	Introduction	xvii
Part I	<u>Introduction to SharePoint 2010 Development</u>	
Chapter 1	The Microsoft SharePoint 2010 Platform	3
	SharePoint Architecture	4
	User Features	5
	Office Integration	5
	Office Web Applications	6
	SharePoint Workspace	6
	Standards Compliant Web Interface	6
	Summary	7
Chapter 2	Developing with SharePoint 2010	9
	Visual Studio 2010 and SharePoint Designer 2010	10
	TypeMock Isolator	10
	Red Gate .NET Reflector	10
	U2U CAML Query Builder	10
	Sysinternals DebugView	11
	Development Server Configuration	11
	Additional Development Environment Configuration	12
	Debugging and Unit Testing SharePoint Applications	12
	SharePoint Fundamentals	14
	Creating a Web Application	14
	Creating a Site Collection	15
	Creating a Site	15
	Server Object Model	17
	Administration and Configuration Classes	20
	Site Provisioning and Content Access Classes	21
	Saving Changes Using the Server Object Model	25
	Best Practice Guidelines	25
	Error Handling	27
	Developer Toolbar	28
	Sandboxed Solutions	29
	Debugging Sandboxed Solutions	30
	Managing Sandboxed Solutions	30
	Summary	30

Part II Presentation Layer

Chapter 3	Presentation Layer Overview.....	33
	Page Types	33
	Application Pages	33
	Site Pages	34
	Ghosting/Unghosting.....	35
	Executing Server-Side Code	35
	Mobile Pages	40
	Ribbon	40
	Ribbon Architecture	40
	Extending the Ribbon	42
	Handling Events from the Ribbon	46
	Disabling Controls	47
	Complex Event Handling	47
	Summary	52
Chapter 4	Client Object Model	53
	Architecture	53
	Demonstration Environment Setup	55
	Host Silverlight in SharePoint.....	55
	Using the Silverlight Web Part.....	59
	Referencing the JavaScript Client Object Model.....	60
	Available Client-side Objects.....	61
	ClientContext.....	61
	Operation Batching	64
	Retrieving Data	65
	In-place Load	65
	Queryable Load	71
	Adding Data	71
	Updating Data	72
	Deleting Data	74
	Using the Status Bar, Notifications, and the Dialog Framework	75
	The Status Bar	75
	Notifications	76
	Dialogs.....	76
	Summary	77
Chapter 5	InfoPath Forms Services	79
	InfoPath Overview	79
	InfoPath Forms Services	79
	BrowserForm Web Part	81
	Using InfoPath Forms in SharePoint	86
	Accessing Data in InfoPath Forms	96
	Data Connection Libraries	99
	Modifying UDC Files	99
	Responding to Events in InfoPath Forms	101
	Using the Rules Engine	101
	Adding Code-Behind.....	103
	Summary	105
Chapter 6	Enterprise Content Management.....	107
	Managed Metadata	107
	Configuring the Managed Metadata Service	108

	Managed Metadata Field	109
	Metadata Navigation	111
	Content Organizer	112
	Large Libraries	114
	Document Management	114
	Content Management Users	114
	Multi-user Editing	115
	Item-Level Permissions	115
	Workflows	115
	Document Sets	116
	Document IDs	118
	Document Metadata	120
	Records Management	120
	Digital Asset Management	120
	Media Content Types	120
	Rich Media Content	121
	Disk-based Caching	121
	Remote BLOB Storage	122
	Web Content Management	122
	Page Model	122
	Publishing	124
	Content Deployment	130
	Web Parts and Fields	131
	Content Query Web Part	131
	Summary	131
Chapter 7	User Interface Customization	133
	Working with Pages	133
	Master Pages	133
	Creating a Custom Master Page	134
	Delegate Controls	136
	Cascading Style Sheets	137
	Themes	137
	Adding Custom Functionality	140
	Web Parts	140
	Improving the Property Editing Experience: Editor Parts	144
	Visual Web Parts	145
	Summary	149
Part III	Application Services	
Chapter 8	Application Services Overview	153
	Handling Events	153
	Event Hosts	154
	Event Receivers	154
	Receiver Base Classes	154
	Synchronous and Asynchronous Events	155
	Security Context	156
	Event Properties	157
	Packaging and Deployment Events	158
	Creating Event Receivers	159
	Enabling or Disabling Event Firing	163

