Authors xix

1. The Watershed Approach..... 1

 1.1 Introduction 1

 1.2 Historical Transformation of Urbanized Watersheds by Industrial Development..... 1

 1.3 The Evolution of Industry and the Rouge Watershed 3

 1.4 Major Themes of the Watershed Approach Used in This Book 7

 1.4.1 Theme #1: Near-Surface Geology, Hydrogeology, and Surface Hydrology 7

 1.4.1.1 Geology 8

 1.4.1.2 Hydrogeology 8

 1.4.1.3 Surface Hydrology 9

 1.4.2 Theme #2: Science and Planning—The Movement of Water..... 10

 1.4.3 Theme #3: Industrial Property Abandonment, Contamination, and Risk..... 11

 1.4.4 Theme #4: Remediation of Contaminated Sites..... 13

 1.4.5 Theme #5: Science-Based Landscape Planning..... 14

 1.5 Organization of This Book 15

 References 16

Part I Geology

2. Geology of Urban Watersheds 21

 2.1 Introduction 21

 2.2 Geological Processes Affecting Urban Watersheds 22

 2.2.1 Formation of Sediments and Rocks 23

 2.2.2 Principle of Uniformity..... 26

 2.2.3 Principles of Stratigraphy 26

 2.2.4 Unconformities..... 28

 2.3 Sedimentary Processes: From Removal to Rock Formation..... 29

 2.3.1 Clastic Processes 30

 2.3.1.1 Weathering..... 30

 2.3.1.2 Mass Wasting..... 31

 2.3.1.3 Stream Transport..... 33

 2.3.2 Non-Clastic Chemical Sedimentary Processes 38

 2.3.2.1 Limestone and Dolostone..... 39

 2.3.2.2 Evaporites 39

 2.3.3 Formation of Sediments..... 40

 2.3.4 Rock Formation: Diagenesis..... 41

2.4 Identification and Classification of Sedimentary Deposits..... 41

2.4.1 Identification and Classification Methods..... 42

2.4.1.1 Sorting..... 42

2.4.1.2 Grain Shape..... 43

2.4.1.3 Grain Size 43

2.4.1.4 Composition 43

2.4.1.5 Thickness..... 45

2.4.2 Bedded or Stratified Depositional Features..... 45

2.4.3 Other Depositional Features 47

2.5 Sedimentary Depositional Environments..... 49

2.5.1 Alluvial..... 50

2.5.2 Fluvial..... 50

2.5.3 Lacustrine 53

2.5.4 Eolian 54

2.5.5 Wetlands..... 54

2.5.6 Glacial..... 54

2.5.7 Non-Clastic Chemical Depositional Environments 57

2.6 Disturbance..... 57

2.6.1 Anthropogenic Disturbance..... 57

2.6.2 Naturally Occurring Disturbance 58

2.7 Summary and Conclusion 59

References 60

3. Water and the Hydrogeology of Watersheds 65

3.1 Introduction 65

3.2 Water Basics 66

3.2.1 Basic Water Chemistry 66

3.2.2 Water Cycle 67

3.2.3 Distribution of Water on Earth 67

3.2.4 Potable Water Use 68

3.3 Surface Water in Watersheds..... 71

3.3.1 Watersheds..... 71

3.3.2 Surface Water Drainage Development and Patterns 74

3.4 Groundwater in Watersheds 76

3.5 Fundamental Concepts of Groundwater 78

3.5.1 Aquifer Types and Basic Structure..... 79

3.5.2 Heterogeneity and Homogeneity 80

3.5.3 Hydraulic Conductivity 83

3.5.4 Groundwater Movement..... 84

3.5.5 Primary Porosity..... 86

3.5.6 Secondary Porosity 88

3.5.7 Water Table and Hydraulic Gradient 90

3.5.8 Determining the Direction of Groundwater Flow 90

3.5.9 Estimating the Rate of Groundwater Flow 92

3.5.10 Groundwater Withdrawal 94

3.6 Surface Water–Groundwater Interaction..... 96

3.6.1 Stream Interaction with Groundwater 96

3.6.2 Lake Interaction with Groundwater 98

3.6.3	Wetland Interaction with Groundwater	100
3.6.4	Ocean Water, Groundwater, and Surface Water Interaction.....	100
