
The Go-Team	70
Accident Site	71
Laboratory	72
Accident Report Preparation	73
Public Hearing	73
Final Accident Report	74
Safety Recommendations	75
Investigating a General-Aviation Accident	76
Family Assistance and the Transportation Disaster Assistance Office	76
FAA Responsibilities During an Investigation	76
NTSB Accident Databases	77
NTSB Most Wanted Aviation Safety Improvements	78
NTSB Seven Most Wanted List Items (June 2011)	79
Key Terms	80
Review Questions	81
References	82
Web References	82

CHAPTER FOUR. RECORDING AND REPORTING OF SAFETY DATA

83

Learning Objectives	84
Accidents	84
Incidents	86
Establishing a Culture of Safety Reporting	87
Incident Reporting Systems	89
Mandatory Incident Reporting Systems	90
Voluntary Incident Reporting Systems	90
Aviation Recording and Reporting Systems	90
Federal Aviation Administration Reporting Systems	91
The Aviation Safety Information Analysis and Sharing System (ASIAS) (www.asias.faa.gov)	91
Industry Voluntary Safety Reporting Initiatives	92
NTSB Accident/Incident Reporting System	95
Department of Transportation Reporting System	95
National Aeronautics and Space Administration Reporting System	96
Automatic Recording Systems	98
ICAO International Reporting Systems	99
General Industry (OSHA) Recording and Reporting Systems	101
Applicability	101
OSHA Form 300—Log of Work-Related Injuries and Illnesses	102
OSHA Form 301—Injury and Illness Incident Report	102
OSHA Form 300A—Summary of Work-Related Injuries and Illnesses	102
Open Government Initiative (Transparency in Government)	102
Environmental (EPA) Recording and Reporting	103
CERCLA Reporting Requirements	103
EPCRA Reporting Requirements	104
RCRA Subtitle I (Underground Storage Tanks)	105
Other Reporting Requirements	106
Control of Air Pollution from Aircraft and Aircraft Engines	106
Key Terms	106
Review Questions	107
References	108
Web References	108

CHAPTER FIVE. REVIEW OF SAFETY STATISTICS

109

Learning Objectives	109
Introduction	109
Aviation Accident Statistics	112
Manufacturers' Involvement with Safety Data	112
Boeing's Accident Statistical Summary	114

United States and International Accident Statistics	119
Looking Forward—2011 and Beyond	134
Occupational Accident Statistics—Department of Labor, Bureau of Labor Statistics (BLS) (www.bls.gov/iif/)	135
Key Terms	137
Review Questions	137
References	138
Web References	138

CHAPTER SIX. ACCIDENT CAUSATION MODELS 139

Learning Objectives	139
Introduction	140
Reason's "Swiss Cheese" Model	141
The SHELL Model	144
The 5-M Model	146
Modern Commercial Avionics Equipment	146
Man	148
Machine	149
Medium	151
Mission	151
Management	151
Conclusion	152
Key Terms	153
Review Questions	154
References	154

CHAPTER SEVEN. HUMAN FACTORS IN AVIATION SAFETY 155

Learning Objectives	155
Introduction	156
Human Factors	157
Human Performance	158
The Human Factors Analysis and Classification System (HFACS) (www.hfacs.com)	161
Management of Human Error	165
Crew Resource Management (CRM)	165
Line Operations Safety Audit (LOSA)	166
Threat and Error Management (TEM)	166
Control Strategies to Manage Threats and Errors	167
Airbus and Boeing Design Strategies	167
Cockpit Standardization	168
Cockpit Automation and Precision Navigation	169
Communication Issues	171

Professionalism in Aviation	172
Sterile Cockpit Rule (FAR 121.542)	173
Conclusion	173
Key Terms	174
Review Questions	175
References	176

CHAPTER EIGHT. AIR TRAFFIC SAFETY SYSTEMS 177

Learning Objectives	177
Introduction	178
Major Milestones of ATC History	178
Basic Components of the ATC System	179
Airspace Classification	179
Air Traffic Control Services	179
Area Navigation (RNAV) Equipment	182
GPS Enhancements	182
Advantages of Satellite-Based Navigation	184
Weather Automation Systems	185
Operational Planning Improvements	187
Automated Flight Service Stations (AFSSs)	187
Airport Surface Detection Equipment, Model X (ASDE-X)	188
Departures and Arrivals	188
En Route and Oceanic Operations	188
The Next Generation Air Transportation System (NextGen) (www.faa.gov/)	189
NextGen Transformational Programs	191
NextGen Implementation Challenges	192
Key Terms	193
Review Questions	194
References	195