	Binding Events	165
	E-mail Events	167
	Summary	167
Chapter 9	Service Application Framework.....	169
	Implementation.....	169
	Server-side Implementation.....	169
	Client-side Implementation.....	171
	Client/Server Communication	173
	Configuring Service Applications.....	173
	Connecting to Remote Applications.....	174
	Topology Service	175
	Demonstration Scenario	175
	Prerequisite: Generating a New AppId.....	175
	Creating a New SharePoint Project.....	176
	Adding Server-side Configuration Classes	176
	Adding Client-side Configuration Classes	179
	Adding Windows Communication Foundation Components.....	181
	Implementing Translation Functionality	183
	Installing Service Application Components.....	185
	Provisioning Service Application Instances	187
	Using Service Application in Front-end Components.....	196
	Managing Service Applications.....	199
	Summary	202
Chapter 10	Word Automation Services	203
	Word Automation Services	203
	Creating Conversion Jobs	204
	Checking Status of Conversion Jobs	205
	OpenXML	206
	Getting Started with OpenXML	206
	Demonstration Scenario	207
	Architecture	207
	Creating a Custom Content Type	208
	Customizing the DocumentSetProperties Web Part	210
	Creating a Custom Job Definition.....	214
	Combine Documents Using OpenXML.....	215
	Converting an OpenXML Document to an Alternative Format.....	217
	Customizing Document Set Welcome Page	219
	Create a Document Library.....	220
	Create a Document Template	220
	Summary	222
Chapter 11	Workflow	223
	Workflow Foundation Fundamentals.....	223
	Types of Workflow	224
	Making Workflows Work	225
	Custom Workflow Activities.....	226
	External Activities via Pluggable Workflow Services	227
	Creating Workflows	227
	Demonstration Scenario	228
	Prerequisites	229

Designing a Workflow Using Visio 2010	231
Using the Microsoft SharePoint Workflow Template.	232
Implementing a Visio Workflow Using SharePoint Designer	233
Using Visio Services to Visualize Workflow State	238
Creating a Pluggable Workflow Service	240
Creating a Sample WCF Calculation Service	241
Creating a Pluggable Workflow Service	250
Calling a SharePoint-Hosted WCF Service	256
Creating a Workflow Using Visual Studio 2010	257
Using the Visual Studio Workflow Designer.	258
Creating a Workflow Using SharePoint Designer	262
Summary	264
Chapter 12 Excel Services	265
Excel Capabilities on SharePoint 2010.	266
Excel Application Services.	266
Excel Client Service	266
Excel Web App	269
PowerPivot	270
Configuring Excel Services	270
Service Application Settings	271
Demonstration Scenario	273
Set Up Adventure Works Sample Database	273
Create a Sample Site	273
Create a Workbook for Use with Excel Services.	274
Configure a Data Connection	276
Configure a PivotTable to Act like an External Data List	276
Using Named Ranges in Excel Services	277
Perform Calculations Using PivotTable Values	278
Add a PivotChart	280
Publish to Excel Services	281
Create a User Interface Using the Excel Web Access Web Part	281
Adding Interactivity Using a Slicer	282
Using the Excel Services REST API	285
Excel Services REST API Syntax	285
Retrieving a PivotTable Using REST	286
Using REST-Generated Content Within a Web Part Page	287
User-Defined Functions.	288
Attributes Used when Creating UDFs	288
Usable Data Types Within UDFs	289
Creating a UDF Using Visual Studio 2010	289
Configuring UDFs for Development.	292
Using UDFs Within Excel	293
Debugging UDFs	294
Configuring UDFs for Production	295
Using the JavaScript Object Model.	297
A Whirlwind Tour of Excel JSOM	297
Adding a Content Editor Web Part Containing JavaScript	298
Creating JSOM Content in an External File.	299
Using Data Connection Libraries.	300
Restricting Data Connection Types.	301

Adding Connections to Data Connection Libraries	302
Connecting to Data Using Alternative Credentials	304
Configuring the Secure Store Service.....	305
Summary	308