3.7	Anthropogenic Influences on Surface Water and Groundwater.....	103
3.7.1	Anthropogenic Surface Water Influences.....	103
3.7.1.1	Destruction of Wetlands	104
3.7.1.2	Dam Construction.....	105
3.7.2	Anthropogenic Groundwater Influences	107
3.7.2.1	Saltwater Intrusion.....	107
3.7.2.2	Changes in Groundwater Flow	107
3.7.2.3	Artificial Recharge	109
3.7.2.4	Land Subsidence.....	111
3.8	Summary and Conclusion	112
	References	113
4.	Conducting Subsurface Environmental Investigations in Urban Watersheds.....	117
4.1	Introduction	117
4.2	Types and Description of Subsurface Environmental Investigations, Studies, Plans, or Reports	119
4.2.1	Phase I Environmental Site Assessment	120
4.2.2	Health and Safety	124
4.2.3	Phase II Investigation	127
4.2.4	Geophysical Investigation.....	130
4.2.5	Ecological and Human Health Risk Assessment.....	131
4.2.6	Feasibility Study.....	134
4.2.7	Remedial Investigation	134
4.2.8	Natural Resource Damage Assessment.....	135
4.2.9	Environmental Impact Statement.....	135
4.2.10	Remedial Action Plan.....	136
4.2.11	Completion Evaluation Study	136
4.2.12	Summary of Environmental Investigations.....	137
4.3	Common Environmental Sampling Methods.....	137
4.3.1	Soil Sampling and Description	138
4.3.1.1	Surface Sampling.....	138
4.3.1.2	Excavating Test Pits.....	139
4.3.1.3	Drilling Using a Hand Auger.....	139
4.3.1.4	Mechanical Drilling Methods	139
4.3.1.5	Sample Containers	143
4.3.1.6	Documentation	143
4.3.2	Groundwater Sampling Methods.....	150
4.3.2.1	Installing a Monitoring Well	150
4.3.2.2	Groundwater Sampling.....	154
4.3.3	Sediment Sampling	157
4.3.4	Surface Water Sampling.....	157
4.3.5	Air Sampling	158
4.3.5.1	Indoor Air Sampling.....	158
4.3.5.2	Outdoor Air Sampling.....	160
4.4	Summary and Conclusion	161
	References	162

5. Urban Geologic Mapping	165
5.1 Introduction	165
5.2 Geologic Mapping in an Urban Environment	166
5.2.1 Information and Mapping Challenges	166
5.2.2 Information Sources, Integration, and Evaluating Usability	167
5.2.3 Building the Conceptual Geologic Model	171
5.2.4 Fieldwork	172
5.2.5 Facies Analysis	177
5.2.6 Developing and Constructing Cross Sections	179
5.2.7 Creating the Base Map	181
5.2.8 Final Draft Map Preparation	182
5.2.8.1 Succession of Maps	183
5.2.8.2 Three-Dimensional Maps	185
5.2.8.3 Maps Using GIS	185
5.3 Summary and Conclusion	190
References	193
6. Geologic Vulnerability	195
6.1 Introduction	195
6.2 Subsurface Vulnerability and Vulnerability Map Development	196
6.3 Methods	197
6.4 Map-Building Example	202
6.5 Demonstrating the Significance of Vulnerability Mapping	205
6.5.1 Site 1: Low Vulnerability Site	207
6.5.2 Site 2: High Vulnerability Site	210
6.5.3 Site Comparison Analysis	217
6.6 Summary and Conclusion	219
References	219

Part II Contamination

7. Common Contaminants in Urban Watersheds	225
7.1 Introduction	225
7.2 Contaminant Toxicity	227
7.3 Volatile Organic Compounds	230
7.3.1 Light Nonaqueous Phase Liquids	230
7.3.2 Dense Nonaqueous Phase Liquids	233
7.3.3 Trihalomethanes	235
7.4 Polynuclear Aromatic Hydrocarbons	236
7.5 Polychlorinated Biphenyls	237
7.6 Semivolatile Organic Compounds	240
7.6.1 Phthalates	240
7.6.2 Phenol	242
7.6.3 Amines	243
7.6.4 Esters	243
7.7 Heavy Metals	244
7.8 Other Contaminants	247