CHAPTER NINE. AIRCRAFT SAFETY SYSTEMS 197

Learning Objectives	198
Introduction	198
Jet Engine Development	200
Recent Developments in Jet Engine Design	201
Long-Range Commercial Jet Transport Era	202
High-Lift Systems	203
Stopping Systems	204
Flying Qualities	206
Structural Integrity	208
Cabin Safety	214
Safety Design for Atmospheric Conditions	215
Turbulence	215

Wind Shear	216
Volcanic Ash	217
Ice and Precipitation	218
Flight Deck Human–Machine Interface	220
Early Cockpit Development	220
Flight Deck—757/767 and B-747-400	221
New Cockpit Enhancements	222
Crew Alerting Systems	224
Aircraft Communications Addressing and Reporting System	226
Flight Management System	227
Multiple Flight Control Computers	227
Central Maintenance Computer System	228
Flight Procedures—Takeoff, Approach, and Landing	228
Takeoff	228
Approach and Landing	229
Modeling, Design, and Testing Tools	230
Computational Fluid Dynamics (CFD)	230
Wind Tunnel	232
Flight Simulation	232
Structural Tests	233
Flight Test	233
Accident/Incident Investigation	234
Future Aircraft Technologies	235
Weather Detection	235
Communication and Navigation Systems	236
Displays	237
Head-Up Displays (HUDs)	238
Electronic Flight Bags (EFBs)	238
Next Generation Flight Operations	239
Key Terms	239
Review Questions	240
References	241
Web References	242

CHAPTER TEN. AIRPORT SAFETY

243

Learning Objectives	243
Introduction	244
Airport Certification	244
Airport Certification Classes	245
Airport Certification Manual	246
Airport Inspection and Compliance with FAR Part 139	248
Operational Safety	249
Airport Terminal Buildings	249
Hangars and Maintenance Shops	251

Ramp Operations	253
Specialized Services	254
Runway Incursions	261
Background	261
Definitions	261
Airport Surface Environment	262
Control Strategies and Future Initiatives	264
Conclusions	266
Key Terms	266
Review Questions	267
References	268
Web References	268

CHAPTER ELEVEN. AVIATION SECURITY **269**

Learning Objectives	269
Introduction	270
Review of Attacks on Civil Aviation	271
The Regulatory Movement	273
International Response to Terrorism	273
Evolution of Aviation Security in the United States	275
The 9/11 Commission (www.9-11commission.gov)	282
Transportation Security Administration	284
Role of Intelligence	286
National Counterterrorism Center	286
Department of Homeland Security (www.dhs.gov)	289
Review of Security Technologies	289
Imaging Technologies	290
Explosive Trace Detection Technology	291
Explosive Detection Systems (EDSs)	292
Metal Detectors	293
Biometrics and Future Checkpoint Systems	294
Strengthening Aircraft and Baggage Containers	295
Cockpit Door Reinforcement	296
Conclusions	296
Key Terms	297
Review Questions	298
References	299
Web References	299

CHAPTER TWELVE. AIRLINE SAFETY **301**

Learning Objectives	302
Introduction	302
International Development of Airline SMS	304

The ICAO SMS Framework of Safety Components and Program Elements—The Four Pillars	304
Safety Policy and Objectives	305
Safety Risk Management	307
Safety Assurance	308
Safety Promotion	309
Development of Airline SMS in the United States	311
Status of FAA SMS Rulemaking	311
Accident Investigation and Auditing	313
Accident Investigation	313
Auditing—A Tool of Safety Assurance	315
Communications	317
Safety, Maintenance, and Flight Communication	317
FAA, NTSB, and Flightcrew Communication	318
Safety Trend Evaluation, Analysis and Data Exchange System (STEADES)	318
Communication Media	319
Training	319
Role of ALPA in Airline Safety	320
ALPA Safety Structure	321
Accident Investigation	322
ALPA Safety Management Systems Policy	322
Flight Safety Foundation	323
SMS Infrastructure at a Major U.S. Airline	324
The Phased SMS Implementation Process	324
Key Terms	330
Review Questions	330
References	331
Web References	331

CHAPTER THIRTEEN. AVIATION SAFETY MANAGEMENT SYSTEMS

333

Learning Objectives	333
Introduction	334
The Evolution of SMS Principles	334
The Fundamental Components of SMS—The Four Pillars	335
Safety Risk Management Explained	336
Hazard or Risk	336
Control Strategies	338
Safety Assurance Explained	340
Performance Monitoring and Measurement	341
Management of Change—New Hazards to Consider	341

Continuous Improvement—Getting Better Through the SMS Process	341
The Future of SMS in Aviation	342
Key Terms	342
Review Questions	342
References	343
Index	345