Part IV Data Access Layer

Chapter 13	Data Access Overview	311
	Content Types	311
	Content Type Inheritance	312
	Content Type Metadata	316
	Enterprise Content Types	318
	Columns	321
	Field Types	323
	Validation	330
	Lists and Document Libraries.....	331
	Views	332
	Queries	332
	Performance	333
	List Throttling	334
	Column Indexes.....	335
	Summary	336
Chapter 14	LINQ to SharePoint and SPMetal.....	337
	Overview of LINQ	338
	Locating Data Using an Iterator	339
	Locating Data Using an Anonymous Delegate.....	340
	Locating Data Using a Lambda Expression	340
	Locating Data Using LINQ	341
	LINQ to SharePoint.....	341
	Microsoft.SharePoint.Linq.DataContext	342
	Demonstration Scenario	344
	Create a Data Structure Using SharePoint 2010	346
	Creating Entities Using SPMetal	353
	Adding Data Using LINQ	358
	Add Data Generation Buttons to LinqSampleApplication	358
	Deleting Data Using LINQ	361
	Deleting Sample Data	361
	Ensuring Referential Integrity.....	362
	Querying Data Using LINQ to SharePoint	365
	Query Limitations	366
	Performing a Simple Query.....	367
	Result Shaping Using LINQ	370
	Joining Tables Using LINQ	371
	Combining LINQ to SharePoint and LINQ to Objects	373
	Performing an In-Memory Subquery	373
	Updating Information Using LINQ to SharePoint.....	375
	Disconnecting Entities	375
	Reconnecting Entities	376
	Handling Concurrency Errors when Updating Data.....	378
	Resolving Change Conflicts.....	381
	Summary	385

Chapter 15	Business Connectivity Services	387
	Business Data Catalog in MOSS 2007	387
	Components of BCS	388
	Demonstration Scenario	391
	Prerequisites	392
	Connecting to BCS Data Using SharePoint Designer	392
	Associations	392
	Stereotypes	392
	Create an External Content Type	394
	External Data Picker Control	400
	Building a .NET Connectivity Assembly	404
	Pluggable Connector Framework	405
	Business Data Connectivity Model Project	405
	Using BCS Data in External Data Columns	418
	Profile Pages	419
	Default Actions on External Content Types	420
	Summary	422
Chapter 16	Enterprise Search	423
	Components of Enterprise Search	423
	Architecture	423
	Indexing Components	424
	Query Components	429
	Front-End Components	435
	Summary	442
Chapter 17	User Profiles and Social Data	443
	Folksonomies, Taxonomies, Tagging, and Rating	444
	User Profile Service Application	445
	Synchronization	445
	User Properties	446
	Subtypes	447
	Audiences	448
	Organizations	449
	My Sites	450
	My Profile	452
	My Network	461
	My Content	462
	Summary	462
Chapter 18	Business Intelligence	463
	Microsoft Business Intelligence Solution	464
	Business User Experience	464
	Business Productivity Infrastructure	464
	Data Infrastructure	464
	SharePoint Server 2010 Business Intelligence Platform	465
	Excel Services	465
	Business Intelligence Web Parts	465
	PerformancePoint Services	469
	PowerPivot	480
	Reporting Services	485
	Summary	489

Part V Configuration

Chapter 19	Packaging and Deployment Model	493
	Working with Packages	493
	Package Structure	494
	Package Designer	494
	Deploying Assemblies	496
	Features	496
	Feature Designer	497
	Activation Dependencies	497
	Feature Scope	498
	Feature Activation Rules	498
	Feature Properties	499
	Feature Elements	499
	Feature Receivers	501
	Upgrading Features	508
	Site Definitions	512
	Creating Site Definitions Using Visual Studio	512
	Summary	515
Chapter 20	PowerShell	517
	PowerShell Primer	517
	Using Objects	518
	Using Functions	520
	PowerShell for SharePoint	521
	Connecting to SharePoint Remotely	521
	PowerShell Permissions	522
	Working with Site Collections and Sites	522
	Working with Lists and Libraries	523
	Working with Content	524
	Working with Timer Jobs	524
	Summary	525
	Index	527