7.8.1	Pesticides and Herbicides	247
7.8.2	Dioxins	249
7.8.3	Fertilizers	250
7.8.4	Cyanide.....	250
7.8.5	Asbestos	251
7.8.6	Acids and Bases.....	253
7.8.7	Radioactive Compounds.....	254
7.8.8	Greenhouse Gases	255
7.8.9	Carbon Monoxide	256
7.8.10	Ozone.....	258
7.8.11	Sulfur Dioxide	260
7.8.12	Particulate Matter	260
7.8.13	Bacteria, Parasites, and Viruses	263
7.8.14	Emerging Contaminants.....	264
7.9	Summary and Conclusion	266
	References	266
8.	Contaminant Fate and Transport	273
8.1	Introduction	273
8.2	Contaminant Releases into the Environment	274
8.3	Principles of Contaminant Fate and Transport	276
8.3.1	Basic Contaminant Transport Concepts	276
8.3.2	Basic Contaminant Degradation Concepts	281
8.3.2.1	Biotic Degradation.....	282
8.3.2.2	Abiotic Degradation.....	283
8.3.3	Fate and Transport of Contaminants in Soil.....	284
8.3.4	Fate and Transport of Contaminants in Surface Water	285
8.3.4.1	Contaminant Persistence and Bioaccumulation	287
8.3.5	Fate and Transport of Contaminants in Groundwater.....	288
8.3.5.1	Karst Topography	293
8.3.6	Fate and Transport of Contaminants in the Atmosphere	293
8.4	Fate and Transport of Contaminants	297
8.4.1	VOCs	297
8.4.2	PAHs	301
8.4.3	PCBs	301
8.4.4	SVOCs.....	302
8.4.5	Heavy Metals.....	302
8.4.6	Other Contaminants.....	303
8.4.6.1	Pesticides and Herbicides.....	303
8.4.6.2	Dioxins	304
8.4.6.3	Fertilizers.....	304
8.4.6.4	Cyanide.....	305
8.4.6.5	Asbestos.....	305
8.4.6.6	Acids and Bases	305
8.4.6.7	Radioactive Compounds.....	306
8.4.6.8	Greenhouse Gases.....	306
8.4.6.9	Carbon Monoxide.....	306
8.4.6.10	Ozone	306

8.4.6.11	Sulfur Dioxide.....	307
8.4.6.12	Particulate Matter.....	307
8.4.6.13	Bacteria, Parasites, and Viruses.....	308
8.4.6.14	Emerging Contaminants.....	308
8.5	Summary and Conclusion.....	308
	References.....	309
9.	Metal Contamination in Urban Watersheds.....	315
9.1	Introduction.....	315
9.2	Heavy Metals in Soil.....	315
9.3	Case Study: Metals in Soil, Rouge River Watershed.....	316
9.3.1	Study Objectives, Study Area, and Methods.....	316
9.3.2	Results.....	321
9.4	Case Study: Dissolved Metals in Shallow Groundwater, Rouge River Watershed.....	326
9.4.1	Study Objectives, Study Area, and Methods.....	327
9.4.2	Results.....	329
9.5	Conclusions.....	336
	References.....	337
10.	Contaminant Risk Factors.....	341
10.1	Introduction.....	341
10.2	Surface Risk Factor.....	341
10.3	Groundwater Contaminant Risk Factor.....	346
10.4	Soil Contaminant Risk Factor.....	355
10.5	Air Contaminant Risk Factor.....	363
10.6	Discussion and Implications.....	370
10.7	Summary and Conclusion.....	374
	References.....	374
11.	Remediation: Techniques and Cost.....	377
11.1	Introduction.....	377
11.2	Remediation Overview.....	377
11.3	Common Soil Remediation Technologies.....	379
11.3.1	Soil Excavation.....	379
11.3.2	Active and Passive Bioremediation.....	380
11.3.3	Monitored Natural Attenuation.....	381
11.3.4	Mechanical Soil Aeration.....	381
11.3.5	Capping.....	382
11.3.6	Land Use Restrictions.....	382
11.3.7	Soil Vapor Extraction.....	383
11.3.8	Phytoremediation.....	383
11.3.9	Soil Washing.....	384
11.3.10	In Situ Thermal Treatment.....	384
11.3.11	Ex Situ Thermal Treatment.....	385
11.3.12	Electrokinetics.....	386
11.3.13	Solidification/Stabilization.....	386
11.3.14	Fracturing.....	386

- 11.3.15 Vitrification 386
 - 11.3.16 Chemical Oxidation..... 387
 - 11.3.17 Chemical Dehalogenation 387
- 11.4 Summary of Soil Remediation Technologies..... 388
- 11.5 Common Groundwater Remediation Technologies 390
 - 11.5.1 In Situ Soil Flushing 392
 - 11.5.2 Air Sparging 392
 - 11.5.3 Permeable Reactive Barriers..... 393
 - 11.5.4 Injection of Biological Agents..... 393
 - 11.5.5 Injection of Chemical Agents 393
 - 11.5.6 Monitored Natural Attenuation..... 394
 - 11.5.7 Institutional Controls 394
 - 11.5.8 Multiphase Extraction..... 394
- 11.6 Summary of Groundwater Remediation Technologies..... 394
- 11.7 Sediment Remediation 397
 - 11.7.1 Source Control..... 398
 - 11.7.2 Excavation 398
 - 11.7.3 Dredging 398
 - 11.7.4 Bioremediation 399
 - 11.7.5 Capping..... 399
 - 11.7.6 Natural Attenuation 399
- 11.8 Surface Water Remediation 399
 - 11.8.1 Spills..... 401
- 11.9 Air Remediation..... 403
- 11.10 Cost of Remediation 404
 - 11.10.1 Results 407
- 11.11 Summary and Conclusion 410

Part III Sustainable Development

- 12. Urbanization and the Disruption of Matter and Energy Flows within Watersheds..... 417
 - 12.1 Introduction 417
 - 12.2 Watershed Structure..... 418
 - 12.2.1 The Atmosphere..... 418
 - 12.2.2 The Surface and Subsurface 420
 - 12.2.3 Zonation of Surface Watersheds..... 421
 - 12.3 Watershed Function..... 422
 - 12.4 Urbanization and Watersheds: Disruption of Matter and Energy Flows..... 424
 - 12.4.1 Water Infrastructure and Ecosystems 425
 - 12.4.2 Stormwater..... 428
 - 12.4.2.1 Case Study..... 430
 - 12.4.3 Erosion and Sedimentation 432
 - 12.4.4 The Urban Heat Island 432
 - 12.5 Summary and Conclusion 433
 - References 434

13. Pollution Prevention	437
13.1 Introduction	437
13.2 Pollution Prevention in the United States.....	438
13.3 Implementing Pollution Prevention Techniques: Industrial Point Sources	439
13.3.1 Step 1: Establishing Objectives and Gathering Background Data.....	440
13.3.2 Step 2: Inventory of Hazardous Substances.....	441
13.3.3 Step 3: Assessing CRFs of Substances Present	442
13.3.4 Step 4: Preliminary Assessment of Geologic Vulnerability	442
13.3.5 Step 5: Preventing Pollution through ESPM Methods	443
13.3.5.1 Elimination.....	443
13.3.5.2 Substitution	443
13.3.5.3 Prevention	444
13.3.5.4 Minimization	448
13.3.6 Step 6: Assessing Results	449
13.3.7 Financial Incentives for Industrial Pollution Prevention.....	450
13.4 Implementing Pollution Prevention Techniques for Nonpoint Sources in Urbanized Watersheds	450
13.4.1 Applying the Source Control Framework to Nonpoint Sources.....	451
13.4.1.1 Step 1: Establishing Objectives and Gathering Background Data.....	451
13.4.1.2 Step 2: Inventory of Hazardous Substances	453
13.4.1.3 Step 3: Assessing CRFs of Substances Present.....	454
13.4.1.4 Step 4: Preliminary Assessment of Geologic Vulnerability	454
13.4.1.5 Step 5: Preventing Pollution through ESPM Methods.....	455
13.4.1.6 Step 6: Assessing Results	459
13.5 Summary and Conclusion	459
References	460
 14. Case Studies: Successful and Unsuccessful Redevelopment of Contaminated Sites	 463
14.1 Introduction	463
14.2 Case Study 1: Michigan.....	463
14.3 Case Study 2: Illinois	470
14.4 Case Study 3: Indiana.....	473
14.5 Case Study 4: Wisconsin	477
14.6 Case Study 5: California.....	481
14.7 Case Study 6: New Jersey.....	485
14.8 Summary and Conclusion	488
References	490
 15. Science-Based Landscape Planning in Urban Watersheds.....	 491
15.1 Introduction	491
15.2 The Science–Policy Gap.....	492
15.2.1 Land Development at the Community Level	493
15.2.2 Narrowing the Science–Policy Gap.....	494
15.3 Science-Based Landscape Planning	496
15.3.1 How Landscapes Form and Change.....	497
15.3.2 The Special Role of Water in Landscape Change.....	497
15.3.3 The Dimensions of Landscape.....	498

15.3.4	Site and Situation	498
15.3.5	On-Site Interactions and Thresholds	499
15.3.5.1	Interaction 1: Soil Type with Soil Water	500
15.3.5.2	Interaction 2: Soil Type with Vegetation	500
15.4	Watershed Management	501
15.5	Summary and Conclusion	503
